## OAKLAND AND ALAMEDA COUNTY

RESIDENCE.—1 story and base, frame, \$2,500, Oakland, Cal. Architect, none. Owner Paul E. Woodburn 3965 Greenwood avenue, Oakland. The dwelling will be erected on West Park Boulevard and has been designed for a six room house with bath and sleeping porch. Interior finish will be of pine with some hardwood veneer. Hard-

wood floors will be used in the living room, dining room and reception hall. There will be a large open fire place in the living room with brick or tile mantel. Tile wainscot and floor will be used in the bath room. An automatic water heater has been specified. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner, who will do the work by Day Labor.

**RESIDENCE**.—2 story and base, frame, \$3,500, Oakland, Cal. Architect, none. Owner, E. L. Higgins, 3250 Miles avenue, Oakland. The dwelling will be erected on the east side of Thomas street north of Napa and has been designed for a seven room house with bath and sleeping porch. Interior finish will be open pine. White enamel will be used in the bedrooms. Hardwood floor will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile and brick. Bath room will have tile floor and wainscot. Plans provide for an automatic water heater. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner, who will do the work by Day Labor. Materials are now being purchased.

**RESIDENCE**.—1½ story and base, frame, \$4,500, Berkeley, Alameda Co. Cal. Architect, H. H. Gutterson, Foxcroft Bldg., S. F. Owner, J. A. Cross. The dwelling has been designed for a seven room house with bath and sleeping porch, and will be erected in Northbrae. Interior finish will be of pine, hardwood and white enamel. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat, open fire places and an automatic water heater. Mantels will be of brick. Bath room will have tile floor and wainscot. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken by the architect.

**RESIDENCE**.—2 story and base, frame, \$3,500, Oakland, Cal. Architect, none. Owner, C. E. Carlson, 1512 Broadway, Oakland. The dwelling will be erected on the east side of Thomas street north of Napa and has been designed for a seven room house with bath and sleeping porch. Interior trim will be of pine southern gum and white enamel. Hardwood floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of tile. Tile wainscot and floors will be used in the bath room. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**RESIDENCES**.—3 1 story and base, frame, \$3,000 each, Oakland, Cal. Architect, none. Owner, C. M. MacGregor, 470 13th street Oakland. These dwellings will be erected at the corner of Woodruff and East 38th street and each has been designed to contain 5 rooms and bath. Interior finish will be of pine, redwood and elm. Hardwood floors will be used in the living and dining rooms. Each living room

will have a large open fire place, and tile or brick mantel. Imitation tile wainscot will be used in the bath rooms. Automatic water heaters will be installed. Exterior will be covered with rustle and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**RESIDENCE**.—2 story and 2 base, frame, \$8,000, Berkeley, Alameda Co. Cal. Architect, H. H. Gutterson Foxcroft Bldg., S. F. Owner, Dr. E. H. Frenzel The dwelling has been designed to contain ten rooms, two baths, sleeping porch and basement garage, and will be erected in Hawthorne Terrace. Interior finish will be of pine, hardwood and white enamel. Hardwood floors will be used in the living room, dining room, library and reception hall. There will be furnace heat and open fire places. Mantels will be of brick. Bath rooms will have tile floors and wainscot. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

**RESIDENCE**.—2 story and base, frame, \$3,500, Oakland, Cal. Architects Mau & Sprague, MacDonough Bldg., Oakland. Owner, Charles Mau, Jr. The dwelling will be erected on Grand avenue near Sunnyside and has been designed for a six room house with bath and sleeping porch. Interior will be finished in pine and hardwood veneer with white enamel in the bed rooms. Hardwood floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of tile and brick. Bath room will have tile floor and wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are now being prepared.

**RESIDENCE**.—1 story and base, frame, \$1,500, Oakland, Cal. Architect, C. W. McCall, Central Bank Bldg., Oakland. Owner's name withheld. The dwelling will be erected in Fourth Avenue Terrace and has been designed for an eight room house with two baths and sleeping porch. Interior finish will be of pine and hardwood with white enamel in the bed rooms. Hardwood floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of tile and brick. Bath rooms will have tile floors and wainscot. An automatic water heater will be installed. Exterior will be covered with cement plaster on metal lath. Plans are now being prepared.

**RESIDENCE**.—2 story and base, frame, \$6,500, Oakland, Cal. Architect, C. W. McCall, Central Bank Bldg., Oakland. Owner's name withheld. The dwelling will be erected in Crocker Highlands and has been designed for an eight room house with two baths, sleeping porches and a separate garage. Interior will be finished in pine, hardwood and white enamel. Hardwood floors will be used in the living room, dining room, library and reception hall. Plans provide for furnace heat and open fire places. Mantels

will be of tile and brick. Bath rooms will be finished to tile and equipped with high class fixtures including showers. A hot water circulating system will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

**RESIDENCE**.—2 story and base, frame, \$4,500, Architect, none. Owner, E. W. Button, 347 63rd street, Oakland. The dwelling will be erected on Hillmeas avenue south of 62nd street and has been designed to contain seven rooms, bath and sleeping porch. Interior will be finished in pine and southern gum. White enamel will be used in the bed rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile. Bath room will have tile floor and wainscot. An automatic water heater will be installed. Plans are complete and in the hands of the owner, who will do the work by Day Labor.

**TIMBER TREESTLE**.—Cost not stated, Oakland, Cal. Engineer, County Surveyor, Oakland. Owners Alameda County. Plans and specifications have been completed and approved and bids will be opened on August 30th by the Board of Supervisors for constructing a timber trestle and the necessary grading for the waterway and for footings, on the main county road from Alvarado to Centerville or County Road No. 511 all in Washington Road District, Washington Township. Plans and specifications can be secured from the Clerk of the Board of Supervisors.

**APARTMENT HOUSE**.—4 story and base, brick and steel, \$50,000, Oakland, Cal. Architects, Richardson & Burrell, Albany Bldg., Oakland. Owner's name withheld. The building will be erected on Grand avenue, covering an area of 88 by 78 feet and will contain a total of twenty-six suites of three, four and six rooms. Interiors will be finished in pine, hardwood and white enamel. Hardwood floors will be used in the principal rooms. Plans provide for steam heat, an automatic elevator, hot water system, vacuum cleaning and oil burning plant. All bath rooms will have tile floors and wainscot. Wall beds are specified. Marble wainscot will be used in the entrances. Exterior of the building will be faced with pressed brick trimmed with terra cotta. Plans are being prepared.

**APARTMENT HOUSE**.—3 story and base, frame, \$12,000, Oakland, Cal. Architect, Merrill Newson, 1718 Broadway, Oakland. Owner, William Kerrigan. To building will be erected at the corner of 10th and Webster street and has been designed to contain six suites of three and four rooms with private bath and wall beds. Interior finish will be of pine and hardwood. Some oak floors will be used. Bath rooms will be finished in tile and a hot water system and steam heat are specified. Exterior of the building will be covered with cement plaster on metal lath. Plans are now being prepared.

**RESIDENCE**.—1 story and base, frame, \$2,000, Oakland, Cal. Architect, none. Owner H. A. Pfeiffer, 554 Fruitvale avenue, Oakland. The dwelling has been designed for a six room house and will be erected on the north side

of Kansas street west of Laurel. Interior will be finished in pine with some elm panels. Hardwood floors will be used in the living and dining rooms. There will be a large open fire place and tile mantel. Tile wainscot will be used in the bath room. An automatic water heater will be installed. Exterior of the dwelling will be covered with rustic and cement plaster. Plans are complete and in the hands of the owner, who will do the work by Day Labor.

## SAN JOSE AND THE SANTA CLARA VALLEY

RESIDENCES.—2 1 story and base,  
frame, \$2,500. Burlingame, San Mateo  
Co., Cal. Architects, Fabre and Bear-  
ward, Merchants National Bank Bldg.,  
S. F. Owner's name withheld. These  
dwellings will each contain five rooms  
and bath. Interior finish will be of  
plum with some elm panels. Hardwood  
floors will be used in the two principal  
rooms. Each living room will have a  
large open fire place and tile or brick  
mantel. Imitation tile and wainscot  
will be used in the bath rooms. Auto-  
matic water heaters will be installed.  
Exterior will be covered with rustic  
and shingles. Plans are now being pre-  
pared.

RESIDENCE.—2 story and base,  
frame, \$15,000. San Mateo, San Mateo

Co., Cal. Architect Sylvain Schnait-  
tacher, 233 Post street, S. F. Owner,  
Edward Livingston. The dwelling will  
be erected on El Cerrito and has been  
designed to contain twelve rooms, three  
baths and sleeping porches. A separate  
garage will also be erected on the  
property. Interior of the dwelling will  
be finished in pine, hardwood and white  
enamel. Hardwood floors will be used  
in the principal rooms. Plans provide  
for furnace heat and open air places.  
Mantels will be of tile and brick. Bath  
rooms will have tile floors and wainscot  
and will be equipped with showers. A  
hot water circulating system will be  
installed. Exterior will be covered with  
cement plaster on metal lath. Plans  
are complete and figures are being tak-  
en.

BY-PASS.—Reinforced concrete. Cost  
not stated. San Jose, Santa Clara Co.,  
Cal. Engineer, county surveyor, San  
Jose. Owners, Santa Clara County.  
The County Supervisors have approved  
plans and specifications for the im-  
provement of the Canoas by-pass, and  
will receive bids on the work until  
September 7th, at 11 a. m. Plans and  
specifications together with full in-  
formation may be had from the county  
surveyor, at San Jose.

BRIDGES AND PROTECTION WORK.  
—\$75,000 and \$15,000. Salinas, Mon-  
terey Co., Cal. Engineer, County Sur-  
veyor, Salinas, Owners, Monterey  
County. At the next meeting of the  
Supervisors the County Engineer will  
present plans and specifications for  
the new steel highway bridge and  
protection work near King City. The  
Highway Commission has already ap-  
proved the plans for the bridge which  
will be the longest and most expensive  
in the county of Monterey. If con-  
structed in accordance with the pre-  
sent plans, the structure will cost \$75,-  
000, and will be 2,800 feet in length.  
The protection work will cost in the  
neighborhood of \$15,000. Further par-  
ticulars will be given when the plans  
have been approved by the County  
Supervisors.

CHILDREN'S HOME.—1 story and  
base, Class A construction. Cost not  
stated. Woodside, San Mateo Co., Cal.  
Architect, Houghton Sawyer, Shreve  
Bldg., S. F. Owners, Drexler Hall.  
building has been designed for a home  
for crippled children and will have  
complete steel frame. Interior finish  
hardwood and pine with tile and hard  
wood floors. Steam heat, vacuum  
cleaning, hot water system are speci-  
fied. Exterior faced with cement plas-  
ter. Plans are being prepared.

## FRESNO, MODESTO STANISLAUS AND CENTRAL CALIFORNIA

**RAILROAD CONSTRUCTION.**—Cost not stated. Ceres, Stanislaus Co., Cal. Engineers name not given. Owners, Ceres Street Railroad Co. Application for a franchise to erect maintain and operate, by means of electricity or other motive power except steam, a single track railroad, with all necessary turnouts, switches, stations, apparatus and appliances, over and along the route lying and being in the town of Ceres, in the County of Stanislaus, as follows: "Commencing at a point at the north line of the limits of the said town of Ceres, at the intersection of Railroad ave. with said north line of said limits of the said town of Ceres, thence over, along and upon said Railroad avenue to the southerly limits of the said town of Ceres." "That said Board of Supervisors intends to grant said franchise, right, privilege and permission and notice of the time and place of the receipt of bids therefor, and in the terms and conditions thereof."

**RAILROAD CONSTRUCTION.**—Cost not stated. Patterson, Stanislaus Co., Cal. Engineer's name not given. Owners, Mr. Hoffman and Honolulu capitalists. According to word sent from Honolulu by Mr. Hoffman, Editor of the Patterson Irrigator, work on proposed railroad from Patterson up Del Norte Canyon to the magnesite and manganese mines near Red Mountain will be started shortly. Although no names of those backing the movement are mentioned it is known that business men of Honolulu are making preparations to have the road constructed.

**IRRIGATION WORK.** — \$1,000,000. Terra Belle, Tulare Co., Cal. Engineer, chief engineer Terra Belle Irrigation Project, Terra Belle. Owner, Terra Belle Irrigation District. Bonds in the amount of \$1,000,000 have been voted by the residents of the Terra Belle Irrigation district which assures the speedy construction of a large irrigation project. A new irrigation district is to be laid out and construction work costing nearly \$1,000,000 will be undertaken.

**BRIDGES.**—Reinforced concrete, steel and timber. Cost not stated. Modesto, Stanislaus Co., Cal. Engineer, E. H. Annear, Modesto. Owners, Stanislaus county. The plans and specifications prepared by County Surveyor E. H. Annear for a concrete bridge over the drainage canal on the McHenry road, for a bridge over the M. I. D. main canal on the Sonoma lateral at Star, 103 x 50 C. H. C., for a concrete bridge over the M. I. D. main canal on the Sonoma lateral at Star 369x86 C. H. C.; for a bridge over the Ceres Moine canal on the Hugheson road, for a bridge over lateral No. 1 on the McHenry road at the northern limits of the city of Modesto; for a bridge over lateral No. 3 on the McHenry road near Snedigar's house; for a bridge over lateral No. 6 on the McHenry road near Bang's house; and for a bridge over lateral No. 3 on the Claus road, were adopted by the county Supervisors at their last meeting and the clerk was instructed to advertise for bids to be received on

September 11th, 10 a. m. Plans and full information may be had from the County Engineer at Modesto.

**RESIDENCE.**—1 story and base, frame, \$2,000. Fresno, Fresno Co., Cal. Architect, none. Owner, W. H. Ackerman, Fresno. The dwelling will be erected in the Alta Vista Tract and has been designed for a six room house with bath and sleeping porch. Interior will be finished in pine with elm panels. Some oak floors will be used. There will be an open fire place and tile or brick mantle. Bath room will have imitation tile wainscot. Exterior of the house will be covered with rustic and shingles. Plans are complete and in the hands of the owner, who will do the work by Day Labor.

**SEWER EXTENSION.**—Cost not stated. Turlock, Stanislaus Co., Cal. Engineer, City Engineer, Turlock. Owners, City of Turlock. Plans have been completed and approved for the construction of a sewer extension system. Bids are being taken and will be opened on September 7th. Plans can be secured from the office of the City Clerk.

### SACRAMENTO, STOCKTON AND NORTHERN CALIFORNIA.

BRIDGES.—16, steel, reinforced concrete and timber, \$22,000. Oroville, Butte Co., Cal. Engineer, County Surveyor, Oroville. Owners, Butte County. The Board of Supervisors has ordered the construction of 16 bridges in Butte County, the total cost to be about \$22,000. Bids will be opened on September 1st. Ten of the bridges will be on the State Highway, between Nelson and Butte Creek. Eight of the ten bridges will range from 20 to 120 feet in length the total cost to be \$12,000, and one bid will cover the work on all of the eight. Of the remaining two, one will be 100 feet in length across the North Channel of Butte Creek, and the other 40 feet in length, will be built across Burham Slough. The two structures will cost \$1,500. Of the remaining six structures five will be small bridges in different road districts, the total cost to be \$2,500. The other will be a large structure to cost \$3,000, across Pine Creek near the Sana Road. Plans and complete information can be secured from the County Surveyor.

STREET LIGHTS AND SYSTEM.—Cost not stated. Colusa, Colusa Co., Cal. Engineer City Engineer, Colusa Owners, City of Colusa. Plans and specifications have been adopted and the Supervisors have directed the clerk to advertise for bids for installing, cutting for, and maintaining lights in the Alhucle Lighting District of Colusa County. Bids on this work close September 8th 12 m. Further information may be had from the County Clerk.

RESIDENCE.—2 story and base, frame, cost not stated. Stockton, San Joaquin County, Cal. Architect, F. Holberg Reimers, 2125 Shattuck avenue,

Lockley. Owner, D. F. Goodman. The dwelling will be erected in Tuxedo Park and has been designed to contain seven rooms, two baths, and sleeping porches. Interior will be finished in pine and hardwood with white enamel in the doctor's office and in the bed rooms. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of brick. Bath rooms will have tile floors and wainscot. Automatic water heaters will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor under the supervision of Mr. McVillie of Stockton.

RESIDENCE.—2 story and base, frame, \$6,000. Lodi San Joaquin Co., Cal. Architect, Ralph P. Morrell Odd Fellows Bldg., Stockton. Owner, Dr. J. E. Nelson. The dwelling has been designed for a ten room house with baths and sleeping porches. Interior will be finished in pine and hardwood with some white enamel. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile. The wainscot will be used in the bath rooms. Automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are now being prepared.

RESIDENCE.—1 story and base, frame, \$3,000. Ukiah, Mendocino Co., Cal. Architect, C. W. McCall, Central Bank Bldg., Oakland. Owner's name withheld. The dwelling has been designed for a six room house with bath and sleeping porch. Interior finish will be of pine and redwood. Some hardwood floors will be used. Plans provide for furnace heat and open fire place. Mantel will be of brick. Bath room will have tile floor. An automatic water heater is specified. Exterior of the house will be covered with shakes. Plans are now being prepared.

BRIDGE.—Steel and concrete. Cost not stated. Crescent City, Del Norte Co., Cal. Engineer, County Surveyor H. Malpas, Crescent City. Owners, Del Norte County. Plans have been completed and figures will be opened on September 13th by the Board of Supervisors for the construction of a Pratt Combination type bridge of 120 foot span, 14 foot clear roadway, and a 30 foot approach, and all grading necessary to reach approaches. Bents and piers to be of driven piling. Plans and specifications together with complete information may be had by addressing the county surveyor at Crescent City.

BRIDGE.—Reinforced concrete. Cost not stated. Stockton, San Joaquin Co., Cal. Engineers, Givan & Pearce, Sacramento. Owners, San Joaquin county. Plans have been prepared by Engineers Givan & Pearce of Sacramento, for reinforced concrete bridge over Mormon channel at San Joaquin street. The structure will be 200 feet long and will be built in six 33 1-3 foot spans.

TRESTLE.—Timber and steel, \$31,000. Sacramento, Cal. Engineer, Co. Surveyor, Sacramento County. Owners, Sacramento County. The Board of Supervisors of Sacramento County

has entered into an agreement with the Natomas Consolidated whereby a trestle will be constructed from the 12th street bridge to Reclamation District No. 1000. The county will pay one-half of the \$17,000 and the Natomas Consolidated will pay the other half.

BUNGALOW.—1 story and base, frame, \$2,500. Stockton, San Joaquin Co., Cal. Architect, Joseph Losekann, San Joaquin Bldg., Stockton. Owner, Charles De Young, 336 East Anderson street. The dwelling has been designed for six rooms with bath and sleeping porch. Interior will be finished in pine and redwood with some elm panels and white enamel. Hardwood floors will be used in the living room, dining room and reception hall. There will be an open fire place and tile mantel. Tile wainscot will be used in the bath room. An automatic water heater will be installed. Exterior of the house will be covered with rustic. Plans are complete and figures are being taken.

BUNGALOW.—1½ story and base, frame, \$3,500. Stockton, San Joaquin Co., Cal. Architect, Franklyn Warner, San Joaquin Bldg., Stockton. Owner, Harry McIsaacs, 331 South East st. The dwelling will be erected on Magnolia and has been designed to contain six rooms and bath with a large sleeping porch. Interior will be finished in pine and hardwood and with some white enamel. Hardwood floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of brick. Tile wainscot will be used in the bath room. An automatic water heater will be installed. Exterior of the dwelling will be covered with rustic and cement plaster. Plans are now being prepared.

BUNGALOW.—2 story and base, frame, \$2,500. Stockton, San Joaquin Co., Cal. Architect, Franklyn Warner, San Joaquin Bldg. Stockton. Owner, J. Edward Maaden. The dwelling will be erected in Yosemite Terrace and has been designed for six rooms with bath and sleeping porch. Interior finish will be of pine and white enamel. Hardwood floors will be used in the living and dining rooms. An open fire place and tile or brick mantel will be used in the living room. Plans provide for an automatic water heater. Tile wainscot will be used in the bathroom. Exterior of the house will be covered with rustic. Plans are complete and a contract will be awarded shortly.

STREET GRADING AND FURNISHING PAVK.—Cost not stated. Eureka, Humboldt Co., Cal. Engineer, City Engineer, Eureka. Owners, City of Eureka. The City Council has approved plans and specifications for the grading of Fairfield street and a resolution ordering the work done and advertising for bids was ordered. Specifications for street rock were also adopted and bids were ordered called to be opened on September 7th.

STREET PAVING AND CURBS.—Cost not stated. Woodland, Yolo Co., Cal. Engineer, City Engineer Woodland. Owners, City of Woodland. Plans and specifications have been completed by the City Engineer for

...ive paving improvements to be made in this city. The plans which have been prepared and approved by the Board of Public Works provide for the paving of the street between the width of east and west Main street, and the laying of 14 ft. strip curbs and the construction of concrete curbs and gutters along the same thoroughfares. It is proposed that the new paving will have a hydraulic concrete foundation 5 inches in thickness and an asphaltic wearing surface one inch thick. Bids will be called for this kind of work. It is estimated that the cost will not exceed 12½ cents per square foot. All the work will be done in pursuance of an act of the Legislature of the State of California passed as the Improvement Act of 1911, approved April 7th, 1911. A resolution of intention will be passed by the Board of Public Works at their next meeting and bids will be called.

**STREET PAVING.**—\$30,000. Stockton, San Joaquin Co., Cal. Engineer, Engineer, Stockton. Owners, City of Stockton. At the last meeting of the city council plans for paving Market street from Fairbanks to Filbert street were adopted and bids will be called shortly. At the same meeting a contract was awarded to the General Construction Co., Stockton, for paving East street from Poplar to 14th street. The contract price is \$18,47.

**COURT HOUSE REPAIRS.**—Cost not determined. Crescent City, Del Norte Co., Cal. Architect, none. Owners, Del Norte County. Plans have been completed and figures are being taken for bids to front entrance of County Court House. Bids will be opened on September 13th.

**HOSPITAL.**—1 and 2 story frame, cost not stated. Crescent City, Del Norte Co., Cal. Architects, Ackerman, Reese, Eureka. Owners, Del Norte County. Plans complete and bids will be opened on September 13th. Central heating system, vacuum cleaning and water system specified. Interior shed in pine. Exterior covered with cement plaster.

**SCHOOL.**—1 story and base, concrete and brick. \$25,000. Architects, none & Wright, San Joaquin Valley Bldg., Stockton. Owners, City of Stockton. Bids are now being taken for a seven room school to be erected on Lincoln and Jefferson streets. Interior finish pine with maple floors in classrooms. Steam heat, oil burning furnace. Exterior faced with pressed brick. Plans from architect.

**RECLAMATION WORK.**—Cost not stated. San Luis Obispo, San Luis Obispo Co., Cal. Engineer, County Surveyor, San Luis Obispo. Owners, San Luis Obispo county. At a recent meeting of the Supervisors plans and specifications for the reclamation work on the north bank of the Santa Maria river above Santa Barbara county bridge on the Nipomo and Santa Maria road, were received. The River Current Control Co. of San Francisco submitted plans that were accepted, and which will, it is believed stop the encroaching of the waters on the San Luis Obispo side of the stream. Bids are now being taken, and will close on September 8th. Further information with plans may be had from the County Engineer at San Luis Obispo, Cal.

**BRIDGE.**—Reinforced Concrete, cost not stated. San Luis Obispo, San Luis Obispo Co., Cal. Engineer, county surveyor, San Luis Obispo. Owner, San Luis Obispo County. At the last meeting of the Supervisors plans and specifications for the construction of the bridge across the Salinas river on the San Miguel and Vineyard Canyon road were presented, but failed to be adopted, as the Board decided the time was inopportune and action could be taken at some future date.

**BRIDGE.**—Reinforced concrete. Cost not stated. San Luis Obispo, San Luis

Obispo Co., Cal. Engineer, county surveyor, San Luis Obispo. Owners, San Luis Obispo county. At the last meeting of the County Supervisors plans and specifications for the Paso Robles creek bridge on the state highway near Templeton were accepted and ordered that bids be called for to be opened on the 8th of September.

**BRIDGE.**—Steel and timber. Cost not stated. Ventura, Ventura Co., Cal. Engineer, County Surveyor, Ventura. Owners, Ventura County. The Supervisors have instructed the County Surveyor to prepare plans and specifications for the construction of a wood and steel bridge across the Ventura river at Foster Park, giving entrance to the Park and to the Casitas and Santa Ana sections. On completion of plans bids will be called.

**RESIDENCE.**—2 story and base, frame, cost not stated. Los Angeles, Cal. Architect, J. C. Austin, Baker-Detwiller Bldg., L. A. Owner, R. D. Collins. The dwelling will be erected on a fifteen acre tract on Washington street near the city limits. There will be ten rooms, three baths, sleeping porch and a separate garage. Interior will be finished in hardwood and white enamel. Hardwood floors will be used in the living rooms, dining room and reception hall. Plans provide for furnace heat, a hot water circulating system and vacuum cleaning. Bath rooms will be finished in tile. Exterior of the dwelling will be covered with cement plaster on metal lath. A clay tile roof will be

used. Plans are complete and figures are being taken.

**RESIDENCE.**—2 story and base, hollow tile, \$20,000. Architect, A. Martin, Higgins Bldg., L. A. Owner, J. M. Trumbel. The dwelling has been designed to contain 12 rooms, three baths and sleeping porch. A separate garage will also be erected on the property. Interior of the dwelling will be finished in pine, hardwood and white enamel. Hardwood floors will be used throughout. There will be a central heating system, open fireplaces, a hot water circulating system and vacuum cleaning. Bath room will be finished in tile. Brick mantels are specified. Exterior of the house will be faced with cement plaster. Plans are complete and figures are being taken.

**COMFORT STATION, PAVING AND CURES.**—Cost not stated. Santa Barbara, Santa Barbara Co., Cal. Engineer, City Engineer. Owners, City of Santa Barbara. Plans are complete and bids will be opened on September 2nd for the construction of a comfort station of brick construction, resurfacing 12,000 square feet in Pedregosa and constructing concrete curbs and gutters. Plans can be secured from the City Clerk.

**SCHOOL.**—2 story and base, frame and brick. Cost not stated. Los Angeles, Cal. Architect, Julius W. Kraus, Higgins Bldg., L. A. Owner, Loml School District. Bids will be opened on September 2nd for a six class room building with gymnasium and elementary class room on first floor. Inter-

sh, pine with maple floors. A central heating system. Exterior covered with cement plaster.

**SCHOOL**—2 story and base, brick. Cost not stated. San Pedro, Los Angeles Co., Cal. Architect, Lyman Farwell, Dry Bldg., L. A. Owners, City of San Pedro. Bids will be opened on September 2 for repairs to an old building and construction of a new building 91 by 102 feet. Interior pine with maple floors. Central heating, program clocks and vacuum cleaning, exterior pressed brick.

**SCHOOL**—2 and 3 story and base, brick. Cost not stated. San Pedro, Los Angeles Co., Cal. Architect, John Fell De Remer. Tile and Insulation Bldg., L. A. Owners, City of San Pedro. Bids are now being taken on plans for 12 rooms, auditorium and departments of domestic science and manual training. Interior sh, pine with maple floors. Steam heat, program clocks and vacuum

cleaning. Exterior pressed brick.

**SCHOOL**—3 story and base, brick and concrete, cost not stated. Los Angeles, Cal. Architect, W. J. Bleisner, Van Nuys Bldg., L. A. Owners, Polytechnic High School District. Building will cover an area of 104 by 113 feet. Interior pine and hardwood with maple floors. Work includes steam heat, program clocks, vacuum cleaning and plunking in by 80 feet. Exterior faced with pressed brick and cement plaster. Working drawings nearly complete.

**SCHOOL**—1 story and base, concrete. \$24,145. San Gabriel, Los Angeles Co., Cal. Architects, Lynnis & Hewitt, Fay Bldg., L. A. Owners, Garvey School District. Contractor, B. H. Paul, 2018 West 28th Street. L. A. general construction; Foss & Jones, Pasadena, heating and ventilating; F. N. Newberry, L. A., electric work; H. T. Miles & Son, San Gabriel, painting; Cooney & Winterbottom, Alhambra, plumbing.

**SCHOOL**—1 story and base, brick or concrete, \$30,000. Calipatria, Imperial Co., Cal. Architect, Norman P. Marsh, 214 Broadway, L. A. Owners, City of Calipatria. The building will contain six class rooms, principal's office and a large auditorium. Interior will be finished in pine with maple floors in the class rooms. A central heating system will be installed. Modern school plumbing, program clocks and vacuum cleaning are specified. Exterior will be faced with cement plaster. Plans are now being prepared.

**COLLEGE BUILDING**—3 story and base, reinforced concrete, \$60,000. Los Angeles, Cal. Architect, Elmer Grey, Wright and Callender Bldg., L. A. Owners, Throop College of Technology. The building will be erected at the corner of California and Wilson streets and will cover a large ground area. Interior will be arranged for class rooms, study hall, library and laboratories. Plans provide for steam heat vacuum cleaning and modern plumbing and electric work. Exterior will be faced with cement plaster. Plans are now being prepared.

**OFFICE BUILDING**—5 story and base, Class A construction, \$200,000. Los Angeles, Cal. Architect, W. J. Dodd, Marsh-Strong Bldg., L. A. Owners, Pacific Mutual Life Insurance Co. The building will be in the nature of an addition to the present building at the corner of 6th and Olive streets, and will cover an area of 82 by 80 feet. The first floor will be arranged for offices and rooms for the directors, while upper floors will contain lifts with vaults and fire-proof lockers. There will be a complete steel frame and concrete floors and roof slabs hollow tile interior partitions, metal window sash and frames. Plans provide for elevator service, steam heat and vacuum cleaning. Interior will be finish 1 in hardwood and ornamental plaster. Marble and tile wainscot will be used. Exterior will be faced with colored tile. Plans are now being prepared.

**RESIDENCE**—2 story and base, brick and frame. Cost not stated. Los Angeles, Cal. Architects, Eison & Son, Wilcox Bldg., L. A. Owner, Dr. Ralph Williams. The dwelling will be erected on Vinson Boulevard between 2nd and 16th, and has been designed to con-

tain eleven rooms, three baths and sleeping porch. A large two-story garage will also be erected on the property. Interior of the dwelling will be finished in hardwoods and white enamel. Hardwood floors will be used throughout except in the baths which will be finished in tile. Plans provide for a central heating system, vacuum cleaning and hot water circulating system. There will be open fire places and tile mantels. Exterior of both the house and garage will be covered with brick veneer and shingles. Plans are now being prepared.

**APARTMENT HOUSE**—4 story and base, Class A construction, \$70,000. Los Angeles, Cal. Architect, California Architectural and Construction Co., California Bldg., L. A. Owner's name withheld. The building will be erected at the southwest corner of Maryland and Bixel streets, covering an area of 700 by 88 feet, and has been designed to contain a total of 100 rooms which will be arranged in suites of four and five rooms. Interior will be finished in pine and hardwood with some white enamel. Hardwood floors will be used in the living and dining rooms. There will be steam heat, elevator service, a hot water system and vacuum cleaning. All suites will have wall beds. Bath rooms will be finished in tile. Marble wainscot will be used in the entrance vestibule. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

**BRIDGE**—Reinforced concrete. Cost not stated. Ventura, Ventura Co., Cal. Engineer, County Surveyor, Ventura. Owners, Ventura County. Bids will be opened on August 25th for the following work: Construction of the south abutment and approach to the Saticoy bridge, and for the construction of the Concho Creek bridge on the state highway. The south abutment and approach to the Saticoy bridge is located about one-half mile southeast of the Southern Pacific station at Saticoy. Some approximate quantities in this work are: Embankment, 11,500 cubic yards; fill, 6700 asphaltum; 223 barrels concrete in abutments; 500 cubic yards reinforcing steel in abutment; 19,100 pounds steel sheet piling; 75 square feet concrete piles 25 feet long; 36,200 pounds 1328 lineal feet, 24-inch corrugated iron pipe, 10 feet. The Concho Creek bridge on the state highway is about two miles east of the Southern Pacific station at Camarillo, Ventura County, California. The bridge consists of eight spans, each 30 feet long. Some approximate quantities in this bridge are: Concrete, 150 cubic yards; reinforcing steel, 17,000 pounds; pipe piling, 100 lineal feet. Plans can be secured from the office of the County Clerk.

**CAVERTS**—Reinforced concrete covered culverts. Ventura, Ventura Co., Cal. Engineer, County Surveyor, Ventura. Owners, Ventura County. Plans have been prepared and bids will be opened on August 25th for the following work: Construction of the Wilcox, Los Olivos culvert, the Hackberry, Los Olivos culvert, and the San Diego, Santa Rita, the Sycamore Road Culvert, Ventura County, Cal. The culverts are all of reinforced concrete with corrugated iron pipe culverts drawn. Some approximate quantities in the four culverts are: Concrete, 150

cubic yards, reinforcing steel, 13,850 pounds; earth fill, 2,100 cubic yards; 16-inch corrugated iron pipe, 126 feet; 21-inch corrugated iron pipe, 58 feet; 36-inch corrugated iron pipe, 1 foot; 38-inch corrugated iron pipe, 44 feet; standard guard fence, 1,110 feet. Plans can be secured from the office of the County Clerk.

**CITY HALL, AUDITORIUM, ETC.**—Class A construction, \$210,000. San Fernando, San Bernardino Co., Cal. Architects, Elmore R. Jeffery and Frank R. Schaefer, Westley Roberts Bldg., L. A. Owners, City of San Bernardino. The City Council of San Bernardino has approved plans and specifications for a group of municipal buildings, which will be erected on property at the corner of Fourth and F streets. A bond issue of \$210,000 will be voted on October 20th, the funds to be divided as follows: \$70,000 for the city hall, \$50,000 for the auditorium, \$50,000 for the jail and garage, and \$20,000 for furniture and equipment. The preliminary plans, which were accepted, provide for buildings of Spanish Renaissance style. The site will probably be at the corner of Fourth and F streets. The city hall will be a two-story structure, 150 by 62 feet. The first story will provide for the police court, jury room, judges' quarters, water commission, police chief, fire commission, lavatories, city clerk, and auditor. The second floor will contain the office of the mayor, council chamber, committee rooms, city attorney, health department, board of public works, and the building and engineering departments. The jail building will be two stories, 22 by 60 feet. It will contain the receiving hospital and steel cells in the first story and officers' quarters in the second. The garage will be 32 by 70 feet and will provide room for five machines. The auditorium will be 114 by 90 feet. It will have a seating capacity of 2,500 on main floor and 500 in balcony. There will also be a fully equipped stage with dressing rooms, smoking rooms, reception parlors, foyer, etc. It will be provided with a level floor so that it may be used for exhibition and other public purposes. The buildings will be of brick or reinforced concrete construction with plastered exteriors, clay tile roofing, concrete foundations, hardwood interior trim, maple floors in offices and auditorium, reinforced concrete stairways and corridor floors, marble and tile entrances and hallways, steam heat, metal frames and cash and all modern equipment.

#### Contracts Awarded.

**RAILROAD BRIDGE**—Steel. Cost not stated. Campo, San Diego Co., Cal. Engineer's name not given. Owners, San Diego & Arizona Railroad Co. Contractor, Charles W. Corbaley, L. A. Contract price not stated.

**RESIDENCE**—2 story and base, frame, \$15,000. Los Angeles, Cal. Architect, Milwaukee Building Co., Wright and Callender Bldg., L. A. Owner, P. H. Lyon 1202 South Grand avenue, L. A. Contractors, Milwaukee Building Co., Wright and Callender Bldg., L. A. Contract price, \$15,000.

**RESIDENCE**—1 story and base, hollow tile, \$30,000. San Fernando, Los Angeles Co., Cal. Architect, C. E. Myers 900 West 1st street, L. A. Owner, General H. G. Otis. Contractors,

Leonardt & Peck, H. W. Hellman Bldg., L. A. Contract price, \$30,000.

**WAREHOUSE**—2 and 5 story and base, reinforced concrete, \$33,541. Los Angeles, Cal. Architect, E. P. Parcher, Engineer, J. F. Blee, Union League Bldg., L. A. Owners, Hollywood Fireproof Storage Co. Contractor, F. O. Engstrom, 5th and Seaton streets, L. A. Contract price, \$33,541.

**HOSPITAL**—2 story and base, reinforced concrete, \$32,875. Los Angeles, Cal. Architect, W. S. Garrett, Currier Bldg., L. A. Owners, French Hospital Association. Contractors, The Pozzo Construction Co., 421 Macy street, L. A. Contract price, \$32,875.

**SCHOOL**—1 story and base, brick, \$21,190. Los Angeles, Cal. Architects, Edelman & Barnett, Black Bldg., L. A. Owners, City of Los Angeles. Contractor, Alex. Grant, 1261 West 37th street, L. A. Contract price, \$21,190.

**BRIDGE**—Timber construction, \$1,180. Santa Barbara, Santa Barbara Co., Cal. Engineer County Surveyor, Santa Barbara. Owners, Santa Barbara County. Contractor, E. F. Edwards, Santa Barbara. Contract price \$1,180.

**PIPE LINE**—Cost not stated. Fillmore, Ventura Co. Cal. Engineers' name not given. Owner H. R. Edwards, Fillmore. The City Trustees have granted a franchise to H. R. Edwards for laying and maintaining a pipe line system within the city of Fillmore, connecting the Montebello lease with the new refinery building now under construction.

**HIGHWAY CONSTRUCTION**.—\$9,229.20. Tustin, Orange Co., Cal. Engineer County Surveyor, Orange. Owners, Orange County. Contractors, Hart & Ducey, Pasadena. Contract price, \$9,229.20.

**ROAD CONSTRUCTION**.—\$10,695.78. Anaheim, Orange Co., Cal. Engineer, County Surveyor Orange. Owners, Orange County. Contractor, Max L. Hubermann, Anaheim. Contract price, \$10,695.78.

**GARAGE**—2 story and base, steel and concrete, \$15,000. Santa Barbara, Santa Barbara Co. Cal. Architect, none. Owners, Ford Co. Contractor, J. A. Clary, Santa Barbara. Contract price, \$15,000.

**GARAGE**—1 and 2 story and base. Class C. Cost not stated. Los Angeles, Cal. Architects, Krenple & Erkes, Henne Bldg., L. A. Owner, Dr. Carl Kurtz. Contractors, C. J. Kubach Co., Merchants National Bank Bldg., L. A. Contract price not stated.

**SCHOOL**—1 story and base, frame, \$8,619. Piru, Ventura Co., Cal. Architect, C. H. Russell, Story Bldg., L. A. Owners, Piru School District. Contractors, Mill and Lumber Co., Fillmore. Contract price, \$8,619.

**SCHOOL**—1 story and base, frame, cost not stated. Crescenta, Los Angeles Co., Cal. Architects, Tuttle & Angel, Delta Bldg., L. A. Owner, Crescenta School District. Contractor, Thomas H. Addison, 316 Belmont st., Glendale. Price not stated.

#### PORTLAND AND OREGON

**COUNTRY ESTATE**.—Frame construction, \$150,000. Portland, Ore. Architects, Cutler & Malgreen, Spokane. Owner, T. B. Wilcox, Portland. The buildings which will include an

18 or 20 room house, barns, greenhouses and garage, will be erected on a large tract some miles outside city of Portland. Details as to interior finish and mechanical equipment have not been reached and will be given later when plans are more nearly complete. All construction will be of frame.

**DETENTION HOME**.—2 story base, brick, \$25,000. Portland, Ore. Architects, Doyle & Patterson, Vester Bldg., Portland. Plans are complete and figures for the general construction are now being taken. Plans can be secured from the architect.

**WAREHOUSES**.—2 story and reinforced concrete, \$25,000. Eugene, Ore. Architect, none. Owners, A. & Lewis, Portland. The buildings will cover an area of 80 by 150 feet, will be of fireproof construction. Interior will be faced with cement plaster. H. O. Bowen is the local manager and will let all contracts. Plans are complete.

**SCHOOL ADMINISTRATION BUILDING**.—2 story and base, brick, \$100,000. Grand Mound, Ore. Architect, Watson Vernon, Aberdeen, Own State of Washington. Bids will be opened on August 31st for building 113 by 37 feet. With two wings 52 feet. Interior finish, pine hardwood. Work includes steam heat vacuum cleaning and modern electric work. Exterior faced with pressed brick.

**SCHOOL**.—1 story and base, brick and stone, \$15,000. Prairie City, Ore. Architect, E. E. McLaren, Lumber change Bldg., Portland. Owners, Town of Prairie City. Bids are being taken for a six class room building finished in pine with maple floors. Work includes steam heat. The exterior will be faced with pressed brick.

**SCHOOL**.—2 story and base, brick, \$15,000. Hubbard, Ore. Architect, Brown & Forbes, Mohawk Bldg., Portland. Owners, Town of Hubbard. Building will contain six class rooms and will be finished in pine and maple floors. There will be steam and slate blackboards. Exterior finished with pressed brick. Plans being prepared.

**STORES AND HALL**.—2 story base, brick, \$20,000. Salem, Ore. Architect, Fred A. Legg, Ainsworth Bldg., Portland. Owners, Roth Grocery The building will cover an area of 166 feet. The first floor will be occupied by the owners and the second floor has been leased to the Young Men's Christian Association. Interior will be finished in pine. There will be steam heat. Patent store fronts are specified. Exterior will be finished with pressed brick. Plans are complete and figures are being taken.

**Stores and lofts**, 2 story and brick, \$30,000. Portland, Ore. Architects, Camp & Du Put, 426 East A street, Portland. Owners, W. B. Ke Products Co. Location, East and Adler Street, covering an area of 50 by 100 feet. First floor, stores second lofts. Interior finish, pine. Patent store fronts. The exterior will be pressed brick. Plans being prepared.

**RESIDENCE**, 2½ story and base, frame, \$15,000. Portland, Ore. Architect, C. C. Rich, Portland. Owner, C. L. Smith. Contractor, J. L. Quinn.

127 East Broadway, Portland. Contract price, \$15,600.

### Contracts Awarded

WAREHOUSE—2 story, mill construction, \$25,000. Portland, Ore. Architects, Sutton & Whitney, Lewis Bldg., Portland. Owner, Fanny W. Brown. Contractor, J. C. Kilgreen, Lewis Bldg., Portland. Contract price, \$25,000.

## SEATTLE AND WASHINGTON

BRIDGES—Steel and concrete. Cost follows. Seattle, Wash. Engineers, Seattle Bridge Commission. Owners, City of Seattle. The Board of Public Works has let the contract for the 5th avenue bridge to Hans Pederson, Madison Block, Seattle, at \$242,620.30, is alternative bid on which cofferdams will be used in the construction of the piers and pouring the concrete dry. The Pacific States Construction Co., Burke Bldg., at \$111,916, was awarded the contract for constructing the concrete piers for the Fremont avenue bridge, using cofferdams; and the Sears Building Co., Pittcock Block, Portland, Ore., at \$154,601 secured the contract for the superstructure on the Fremont bridge.

STORES—1 story and base, brick and steel, \$16,000. Seattle, Wash. Architects, Bebb & Gould, Denny Bldg., Seattle. Owners, Tucker-Hartford Co. The building will be erected at the corner of Westlake and Roy streets, covering an irregular area of 120 by 20 by 179 by 133 feet. Interior will be finished in pine and hardwood with some ornamental plaster. Cement and tile floor will be used. There will be patent store fronts, marble wainscot and base. Plans provide for steam heat and a vacuum cleaning system. Exterior will be faced with terra cotta. Plans are complete and figures are being taken.

### Contracts Awarded.

APARTMENT HOUSE—2 story and base, reinforced concrete, \$32,215. Seattle, Wash. Architects, W. R. B. Wilco and Julian Everett, Boston Bldg., Seattle. Owner, L. Smith. Contractors, MacIea Bros., Empire Bldg., Seattle. Contract price, \$32,215.

HOSPITAL—4 story and base, reinforced concrete \$225,000. Walla Walla, Wash. Architects, Beezer Bros., Seattle. Owners, St. Mary's Hospital. Contractor, Robert F. Tegan, Morgan Bldg., Portland, Ore. Contract price, \$225,000.

Failures to secure the schooners needed resulted in the canceling of an order for over a million feet of lumber which had been obtained by an American concern through a trade opportunity submitted by Consul Walter F. Boyle, of Ceiba, Honduras.

## CONSTRUCTION WORK ABROAD.

### CANADA.

[Consul Julius D. Dreher, Toronto, July 31.]

Reduced Expenditure on Roads in Ontario.

Last year the actual expenditure on road construction in Ontario was \$815,000, of which the Provincial Government contributed one-third. The estimates for this year provide for an

outlay of only \$640,000, though this amount may be slightly exceeded. The counties entering upon road construction on the largest scale are York (in which Toronto is situated), Welland, Halton, and Oxford. Welland, which heads the list in this respect, set out in the spring to spend \$200,000 or more upon its roads during this year; but the highway department of the Province, which must approve of all road construction undertaken by the counties, called a halt because in a time of national emergency every municipality should avoid increasing the strain upon the financial resources of the Empire. It is stated that Welland will be limited to an expenditure of only \$100,000.

None of the other counties proposed sums too large to receive approval. The Provincial Government grant to the counties this year will be about \$230,000, based upon the one-third proportion of recent years. Under the new highways act the 40 per cent basis does not become operative until next year.

In June last the bank loans to Canadian municipalities amounted to \$46,889,816, that amount having been exceeded only once in the last 23 months. The large aggregate of bank loans to municipalities may serve to explain in part the caution displayed by the Ontario highways department.

### CHINA.

[Consul General] George E. Anderson, Hongkong, June 25.]

#### Hongkong Harbor Improvements.

The first step looking toward the ultimate improvement of the harbor of Hongkong along modern lines by governmental agency has been taken in the action of the legislative council of Hongkong in appropriating a small sum for dredging a portion of the harbor for a 30-foot approach to and berths alongside of a new wharf to be erected by the private corporation (the Hongkong & Kowloon Wharf & Godown Co. (Ltd.)) which owns and controls the only modern wharf accommodations in Hongkong. About two years ago this company proposed to construct a new wharf for accommodation of vessels up to 650 feet in length and corresponding draft, but found that the approaches to their property would not admit the berthing of vessels with over 28 feet draft. The matter was taken up with the colonial government at the time and was referred to the home government (London). As a result of the negotiations the colonial government has agreed to dredge two berths alongside the proposed wharf to a depth of 30 feet at lowest spring tide and to dredge 231,600 square yards of harbor as approach thereto. The work will be done by a government dredger which formerly was employed in the construction of the large typhoon shelter in the harbor.

The work is of importance chiefly in that it is the first work of the sort undertaken by the Government in this, one of the greatest shipping ports of the world. For several years there has been considerable agitation in British shipping and governmental circles in the Far East as to the necessity of improving portions of the har-

bor of Hongkong, not only in the way of the construction of modern wharves and warehouses in addition to those now existing as the property of a private concern, but also in the way of deepening portions of the harbor which have been silted up somewhat and which otherwise cannot properly handle the largest ships coming into the harbor, which, it may be well to add, are American and have to do directly with cheap handling of American flour and other freight.

The need of additional modern accommodations for ships and modern means of handling freight is being felt, and the increasing probability of a serious shortage of the use of the harbor of Hongkong is a fact.

It is announced by the Government that the plans for the improvement of a portion of the harbor along what is known as the "Praya East" by moving several hills into the sea are expected to materialize at no distant date. The inauguration of the enterprise was stopped by the outbreak of the war in Europe.

### DOMINICAN REPUBLIC.

[Vice Consul Juan M. Herrero, Santo Domingo, July 8.]

#### Aqueduct for the City of San Pedro de Macoris.

On April 23, 1915, a contract was entered into by the municipality of San Pedro de Macoris, Dominican Republic, represented by its syndic, and Francisco Escalona D' Castro, a contractor of San Juan, P. R., represented by M. Arturo Salas, whereby a concession was granted to Mr. Escalona, giving him or his assigns the right to use the streets, roads, parks, and other public grounds for the installation of an aqueduct to supply water to the city of Macoris. The duration of the contract is fixed at 50 years, the right being received to the municipality to acquire said aqueduct at the end of 15 years after payment of its value, and after 99 years the aqueduct will become the property of the municipality. The contract is now pending before the National Congress, and it is understood that as soon as the latter approves it, the work of installation will begin.

### FRENCH INDO-CHINA.

[Consul Lawrence P. Briggs, Saigon.]

#### Contemplated Improvements in Saigon Harbor.

Saigon, like other ports of Indo-China, is nominally under the control of the central Department of Public Works, but by a decree of January 2, 1914, it was granted a certain degree of autonomy and a local administrative council. This Council of Administration, consisting of 12 members and assisted by the chief engineer of the Cochinchina division of the Department of Public Works, has a separate budget and votes improvements and money subject to the veto of the governor of Cochinchina. This council met for the first time on August 1, 1914.

The chief task of the new council was to consider an extensive system of improvements for the harbor of Saigon, whose facilities are inadequate for the

accommodation of its commerce. At a recent meeting the following program was agreed upon, to be put into operation as soon as possible:

1. The construction, in common with the navy yard, of a dry dock 300 meters (981 feet) long, at a cost of about \$1,600,000.

2. The installation of an electric towpath along the Canal de Derivation, from Saigon to Cholon (4 or 5 miles), at a cost of about \$200,000.

3. The acquisition of a floating crane, at a cost of about \$30,000.

4. The construction of docks for the mooring of small boats, at a cost of about \$20,000.

5. The construction of warehouses and an inclosing wall for the customs along the quay of Khan-hoi. The estimated cost of this work is fixed at \$200,000.

At its next meeting the council will decide upon a program of improvements for 1916.

### PORK FOR DEFENSE.

An enterprising congressman from Kansas City sees a local advantage in the national defense talk. An arsenal for Kansas City is just the thing. No foreign enemy could possibly get as far into the country as Kansas City, so that is just the place for a munitions supply house.

There will be a whole lot of congressional patriots of just this kind, and they won't help the cause of national defense any. Just as the rivers and harbors funds and the postoffice building funds have been made into "pork barrel" distribution funds, so the money to be spent for national defense would, under our customary congressional methods, be awarded according to factional strength in congress rather than considerations of cost attack and defense.

There was recently announced at Washington a system whereby the Postal Department would meet all proposals for postoffice buildings or additions on a basis of postal incomes. The income of an office is possibly as nearly as fair a test of its building needs as can be devised. Of course congress has the final say about the building allowance, but if the department has a scientific system to test all local demands for "pork," it will be more difficult to get congressional majorities to beat the administration's recommendations.

The river and harbor funds have been of late years freed largely from local taints by the concerted work of the engineering officers of the army. All local suggestions are tested by comparison with national considerations, comparison with the trade needs and advantages to be gained in other parts of the country. This does not secure perfect justice nor freedom altogether from personal influence. But it gives a more nearly honest basis of determining appropriations than does "pull" in committee.

The national defense problem will doubtless be worked out in the same systematic way. There will be a board of army officers before whom all recommendations must be worked out, and the decision of the board will, in its turn, be publicly reviewed by the President and Congress, otherwise we would be having the spectacle of Pres-

ident vying with Tucson, Arizona, for the privilege of mounting howitzers for defense against Montenegro.—Fresno Republican.

### A HADRANCE TO AMERICAN BUSINESS.

[Commercial Attaché William C. Downs, Melbourne, Australia, July 2.]

Several complaints have been received that the failure of American manufacturers promptly to confirm transactions which have been closed by cable leaves the agents in Australia in doubt as to whether all the conditions of the transaction are clearly understood and whether everything is in order, not only as regards the prices stipulated, terms and conditions, but also the time of shipment. Several complaints have been received that although orders which have been taken upon cable quotations from American manufacturers have been accepted by cable, confirmations of the cable have not been received, although sufficient time has elapsed for letters from the United States to arrive.

It should be impressed upon American manufacturers that cables sent or received should be confirmed by letter on the date on which they are sent or received in order that any misunderstanding which might arise from the use of codes, which do not always express the meaning in exact language, may be promptly corrected.

On a par with most of the Chronicle's economic reasoning is that of a recent editorial against inheritance taxes which have been favored by the present state administration. Here is its argument to show how poor people will be oppressed by the passage of such laws:

"It is living on our principal when we ought to live upon our income. An inheritance tax of any kind, and especially such a tax on large estates, is justifiable only as an emergency tax.

It is taking money which might be so invested as to give employment and using it up. It means just so much less work and so much more idleness.

Those who inherit, of course, object, just as all of us object to all taxes and evade them if we can. But the inheritors can stand it.

Those who really suffer from inheritance taxes are those who must have work in order to live.

Every "poor man" should vote against inheritance taxes. They hurt him."

The thing to do then is to perpetuate large fortunes. Let the descendants of the Rockefellers and the Guggenheims and the Vanderbilts own the whole thing and they will employ the poor. They are God's appointed children that should have the sole control and distribution of the wealth of the land.

In England where they have an hereditary aristocracy the inheritance tax laws are very strict and exacting. Nothing that descends by inheritance escapes its burden of taxation. Here where there are no recognized classes, no recognized landed aristocracy, the laws are much more lenient and the taxes but a small percentage of the taxes in England on inheritances. The moneyed aristocracy which the Chron-

icle serves, however, is demanding that they be free from all such burdens of state.

### INDUSTRIAL ORDERS.

For several months committees have been meeting in San Francisco and Los Angeles to prepare tentative General Safety Orders for California's industries.

The California Employers' Federation selected three San Franciscans Grant Fee, President Building Trade Employers Association; H. J. Ralston, President Ralston Iron Works, and F. H. Abbott, President Franklin Printing Trades Association. The California State Federation of Labor delegated President D. P. Haggerty, Secretary-Treasurer Paul Scharrenberg and Kenneth McLeod of Carpenters Union No. 483 of San Francisco. Walter A. Chown represented the Casualty Underwriters Association. John R. Brownell, Superintendent of Safety was the eighth member of the committee. Mr. Abbott was elected chairman and Mr. Brownell secretary.

In Los Angeles the Merchants' and Manufacturers' Association selected W. T. Bishop, Jr., of Bishop & Company Reese Llewellyn, of the Llewellyn Iron Works, and John Griffin, of the Pacific Coast Planing Mill Company. The Central Labor Council named C. F. Grow, J. W. Buzzell and L. W. Butler. The Casualty Underwriters' Association delegated H. D. Vandever, and H. L. Boyd represented the Industrial Accident Commission. Mr. Griffin was elected chairman, Mr. Butler vice chairman and Mr. Boyd secretary.

The tentative General Safety Order prepared by these two committees will be considered at two public hearings. The first will be held on Wednesday August 25th, at 10 a. m. in Room 40 Underwood Building, 525 Market street, San Francisco. The second will be held on Friday, September 3rd, at 10 a. m. in Room 405 Union League Building, Second and Hill streets, Los Angeles. All interested are invited to attend.

The committee decided to consider those problems of safeguarding that are applicable to all industries. Gears, belts, pulleys, clutches, transmission shafting, sprockets, flywheels, grinding wheels etc., are to be properly guarded where exposed to contact, and there will be requirements as to size, speed and location. All projecting screws are to be removed, counter sunk or guarded. Provisions are included for making ladders more stable and for providing hand railings on stairways runways and elevated passages and gangways kept clear and in good repair to prevent stumbling and falling.

Copies of the tentative General Safety Orders will be furnished on request from the offices of the Industrial Accident Commission, 525 Market street, San Francisco, or Second and Hill streets, Los Angeles.

### MILLIONS FOR GUNCOTTON.

The Nitrated Products Company of Pottsville, Pa., has closed a \$5,000,000 contract for gun cotton and other nitrated explosives to be delivered to the New York agents of the allies.

## Catarrh Can Be Relieved

**T**HERE IS NO NEED for you to continually suffer from Catarrh and Cold in the Head. It makes you miserable, doesn't it? You really don't care whether things go right or not and you wonder when you'll ever get over it. And you will not get over it until you get the Clover Leaf Catarrh Remedy, and use it. It will relieve you, and you'll wonder why you had not used it sooner. We are so positive that this will relieve you of your Catarrh or Cold in the Head, that we guarantee you satisfaction or we will refund your money.

# Building and Engineering News

Devoted to the Architectural, Building, Engineering and Industrial Activities  
of the Pacific Coast.

Issued Weekly, \$3.00 per year

San Francisco, September 1, 1915

Fifteenth Year, No 35

For the first time in history the Federal authorities, by aid of the Department of Agriculture, have compiled an official table of automobile registrations in the various States, together with supplementary material, making a complete record of the status of the motor car in America for the year 1914. Remember that only so long ago in 1909 statistics covering the motor car industry in Government reports were lumped in with the figures for all classes of vehicle manufacture.

In the conservative eyes of the Government officials the motor industry had not, at that time, reached sufficient size to warrant a special classification. Today there is no question on this point, and we may consider that the Government recognition officially acknowledges the right of the industry to a leading place in the economic life of America.

Coming down to concrete figures, we find that in 1914 there were 1,666,984 pleasure cars running in the United States, and there were in addition 44,355 motor trucks in operation.

This gives us the very impressive total of 1,711,339 motor vehicles in use in America. These vehicles paid the tidy sum of \$12,270,035.78 for the privilege of using our roads, and in addition the owners and chauffeurs paid further \$427,179 for the right to drive.

Manufacturers and dealers, who are placed in a special category in most of the States, contributed an additional \$1,255 for the privilege of running cars necessary to their business.

## U. S. Auto Census for 1915.

State	Automobiles.	Gross Registration Revenues.
Alabama	8,672	\$ 113,201.55
Arizona	5,046	34,677.50

West Virginia	6,159	60,648.49
Wisconsin	53,161	293,580.00
Wyoming	2,428	12,140.00
Dist. of Columbia	4,833	20,147.50

Totals 1,666,984 \$12,270,035.78

\*State registration not required.

\*\*Law declared unconstitutional.

An important home industry victory has just been announced by the State Board of Control, the chairman of which is John Neylan, and has to do with the metal license signs for automobiles, motorcycles and other forms of motor vehicles. These signs have been the subject of a battle royal between California manufacturers and eastern ones regularly every year for some time back. Heretofore the work has been sent to eastern shops.

The contract for the 1916 signs has this year been awarded to the California Metal Enameling Company of Bairdstown, Southern California. This contract is for 400,000 automobile signs and 50,000 motorcycle plates, and will probably mean a total cash consideration of something in excess of \$75,000.

A gratifying feature in the award is that the California bid was 20 per cent lower than the bid of the lowest eastern bidder. The practical result of this sort of home industry is that scores of workmen will be kept busy for many months in this California factory making these plates and spending their wages in this State.

A recent issue of the Press Bulletin issued by the United States Geological Survey credits California with a monopoly of borax. The production of crude borate materials in the United States during the year 1914 was 62,400 short tons valued at \$1,461,400. This shows an increase of more than 6,000 tons over the previous year, but the value was less. The Bulletin says: "The product during 1914 was obtained from three mines, all in Southern and Southeastern California." The largest part came from the Lila C. mine, owned by the Pacific Coast Borax Company, in the Death Valley region of Inyo County. The Sterling Borax Company, near the borders of Los Angeles County, ranked second in production. The third mine is owned by the Russell Borax Company in the Ventura district. A forty-foot deposit of colemanite, the usual source from which borate is derived, has been discovered at a depth of 370 feet in the Kramer district of San Bernardino County. This was discovered a good deal as Bret Harte's hero "struck pay gravel" when drifting on Poverty Flat, for it was made by a farmer drilling for water.

Pasadena wants a janitor with brains for the new post office that is in the building there. The man who fills the position will be required to take an educational examination. Pretty soon Pasadena will turn some white wing down when he seeks a position as street cleaner, because he fails to qualify in integral calculus.

## Lessons from the Exposition.

Collected by George Nelson, C. E.

### The Foxboro Exhibit of Indicating and Recording Instruments.

A very complete line of indicating and recording instruments for measuring pressure, temperature, speed and time, also automatic temperature controllers and orifice meters, is shown by the Industrial Instrument Co. and the Foxboro Co., of Foxboro, Mass., at the Exposition.

These companies are operated under the direct supervision of Messrs. B. B. and E. H. Bristol—men who have had a very wide experience in the manufacture and sale of measuring instruments—and the instruments which they are manufacturing show many interesting and practical improvements in design.

The booth is finished in cream white and gold and is attractively arranged. In utilizing recording instrument cases, a very attractive light has been designed for the pillars at the entrances. At the rear of the booth, there is a large mahogany panel, on which there are symmetrically arranged "Foxboro" recorders and thermographs,

At the center of the booth is arranged a frame on which there is an automatic temperature controller, also a recording thermometers, two liquid level recorders, a vacuum recording gauge and a gas pressure recording gauge in operation. These instruments will be in operation 24 hours a day and will continually record the operation of the controller, the varying water levels in a tank, the vacuum on the controller system and the Machinery Palace Building service gas pressure.

The adaptability of "Foxboro" instruments is shown in the display of several gauge boards for power plants. The uniform design of these instruments enables them to supply both the indicating and recording instruments in the same case, having the same style and finish throughout, which naturally makes a very pleasing effect.

The famous Dr. Horn system of speed measuring instruments are shown in their many different styles and

Foxboro Booth.

also one hundred and seventy indicating gauges for pressure and vacuum for every known purpose in all sizes from 2 in. to 24 in. in diameter. This is the largest assortment of gauges ever arranged on a single panel for display purposes.

A second attractive mahogany panel at the left side of booth has a display of indicating dial thermometers, round and square case counters, thermographs, recording gauges, recording hygrometers and liquid level recorders; also, an interesting display of the many bulbs, connections and capillary tubing used on this service.

An orifice meter, measuring flow of air, is shown in operation; this is one of the latest developments for accurately measuring the flow of gases and liquids. It is understood that an accuracy of within less than one per cent is guaranteed.

sizes, both in the portable and stationary forms. A frequency meter of Dr. Horn design will be in operation; it will both indicate on a large dial and record on a continuous chart the number of cycles per second of Machinery Palace Building circuit.

All types of recording gauges for any range, from full vacuum to 20,000 lbs. per square inch, and a very complete line of both indicating and recording thermometers for any range, from minus 60 to plus 800 degrees Fht. are shown, together with a complete line of electric pyrometers, for any range up to 3,000 degrees Fht. or its equivalent.

Two Foxboro orifice meters are in operation at booth 29, Collective Gas Exhibit (Manufacturers' Building), measuring all gas consumed in the Collective Gas Exhibit, both for service and illumination.

Recording Gauges.

Recording Gauges for all purposes and all ranges from full vacuum to 20,000 pounds per square inch.

Round form, moisture, dust and fume tight case.

Improved supported helical and diaphragm tube movements and pen arms, eliminating the effect of vibrations and insuring positive action.

Spring-tension self-centering chart holder, which insures the accurate placement of charts.

Automatic release pen lifter, which keeps chart and instrument neat and clean.

Strong clock movement with three point support.

Charts have wide open scales, and bold face and skeleton type to make it easy to distinguish between night and day.

All parts interchangeable.

These instruments are neat, compact and efficient, can be used for Steam, Gas, Water, Air, Oil, Ammonia, Brine, anything under pressure and vacuum.

Differential Recorders.

This recording instrument is designed to record on a chart the difference between two existing pressures.

It is guaranteed to give satisfactory results under pressures from 0 to 4-inch head of water, and up to any desired differential pressure and under static pressure up to 1,000 pounds per square inch.

The construction of this Differential Gauge, which is the most satisfactory instrument of its kind ever manufactured, has made possible the use of Orifice Plates for the measurement of gas. This mode of measuring being considered the most accurate that can be had, but has heretofore not been used on account of the inability to obtain an accurate instrument to record differential pressures.

Orifice Meters.

Space does not permit the illustration of a complete Orifice Meter. This Meter consists, however, of a "Foxboro" Differential Recorder.

"Foxboro" Static Pressure Recording Gauge.

The necessary Flange Unions and

Orifice Plate, as illustrated above.

Complete with Angle Iron Frame and

All necessary Pipe Fittings.

The Differential Recording Gauge in this instance records the difference in the pressures caused by variations in velocity of gas passing through an orifice of definite diameter, inserted in the pipe line.

The Static Recorder records the static pressure of the gas.

In the measurement of gas by this meter, it is usual to have the Differential Gauge chart graduated to read inches of water, and the Static Pressure Gauge in pounds per square inch.

Using the records obtained from these instruments together with the data supplied, the rate of flow in cubic feet per hour is very readily and accurately obtained.

"Foxboro" Orifice Meters can be supplied in any size up to 12 inches. For anything larger than 12 inches, special meters will be built. There are two companies, each of which have over 200 meters in constant use, and they are measuring their gas with an accuracy heretofore considered practically impossible.

Improved Helical Tube Movement.

As the actuating tube movements form the important part of our Recording instruments, we wish to briefly describe those which we are using.

The illustration shows our improved Helical Tube Movement which is used in all "Foxboro" Recording Gauges for ranges above 12 pounds or its equivalent; also in all "Foxboro" Thermographs.

The Helical tube is mounted on a permanent base. The pen arm instead of being fastened to the free end of the tube is fastened to a shaft passing through the center. The action caused by application of pressure to the tube is transmitted from the tube to the shaft through a connection strip that is flexible only in the direction of the radial expansion of the tube. This construction supports the pen arm and actuating tube, forms a positive center of motion, and makes a very positive acting movement, which is not easily affected by vibrations. Note that all multiplying devices are eliminated and that the adjustment on the pen arm comes at the center of motion.

**Liquid Level Recorders.**

This instrument is designed for recording the varying levels of rivers, reservoirs, canals, forebays, tail races, etc.

One especially good feature about this instrument is that it is not affected by temperature changes or freezing. For instance, the ice in a forebay or tail race has no effect upon the diaphragm bulb, as it is below the depth of ice formation. This instrument has been put to many different uses other than measuring heights of water—being used in paper mills for recording the height of stuff in Jordan Stuff Chests, etc.

It can be used for any liquid other than water. It is guaranteed for accuracy and will be sent upon trial.

**Automatic Temperature Controllers and Regulators.**

These Controllers are the latest and most simple application of their kind now on the market.

It will accurately control any temperature from —60 to 800 degrees, will operate on any size of valve up to 12 inches. It has a graduated scale. The index may be set at any desired point, and the regulator will automatically control the temperature at that degree without any further adjustment.

Valves are operated by a vacuum or pressure. The vacuum system is recommended as it eliminates condensation or moisture in the pipes.

The diaphragm valve is made completely of metal—no rubber to deteriorate. This valve closes automatically if the system fails, due to leaks or pump troubles, thereby preventing over-heating.

The Controller may be equipped with a clock driving cam so as to automatically control a definite cycle of operations.

The Controller may be included in the same case as Recording Thermometer if desired.

**Improved Diaphragm Tube Movement.**

For all low pressures below 12 pounds or its equivalent the improved form of Diaphragm Tube movement is used. The same principle of pen arm construction is carried out in this movement as in the helical tube—the motion being transmitted from the diaphragm tube to the shaft on which the pen arm is fastened.

Although this tube is very sensitive to pressure changes, it is "Dead Beat" and the support given to it eliminates the necessity of clamping devices of any kind, when transporting the instrument.

This short improved diaphragm movement is especially well adapted for use in Liquid Level Recorders. The small capacity results in small transmission of air between the tube and the bulb.

A modification of this tube is used in our Differential Recording instruments which have proven so successful. The rapidity with which instruments having this type of actuating movement have been adopted, proves without question its superiority.

All "Foxboro" instruments are manufactured by The Foxboro Co., but, for the present, are being sold by The Industrial Instrument Co., a subsidiary company.

**Improved Recording Thermometers.**

"Foxboro" Thermographs or Recording Thermometers are made in many different styles, and in three sizes, viz.: —8, 10 and 12-inch.

They can be supplied in any range from —60 to 800 degrees Fahr. or its equivalent in Centigrade or Reaumur.

These instruments can be supplied for hundreds of different purposes. Thousands of them are in daily use giving most satisfactory results.

Over twenty years of experience in instrument making is back of every instrument. We guarantee satisfaction, and will submit instruments on 30 days' free trial.

They are especially adapted for recording temperatures of feed-water, flue gases, super-heated steam, mash tubs, cookers, vacuum pans, vulcanizers, dry rooms, pasteurizers, etc.

The instrument, as illustrated, is the stationary type for permanent installation.

The connecting tube can be any length up to 250 feet, and we will guarantee the instrument to accurately record the bulb temperature.

Model "A" Pressure Gauges.

On the previous page we described the movement that is used in all "Foxboro" Model "A" Gauges.

Although the movement is the heart of the gauge, special care also has been exercised to get a perfect dial, and an instrument that is handsome in appearance.

The dials of all Model "A" Gauges are hand calibrated, and are therefore as accurate as it is possible to make an instrument of this kind.

These Indicating Gauges can be supplied in the same case as our Recording instruments. This enables us to supply a full gauge board equipment consisting of Indicating and Recording Gauges, Recording Thermometers, Clocks, etc., all in the same style of case, giving a very uniform appearance and a satisfactory installation.

Durand Radial Planimeters.

These Planimeters are designed to obtain average of records on all charts with even scale and radial coordinates.

They are very easy and simple to operate and are exceedingly accurate.

Plots for all our charts can be supplied, which makes the averaging of charts very easy.

The instrument is of the finest workmanship, made by Anslar & Son, Switzerland.

Indicating Electric Pyrometers.

(Stationary Type.)

For ranges from 0 to 3,000 degrees Fahr. or 0 to 1,600 degrees Centigrade.

This instrument is supplied in the Stationary type for

permanent installation. It is an ideal instrument for high temperatures; can be depended on for accuracy; is simple to operate; not easily damaged.

It is a high resistance instrument for use with either base metal or platinum-rhodium thermocouples, all fire bars being absolutely interchangeable.

These instruments are especially adapted for Hardening, Tempering and Annealing Furnaces, Brick and Pottery Kilns, Carburetors and Superheaters of Water Gas Sets, Chemical Works, Enameling Furnaces, Galvanizing and Tanning Baths, Lead and Oil Baths, Oil and Tar Stills, Incinerators, etc.

Indicating Dial Type Thermometers.

For ranges from -25 to 1,000 degrees Fahr. or corresponding degrees Centigrade or Reaumur.

This is the Thermometer that you have been looking for. The indicator can be placed any distance up to 100 feet from the bulb and give satisfactory results.

It has Wide Open Scale, Easily Read, No Fragile Parts to Break, No Mercury to Separate.

Can be used anywhere that a Thermometer is required.

Revolution Counter.

These instruments are of the round type and can be reset to zero very readily.

They are for either right or left rotary and reciprocating motions of Marine or Stationary Engines, Motors, Generators, Machine Tools, Shafting, Printing Presses, Fire Winding Machines, etc.

The instrument is made in 6, 8, 12, 10, and 12-inch sizes, and has a capacity of 99,999,999.

All parts are highly finished. All parts subject to wear are made of bronze or steel.

If properly cared for these counters will last a life time. We have also the square counters.

### APARTMENT HOUSES.

**SAN FRANCISCO.**—Apartment house 3 story and base, frame, \$15,000. Architect, Charles J. Rosseau, 46 Kearny street, S. F. Owner, James Frazer. Location, northwest 4th avenue and Hugo street, covering area of 25 by 90 feet. Will contain six apartments of four rooms, bath and sleeping porch. Interior red gum and hardwood, hardwood floors and wall beds. Steam heat and hot water service. Tile bath rooms. Exterior covered with Klingstone. Plans being prepared.

**SAN FRANCISCO.**—Apartment house 3 story and base, frame, \$15,000. Architect, Earl B. Scott, Humboldt Bank Bldg., S. F. Owners name not given. Location Fifty Vara District. Will contain 12 apartments of two rooms and bath. Interior pine and hardwood with tile in the baths and wall beds. Steam heat and hot water system. Exterior covered with cement plaster on metal lath. Plans being prepared.

**SAN FRANCISCO.**—Apartment house, 4 story and base, brick and steel, \$40,000. Architects, Rosseau & Rosseau, 110 Sutter street, S. F. Owners, Girard Investment Co. Location, east Leavenworth, 44 south Geary, covering area of 41 by 65½ feet. Will contain 23 suites finished in pine and hardwood with tile baths and wall beds. Steam heat, automatic elevator, oil burning system hot water supply and vacuum cleaning. Marble and tile entrance. Exterior faced with pressed brick trimmed with terra cotta. Plans complete and segregated figures being taken.

**SAN FRANCISCO.**—Apartment house, 4 story and base, brick and steel, \$45,000. Architects, O'Brien Bros., 240 Montgomery street, S. F. Owners, O'Brien Bros. Location, south Bush 187 west of Mason covering area of 42 by 137½ feet. Will contain 29 suites of two rooms and bath. Bath rooms tile floors and wainscot. Steam heat, elevator service, oil burning equipment, hot water system and vacuum cleaning. Marble and tile wainscot. Exterior faced with marble. The plans are complete and segregated figures are being taken.

**SAN FRANCISCO.**—Apartment house, 3 story and base, frame, \$10,000. Architect, John J. Foley, 46 Kearny street, S. F. Owner, Mr. Sullivan. Location, west Dolores, between 17th and 18th covering area of 30 by 75 feet. Will contain six suites of four rooms. Interior finished in pine and elm panels. Wall beds, steam heat and hot water system. Tile in bath rooms. Exterior covered with cement plaster on metal lath. Plans are being prepared.

**MARTINEZ, CONTRA COSTA CO., CAL.**—Apartments and store, 2 story and base, frame. Cost not stated.

Architect, James T. Narbett, 704 Macdonald street, Richmond. Owner, Frank Prosser. Will contain four stores and eight apartments with bath. Interior finish will be of pine. Wall beds, tile bath rooms and hot water system. Patent store fronts. Exterior covered with cement plaster on metal lath. Plans being figured.

**MARSHFIELD, ORE.**—Apartment house, 2 story and base, brick and stone, \$25,000. Architect, Fred Magnusson, Marshfield. Owner, A. C. Goring. Will cover an area of 50 by 145 feet with stores on first floor. Interior finish pine and hardwood veneer. Wall beds, tile in baths, steam heat and hot water system. Exterior faced with cut stone and brick. Plans being prepared.

**SAN FRANCISCO.**—Apartment house, 4 story and base. Class C construction, \$40,000. Architects, Rosseau & Rosseau, 110 Sutter street, S. F. Owners, Girard Investment Co., Location, east Leavenworth, 44 south Geary, covering an area of 41 by 65½ feet and arranged for 23 apartments of two and three rooms. All suites will have wall beds, private baths finished in tile. Interior finish, pine and hardwood with hardwood floors. Steam heat, automatic elevator, hot water system and vacuum cleaning. Marble and tile wainscot. Exterior faced with pressed brick and terra cotta. Plans are complete.

**OAKLAND, CAL.**—Apartment house, 3 story and base, brick veneer, \$35,000. Architects, Oliver & Thomas, Pantages Theatre Bldg., Oakland. Owner, C. L. Donohoe, 1463-76th avenue, Oakland. Location corner of Harrison and Grand ave. Will contain 25 suites of two and three rooms with baths and wall beds. Interior finish pine and elm panels. Hardwood floors, steam heat, oil burning plant, and hot water system. Tile in the baths. Exterior faced with pressed brick. Plans complete and in the hands of the owner who is taking figures.

### Contracts Awarded.

**SAN FRANCISCO.**—Apartment house 3 story and base, frame, \$22,500. Architect, A. J. Laib, Russ Bldg., S. F. Owner's name not given. Contractor, Henry Conrad, 2854 Pine street, S. F. Contract price, \$22,500.

### BATH HOUSES.

**SAN MATEO, SAN MATEO CO., CAL.**—Bathing pavilion, 1 story frame. Cost not stated. Architect, W. H. Toepke, 46 Kearny St., S. F. Owners, City of San Mateo. Location, Bay Beach. Will include dressing rooms, open air pavilion, cafe and grill rooms. Interior finish, pine. Exterior, cement plaster on metal lath. Plans being prepared.

**BONDS**

**SANTA PAULA, VENTURA CO., CAL.**—For the purpose of constructing and maintaining a system of good roads Ventura County last week voted bonds of \$1,000,000. The election carried by a large majority. The proceeds of the sale of the bonds will finance the construction of the highways and bridges.

**MILWAUKEE, ORE.**—Bonds of \$25,000 have been voted for the extension and improvement of the water system. Bids on the work will be called for when the bonds have been sold. Engineer J. W. Morris, Morgan Bldg., Portland, is now preparing plans for the work which will include the construction of a reservoir.

**SACRAMENTO, CAL.**—Members of City School Board will meet with a committee from the Federation of Improvement Clubs for the purpose of discussing a bond issue of \$2,500,000 for new schools to be erected in Sacramento.

**MARYSVILLE, YUBA CO., CAL.**—With a vote of more than four to one the proposition of incurring a bonded indebtedness of \$18,000 for the extension of the drainage sewer system out D street from its present terminal at Tenth street to Fourteenth. The vote cast was 709 for the issue and 162 against.

**SAN MATEO, SAN MATEO CO., CAL.**—A plan has been started to bond this city to improve Coyote Point making it an attractive beach resort. The plan has met with much favor and it is expected that immediate action will be taken in setting a date for the election.

**REDONDO BEACH, LOS ANGELES CO., CAL.**—At a recent meeting of the City Trustees, three bids were received for the purchase of the bonds voted for the construction of a pleasure pier. subject to a deposit of \$25 to insure their return, or may be seen at the navy yard, New York, N. Y. WM. M. SMITH, acting chief of bureau.

### Notice to Contractors.

Office of the Board of State Harbor Commissioners, Union Depot and Ferry House, San Francisco, California.—Sealed proposals or bids will be received at this office at or prior to **11 o'clock a. m. on FRIDAY, September 10, 1915**, for furnishing materials and constructing wood-block pavement on Pier No. 25, on the waterfront of the City and County of San Francisco, in accordance with the plans and specifications prepared therefor by the Chief Engineer and adopted by the Board August 9, 1915, and on file in this office, to which special reference is hereby made. The materials to be used in this work shall consist of the requisite quantities of wood for paving blocks, roofing felt, gravel, sand and asphalt. All materials will be subjected to a rigid examination and test, and if found defective, undersize, unsuitable or not as specified, will be condemned and must be immediately removed from the work by the contractor at his expense.

No bid will be received unless it is made on a blank form furnished from this office. Each bid shall be accompanied by a certified check for an amount equal to five (5) per cent of the amount of the proposal to be made payable to the order of the Secretary of the Board, conditioned that if the proposal is accepted and the contract awarded, and if the bidder shall fail or neglect to execute a contract and to the satisfaction of said Board, and said bond shall be effective as provided in an act approved May 1, 1911, for the protection of material men, mechanics and laborers.

Bids will not be considered by this Board unless delivered to the Secretary or to the Assistant Secretary at the office of the Secretary, Room 17, Ferry building, at or prior to **11 o'clock a. m. on FRIDAY, SEPTEMBER 10, 1915**, at which time and place the bids will be opened.

The Board reserves the right to reject any or all bids if deemed for the best interests of the State.

Bidders are invited to be present at the opening of the bids.

Plans and specifications of this work to be had at Room 18, Ferry Building, upon depositing \$20.00 for same, will be returned on return of plans and specifications.

Bidders are requested to mark envelopes containing bid "Bid for Wood Block Pavement, Pier No. 25."

J. L. DAWYER,  
THOMAS S. WILLIAMS,  
J. H. McCALLUM,  
Board of State Harbor Commissioners.  
JEROME NEWMAN,  
Chief Engineer.

LEO V. MERLE, JR.,  
Secretary.

### Notice To Contractors

Office of the Board of State Harbor Commissioners, Union Depot and Ferry House, San Francisco, California.—Sealed proposals or bids will be received at this office at or prior to **11 o'clock a. m. on Friday, September 10, 1915**, for furnishing materials and constructing wood-block pavement on the adjacent bulkhead wharf, on the waterfront of the City and County of San Francisco, in accordance with the plans and specifications prepared therefor by the Chief Engineer and adopted by the Board August 9, 1915,

and on file in this office, to which special reference is hereby made.

The materials to be used in this work shall consist of the requisite quantities of Portland cement which will be furnished to the contractor by the Board) yellow fir lumber, redwood lumber, sand, metal lath, castings, structural steel, rods, bolts, spikes, roofing, and painters' materials, glass, window frames, etc. All materials used must be of the best of their respective kinds if not especially specified herein. All materials used in the structure will be subjected to a rigid examination and test, and if found defective, under size, unsuitable or not as specified, will be condemned and must be immediately removed from the work by the contractor at his expense.

No bid will be received unless it is made on a blank form furnished from this office. Each bid shall be accompanied by a certified check for an amount equal to Five (5) per cent of the amount of the proposal, to be made payable to the order of the Secretary of the Board, conditioned that if the proposal is accepted and the contract awarded, and if the bidder shall fail or neglect to execute a contract and give the bond required within six days after the award is made, in the satisfaction of said sum mentioned in said check shall be deemed liquidated damages for such failure and neglect, and shall be paid into the San Francisco Harbor Improvement Fund.

The bond required to be not less than one-half of the amount of the bid, with two or more sureties to be approved by the Board of State Harbor Commissioners, and conditioned for the faithful performance by the contractor of all the terms and conditions of said contract according to the true intent and meaning thereof, and to the satisfaction of said Board, and said bond shall be effective as provided in an act approved May 1, 1911, for the protection of material men, mechanics and laborers.

Bids will not be considered by this Board unless delivered to the Secretary or to the Assistant Secretary at the office of the Secretary, Room 17, Ferry building, at or prior to **11 o'clock a. m. on FRIDAY, SEPTEMBER 10, 1915**, at which time and place the bids will be opened.

The Board reserves the right to reject any or all bids if deemed for the best interests of the State.

Plans and specifications of this work to be had at Room 18, Ferry building, upon depositing \$20.00 for same, will be returned on return of the plans and specifications.

Bidders are requested to mark envelope containing bid: "Bid for shed on Pier No. 35 and the Adjacent Bulkhead Wharf."

J. L. DAWYER,  
THOMAS S. WILLIAMS,  
J. H. McCALLUM,  
Board of State Harbor Commissioners.

Laramie Unit, North Platte Project, Nebraska-Wyoming, involving the excavation of approximately 1,406,000 cubic yards of material. This work is situated near the Bridgeport-Guiney line of the Chicago, Burlington and

Quincy Railway in the vicinity of Ft. Laramie, Wyoming. For particulars address the United States Reclamation Service, Washington, D. C.; Denver, Col.; or Ft. Laramie, Wyoming. A. P. DAVIS, chief engineer.

#### PROPOSALS FOR COURT HOUSE ADDITIONS.

The following resolution was introduced in the Alameda County Board of Supervisors:

Whereas, in the judgment of this Board, it is for the best interest of the County that an addition be made to the County Court House; now, therefore, be it

Resolved, That an addition be made to the County Court House, that the plans and specifications filed August 9, 1915, be and the same are hereby approved and adopted. Be it further

Resolved, That the Clerk of this Board give notice in accordance with the provisions of law of said work by publishing the same in the Oakland Enquirer and that said notice fix the day for the presentation of bids or proposals for said work.

**September 4, 1915 at 10 o'clock a. m.**, at the office of the Clerk of said Board of Supervisors, and that said notice also require that a certified check on some responsible bank accompany said bid for an amount equal to 10 per cent of the amount of the respective bids or proposals, said check to be payable to the Clerk of this Board and to be forfeited to the County of Alameda as the party or parties to whom the contract for said work is awarded fail to enter into the contract for the performance of said work or fail to give bond required by this Board.

On motion by Supervisor Foss, seconded by Supervisor Heyer, the resolution was adopted by the following vote:

Ayes—Supervisors Foss, Heyer, Kelley, Mullins and Chairman Murphy—5.  
TO CONSTRUCT TRESTLES.

The following resolution was introduced:

Whereas, in the judgment of this Board it is for the best judgment of the County that a timber trestle be constructed and the necessary grading be done for the waterway and for footings on the main county road from Alvarado to Centerville, or County Road No. 744, all in Washington Road District, Washington Township, Alameda County, California. Now, therefore, be it

Resolved, That the plans and specifications filed August 2, 1915, be and the same are hereby approved and adopted. Be it further

Resolved, That the Clerk of this Board give notice in accordance with the provisions of law of said work by publishing the same in the Township Register and that said notice fix the day for the presentation of bids or proposals for said work.

**August 26, 1915, at 10 o'clock a. m.**, at the office of the Clerk of said Board of Supervisors, and that said notice require that a certified check on some responsible bank accompany said bid for an amount equal to 10 per cent of the amount of the respective bids or proposals. Said check to be payable to the Clerk of this Board and to be forfeited to the County of Alameda as agreed and liquidated damages, should the party or parties to whom the contract for the performance of said work is awarded fail to enter into the contract for the performance of said work or fail to give the bond required by this Board.

On motion by Supervisor Kelley, seconded by Supervisor Heyer, the resolution was adopted by the following vote:

Ayes—Supervisors Foss, Heyer, Kelley, Mullins and Chairman Murphy.

#### PROPOSALS FOR BUILDING.

**BUILDING**—Sealed proposals indorsed "Proposals for Magazine Building" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m. September 11, 1915, and then and there publicly opened, for constructing one steel frame shell house with plas-

tered walls and two brick magazines with steel roof trusses at the naval magazine, Puget Sound, Wash. Plans and specifications may be obtained on application to the bureau or to the commandant of the navy yard, Bremerton, Wash. W. M. SMITH, acting chief of bureau.

#### PROPOSALS FOR BRIDGE.

**BRIDGE**—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the United States Reclamation Service, Washington, D. C., until 2 o'clock p. m. September 8, 1915, for furnishing and erecting a steel bridge of three 100-foot spans and a structural steel movable crest with operating machinery for the Vandalla dam of the Milk River project, Montana. For particulars address the United States Reclamation Service, Washington, D. C. A. P. DAVIS, chief engineer.

#### PROPOSALS FOR SUBMARINES.

**SUBMARINES**—The date for the opening of proposals for building submarine boats Nos. 63-7, as fixed by the department's advertisement of May 20, 1915, is hereby changed from August 2 to September 20, 1915. JOSEPHUS DANIELS, Secretary of the Navy.

#### PROPOSALS FOR WHARF CONSTRUCTION.

**WHARF**—Sealed proposals indorsed "Proposals for Reinforced Concrete Wharf" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m. September 15, 1915, and then and there publicly opened, for constructing a reinforced concrete wharf at the United States naval station, Pearl Harbor, Hawaii. Plans and specifications may be obtained on application to the bureau or to the commandant of the naval station named. H. R. STANFORD, chief of bureau.

#### PROPOSALS FOR CONCRETE PIERS.

**CONCRETE PIERS**—Sealed proposals indorsed "Proposals for Concrete Pier" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m. September 15, 1915, and then and there publicly opened, for constructing reinforced concrete torpedo boat piers at the naval station, Pearl Harbor, Hawaii. Plans and specifications may be obtained on application to the bureau or to the commandant of the naval station named. H. R. STANFORD, chief of bureau.

#### PROPOSALS FOR RAILROAD.

**MARINE RAILWAY**—Sealed proposals indorsed "Proposals for Marine Railway" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m. September 15, 1915, and then and there publicly opened, for constructing a marine railway at the naval station, Pearl Harbor, Hawaii. Plans and specifications may be obtained on application to the bureau or to the commandant of the naval station named. H. R. STANFORD, chief of bureau.

#### PAVING BLOCKS.

The main objection offered to wood block paving is that the oil rises to the surface during the hot weather in summer, and makes a sticky mess to walk on that is carried into adjoining buildings. If someone will invent a process for treating blocks, so they will not show sticky on the surface in this way when the weather is hot, it will be a great boon to the wood-paving industry.—The Woodworker.

# ADVANCE NEWS

Classified according to Location

## SAN FRANCISCO.

**APARTMENT HOUSE**.—3 story and base, frame, \$15,000. San Francisco. Architect, Earl B. Scott, Humboldt Bank Bldg., S. F. Owner's name not given. Location, Fifty Vara District. ## Why we guarantee Wybro Panels.

The reason we so unhesitatingly guarantee the WYBRO PANELS is because we have yet to see their equal in point of quality and smoothness.

We have yet to see a better made panel at any price—a panel that will look as well and last as long as the WYBRO.

That is why we give the broadest kind of a guarantee on WYBRO PANELS.

neer's name not given. Owners, Great  
Western Canal Co., Oroville. The Great  
Western Canal Co. has announced that  
the construction of its western canal  
will be started during the coming fall.  
Arrangements have practically been  
completed for rights-of-way. The new  
ditch will be six or seven miles long  
and will run into the rice belt in  
western Butte county. The present sys-  
tem goes to the edges of the rice grow-  
ing district, with its completion more  
than 150,000 acres will be placed under  
water.

LIBRARY.—2 story and base, rein-  
forced concrete, \$100,000. Sacramento,  
Cal. Architect not selected. Owner,  
City of Sacramento. The plans received  
for the proposed library building to  
be erected in the Civic Center at 9th  
and "T" streets, have been taken for  
our consideration by the city com-  
mission. A selection will soon be made.

and the plans selected will be forwarded to the Carnegie Corporation for approval. Three architects from Sacramento submitted plans, J. W. & W. L. Wollert, E. C. Hemmings and C. C. Chitt. All plans call for a building to cost \$100,000.

**LIBRARY**—1 story and base, brick and stone. \$15,000. Grass Valley, Nevada Co., Cal. Architect, William Brown, Nevada Book Bldg., S. F. Owners, City of Grass Valley. Preliminary plans have been prepared and accepted for a one-story building of classic design. Interior will be finished in pine and hardwood with maple floors and metal book stacks. A central heating system, probably steam heat, will be installed. Exterior will be faced with pressed brick. Plans are in the hands of the Carnegie Association for approval. Further mention will be made of the work.

**STREET PAVING**—Cost not stated. Sacramento, Cal. Engineer, City Engineer, Sacramento. Owners, City of Sacramento. Work will soon be started on the paving of more than a mile of concrete roadway, 16 feet wide, in Fair Oaks.

**FURNISHING CRUSHED ROCK**—Cost not stated. Eureka, Humboldt Co., Cal. Engineer, County Surveyor, Eureka. Owners, Humboldt County. Bids will be opened on September 7th at 8 a. m. for furnishing approximately 5,000 cubic yards of crushed rock. Complete particulars can be secured from the County Clerk.

**HIGHWAY CONSTRUCTION**—\$22,600. Sacramento, Cal. Engineer, State Highway Commission, Forum Bldg., Sacramento. Owners, State of California. Only four sets of bids were opened by the State Highway Commission on August 23rd for constructing Division 2, Route 3, Section A of the State Highway in Siskiyou County. E. H. Green of Eureka, presented the low bid at \$22,600. No award was made. A complete list of the bids will be found under the heading of San Francisco in this issue.

**STREET IMPROVEMENTS**—\$15,420. Stockton, San Joaquin County, Cal. Engineer, City Engineer, Stockton. Owners, City of Stockton. At the last meeting of the City Council, plans and specifications for the improvement of North Commerce, North Center, Maple and Ash streets and a resolution ordering the work under resolution of intention No. 529 was adopted. The streets mentioned are to be improved with curbing and guttering and are to be paved with asphalt concrete.

**BRIDGE**—Reinforced concrete. Cost not stated. San Andreas, Calaveras Co., Cal. Engineers Jones, Reddick & Boddy, Humboldt Bank Bldg., S. F. Owners, Calaveras County. Plans are complete and figures will be opened on September 13th at 1 p. m. for the construction of either an arch type or girder type reinforced concrete bridge of 100 feet span, to be erected over the Middle Fork of the Mokelumne River between Railroad Flat and West Point. Plans can be secured from A. W. Poe, County Clerk, San Andreas.

### Contracts Awarded.

**BRIDGE**—Steel and concrete, \$22,600. Dunsmuir, Siskiyou Co., Cal. Engineer, State Highway Commission, Forum Bldg., Sacramento. Owners, State of California. Contractor, E. H. Green, Eureka. Contract price \$22,600.

**BRIDGE**—Steel and concrete, \$17,726. Redding, Shasta Co., Cal. Engineer, City Engineer, Kemmet, Contractors, Portland Bridge Co., Portland, Ore. Contract price \$15,976. The city will furnish the steel at \$1,750.

**LODGE HALL AND STORES**—Two story brick and steel, \$35,000. Stockton, San Joaquin Co., Cal. Architect, Franklyn Warner, San Joaquin Bldg., Stockton. Owner, Peter Jordan. Contractors, P. J. Walker Co., Monadnock Bldg., S. F. Contract price, \$35,000.

**BANK**—1 story and base. Class A construction. \$75,000. Stockton, San Joaquin Co., Cal. Architect, C. W. Dickey, Central Bank Bldg., Oakland. Owners, Stockton Bank of Savings. Contract awarded on percentage basis. Plans being prepared.

### CANDIDATE FOR COUNTY SURVEYOR.

#### NOTES FROM THE HAWAIIAN ISLANDS.

[A. P. Taylor, correspondent, Honolulu, July 30.]

#### New Bulkhead Wharves.

The Board of Harbor Commissioners is preparing specifications for the new bulkhead wharves to be built in Honolulu at the foot of Fort street. These wharves will be designed to accommodate cargoes discharged at the rate of 2,500 to 3,000 tons in 24 to 36 hours. Cargoes of this size are brought from Oriental ports by the Pacific Mail and Toyo Kisen Kaisha steamers, the vessels remaining in port on an average of 24 hours or less. This will complete a system of wharves from the Navy wharves to the Oceanic Steamship Co's pier.

#### Gala in Bank Deposits.

Banks and trust companies of Honolulu during the year ended June 30, 1915, have shown the greatest gain in combined resources for any 12 month period in their history. The increase in bank deposits for the 6 month period to December 31, 1915, was \$1,378,208, followed by the further increase of \$3,549,128 for the first six months of 1915. The total bank deposits to 1914-15 amounted to \$30,000,000 and in 1915 the total was \$31,378,208.

## STATE HIGHWAY BIDS.

Only four sets of bids were opened by the State Highway Commission on August 23rd for constructing Division 3, Route 3, Section A of the State Highway in Siskiyou County. F. H. Green of Eureka presented the low bid at \$1,600. No award was made. Following is a complete list of the bids received:

Siskiyou Co., Div. 2, Route 3, Sec. A.	
P. J. Lechner, Alameda.....	\$23,991
Moffett & Mead, S. P.....	24,750
F. H. Green, Eureka.....	22,600
Pac Coast Con. Co., Fresno.....	27,300
<b>Engineer's Estimate, \$27,834.38.</b>	

Materials furnished by the State: Reinforcing steel, Portland cement, coarse and fine aggregate and curb inlets. Total, \$16,628.35.

## FIRE-RESISTING LUBRICATING OIL.

One of the new offerings cataloged by a concern devoting its main efforts toward the production of fire-proof paint, is what is termed fire-resisting lubricating oil. It would appear from the description that a lubricating oil is selected and simply treated with a fire-proofing liquid, the same liquid that is added to the lead, zinc and linoseed oil mixture to make fireproof paint.

It is claimed that lubricating oil so treated will prevent hot boxes if used before starting. This puts a new angle to the hot-box problem, for undoubtedly the combustible nature of the oil is one of the things that increases the element of danger from hot journals. With a lubricating oil made fire-resisting and practically non-combustible, the nightmare of fire resulting from a hot box should practically disappear. —The Woodworker.

## BUSINESS ADVERTISING IN 1748.

Judging from many advertisements in the early New York newspapers, the numbers of buildings were very little used. Business houses were usually designated by a characteristic sign or by the locality to their well known residents. An example of the latter is seen in the following from the New York Gazette of December, 1748. Smith's Fly was at the foot of Maiden Lane.

"Henry Hansen, who lately kept his store next door to Mr. John Groesbeek's, is now removed to Capt. Richard Langdon's, in Smith's Fly opposite to Col. De Peyster's, Treasurer, where he now keeps his Store. He has likewise imported in the last Ships from London, a fresh Assortment of European Goods."

## ECONOMY AND WAR.

All of the warring nations of Europe are on a forced economy basis, made necessary by the immense requirements of the war. To begin with, the absence of millions of bread-winners in the army forces all who are dependent on the absent soldiers to live on little, because they have the most meager means, or none at all, to provide the necessities of life. Beyond that are the men whose business or

labor has been restricted by the war so that they are earning much less than in times of peace. Even those who are in comfortable circumstances know not what disaster the war may bring on them, and therefore they are husbanding their resources.

Beyond the circle of these classes are the well-to-do who do not need to economize, but are affected by the spirit of the times or the appeals of the government.

With all these influences at work it may be considered certain that the great majority of the people of Europe are consuming less of the necessities and using fewer of the luxuries of life than in normal times.

There are not so many commodities available for use. With millions of producers away to the war and the labor of millions of others diverted from normal production to the making of war munitions, it is evident that the supply of goods and services ordinarily available in times of peace is greatly curtailed. Under such circumstances it is doubtful whether the appeals of are either necessary or effective in inducing any greater frugality than naturally arises from existing conditions.

The statement has been made that by strict economy and saving the people of the warring nations can almost pay the cost of the war. The statement, of course, is an exaggeration, but it is a fact, none the less, that wars never prove as burdensome to a people as would be judged from the immense expense and accumulation of debts arising from them. This is because of economies in living, diversion of labor and capital from peaceful pursuits to those of war, and finally because of greater efficiency of the entire working population and machinery of production, enforced by necessity.

This explains the enormous resources that become available for war, and affords a reason why war on a huge scale can be carried on long after the predicted period for exhaustion to occur. Many persons thought that Europe would have to quit fighting within a year because of sheer inability to furnish the means for carrying on a conflict on such a gigantic scale, but war loans for 15 billion dollars have been issued in the first year of the conflict, and there are no signs yet of material or financial exhaustion.

The pity of it all, aside from the loss of life and the suffering of the soldiers and their loved ones, is that hundreds of millions of persons must be denied necessities and pleasures of living while their governments are destroying property on a scale without precedent in a vicious effort to settle by force a controversy that never should have reached such a stage.—Kansas City Star.

## ROAD BUILDING IN SCHOOLS.

## Plan to Interest Oklahoma Boys in Good Roads Movement.

The good road educational movement is to reach the country boy in Oklahoma through the rural schools, as the result of advocacy of such a plan by Colonel Sidney Suggs of Ardmore, state

highway commissioner, who has secured the indorsement and co-operation of other prominent state officials.

The plan as outlined by Colonel Suggs is to organize a good roads and tree planting club in every rural school in the state, have the county or state highway engineer visit the schools, following the organization of the clubs, and proceed to lay out one-fourth or one-half mile of road leading from the school house. In every instance the school club shall assist in the survey, the laying out of the road, in securing the easements from the abutting property owners. The club boys shall carry the chain, set the grade stakes, learn just how plans and profits are made and be taught that this piece of good road will be used for generations to come.

Only the building of a common dirt road will be undertaken at the start by the boys. They will be taught that if they desire in the future to put gravel or macadam on the road that they have in the well-built dirt road a foundation already prepared for such an improvement. In this manner, too, they may be taught to use such materials as are most suitable and convenient at the time and the nearest at hand.

## NEW GOVERNMENT PUBLICATIONS.

The Superintendent of Documents, Washington, D. C., announces that he received in stock during the week ended August 7, the following new United States Government publications of a business character, which he will sell at the nominal prices affixed:

**Durability of Cement Drain tile in Al- soils.** Standards Bureau of Technology, Paper 41—Study of the manufacture of drain tile, installation of drain tile, testing, results of tests, etc. Price, 35 cents.

**Vitrified Brick Pavement for Country Roads.** Agriculture Department Bulletin 216.—Practical information concerning raw materials, manufacture, physical characteristics, construction, cost and maintenance. Price, 10 cents.

**Portland Cement Concrete Pavement for Country Roads.** Agriculture Department Bulletin 249.—Practical and important work on materials, structural methods, organization, cost, and maintenance, with summary of conclusions. Price 15 cents.

## SAVING LEMON BY-PRODUCTS IN CALIFORNIA.

A subsidiary company to the California Fruit Growers' Exchange has selected Corona, Riverside county, as the site of a factory for the manufacture of citrate of lime, lemon oil, lemon emulsion, and other by-products.

The new company is capitalized at \$100,000 and its shareholders are all lemon growers.

An Italian fruit seller became greatly annoyed at people stopping at his stand and trying his fruit by feeling of it; so he placed the following sign in front: "If you must pincha da fruit, pincha da coccauul." Christian Register.

## Catarrh Can Be Relieved

**T**HERE IS NO NEED for you to continually suffer from Catarrh and Cold in the Head. It makes you miserable, doesn't it? You really don't care whether things go right or not and you wonder when you'll ever get over it. And you will not get over it until you get the Clover Leaf Catarrh Remedy, and use it. It will relieve you, and you'll wonder why you had not used it sooner. We are so positive that this will relieve you of your Catarrh or Cold in the Head, that we guarantee you satisfaction or we will refund your money.

# Building and Engineering News

Devoted to the Architectural, Building, Engineering and Industrial Activities  
of the Pacific Coast.

Issued Weekly, \$3.00 per year

San Francisco, September 8, 1915

Fifteenth Year, No. 36

The election for the three million dollar Marin County Municipal Water District bonds carried four to one, and the county will soon have its own water system.

The county plans to purchase the North Coast Water Company, which serves water to Mill Valley, Belvedere and Tiburon, and the Marin Water and Power Company, which supplies the towns of San Rafael, San Anselmo, Fairfax, Larkspur, Corte Madera and San Quentin.

The passage of the bonds also provides for the purchase of nearly all of the north and west slopes and a portion of the south slope of Mount Tamalpais. Among other things, it means that the mountain will be preserved as a public park.

In order to obtain permanent improvements of local streets the City Council of the City of Alameda decided that in the next tax rate there will be a special fund of fifty cents on each \$100 valuation, or about \$100,000. This will be utilized in new street work, but the Council has not yet decided on what thoroughfares the money will be expended.

The use of ordinary tax fund for new street work is, to say the least, a lack of business judgement, ten year bonds is the most suitable way of paying for new work, taxes are meant for running expenses and maintenance charges.

The design of the ocean beach esplanade has been completed by City Engineer O'Shaughnessy, who reports that bids will soon be invited for the construction of the first unit, which is to be built along the beach for 650 feet from a point near the terminus of Cabrillo street.

An appropriation of \$50,000 has been made by the Supervisors for the first section. The City Engineer estimates the cost of its construction at \$48,500. The intention is to build an additional section each year. The Chamber of Commerce, which initiated the project, figured the cost of an esplanade for the whole length of the beach at \$1,000,000.

A reinforced concrete seawall will be built to check the waves. This wall is to have a concave curve to counteract the force of the breakers.

Broad concrete steps will descend from the wall to the sand, and in front of these steps interlocking piles of reinforced concrete will be driven into the sand to a point fifteen feet below mean tide, as a protection against the underseour of the seas. The main wall will be supported by pedestal piles, which will be driven ten feet apart.

The wall is to have an ornamental top, and between this coping and the Great Highway will be an artificial stone walk, twenty-five feet wide. The walk will have a slight slope, so that water may run off it through scupper holes in the wall.

From the walk concrete stairways will lead to the sand. The stairways are to be placed 150 feet apart. The Park Commission is to co-operate in the construction of the esplanade, and will ornament it with plants and flowers.

As we understand the design of the wall, it is to have a parapet with a curved face toward the ocean, and this is, in our opinion, the weakest part of the design, if it is not a very considerable distance above the high water plane, as is evidenced by experience with similar designs in Europe. The curved section has nothing to recommend it but the "looks." Long flat slopes are used in

Holland, which country has been battling with the sea for centuries, and the methods developed there are the outcome of long years of experience.

Initial steps for the control of Southland streams were taken by the Board of Supervisors in appointing James W. Reagan engineer of the Los Angeles County Flood Control District at a salary of \$3,000 a year.

Under resolutions drafted by Supervisor Hamilton, Engineer Reagan is instructed to investigate and submit plans, with cost, of conserving flood waters and protecting menaced lands and the harbor.

The appointment of Engineer Reagan was the climax of a superheated meeting, in which personalities were so freely thrown about that Supervisor Norton surprised the gallery by asking for fewer insinuations and more business.

As a member of the recently-dissolved County Board of Engineers, flood control, Engineer Reagan submitted a minority report to the Board of Supervisors, in which he attacked the scheme to divert the Los Angeles River from the harbor to Alamitos Bay through the medium of a dam at Dominguez junction and an outfall channel. Instead, he suggested that the waters of the Los Angeles River be thrown into the channel of the San Gabriel River and the combined flow carried to Alamitos Bay through a dredged channel across the Clearwater divide.

The submission of this minority report elicited the censure of both Chairman Pridham of the Board of Supervisors and Supervisor Woodley, the head of the flood control committee. In the balloting they maintained a solid front of opposition to the appointment of Mr. Reagan.

Engineer Reagan was connected with the Harriman lines many years in a confidential capacity. During eight of these years he was directly under Col. Epes Randolph, President of the Southern Pacific of Mexico, and an engineer of international note. Two letters in which Col. Randolph warmly commented the attainments of Mr. Reagan were read by Supervisor Hamilton.

"His views on the subject are sound," said Col. Randolph, referring to Mr. Reagan and the county's flood control problems, with which he is acquainted. "If carried out in accordance with his suggestion, the work will be accomplished to your entire satisfaction."

Among the important work Mr. Reagan did for the Harriman lines was the surveying and construction of a large part of the Southern Pacific of Mexico and the survey work for the line which E. H. Harriman was planning on the East Coast of Mexico at the time of his death. In addition to railroad work, Mr. Reagan has had much experience in drainage and other engineering work, in both this country and Africa. His home is at Long Beach.

Under the resolutions of Supervisor Hamilton, by which Mr. Reagan was chosen engineer, the board is to await the maturing of final flood control plans before doing anything towards providing the money.

"The Los Angeles County Flood Control Association," says the final paragraph, "will, in the future as in the past, be taken into consultation; and the citizens of the county generally will be accorded every opportunity to criticise the plans and propose amendments thereto before final action shall be taken."

The Los Angeles Advancement League appointed a committee of fifty to work for the alternative plan it advocates for flood control. This plan calls for diversion of the waters of the San Gabriel River to a large storage basin and the utilization of this water for irrigation.

## Metropolitan Building Exhibit.

LOS ANGELES, CAL.

By George Nelson, C. E.

The Metropolitan Exhibit of building materials and appliances is today an institution in the life of the architects, builders and owners in the City of Los Angeles, and it was left to a young and pretty woman, Miss M. L. Schmidt, to conceive the idea and develop it and bring it to a successful conclusion, for it is an unqualified success vouched for both by its present exhibitors and those firms not yet exhibiting, but clamoring for space as yet unavailable in its present location.

A little over a year ago Miss Schmidt conceived the idea that an exhibit of materials, appliances and furnishings used in the construction and equipment of office buildings, flat buildings and apartment houses, and last but not least,

The exhibit is being extensively patronized by architects and builders, who take their clients in to show them the many modern and up-to-date materials, appliances and furnishings on the market and an exhibit here, giving the owner a birdseye view, so to speak, of the extensive and varied line he can have to select from. People, who are planning to build, be it apartments or bungalows, come here to study all the newest and most modern inventions in the art of making the human habitation and its environments sanitary, comfortable and artistic, and

Miss M. L. Schmidt, Founder of the Exhibit.

in the construction of the multitude of independent Southern California homes, would be of practical benefit to architects, builders and owners, and in addition possess a highly and not easily estimated educational value for the whole population of Southern California. The young lady did not hesitate to carry her ideas into practical execution, and the sixth floor of the Metropolitan Building on the corner of Fifth and Broadway was rented and material men, manufacturers, architects and inventors importuned to take space, and so successful has the enterprise proven itself and that now after only a year's existence, the growing demand for exhibit space is forcing Miss Schmidt to plan larger accommodations.

The exhibit is very artistically arranged, and the visitor instantly gains the impression that the whole arrangement was originated and carried out by a young woman with a highly developed artistic taste and a well educated mind. An artistic catalogue of exhibitors with full page ads containing illustrations and descriptions of the different exhibits distributed to visitors.

Interior View of Exhibit.

the exhibitors all testify to the good results they derive.

Most of the building materials are arranged in panels or wall partitions showing actual construction and use of materials. There are walls of ordinary brick, of in-

Eveready Ironing Board.

terlocking hollow tile, of pressed brick, of enameled brick, of vitrolite, of artificial stone. Roofing of all kinds are shown both in the samples and on models of Swiss

Chalets and Bungalows. Multicolored enameled tile and marble and artificial stone and skagliola are shown in different grate and mantel piece arrangements.

Several metal lath and plastering methods are used in models and also many ways of waterproofing and fire-

ash and garbage elevators and refrigerators. Improvements in windows and doors are shown in the exhibit of the Simplex window, the Whitney window, the Shelby window, the Hippolite window and the Ideal window. Windows and doors furnished with the Monarch Metal

Help Her Improved Sanitary Kitchen Sink and Refuse Separator.

proofing walls and roofs. The waterproofing method by the Cement Gun is elaborately shown, and the various waterproofing compounds and chemicals are extensively and practically displayed for open inspection by visitors. Sil. O. Cel. and its many forms and qualities are shown in actual building sections.

The interior finishing is represented by the several kinds of wall board, such as Beaver Board, Amiwud, Compo-board and sanitary wall and floor finishes, by white

Weather Strips, the disappearing roller screens and the Hippolite Screens, the Venetian Blinds. A decided improvement in bath room fixtures is exhibited by "The Improved Sanitary Fixture Company" in their "Boudoir" Bath and the "Help Her" sanitary kitchen sink.

The heating and ventilating and lighting of buildings is remarkably well shown by a number of exhibits that can be put in actual operation and the running of the furnaces, etc., are shown to visitors. The Monrovia Solar

Peerless Nook Seat Folding Bed Exhibit.

enamel tile and by Vitrolite and Opalite. Paints, varnishes, floor waxes and tints are also lavishly exhibited. The built-in features of furniture, which is gaining ground rapidly in all of our modern buildings, is well represented by wall beds of all kinds, ironing boards, ice chests, kitchen cabinets, davenport beds as well as other furniture and utensils such as washing machines,

Heater is also on exhibit here, installed in a small cottage. Electrical fixtures of a manifold variety are displayed in a section for themselves, and all the leading manufacturers are represented by the Southern California electrical contractors and dealers. A bountiful supply of catalogues and descriptive literature is kept constantly on hand at each exhibit.

## Lessons from the Exposition.

Collected by George Nelson, C. E.

### The Foxboro Exhibit of Indicating and Recording Instruments.

(Continued from Sept. 1, 1915.)

Indicating Electric Pyrometers.

(Portable Type.)

These instruments are made especially for Portable Work. They are made in such a way that when transporting from place to place, the pointer is lifted from its bearing so that it is in no way affected by jars or vibration.

Although the instrument is robust in construction and will stand considerable hard usage, it is very sensitive and can be depended upon for accuracy.

Many engineers doing power plant efficiency work, and also in other fields where high temperatures are important are using this instrument with great success.

You should investigate this Pyrometer before placing your order, as it is the most improved type of Portable Pyrometer now on the market. It can be supplied for any range up to 3,000 degrees Fahr.

Portable Thermographs.

8-inch Size, 11x5x12 inches.....Weight, 8 lbs.

10-inch Size, 13x5x11 inches.....Weight, 10 lbs.

12-inch Size, 15x5x16 inches.....Weight, 12 lbs.

There are many requirements in the Engineering Field for Portable Recording Thermometers, and to meet this demand, we are manufacturing a very complete line of instruments for this work.

The rugged construction of our instruments make them very satisfactory for this class of work, and they have been universally adopted by efficiency and consulting engineers.

The above illustration is our Portable Self-contained instrument for ordinary room temperatures. This instrument can be made, however, in the long distance type for recording any temperature from -60 to 800 degrees Fahr.

This instrument comes complete with all necessary accessories for operation, can be picked at a moment's notice and is ready for service.

Model "A" Independent Gauge Movement.

Our Model "A" independent non-corrosive movement is considered the highest standard of gauge construction.

The entire movement is independent of the case.

The Plates and Segments are made of bronze; Pinions and Arbors of German silver.

The Bourdon Tube is made of special non-corrosive composition, and will not set.

These Indicating Gauges are made in all sizes up to 24 inches, for any pressure up to 20,000 pounds per square inch.

Syphon Gauges.

These instruments are for measuring the low pressures of gases on the well-known "U" type principle.

All metal parts are made of brass and heavily nickel-plated so that the instrument is durable and presents a handsome appearance.

The glass legs are so held at both the top and bottom so that they are not subjected to strains. The stuffing boxes at the ends of these glass legs are made in such a manner that all leakage is prevented, and if a glass should by any possibility be broken, a new one can be very easily inserted.

The Boxwood Scale is accurately divided and clearly numbered and held firmly in place so that slipping is impossible. A black metal scale with white figures can be supplied if desired.

This Gauge is made in any size from 4 to 24 inches water.

### Recording Hygrometers.

These Hygrometers are built upon the same principle as our Recording Thermometers except that they have two pens—one to record the dry bulb temperatures, and the other the wet bulb temperatures. The instrument traces upon the chart two distinct records and reading the difference between them at any one point and consulting the chart sent with the instrument, the humidity of the air can be quickly ascertained.

This instrument is exceedingly accurate and has nothing about it which will quickly deteriorate.

It is made in both the self-contained and long distance types for any ranges between freezing and boiling points of water.

If desired for test purpose, it can be supplied in a portable carrying case.

They are being used extensively in mines, textile mills, schools and places where the need of proper humidity is being realized as never before.

### Stationary Tachometers and Tachographs. (Dr. Horn System.)

We have the most complete line of Tachometers and Tachographs in the world. Wherever accurate speed measurement is required, you will find the Dr. Horn instruments.

Instruments to both indicate and record can be supplied.

The cut shows our "C-23" Tachograph which is especially adapted for indicating and recording engine speed.

We have Tachographs for recording percentage of fluctuations, Tachographs for recording number of feet per minute of paper being made by paper machines, also Tachographs for mine hoist apparatus, to record the complete data of the operations of the hoist.

### Portable Recording Gauges.

8-inch Size, 11x5x12 inches.....Weight, 8 lbs.

10-inch Size, 13x5x14 inches.....Weight, 10 lbs.

12-inch Size, 15x5x16 inches.....Weight, 12 lbs.

For field service a portable instrument is necessary and must be constructed in such a way as to withstand the hard usage that it is liable to be subjected to.

"Foxboro" Portable Recording Gauges are especially

adapted for this work, as their improved actuating tubes do not have to be clamped while being transported from place to place.

They will withstand and can be depended upon at all times to give authentic records.

For gas work, we have designed a special Recorder with "U" Gauge in the same case. This makes an ideal outfit for gas companies.

### Mechanical Time Recorders.

These instruments are constructed to record the time and amount, by direct attachment, of certain mechanical actions, such as the operation of slice gates, dampers, gate valves, governors, etc.

Absolutely dependable.

Made to fit all conditions.

### Charts.

Special attention has been paid to the design of all "Foxboro" Charts.

They are made in three sizes for 8, 10 and 12-inch instruments.

They have long open scales, clear cut unbroken lines, night and day plainly designated by solid and skeleton type.

All our charts are made from figures given to thousandths of an inch, with the result that our instruments are extremely accurate and can be depended upon for authentic records.

**Temperature Controllers—Interior Construction.**

This illustration has been inserted to show the simplicity of the Foxboro Controllers.

The air control valve is operated by our helical tube, which has proven so successful in "Foxboro" Recording Thermometers.

There is absolutely nothing in this construction that can get out of order, or cause any serious trouble. Simplicity is the keynote. Accuracy is the result.

**Portable Tachometers.**

(Dr. Horn System.)

These Tachometers are the most accurate, compact and durable on the market. Thousands of them are daily proving their efficiency. They are single spindle, multi-speed Tachometers and are absolutely Dead Beat.

The Dr. Horn system is considered standard the world over. Every large engineering concern in the world is using these instruments for test purposes.

Any range from 25 to 20,000 R. P. M. can be supplied.

The instrument complete in leather carrying case with all accessories weighs 17 ounces. By far the most satisfactory instrument for direct reading of speeds that has ever been constructed.

**Electric Time Recorders.**

(Round Chart Type.)

Our electrical Time Recorders are similar to the Mechanical Time Recorders except that they can be operated at a long distance by electricity, and only show the duration of certain operations, and not the amount of mechanical motion.

They are adaptable for recording machine operations and are very easy instruments to install.

Above is shown the round chart type, which can be fitted with one to twelve pens as required.

**Electrical Time Recorders.**

(Tape Chart Type.)

This instrument is similar to the one illustrated on the preceding page, except that instead of the chart being round it is rectangular, and is recommended where close time observations are necessary.

Chart speed of 1 to 6 inches an hour may be obtained if desired.

The instrument may be equipped with any number of pens up to 8.

It is especially adapted for Hydraulic Presses and Moulding Machines.

### APARTMENT HOUSES.

**SAN FRANCISCO**—Apartment house and store, 3 story and base, frame, \$19,500. Architect, P. Righetti, Phelan Bldg., S. F. Owner, F. Tomasini. Location, southeast corner of Judah and 8th avenue, covering an area of 51½ by 100 feet. Arranged for two stores and fourteen suites of two and three rooms. Interior finish pine and elm panels with some hardwood floors. Central heating system, hot water system and vacuum cleaning. Wall beds and private bath rooms. Tile floors and wainscot in baths. Exterior covered with cement plaster on metal lath. Plans complete and figures under advisement.

**OAKLAND, CAL.**—Apartment house and stores, 2 story and base, frame, \$30,000. Architect, Merrill Newsom, 1748 Broadway, Oakland. Owner, A. F. Verum. Location, 35th avenue and Boulevard. Will contain stores on first floor and a number of two and three room apartments on upper floor. Interior finish, pine and elm with some hardwood floors. Steam heat and hot water system, wall beds and private baths. Bath rooms finished in tile. Exterior covered with cement plaster on metal lath. Plans being prepared.

**MARTINEZ, CONTRA COSTA CO., CAL.**—Apartment house and stores, 2 story and base, frame, \$10,000. Architect, James T. Narbett, 704 Macdonald avenue, Richmond. Owner, James Frosser. Location, Martinez, covering an area of 50 by 100 feet. Will contain stores on first floor and two and three room suites above. Interior finish, pine throughout with some hardwood floors. Central heating system oil burning furnace, patent store fronts and wall beds. Bath rooms finished in tile. Exterior covered with cement plaster on metal lath. Plans complete and figures being taken.

**LOS ANGELES, CAL.**—Apartment house, 2 story and base frame. Cost not stated. Architects, Buchanan & Brockway. Chamber of Commerce Bldg., L. A. Owner, Dr. H. Rinehart. Location, Park street near Los Angeles avenue. Arranged for bungalow court, and will contain three two-story and eight one-story buildings. Interior finished in pine and hardwood with hardwood floors. Central heating system, hot water system, wall beds and vacuum cleaning. Bath rooms finished in tile. Exteriors covered with shingles and cement plaster on metal lath. Plans being prepared.

**SAN FRANCISCO**—Apartment house, 5 story and base. Class C construction. Cost not stated. Architect, C. A. Meussdorffer, Humboldt Bank Bldg., S. F. Owner, C. A. Meussdorffer. Location, Jones near Sutter with a frontage of 30 feet. Will contain 20 suites of two and three rooms. Interior finish pine and hardwood with some hard-

wood floors. Wall beds, steam heat, automatic elevator and hot water supply. Tile floors and wainscot in baths. Exterior faced with pressed brick trimmed with terra cotta. Plans being prepared.

**SAN FRANCISCO**—Apartment house, 3 story and base, frame, \$10,000. Architects, L. M. Weissmann & Phillip Schwerdt, Pacific Bldg., S. F. Owner, Rosa Unfried. Location, west Church north of 20th street, covering an area of 25 by 86 feet. Will contain six suites. Interior finish pine and elm panels. Steam heat and hot water system, wall beds. Bath rooms finished in tile. Exterior covered with shiplap. Plans complete and work to be done by Day Labor.

**SAN FRANCISCO**—Apartment house, 2 story and base, frame, \$10,000. Architect, W. H. Crim, Jr., 425 Kearny street. Owner, John McCormick. Location northwest corner Cabrillo and 5th avenue. Will contain four suites. Interior finish pine and elm panels, some hardwood floors. Tile bath rooms. Hot water system and wall beds. Exterior covered with cement plaster on metal lath. Plans being figured.

**LOS ANGELES, CAL.**—Apartment house, 3 story and base, brick and frame, \$20,000. Architect, Edgar H. Dorr, 1425 Winfield street, L. A. Owner, W. J. Dorr. Location, 1425 Winfield Court, covering an area of 50 by 90 feet. Will contain 42 suites of two and three rooms. Interior finish pine and hardwood with some hardwood floors. Steam heat, hot water system and wall beds. Bath rooms finished in tile. Exterior covered with brick veneer. Plans being prepared.

**PASADENA, LOS ANGELES CO., CAL.**—Apartment house, 3 story and base, frame. Cost not stated. Architect, Arthur S. Heineman, 831 San Fernando Bldg., L. A. Owner's name withheld. Location, South Los Robles avenue. Will contain a total of 20 suites of two and three rooms. Interior finish pine and hardwood. Wall beds, steam heat and hot water system. Tile in bath rooms. Exterior covered with cement plaster on metal lath. Plans being prepared.

### Contracts Awarded.

**SEATTLE, WASH.**—Apartment house, 3 story and base, brick veneer, \$50,000. Architect, W. J. Jones, Central Bldg., Seattle. Owner, J. P. Jones. Contractor, Central Realty Co., Pantages Theatre Bldg., Seattle. Contract price, \$50,000.

**SAN FRANCISCO**—Apartment houses, 2, 1 story and base. Class C construction, \$36,000 and \$34,000 each. Architects, Smith & Stewart, 244 Kearny street. S. F. Owners, Smith & Stewart, 244 Kearny street, S. F. Contractor, J. B. Reiter, 110 Jessie street, S. F. Contract price, \$36,000 and \$34,000.

## BATH HOUSES.

PASO ROBLES, SAN LUIS OBISPO CO., CAL.—Bath house addition, frame and concrete. Cost not stated. Architect none. Owner, E. J. Burlingham, Paso Robles. E. J. Burlingham, the new proprietor of the Sparks Bathing House, is planning to make several additions to the present building. An addition will be made on the rear of the present building for a plunge, which will be 25x75 feet, and a depth of from 3 to 7 feet, and which will probably be of concrete and tile construction. The proposition of adding two stories, making the structure three stories for bath rooms and apartments is also being considered.

## BONDS

PASO ROBLES, SAN LUIS OBISPO CO., CAL.—Bonds of \$40,000 have been voted for the erection of a new school building. An architect will be selected immediately to design plans for the proposed structure.

EVERETT, WASH.—The construction of a pipe line from Sultin Basin, 24 miles, the main to be 32 inches in diameter, was authorized by vote at an election held on August 23rd. Bonds in the sum of \$60,000 were authorized to provide funds for the work.

VISALIA, TULARE CO., CAL.—Word has been received by the Visalia City Attorney to the effect that Blythe-Witter Company, purchasers of the municipal auditorium and sewer bond issues, that the sum of \$115,000 plus the \$10,055 premium will be sent to Visalia immediately. On receipt of the money the Trustees will call for bids for the construction of the proposed auditorium and sewer system.

REDONDO BEACH, LOS ANGELES CO., CAL.—The Executive Board of the Chamber of Commerce has endorsed the proposed \$3,000,000 good roads bond issue for Los Angeles County.

POMONA, LOS ANGELES CO., CAL.—Considerable rumor that an election will be called to vote bonds of \$50,000 for the caring of new roads, lights, etc., paving work, storm drains and culverts, is in circulation here.

PETALUMA, SONOMA CO., CAL.—The sale of the \$20,000 street improvement bonds has been awarded to the Sonoma County National Bank, Petaluma Swiss-American and Petaluma National Banks.

The proceeds of the sale will be used in covering the cost of street improvements to be made in Petaluma.

SAN RAFAEL, MARIN CO., CAL.—Complete returns show that the \$3,000,000 Marin Municipal Water District bond election held here last week carried by a vote of almost four to one.

Plans and specifications will be ordered shortly for extensions to the present system. The city of Richmond in Contra Costa County will be supplied with water from Marin County, the idea being to supply that city by means of two large mains reaching across the Narrows from McNear's Point to Point San Pablo.

SANTA MARGARITA, SAN LUIS OBISPO CO., CAL.—An election held in the Santa Margarita School District resulted in the bonds carrying by a vote of four to one. The proceeds of

the sale of the bonds, \$20,000, will be used in the construction of a school building. An architect will be selected immediately to prepare the plans.

SANTA BARBARA, SANTA BARBARA CO., CAL.—The special election held here last week to vote bonds of \$1,000,000 to complete the coast route system of highways through San Marcos Pass and join it with the highways through Kern County, failed to carry by about 200 votes. There were 3,442 in favor of the issue and 1,977 against.

A proposition to issue bonds for \$550,000 to build bridges connecting the various portions of the state highway system already constructed in the county, was approved, but proposals to issue bonds to build a County Hospital and a Detention Home were defeated.

The County Good Roads Association says the campaign to complete the coast road system will be continued.

SANTA CLARA, SANTA CLARA CO., CAL.—Tentative plans for an extensive bond issue for the paving of the main arteries into this city are being considered by leading merchants and taxpayers. Various propositions will be submitted to the Chamber of Commerce and to the Board of Town Trustees on September 13th, the date set for the hearing of protests on the recent paving project.

One of the propositions that is given favorable consideration includes the following plan:

The paving of a 24-foot strip on the San Francisco road from Scott's Lane to Lincoln street, on Lincoln street from the San Francisco road to Lexington street.

The paving of a 16-foot strip on the Homestead road from Gould street to Lincoln street. Saratoga avenue from the city limits to University avenue. Los Gatos road from the city limits to Lexington street. Washington street from the city limits to Franklin street. The Alameda from the city limits to Grant street. Grant street from the Alameda to Franklin street. Franklin street from Grant street to the S. P. depot. Lafayette street from the city limits to Franklin street.

The City Engineer's estimate on the work is \$85,000.

KENNETT, SHASTA CO., CAL.—Bonds of \$5,000 have been voted to help Shasta County construct the bridge across the Sacramento River opposite the depot. The county recently let a contract to the Portland Bridge Company for \$15,976.

OROVILLE, BUTTE CO., CAL.—After a lengthy hearing the Supervisors voted to organize drainage district No. 100 of Butte County. The district will consist of 18,000 acres.

AUBURN, PLACER CO., CAL.—The City Trustees have set September 21st as the day when the question of issuing bonds to improve the sewer system and the purchase of additional fire equipment will be voted upon.

RIVERSIDE, RIVERSIDE CO., CAL.—A petition has been presented to the City Council asking for the formation of an assessment district for the improvement of North Main street from first street to the city limits. It will be improved with a 20-foot concrete roadway, 1½ miles in length and will cost approximately \$22,000.

EL PASO, TEXAS—An election has been called for October 8th to vote bonds of \$300,000 for the improvement of highways in El Paso County.

SAN LUIS OBISPO, SAN LUIS OBISPO CO., CAL.—A special election will be held on September 18th in the Templeton, Ascension, Bethel and Oak Dale school districts on the question of forming a joint union high school district.

SAN BRUNO, SAN MATEO CO., CAL.—The school needs have outgrown the present accommodations and a movement has been started to call a bond issue to vote the necessary funds for the erection of a new school. The Fifth Addition and the Belle Air Improvement Clubs are interested in the proposed issue.

PORTERVILLE, TULARE CO., CAL.—The \$62,000 paving bonds have been sold. The proceeds will provide funds for the paving of the city streets.

VISALIA, TULARE CO., CAL.—October 5 has been set by the City Council as the date for opening bids for the construction of the new outfall sewer system for which bonds in the sum of \$50,000 were recently voted. The engineer's estimate of the cost of the work has not been announced except in that it is expected to be well within the face of the bonds.

SACRAMENTO, CAL.—To make a canvass of the city schools to estimate the cost of real estate and buildings necessary in the proposed bond issue for new schools, the Board of Education, at a meeting last week, appointed a committee of four. Those named were: President of the Board E. J. Carragher, Superintendent of Schools C. C. Hughes, Architect Rudolph Herold and J. C. Carly, real estate man.

RIVERDALE, FRESNO CO., CAL.—The Board of Supervisors approved by resolution the issuance of a bond issue of \$25,000 in the Riverdale Joint High School District.

MARTINEZ, CONTRA COSTA CO., CAL.—Bids will be received by the County Treasurer until September 20th for the purchase of bonds amounting to \$11,000, recently voted by the Selby School District. The proceeds of the sale will finance the construction of a new school for the district.

FORTUNA, HUMBOLDT CO., CAL.—Bonds of \$24,000 will be sold by the County Supervisors on September 14th. Proceeds of the sale will be used in the construction of a high school.

MARTINEZ, CONTRA COSTA CO., CAL.—The survey for the proposed Mt. Diablo boulevard system to be constructed under the road district plan from funds to be voted at a bond election in the next few months, has been started by C. A. Leighton, chief engineer of the proposed project.

## BRIDGES, DAMS AND HARBOR WORK.

OROVILLE, BUTTE CO., CAL.—Bridges, 14, timber, \$500 each. Engineer, County Surveyor, Oroville. Owners, Butte County. Permission has been granted Supervisor Evans to proceed with the construction of 14 small bridges in his district, the cost of each not to exceed \$500. The structures,

which will replace those pronounced a menace to the safety of the traveling public, are as follows: Six bridges on the Biggs-Princeton road; bridge over Dry Creek west of Nelson; the Crain bridge on the Shippee road; four bridges on the Daynon road; two small bridges on the Shippee road.

**FAIRFIELD, SOLANO CO., CAL.**—Bridge, reinforced concrete. Cost not stated. Engineer, County Surveyor, Fairfield. Owners, Solano County. Bids will be opened on September 7th for constructing a reinforced concrete arch bridge on County Road No. 388, over Pleasants Valley Creek, at the ranch of F. F. Firch, Vacaville Township, Road District No. 4.

**HOQUIAM WASH.**—Bridges, 2, reinforced concrete. Cost not stated. Engineer, City Engineer, Hoquiam. Owners, City of Hoquiam. The Council has adopted resolutions for a considerable amount of road work and two bridges. The estimated cost of the work is placed at \$161,055. Further information on this work may be had from the City Engineer.

### Contracts Awarded.

**PORTLAND, ORE.**—Municipal dock landing, \$12,750. Engineer, City Engineer, Portland. Owners, City of Portland. Contractor, J. A. Backstrand, Chamber of Commerce Bldg., Portland. Contract price, \$12,750.

**KINGSBURG, TULARE CO., CAL.**—Bridge, reinforced concrete, \$15,650. Engineer, County Surveyor, Visalia. Owners, Tulare County. Contractors, Johnson Bros., Kingsburg. Contract price, \$15,650.

**VENTURA, VENTURA CO., CAL.**—Culverts and bridge. Cost as follows. Engineer, county Surveyor, Ventura. Owners, Ventura County. Contractor, A. Pefley, Ventura, four culverts, \$4,700. Putman Stone Co., Pasadena, abutment for Saticoy bridge, \$10,811. Boardman Construction Co., Story Bldg., L. A., approach and fence, \$6,000.

### Factories and Warehouses

**SAN FRANCISCO**—Machine shop, 1 story, brick, \$3,000. Architect, none. Owner, Thomas Butler, 1362 Hayes street. Location, 1362 Hayes street, covering an area of 50 by 57½ feet. Cement floor. Exterior stock brick. Plans complete and work to be done by Day Labor.

**PORTERVILLE, TULARE CO., CAL.**—Packing house, 1 story, frame. Cost not stated. Architect, O. H. Huber, Porterville. Owners, Mid-California Citrus Association. Will cover an area of 72 by 100 feet. Capacity six cars per day. Special machinery. Exterior rustic. Plans complete and work to be done under the direction of H. F. Frey.

**BERKELEY, ALAMEDA CO., CAL.**—Ice plant, 1 story, frame, \$2,000. Architect, none. Owner, H. J. Haney, 2034 Blake street, Berkeley. Location, south Blake street west of Shattuck avenue. Special machinery. Exterior shiplap. Plans complete and work to be done by Day Labor.

**OAKLAND, CAL.**—Warehouse, 2 story and base. Class C construction, \$40,000. Architect, Walter D. Reed, Oakland Bank of Savings, Oakland. Owners, Crane Co. Location, 9th and Webster streets, covering an area of 110 by 100 feet. Interior finish pine. Metal window sash and frames. Elevator and special conveying equipment. Exterior faced with pressed brick. Plans complete and figures being taken.

**OAKLAND, CAL.**—Warehouse, 7 story and base, reinforced concrete, \$70,000. Architect, Edward Soule, Rialto Bldg., S. F. Owner, Martin Bekins. Location, southwest corner 22nd and San Pablo. Fireproof throughout. Special private vaults, metal window sash and frames, elevator and automatic sprinklers. Exterior faced with cement plaster. Plans complete and work to be done by Day Labor under the direction of owner.

### FIRE REPORT.

**TEHAMA, TEHAMA CO., CAL.**—The entire business section of Tehama was threatened when a gasoline tank exploded destroying four buildings, causing a loss of \$24,000.

**JAMESTOWN, TUOLUMNE CO., CAL.**—The Hotel Nevills has been destroyed by fire at a loss of \$25,000. The structure was owned by the Jamestown Improvement Company, headed by T. S. Bullock. Whether or not the structure will be rebuilt is not known.

**SAN FRANCISCO**—Three two-story buildings, 2239, 2245 and 2247 Webster street were destroyed by fire last week causing a loss of \$15,000. Repairs will be made to these structures immediately.

**GRASS VALLEY, NEVADA CO., CAL.**—The Nevada County Narrow Gauge Railway shops, roundhouse, machine shop and turntable, and a number of locomotives were destroyed by fire here last week. The building loss is estimated at \$70,000. Preparations will be made to immediately put the plant in working condition.

**PORTLAND, ORE.**—Fire starting in the plant of the Portland Sash and Door Company, destroyed two blocks of buildings, bounded by Grand avenue, Union, East Mill and Stephens street. The damage is estimated at \$100,000.

**MAXWELL, COLUSA CO., CAL.**—The store of O. A. Burrows & Sons of Sites, Colusa County, was destroyed by fire recently, causing a loss of \$11,000.

**OAKDALE, STANISLAUS CO., CAL.**—The new constructed home of Louis Brichetto was destroyed by fire here last week, causing a loss of \$10,000.

**SAN JOSE, SANTA CLARA CO., CAL.**—Three fires, causing a loss of more than \$150,000, occurred here last week. The J. J. Johnson warehouse was destroyed at a loss of \$30,000; Averill Machine Works, loss \$20,000, and the Ozen & Hunter Dairy, loss \$100,000.

Preparations for rebuilding the dairy plant will be started immediately.

**TURLOCK, STANISLAUS CO., CAL.**—Fire partly destroyed the plant of the Turlock Grape Juice Factory, causing a loss of \$12,000.

**OROVILLE, BUTTE CO., CAL.**—Fire starting in the engine room of the Oroville steam laundry destroyed that plant, a garage and livery stable. The loss is estimated at \$18,000. The three buildings were owned by Mrs. Jeff Kelly and Chas. Wotten.

**RIVERBANK, STANISLAUS CO., CAL.**—The Riverbank Hotel has been completely destroyed by fire here last week. The building was of frame construction.

**SAN FRANCISCO**—Fire completely destroyed the St. Francis Girls' Directory last Saturday morning. The structure was of frame construction and five stories in height.

### FLATS

**SAN FRANCISCO**—Flats, 3 story and base, frame. Cost not stated. Architect, C. O. Clausen, Hearst Bldg., S. F. Owner's name withheld. Location, Dolores near 15th. Will contain three flats of six rooms. Interior finish pine and elm panels and hardwood floors. Open fire places and tile mantels. Tile wainscot in bath rooms. Automatic water heaters. Exterior covered with shiplap and rustic. Plans being prepared.

**SAN FRANCISCO**—Flats, 2 story and base, frame, \$5,000. Architect, none. Owner, John A. Hoots & Son, 251 Kearny street, S. F. Location, west Belvedere south Rivoli, covering an area of 25 by 64 feet. Will contain four flats. Interior finish pine with some elm panels and hardwood floors. Open fire places and tile mantels. Bath rooms finished in tile. Automatic water heaters. Exterior rustic and shiplap. Plans complete and work to be done by Day Labor.

**SAN FRANCISCO**—Flats, 2 story and base, frame, \$6,000. Architect, C. O. Clausen, Hearst Bldg., S. F. Owner, H. Pollard. Location, Oak near Fillmore. Will contain two flats of six rooms each. Interior southern gum, pine and white enamel. Hardwood floors, tile baths. Open fire places and tile mantels. Automatic water heaters. Exterior covered with cement plaster on metal lath. Plans complete and figures being taken.

### GARAGES

**SAN FRANCISCO**—Garage, 1 story reinforced concrete, \$2,000. Architect, A. C. Hampton, Olympic Club. Owner, A. P. Hampton. Location, south Frederick west Downey. Private garage, cement floor and special gasoline tank. Exterior cement plaster. Plans complete and work will be done by Day Labor.

## GOVERNMENT WORK &amp; SUPPLIES

## San Francisco Circular No. 34.

The following bids were received by the depot quartermaster, San Francisco, Cal., under office circular No. 34, opened August 12:

1. Bid 1. Boesh Lamp Co., 1135 Mission street, San Francisco, Cal.

2. Keystone Bros., 130 Second street, San Francisco, Cal.

3. Union Coöperage Co., St. Louis, Mo.

4. Mark-Lally Co., 235 Second street, San Francisco, Cal.

5. F. S. Johnson Co., 576 Howard street, San Francisco, Cal.

6. Van Arsdale-Harris Lumber Co., Fifth and Brannan streets, San Francisco, Cal.

7. Reininger & Co., 420 Market street, San Francisco, Cal.

8. J. M. Josselyn & Co., 58 Sacramento street, San Francisco, Cal.

9. California Steam and Plumbing Supply Co., 671 Fifth street, San Francisco, Cal.

10. California Barrel Co., Monadnock Building, San Francisco, Cal.

11. J. E. Higgins Lumber Co., 423 Sixth street, San Francisco, Cal.

12. Baker & Hammett, Fourth and Brannan streets, San Francisco, Cal.

13. White Bros., Fifth and Brannan streets, San Francisco, Cal.

14. H. E. Holmes & Co., 744 Folsom street, San Francisco, Cal.

15. W. T. Garratt & Co., 299 Folsom street, San Francisco, Cal.

16. H. C. Magnus & Co., 257 California street, San Francisco, Cal.

17. George Lawrence Co., Portland, Ore.

18. C. W. Marwedel, 76 First street, San Francisco, Cal.

19. Singer Sewing Machine Co., 142 Fourth street, San Francisco, Cal.

20. Levenson & Co., 325 Market street, San Francisco, Cal.

21. Koenig & Zanetti, 1280 Seventh avenue, San Francisco, Cal.

22. Pacific States Electric Co., 575 Mission street, San Francisco, Cal.

23. James H. Hardy, Channel and Fourth streets, San Francisco, Cal.

24. Western Pad & Nail Co., 176 Haight street, San Francisco, Cal.

25. Western Electric Co., 680 Folsom street, San Francisco, Cal.

26. A. W. Pike & Co., 711 Mission street, San Francisco, Cal.

27. C. J. Hendry Co., 16 Clay street, San Francisco, Cal.

28. National Brass & Copper Tube Co., 639 Mission street, San Francisco, Cal.

29. Marshall-Newell Supply Co., 142 Stewart street, San Francisco, Cal.

30. Brunswick & Balke - Colander Co., 767 Mission street, San Francisco, Cal.

31. Johnson & Joseph Co., 34 Sacramento street, San Francisco, Cal.

32. John A. Roebing's Sons Co., 721 Folsom street, San Francisco, Cal.

33. Larkin Asphalt Co., 4876 Eighteenth street, San Francisco, Cal.

34. Marshall-Wells Hardware Co., Portland, Ore.

35. Suzan Lumber Co., 578 Sixth street, San Francisco, Cal.

36. Pacific Tool & Supply Co., Mission and Fremont streets, San Francisco, Cal.

37. Moise-Klinkner Co., 1212 Market street, San Francisco, Cal.

38. Handan-Buck Mfg. Co., St. Louis, Mo.

39. Coffin-Reddington Co., 35 Second street, San Francisco, Cal.

40. Holbrook, Merrill & Stetson, Sixth and Bluxome streets, San Francisco, Cal.

41. Judson Mfg. Co., 819 Folsom street, San Francisco, Cal.

42. John Clark Saddlery Co., Portland, Ore.

43. Patrick & Co., 560 Market street, San Francisco, Cal.

44. Schwabacher-Frey Stationery Co., 542 Market street, San Francisco, Cal.

45. M. Greenberg's Sons Co., 225 Beale street, San Francisco, Cal.

46. W. E. Masket & Co., 518 Mission street, San Francisco, Cal.

47. Harg Wood & Ivory Works, 66 Clementina street, San Francisco, Cal.

48. Crane Company, Second and Brannan streets, San Francisco, Cal.

49. Pope & Talbot, foot of Third street, San Francisco, Cal.

50. Dunham, Carrigan & Hayden Co., 110 Kansas street, San Francisco, Cal.

51. W. W. Aboulique & Co., 557 Market street, San Francisco, Cal.

52. Tacoma Mill Co., Tacoma, Wash.

53. Independent Pneumatic Tool Co., 61 Fremont street, San Francisco, Cal.

54. Waterhouse & Lester Co., 754 Howard street, San Francisco, Cal.

55. Electric Novelty Works, 333 Mission street, San Francisco, Cal.

56. Acme Lumber Co., Sixth and Channel streets, San Francisco, Cal.

57. Hart-Wood Lumber Co., Fifth Berry streets, San Francisco, Cal.

58. Foucar, Ray & Simon, 512 Folsom street, San Francisco, Cal.

59. Wilson Bros. & Co., 325 Berry street, San Francisco, Cal.

60. Pacific Mill & Timber Co., Portland, Ore.

61. Eccles & Smith, 71 First street, San Francisco, Cal.

Item 1. 12 coolers, water, wood, 5 gal Bid 3, \$5.91 ea; 38, \$3.91; 51, \$10.50.

2. 36 do, 10 gal-Bid 3, \$9.26 ea; 38, \$9.26; 51, \$18.

3. 1,500 lbs iron, Norway-Bid 12, \$3.95 cwt; 31, \$1.50; 41, \$1.55; 50, \$4.05; 58, 70c.

4. 1.25 lbs pins, escutcheon-Bid 12, 37c lb; 50, 31c; 17, 55c; 18, 50c; 27, 15c; 29, 10c; 31, 32c; 36, 36c; 40, 52c; 46, 60c.

5. 500 ft pipe, wrought, 1 in-Bid 3, \$8.06; 100 ft, 9, \$8.30; 12, \$7.50; 50, \$8.10; 48, \$9.82; 29, \$9.95; 31, \$8.80; 40, \$8.50.

6. 24 reducers, hose-Bid 12, 84c ea; 50, 65c; 15, 72c; 29, 55c; 31, \$1.20; 36, 98c; 40, \$1.15; 45, 74c.

7. 1/2 inch machined, valve-rescating-Bid 12, \$17.52; 29, \$17.52; 36, \$17.52; 46, \$187.50; 61, \$187.50.

8. 12 lbs sal ammoniac, lump-Bid 25, 20c lb; 36, 19c; 39, 15c.

9. 50 bolts, carriage, 1/2 x 3 in-Bid 12, \$2.00; 100, 25, \$1.45; 31, 70c; 34, 78c; 50, \$2.10.

10. 50 do, 1/4 x 1 in-Bid 12, \$2.00; 100, 25, 95c; 31, 90c; 34, 90c; 50, \$2.20.

11. 50 do, 1/2 x 1 in-Bid 12, \$2.50; 100, 25, \$1.45; 31, \$1.31; 34, \$1.32; 50, \$2.60.

12. 50 do, 3/8 x 3/4 in-Bid 12, \$3.00; 100, 25, \$1.31; 31, \$1.20; 34, \$1.50; 50, \$2.75.

13. 50 do, 3/8 x 1/2 in-Bid 12, \$3.00; 100, 25, \$1.05; 31, \$1.25; 34, \$1.60; 50, \$2.95.

14. 50 do, 3/8 x 1/2 in-Bid 12, \$2.20; 100, 25, \$1.20; 31, \$1.15; 34, \$1.80; 50, \$3.20.

15. 50 do, 3/8 x 1/2 in-Bid 12, \$2.50; 100, 25, \$1.32; 31, \$1.57; 34, \$3.50; 50, \$3.50.

16. 50 do, 3/8 x 1/2 in-Bid 12, \$4.20; 100, 25, \$1.80; 31, \$2.30; 34, \$2.40; 50, \$4.15.

17. 50 do, 3/8 x 1/2 in-Bid 12, \$4.50; 100, 25, \$1.95; 31, \$2.50; 34, \$2.60; 50, \$4.10.

18. 50 do, 1/2 x 2 in-Bid 12, \$5.00; 100, 25, \$2.11; 31, \$1.70; 34, \$1.80; 50, \$3.50.

19. 50 do, 1/2 x 2 in-Bid 12, \$4.00; 100, 25, \$2.20; 31, \$2.10; 34, \$2.10; 50, \$3.90.

20. 50 do, 1/2 x 3/4 in-Bid 12, \$1.20; 100, 25, \$2.17; 31, \$2.25; 34, \$2.28; 50, \$4.10.

21. 50 do, 1/2 x 1 in-Bid 12, \$4.50; 100, 25, \$1.90; 31, \$2.40; 34, \$2.45; 50, \$4.10.

22. 50 do, 1/2 x 5 in-Bid 12, \$5.00; 100, 25, \$3.02; 31, \$2.70; 34, \$2.80; 50, \$4.80.

23. 50 do, 1/2 x 8 in-Bid 12, \$7.00; 100, 25, \$4.11; 31, \$3.60; 34, \$3.80; 50, \$6.10.

24. 50 do, 3/4 x 10 in-Bid 12, \$8.00; 100, 25, \$4.81; 31, \$4.25; 34, \$4.45; 50, \$6.90.

25. 50 do, 1/2 x 12 in-Bid 12, \$10.00; 100, 25, \$5.57; 31, \$4.90; 34, \$5.15; 50, \$7.80.

26. 50 braces, bench-Bid 45, 90c ea; 55, 90c.

27. 50 brackets, curtain-Bid 45, 31c ea; 55, 30c.

Steam heat, elevator service, hot water system and vacuum cleaning. Bath rooms finished in tile. Hollow tile partitions and metal window sash and frames. Exterior faced with buff pressed brick. Plans complete.

### IRRIGATION PROJECTS

TERRA BELLA, TULARE CO., CAL.—Irrigation project, \$1,000,000. Engineer D. W. Albert, Yuba City. Owners, Terra Bella Irrigation District. In connection with the development of the Terra Bella irrigation project, for which bonds of \$1,000,000 were recently voted, Messrs. T. W. McClenahan and A. W. Ballardie, of the McClenahan-Ballardie Contracting Co., 180 Jessie street, S. F., and D. W. Albert, a hydraulic engineer of Yuba City, are now in Terra Bella looking over the proposed work. A detailed investigation will be made with a view of bidding on the work. It is their purpose to put in a bid for the entire project, including the diversion dam, intake, ditch, reservoir dam, canals, etc., taking pay for same in bonds of the irrigation district. Consulting Engineer Stephen E. Kieffer is preparing a final report, which will be submitted to the directors of the district shortly. Final action will probably be taken when the report is submitted.

OAKDALE, STANISLAUS CO., CAL.—Irrigation work. Cost not stated. Engineer, Chief Engineer, South San Joaquin Irrigation District, Oakdale. Owners, South San Joaquin Irrigation District. The directors of the South San Joaquin and Oakdale Irrigation Districts have recently returned from a trip into the mountains to investigate the reservoir sites. On returning it was suggested that a reservoir be constructed in the Ramsey reservoir site, owned by F. R. Pattee et al. It was also thought that the suggestion offered by the Utica Mining Co. for a dam built by the company was a good one. The proposal of the Utica Co. is that it and the district each pay half the cost of a \$1,250,000 reservoir at Spicer's Meadows, which would store 61,000 acre feet of water. The

dam would be 150 feet high. This dam site is wide, while at the Ramsey site a narrow dam would have to be built, perhaps 250 feet high. About 500,000 acre feet could be stored here. The dam would cost between \$750,000 and \$1,250,000. It is probable that a meeting will be called to discuss the proposed work.

### LIBRARIES.

SAN FRANCISCO—Library, general construction, \$400,000. Architect, Geo. William Kelham, Sharon Bldg., S. F. Owners, City and County of San Francisco. Bids opened at the last meeting of the Library Trustees show Sampson & Larsen low for the general construction of the new library at \$397,500. Lindgren & Co. were the next low at \$424,000. A complete list of the bids will be found under the heading of San Francisco in this issue.

### RAILROAD CONSTRUCTION AND EQUIPMENT.

SOUTH SAN FRANCISCO, SAN MATEO CO., CAL.—Railroad construction. Cost not stated. Engineer's name not given. Owners, South San Francisco Railroad and Power Co. Application has been filed with the Board of Trustees of the City of South San Francisco by the South San Francisco Railroad and Power Company for a franchise to construct and operate a single or double track standard gauge railroad in the city of South San Francisco, together with necessary curves, side tracks, switches, crossovers and turn-outs.

SAN JOSE, SANTA CLARA CO., CAL.—Railroad construction. Cost not stated. Engineer, Engineering Dept. Peninsular R. R. Co., San Jose. Owners, Peninsular Railroad Co. Railroad engineers have started a survey for a railroad to be constructed by the Peninsular Company from the terminus of their present line at the eastern city limits to Kirk avenue on Alum Rock avenue.

### RESIDENCES.

SAN FRANCISCO — Residence, 1 story and base, frame, \$2,000. Architect, none. Owner, Albert Mattson., 3919 Folsom street, S. F. Location, east Cordova south Athens. Will contain five rooms, bath and sleeping porch. Interior finish pine throughout with some hardwood floors. Open fire place and tile or brick mantel. Imitation tile in bath. Automatic water heater. Exterior covered with rustic and cement plaster on metal lath. Plans complete and in the hands of owner, who will do the work by Day Labor.

SAN FRANCISCO — Residence, 3 story and base, frame. Cost not stated. Architect, Alfred Henry Jacobs, 110 Sutter street, S. F. Owner's name withheld. Location, Washington near Maple. Will contain nine rooms, two baths, sleeping porches and basement garage. Interior finish, pine, hardwood and white enamel. Will contain eight rooms, two baths, sleeping porches and separate garage. Interior finish pine and hardwood with white enamel. Hardwood floors in principal rooms. Furnace heat, hot water circulating system and open fire places. Mantels tile and brick. Bath rooms finished in tile. Exterior covered with cement plaster on metal lath. Plans complete and figures being taken.

BERKELEY, ALAMIDA CO., CAL.—Residence, 2 story and base, frame, \$11,000. Architect, Hiram K. Lovell, Dalziel Bldg., Oakland. Owner, C. W. Boden. Location, Northbrae. Will contain seven rooms, bath and sleeping porch. Interior finish pine, hardwood and white enamel. Hardwood floors in principal rooms. Furnace heat, open fire places, tile mantels and automatic water heater. Bath room finished in tile. Exterior covered with cement plaster on metal lath. Plans being prepared.

OAKLAND, CAL.—Residence, 1 story and base, frame, \$2,500. Architect, none. Owner, A. Stenborg, 2609 Inyo avenue, Oakland. Location, east 31st street between 12th avenue and Mathews. Will contain six rooms and bath. Interior finished in pine and white enamel. Hardwood floors and open fire places. Mantels tile or brick. Tile wainscot in bath room. Automatic water heater. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

OAKLAND, CAL. — Residences, 2, 1 story and base, frame, \$2,000 each. Architect, Merrill Newsom, 1748 Broadway, Oakland. Owner, A. F. Werum. Location, 35th avenue. Will contain five rooms, bath and sleeping porch. Interiors finished in pine and redwood with some white enamel. Hardwood floors, open fire places and tile or

brick mantels. Bath rooms finished in tile. Automatic water heaters. Exteriors covered with cement plaster. Plans being prepared, and when complete will be done by Day Labor.

**SAN LEANDRO, ALAMEDA CO., CAL.**—Residence, 1 story and base, frame, \$1,500. Architect, Merrill Newsom, 1748 Broadway, Oakland. Owner, E. L. Higgins. Location, San Leandro. Will contain five rooms and bath. Interior finish pine throughout. Some hardwood floors. Open fire place and tile mantel. Imitation tile in bath room. Exterior, rustic. Plans complete and work to be done by Day Labor.

**OAKLAND, CAL.**—Residence, 1 story and base, frame, \$2,000. Architect, none. Owner, A. T. Anderson, 7325 Lockwood avenue, Oakland. Location, east 37th street, north Randolph. Will contain five rooms, bath and sleeping porch. Interior finish, pine and white enamel. Hardwood floors in principal rooms. Open fire places and tile mantels. Automatic water heater. Bath rooms finished in tile. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

**CHINO, SAN BERNARDINO CO., CAL.**—Residence, 1 and 2 story, reinforced concrete. Cost not stated. Architect, Myron Hunt, Hibernian Bldg., 14 A. Owner, E. M. Fowler, Pasadena. Location near Chino. Will consist of several buildings besides the residence which will be of reinforced concrete. Interior finish, pine and hardwood with hardwood floors and white enamel. Central heating system, open fire places and brick mantels. Hot water system. Bath rooms finished in tile. Exteriors cement plaster. Plans being figured.

**SAN FRANCISCO**—Residences, 2, 2 story and base, frame, \$2,500 each. Architect, none. Owner, P. Nelson, 30 Presidio Terrace, S. F. Location, west 27th avenue, north of Irving. Will contain five rooms and bath. Interior finish pine with some elm panels and hardwood floors. Open fire places and tile or brick mantels. Tile wainscot in bath rooms. Automatic water heaters. Exteriors cement plaster on metal bath. Work will be done by Day Labor.

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$2,800. Architect, none. Owner, Oscar Lind, 4385 25th street, S. F. Location, east 19th avenue, north Balboa. Will contain seven rooms, bath and sleeping porch. Interior finish pine and hardwood veneer with hardwood floors. Furnace heat, open fire places and tile mantels. Bath room finished in tile. Automatic water heater. Exterior cement plaster. Plans complete and work to be done by Day Labor.

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$4,750. Architect, none. Owner, M. Fisher, 685 Mission street, S. F. Location, Claremont Court. Will contain eight rooms, two baths and sleeping porch. Interior finish pine and hardwood and white enamel. Hardwood floors, furnace heat, open fire places, hot water heater and tile baths. Exterior covered with cement plaster on metal bath. Plans complete and work to be done by Day Labor.

**SAN FRANCISCO**—Residence, 1½ story and base, frame, \$3,000. Archi-

tect, Joseph A. Leonard, 85 Cerritos avenue, S. F. Owners, Urban Realty Co. Location, west Ashton Place south of Pico. Will contain seven rooms, bath and sleeping porch. Interior finish pine, hardwood and white enamel. Hardwood floors, open fire places, automatic water heater and furnace heat. Mantels tile and brick. Bath room finished in tile. Exterior covered with cement plaster on metal bath. Plans complete and work to be done by Day Labor.

**OAKLAND, CAL.**—Residence, 1 story and base, frame, \$2,500. Architect, none. Owner, J. S. Thomas, 2495 62nd avenue, Oakland. Location, north Laverne west 55th avenue. Will contain five rooms and bath. Interior finish pine and white enamel. Hardwood floors, open fire place, brick mantel and automatic water heater. Bath rooms finished in tile. Exterior covered with cement plaster. Work will be done by Day Labor.

**OAKLAND, CAL.**—Residence, 1 story and base, frame, \$2,000. Architect, none. Owner, H. A. Pleitner, 954 Fruitvale avenue, Oakland. Location, Fairview east Baker. Will contain five rooms and bath. Interior finish pine and hardwood. Hardwood floors, open fire place and tile mantel. Tile wainscot in bath room. Automatic water heater. Exterior covered with rustic and cement plaster. Work to be done by Day Labor.

**BERKELEY, ALAMEDA CO., CAL.**—Residence, 1½ story and base, frame, \$2,000. Architects, Universal Drafting Bureau, 1844 5th avenue, Oakland. Owner, C. Texdahl. Will contain six rooms, bath and sleeping porch. Interior finish pine and white enamel. Hardwood floors, open fire places and tile mantels. Automatic water heater. Bath room finished in tile. Exterior cement plaster. Plans being prepared. Will be done by Day Labor.

**ALAMEDA ALAMEDA CO., CAL.**—Residence, 2 story and base, frame, \$2,500. Architects, Universal Drafting Bureau, 1844 5th avenue, Oakland. Owner, C. C. Adams. Location, Water-side Terrace. Will contain seven rooms, bath and sleeping porch. Interior finish pine and hardwood. Hardwood floors. Open fire place, tile or brick mantel, automatic water heater. Bath room finished in tile.

**ALBANY, ALAMEDA CO., CAL.**—Residences, 2, 1½ story and base, frame, \$2,400 each. Architects, Universal Drafting Bureau, 1844 5th avenue, Oakland. Owner, M. P. Braseh. Location, Marin avenue. Will contain six rooms and bath. Interior finish pine. Hardwood floors, open fire places and tile mantels. Automatic water heaters. Tile in bath rooms. Exteriors covered with rustic and cement plaster. Plans being prepared. Will be done by Day Labor.

**BERKELEY, ALAMEDA CO., CAL.**—Residence, 2 story and base, frame, \$3,600. Architect, James W. Plachek, Acheson Bldg., Berkeley. Owner, Mrs. E. Wilkie. Location, Cedar and Euclid. Will contain seven rooms, bath and sleeping porch. Interior finish pine and hardwood. Hardwood floors, furnace heat, open fire places, brick and tile mantels, automatic water heater. Tile in bath rooms. Exterior covered

with cement plaster. Plans being figured.

**OAKLAND, CAL.**—Residence, 1 story and base, frame, \$3,000. Architect, none. Owner, F. N. Fabing, 2515 15th avenue, Oakland. Location, Elliot north E-33rd street. Will contain seven rooms, bath and sleeping porch. Interior finish pine, hardwood and white enamel. Hardwood floors, open fire place, tile mantel and automatic water heater. Bath room finished in tile. Exterior cement plaster. Work will be done by Day Labor.

**OAKLAND, CAL.**—Residence, 1½ story and base, frame, \$2,500. Architect, none. Owner, George H. Hollidge, 5926 Taft avenue, Oakland. Location, Broadway south Manila. Will contain seven rooms and bath. Interior finish pine. Hardwood floors, open fire place and tile mantel. Automatic water heater. Bath room tile. Exterior cement plaster. Plans complete and work to be done by Day Labor.

**OAKLAND, CAL.**—Residence, 1 story and base, frame, \$3,000. Architect, none. Owner, R. C. Hillen, 430 Haight avenue, Alameda. Location, Rossal avenue east Lerida. Will contain six rooms, bath and sleeping porch. Interior finish pine and hardwood with white enamel. Hardwood floors, open fire place and tile mantel. Bath room tile. Automatic water heater. Exterior cement plaster. Plans complete will be done by Day Labor.

**SAN MATEO, SAN MATEO CO., CAL.**—Residence, 2 story and base, frame, \$25,000. Architect, Charles Peter Weeks, Mutual Bank Bldg., S. F. Owner, E. I. Tobin. Will contain 14 rooms, baths and sleeping porch. Interior finish pine, hardwood and white enamel. Hardwood floors, furnace heat, open fire places, tile and brick mantels and hot water system. Bath rooms finished in tile. Exterior cement plaster and brick veneer. Plans being prepared.

**SACRAMENTO, CAL.**—Residence, 1 story, frame, \$1,500. Architect, none. Owner, H. F. Carstens, 215 Ochsen Bldg., Sacramento. Will contain five rooms and bath. Interior finish pine. Hardwood floors, open fire place and tile mantel. Exterior cement plaster and rustic. Plans complete and work to be done by Day Labor.

#### Contracts Awarded.

**LOS ANGELES, CAL.**—Residence, 2 story and base, brick. Cost not stated. Architects, Morgan, Walls & Morgan, Van Nuys Bldg., L. A. Owner's name withheld. Contractor, Thomas C. Mallove, Story Bldg., L. A. Contract price not given.

#### SCHOOLS.

**SAN JACINTO, RIVERSIDE CO., CAL.**—School, 1 story and base, frame and plaster. Cost not stated. Architect, Leo Kroonen, Corona. Owners, San Jacinto School District. Will cover an area of 114 by 114 and contain nine class rooms, office and auditorium. Interior finish pine with maple floors. Central heating system, program clocks and vacuum cleaning. Exterior cement plaster. Plans complete. Bids to be opened on September 15th.

**HANFORD, KINGS CO., CAL.**—School addition, C frame. Cost not

stated. Architect's name not given. Owners, Hanford High School District. Bids are now being received for the construction of an addition to the present high school building manual training quarters until September 15th. **BEAVERTON, ORE.**—School, 2 story and base, hollow tile, \$20,000. Architects, Tourtellotte & Hummel, Itochchild Bldg., Portland. Owners, City of Beaverton. Will contain eight class rooms, gymnasium and offices. Interior finished in pine with maple floors. Central heating system, vacuum cleaning and program clocks. Exterior cement plaster. Plans being figured.

#### Contracts Awarded.

**LOS ANGELES, CAL.**—School, 2 story and base. Class C construction, \$25,999. Architect, Homer W. Glidden, Wright and Callender Bldg., L. A. Owners, Amelia School District. Contractors, G. W. Gilbreth & Co., Hollingsworth Bldg., L. A. Contract price, \$25,999.

**LOS ANGELES, CAL.**—School, 2 story and base, brick, \$31,377. Architects, Walker & Vawter, Hibernian Bldg., L. A. Owners, City of Los Angeles. Contractors, F. O. Engstrom Co., 5th and Seaton streets, L. A. Contract price, \$31,377.

#### SEWERS, STREET WORK & WATER SYSTEMS.

**SAN RAFAEL, MARIN CO., CAL.**—Water system. Cost not stated. Engineer, County Surveyor, San Rafael. Owners, Marin County. The Municipal Water District bond election carried by a vote of 4 to 1. The bonds amounted to \$3,000,000. Plans for a considerable amount of work will be ordered in the near future. Laying of mains, ditching, etc., are among the improvements to be made on the newly acquired system.

**MILL VALLEY, MARIN CO., CAL.**—Retaining wall, reinforced concrete. Cost not stated. Engineers, Sloan & Robson, Nevada Bank Bldg., S. P. Owners, Mill Valley. Bids will be opened on September 14th for the construction of a reinforced concrete retaining wall for the Town of Mill Valley. The following are the approximate quantities of work and material: 14,120 pounds of reinforcing steel, 112 cubic yards of concrete, 116 lineal feet of drain tile, 275 lineal feet of 1½ inch galvanized pipe and fittings.

**MARTINEZ, CONTRA COSTA CO., CAL.**—Electric line construction. Cost not stated. Engineer's name not given. Owners, Great Western Power Co., S. F. Application has been filed with the County Supervisors by the Great Western Power Co. for a franchise to erect lines, distributing electricity along, across, upon, over, through and under certain parts of the roads in Contra Costa County.

**SEBASTOPOL, SONOMA CO., CAL.**—Street improvement. Cost not stated. Engineer, City Engineer, Sebastopol. Owners, City of Sebastopol. Bids will be opened on September 11th for grading and reeking of Litchfield avenue, also bids for constructing cement curbs and gutters on said avenue, according to specifications.

**CROCKETT, CONTRA COSTA CO., CAL.**—Street paving. Cost not stated. Engineer, Town Engineer, Crockett. Owners, Town of Crockett. Main street of this city from the Southern Pacific station to the out-kirts of the city is being torn up and will be macadamized. Supervisor J. D. Casey is in charge of the work.

**FAIRFIELD, SOLANO CO., CAL.**—Street improvement. Cost not stated. Engineer, Town Engineer, Fairfield. Owners, Town of Fairfield. Bids will be received up to September 14th for oil and gravel street improvements as follows: Two intersections in Texas street at Clay and Washington streets, each about 50 feet square.

**McKITTICK, KERN CO., CAL.**—Pipe line construction. Cost not stated. Engineer, Engineering Dept., Valley Pipe Line Co., 213 Sansome street, S. F. Owners, Valley Pipe Line Co. It is reported here that the Valley Pipe Line Co., a subsidiary of the Royal Dutch Shell interests, is planning to build a pipe line from Coalinga to the tank farm located four miles south of McKittick, and that the present intention is to begin the work of construction probably this fall. The distance between these two points is approximately 96 miles, and several months will be required for the distribution of the pipe, the ditching and the filling in. Further information will be given on this work when definite action has been taken by the owners.

**STOCKTON, SAN JOAQUIN CO., CAL.**—Street improvement. Cost not stated. Engineer, City Engineer, Stockton. Owners, City of Stockton. In response to a petition presented by residents and property owners the City Council has directed the City Engineer to prepare plans for the improvement of North Aurora street from Weber avenue to Lindsay street. Bids on the work will soon be called for.

**SACRAMENTO, CAL.**—Street improvement. Cost not stated. Engineer, City Engineer, Sacramento. Owners, City of Sacramento. The City Commission has passed a resolution calling for bids for the improvement of Front street south of N street to S street. Bids were also called for a granite block street fronting the new city wharf. Further information relative to this work may be had from the City Engineer of Sacramento.

**GREENWOOD, CREEK, MENDOCINO CO., CAL.**—Tunnel construction, \$5,000. Engineer's name not given. Owners, L. C. White Lumber Co., Greenwood. The L. C. White Lumber Co. on Greenwood Creek has been ordered to build a tunnel 100 feet long through solid rock as the State Fish and Game Commission declare the company's plant is obstructing the free travel of fish.

**STOCKTON, SAN JOAQUIN CO., CAL.**—Disposal plant. Cost not stated. Engineer, City Engineer, Stockton. Owners, City of Stockton. The City Council has passed an ordinance authorizing the purchase of five acres of land situated on the San Joaquin River about 1,000 feet north of the Santa Fe bridge. The city will use this site for the disposal site in connection with the new sewer system.

**STOCKTON, SAN JOAQUIN CO., CAL.**—Curbs, gutters and sidewalks.

Cost not stated. Engineer, City Engineer, Stockton. Owners, City of Stockton. Plans and specifications for curbs, gutters and sidewalks on Weber avenue between Monroe and Edison streets were adopted.

**DAILY CITY, SAN MATEO CO., CAL.**—Sewer construction. Cost not stated. Engineer, City Engineer, Kneese, Daily City. Owners, Daily City. City Engineer Kneese has been instructed by the City Trustees to prepare plans and specifications for the Ford street sewer and present them at the next meeting for approval. On approval bids will be called for.

**SAN LEANDRO, ALAMEDA CO., CAL.**—Furnishing rock and screenings. Cost not stated. Engineer, City Engineer, San Leandro. Owners, City of San Leandro. Bids will be opened on September 20th for furnishing rock and screenings for macadamizing purposes.

**HALFWAY, ORE.**—Water system, \$20,000. Engineer, Town Engineer, Halfway. Owners, Town of Halfway. Bids are now being taken for the new waterworks system for Halfway. The system will be capable of furnishing 100,000 gallons of pure mountain water per day, and will have a 150,000 gallon reservoir as an additional safeguard to provide water at all seasons of the year. Practically 12,000 feet of pipe will be laid. Bids close September 10. Plans were prepared by H. B. Wright, Boise, Ida.

**FOREST GROVE, ORE.**—Sewer system. Cost not stated. Engineers J. B. and R. E. Koon, Board of Trade Bldg., Portland. Owners, Forest Grove. Plans and specifications have been completed for the proposed sewer system for Forest Grove. Bids on the work close September 21st at 5 p. m. George G. Patterson is mayor of the city. An approximate list of quantities required to complete the system follows: 1,225 feet of 6-inch pipe, 55,315 feet of 8-inch pipe, 5,941 feet of 10-inch pipe, 1,876 feet of 12-inch pipe, 2,347 feet of 14-inch pipe, 6,329 feet of 16-inch pipe, 55,000 cubic yards excavation, 142 manholes, 32 lampholes, 34 flush tanks, 1 limboff tank suit and sludge bed complete.

**REDWOOD CITY, SAN MATEO CO., CAL.**—Sewers, sidewalks, etc. Cost not stated. Engineer, none. Owner, George H. Irving Co., First National Bank Bldg., S. F. The George H. Irving Co. is now taking bids for the construction of sidewalks, sewers and road work in their new subdivision at Redwood Highland. Plans can be seen at either their Redwood City office or at their offices in the First National Bank Bldg.

**MARTINEZ, CONTRA COSTA CO., CAL.**—Road construction. Cost not stated. Engineer, County Surveyor, Martinez. Owners, Contra Costa County. Plans for the final link in the road to connect Martinez and Bay Point will be presented to the Board of Supervisors at their next meeting by County Surveyor Ralph C. Arnold. They will consist of specifications for the erection of the concrete overhead crossing at Leyton. This will go over the Southern Pacific tracks, and will be 62 feet wide with a length of 165 feet. On approval of the plans, bids will be called.

**Contracts Awarded.**

**STOCKTON, SAN JOAQUIN CO., CAL.**—Street paving, \$26,925.25. Engineer, City Engineer, Stockton. Owners, City of Stockton. Contractors, Ransome-Crummey Co., Oakland. Contract price, \$26,925.25.

**SAN LEANDRO, ALAMEDA CO., CAL.**—Street improvements. Cost as follows. Engineer, Town Engineer, San Leandro. Owners, Town of San Leandro. Contractor, D. U. Toffelmier, San Leandro, \$1,181.49 and \$578.85. F. J. Faria, San Leandro, \$2,144.50.

**BERKELEY, ALAMEDA CO., CAL.**—Street improvement. Cost not stated. Engineer, City Engineer, Berkeley. Owners, City of Berkeley. Contractor, J. J. Sullivan, 1729 University avenue, Berkeley. Contract price not stated.

**CORONA, RIVERSIDE CO., CAL.**—Street paving, \$18,004.80. Engineer, City Engineer, Corona. Owners, City of Corona. Contractors, S. C. Contracting Co., Corona. Contract price, \$18,004.80.

**SAUSALITO, MARIN CO., CAL.**—Electrolier system, \$2,717. Engineer, Town Engineer, Sausalito. Owners, Town of Sausalito. Contractors, Pacific Fire Extinguisher Co., S. F. Contract price, \$2,717.

**TULARE, TULARE CO., CAL.**—Street paving. Cost not stated. Engineer, Town Engineer, Tulare. Owners, Town of Tulare. Contractors, Federal Construction Co., Sharon Bldg., S. F. Contract price not stated. Note: The contract covers paving of approximately 17 city blocks.

**BERKELEY, ALAMEDA CO., CAL.**—Sewer construction, \$20,000. Engineer, City Engineer, Berkeley. Owners, City of Berkeley. Contractors, Chambers & Heafey, Bacon Bldg., Oakland. Contract price, \$20,000.

**STORES AND OFFICES.**

**SAN FRANCISCO**—Stores and offices, 3 story and base. Class A construction, \$150,000. Architects, O'Brien Bros., 210 Montgomery street, S. F. Owner's name not given. Location, southwest corner California and Davis streets. Pile foundation, complete steel frame, exterior walls brick, concrete floors, hollow tile interior partitions, metal window sash and frames and patent store fronts. Interior finish hardwood, tile and metal. Steam heat, oil heating system, vacuum cleaning and three elevators. Exterior faced with pressed brick faced with terra cotta. Plans complete and figures being taken.

**RICHMOND, CONTRA COSTA CO., CAL.**—Store alteration and addition, frame, \$1,000. Architect, James T. Narbett, 701 Macdonald avenue, Richmond. Owner, A. Hinkelmann. Work will consist of new interior finish, electric work, plumbing and painting. Some exterior work is also specified. Plans are being prepared.

**MARTINEZ, CONTRA COSTA CO., CAL.**—Stores and offices, 2 story and base. Cost not stated. Architect, none. Owners, L. M. Lassell Co. Location, Castro and Thompson streets. Will contain stores on the first floor and offices above. Interior finish pine. Patent store fronts. Exterior covered with cement plaster on metal lath.

Plans complete and work to be done by Day Labor.

**EUREKA, HUMBOLDT CO., CAL.**—Office building, 1 story, reinforced concrete, \$10,000. Architect's name not given. Owners, City of Eureka. Eureka's water department will soon be housed in a reinforced concrete building, the matter having been taken up by the City Council at the last meeting. The structure will be located at the corner of D and 6th streets and will contain a number of offices.

**SAN FRANCISCO**—Stores and offices, 3 story and base. Class C construction, \$20,000. Architect, William Knowles, Hearst Bldg., S. F. Owners, William Ede Estate. Location, Van Ness avenue and Turk street. Will contain three stores and five office rooms. Interior finish pine and hardwood. Central heating system, metal window sash and frames. Exterior pressed brick trimmed with terra cotta. Plans complete and work to be done by Day Labor.

**LOS ANGELES, CAL.**—Stores and lots, 3 story and base. Class C construction. Cost not stated. Architect, W. J. Saunders, Laughlin Bldg., L. A. Owner, F. W. Braun. Location, 582 South Main street. Will contain one store and two lots. Interior finish pine. Elevator service, metal window sash and frames. Patent store fronts. Exterior pressed brick. Plans complete and work to be done by Day Labor.

**Contracts Awarded.**

**EXETER, TULARE CO., CAL.**—Stores and offices, 2 story and base, brick. Cost not stated. Architect, A. M. Bowser, 1007 Broadway, Oakland. Owner, E. R. Frey, Martinez. Contractors, Graham & Buckmaster, Exeter. Contract price not stated.

**SEALED PROPOSALS****PROPOSALS FOR STRUCTURES.**

**STRUCTURES, ETC.**—Department of the Interior, U. S. Reclamation Service, Washington, D. C. Sealed proposals will be received at the office of the United States Reclamation Service, Malta, Mont., until **2 o'clock p. m. September 20, 1915**, for structures, Nelson Reservoir, South Canal, Milk River project, involving about 25,000 cubic yards of excavation, 1,700 cubic yards of concrete, the placing of 115,000 pounds of steel reinforcement, the erection of 450 linear feet of metal flume and the placing in wooden structures of about 55,000 feet b. m. of lumber. The work is situated in the vicinity of Saco and Beaverton, Mont., on the Great Northern Railway. For particulars address the United States Reclamation Service, Washington, D. C.; Denver, Colo., or Malta, Mont. A. C. Davis, chief engineer.

**PROPOSALS FOR CANAL SUPPLIES.**

**PANAMA CIRCULAR 964**—Proposals for Electric Cable, Steel Cable, Swedes from Rope, Wire, Tool Steel, Galvanized Steel, Spring Steel, Drill Rods, Cast Iron Snubbing Posts, Chain, Manganese Bushings, Soil Pipe, Pipe Fittings, S. Traps, Valves, Cocks, Cock-Hole Covers, Shower Heads, Waste Strainers, Cleanouts, Basin Plugs, Flush Pipe Holders, Closet Pipes, Files, Drills, Taps, Reamers, Pipe Tongs, Wrenches, Tailor Fats, Engine Lubricators, Window Lash, Oil Hose, Magnesia Pipe Coverings, Pipe Thread Compound, Blasting Caps, Detonators, Safety Fuse, Bristol Board, Copying Books, Paper, Lumber and Cross-ties. Sealed proposals will be received at the

office of the general purchasing officer, the Panama Canal, Washington, D. C., until **10:30 a. m. September 16, 1915**, at which time they will be opened in public, for furnishing the above mentioned articles. Blanks and general information relating to this circular (No. 964) may be obtained from this office or the office of the assistant purchasing agent, Fort Mason, San Francisco, Cal.; also from the U. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal.; P. C. BOGGS, major, corps of engineers, U. S. Army, general purchasing officer.

**PROPOSALS FOR BUILDING.**

**BUILDING**—Sealed proposals indorsed "Proposals for Stable at Puget Sound" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until **11 o'clock a. m. September 25, 1915**, and then and there publicly opened, for a stable at the naval hospital, navy yard, Puget Sound, Wash. Blank proposals and particulars may be obtained on application to the bureau or to the commandant of the navy yard, Bremerton, Wash. W. M. SMITH, acting chief of bureau.

**PROPOSALS FOR ENGINES.**

**ENGINES**—Sealed proposals will be received at the Light House inspector, Portland, Ore., until **2 o'clock p. m. September 20, 1915**, and then opened, for furnishing oil engines and compressors for Slip Point Light Station, Wash. Blank proposals and particulars may be obtained by addressing the above office.

**NOTICE TO CONTRACTORS.**

**TREASURY DEPARTMENT**, Supervising Architect's Office, Washington, D. C., August 26, 1915.—**SEALED PROPOSALS** will be received at this office until **3 P. M. September 15, 1915**, and then opened for Bronze and Wood Desks, for buildings under the control of the Treasury Department, in accordance with drawings and specifications, copies of which may be had at this office. JAS. A. WETMORE, Acting Supervising Architect. (\*)

**BIDS WANTED.**

**BIDS** are desired for street work, sidewalks and sewers to be laid in Redwood Highlands, residential subdivision of Redwood City, San Mateo County. Plans, specifications and further information may be secured from GEORGE H. LIVING CO., 321 First National Bank Bldg., San Francisco, or at Redwood City Office.

**PANAMA CIRCULAR 962**—Proposals for Motor-Driven Capstans, Switch hoards, Cables and Miscellaneous Equipment for Dry Dock No. 1, Balboa Terminals.—Sealed proposals will be received at the office of the general purchasing officer, the Panama Canal, Washington, D. C., until **10:30 a. m. September 16, 1915**, at which time they will be opened in public, for furnishing the above-mentioned articles. Blanks and general information relating to this circular (No. 962) may be obtained from this office or the office of the assistant purchasing agent, Fort Mason, San Francisco, Cal.; also from the U. S. Engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal.; P. C. BOGGS, major, corps of engineers, U. S. Army, general purchasing officer.

**Proposals for Oil Storage Plant.**

**OIL-STORAGE PLANT**—Sealed proposals indorsed "Proposals for Storage Plants for Fuel Oil" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until **11 o'clock a. m. October 16, 1915**, and then and there publicly opened, for furnishing and installing the piping, pumps, valves, headers, buildings and insulations for four fuel

all storage stations at Bremerton, Wash.; Mare Island, Cal.; San Diego, Cal. and Norfolk, Va. Plans and specifications may be obtained on application to the bureau when accompanied by a certified check to insure their return, or may be seen at the navy yards and station named or at the navy yard, New York, N. Y. WM. L. SMITH, acting chief of bureau.

#### Proposal for Building.

**BUILDING.**—Sealed proposals in-  
closed "Proposals for Marine Barracks,  
Mare Island," will be received at the  
bureau of yards and docks, Navy De-  
partment, Washington, D. C., until 11  
o'clock a. m. September 27, 1915, and  
then and there publicly opened, for a  
three-story and basement marine bar-  
racks building of reinforced concrete  
construction with steel rod trusses.  
Plans and specifications may be ob-  
tained on application to the bureau or  
to the commandant of the navy yard,  
subject to a deposit of \$25 to insure  
their return, or may be seen at the  
navy yard, New York, N. Y. WM. L.  
SMITH, acting chief of bureau.

**SEALED BIDS** will be received by  
W. F. McClure, State Engineer, Forum  
Building, Sacramento, California, up to  
and including 12 o'clock, noon, Thurs-  
day September 16th, 1915, said bids  
when and there to be publicly opened  
and read for furnishing all plant, ma-  
terials and labor, and doing the work  
required to complete the "Tank Tow-  
er" at the Industrial Home for Adult  
Blind, Oakland, California, in accord-  
ance with the plans and specifications  
hereof, copies of which may be ob-  
tained on application to the State De-  
partment of Engineering, Sacramento,  
California.

Such bids will be received for the  
entire work, and must be submitted  
in forms prepared and furnished by  
the State Department of Engineering.  
Cash, a bidder's bond, or a certified  
check in the sum of ten per centum  
(10%) of the amount of the bid must  
accompany each bid.

A deposit of Five (\$5.00) Dollars will  
be required on plans and specifi-  
cations, the deposit to be returned im-  
mediately on the return of the plans and  
specifications to the State Department  
of Engineering, at Sacramento, Cali-  
fornia, in good condition.

The State Department of Engineer-  
ing reserves the right to reject any  
and all bids and to waive any infor-  
mality in any bid received.

All bids must be addressed to W. F.  
McClure, State Engineer, Sacramento,  
California, and plainly marked on the  
envelope: "Proposal for Tank Tow-  
er," Industrial Home for Adult Blind,  
Oakland, California."

(Signed) W. F. McCLURE,  
State Engineer. (\*)

#### Proposal for Canal Supplies.

**PANAMA CIRCULAR 963**—Proposals  
for Manila Rope, Suction Hose, Pack-  
ing, Asbestos Gaskets, Steel Reinforc-  
ing Bars, Ridge Roll, Sheet Brass,  
Bronze Bars, Yellow Metal, Babbit  
Metal, Boiler Tubes, Propellers, Vacu-  
um Gauges, Steam Gauges, Grease  
Cups, Dies, Reamers, Files, Twist  
Drills, Screws, Horseshoe Nails, March-  
ettes, Vises, Hoes, Anvils, Car Bits,  
Tackle Blocks, Spring Hinges, Mule  
shoes, Wagon Jacks, Dust Brushes,  
Wall Brushes, Sanding Coppers, Cot-  
ters, Rubber Bands, Paper, Pencils,  
and Lumber.—Sealed proposals will be  
received at the office of the general  
purchasing officer, the Panama Canal,  
Washington, D. C., until 10:30 a. m.  
September 16, 1915, at which time they  
will be opened in public, for furnish-  
ing the above-mentioned articles.  
Blanks and general information re-  
lating to this circular (No. 963) may be  
obtained from this office or the office  
of the assistant purchasing agent,  
Fort Mason, San Francisco, Cal., also  
from the U. S. Engineer offices in the  
following cities: Seattle, Wash.; Los  
Angeles, Cal.; F. C. 160105, major  
corps of engineers, U. S. Army, gen-  
eral purchasing officer.

## Associated Catalogues.

Here is where the  
Architect usually  
files the circulars,  
catalogues, an-  
nouncements, etc.,  
that come to his  
office. He can't  
take care of them.  
There are too many  
of them.

### the Remedy:

Associated Catalogues is  
a collection of catalogues  
of Building Materials,  
Building Equipment  
and Building Machinery  
available on the Pacific  
Coast, bound in one vol-

## Bids Opened For Main Library.

Larsen-Sampson Co. Low With Lind-  
gren Co. Second. Contract to be  
Awarded at Next Meeting.

Twenty-one sets of figures were  
opened by the Library Trustees at a  
special meeting held Friday for the  
general construction of the main  
library building to be erected in the  
Civic Center from plans by Architect  
George William Kelham, Sharon Bldg.

The low bid was presented by Larsen-  
Sampson Co. at \$397,500 and the next  
low bid by Lindgren & Co. at \$424,000.  
Checks of the three low men were re-  
tained and all others returned. A con-  
tract will be awarded shortly. Follow-  
ing is a complete list of the bids as  
opened:

## SAN JOSE AND THE SANTA CLARA VALLEY.

RAILROAD CONSTRUCTION—Cost not stated. South San Francisco, San Mateo Co., Cal. Engineer's name not given. Owners, South San Francisco Railroad and Power Co. Application has been filed with the Board of Trustees of the City of South San Francisco by the South San Francisco Railroad and Power Company for a franchise: "To construct and operate a single or double track standard gauge railroad in the city of South San Francisco, together with necessary curves, side tracks, switches, crossovers and turnouts."

SEWER CONSTRUCTION—Cost not stated. Daly City, San Mateo Co., Cal. Engineer, City Engineer Kneese, Daly City. Owners, Daly City. City Engineer Kneese has been instructed by the City Trustees to prepare plans and specifications for the Ford street sewer, and present them at the next meeting for approval. On approval bids will be called for.

HOME FOR CHILDREN—2 story and base. Class A construction. Cost not stated. Redwood City, San Mateo Co., Cal. Architect, Houghton Sawyer, Shreve Bldg., S. F. Owners, Drexler Home for Crippled Children. Complete steel frame, brick and terra cotta walls, hollow tile interior partitions. Interior finish pine and hardwood. Steam heat, oil burning furnace and hot water system. Exterior faced with pressed brick. Plans complete and figures to be called for at once.

COUNTY HOSPITAL BUILDINGS—1 story, frame. Cost not stated. San Jose, Santa Clara Co., Cal. Architect's name not given. Owners, Santa Clara County. Bids will be opened on September 27th for constructing a milk-barn, milk room, cottage and hay barn at the Santa Clara Hospital. Plans can be secured from the office of the County Clerk.

RAILROAD CONSTRUCTION—Cost not stated. San Jose, Santa Clara Co., Cal. Engineer, Engineering Department Peninsular R. R. Co., San Jose. Owners, Peninsular Railroad Co. Railroad engineers have started a survey for a railroad to be constructed by the Peninsular Company from the terminus of their present line at the eastern city limits to Kirk avenue on Alum Rock avenue.

RESIDENCE—2 story and base, frame, \$25,000. San Mateo, San Mateo Co., Cal. Architects, Charles Peter Weeks, Mutual Bank Bldg., S. F. Owner, E. J. Tobin. Will contain 14 rooms, bath and sleeping porch. Interior finish pine, hardwood and white enamel. Hardwood floors, furnace heat, open fire places, tile and brick mantels and hot water system. Bath rooms finished in tile. Exterior cement plaster and brick veneer. Plans being prepared.

SEWERS, SIDEWALKS, ETC.—Cost not stated. Redwood City, San Mateo Co., Cal. Engineer, none. Owner, George H. Irving Co., First National

is now taking bids for the construction of sidewalks, sewers and sidewalk work in their new subdivision at Wood Highland. Plans can be seen either their Redwood City office or their offices in the First National Bank Bldg.

## MARIN, CONTRA COSTA AND SONOMA COUNTIES

**BRIDGE**—Reinforced concrete. Cost not stated. Fairfield, Solano Co., Cal. Engineer, County Surveyor, Fairfield, Owners, Solano County. Bids will be opened on September 17th for construction of a reinforced concrete arch bridge on County Road No. 388 over Pleasantley Creek at the ranch of F. F. Sch. Vacaville Township, Road District No. 4.

**APARTMENT HOUSE AND STORES**—2 story and base, frame, \$10,000. Martinez, Contra Costa Co., Cal. Architect, James T. Narbett, 704 Macdonald avenue, Richmond. Owner, James Messer. Location, Martinez, covering area of 50 by 100 feet. Will contain 100 on first floor and two and three room suites above. Interior finish, pine throughout with some hardwood floors. Central heating system, oil burning space, patent store fronts and wall s. Bath rooms finished in tile. Exterior covered with cement plaster on metal lath. Plans complete and figures being taken.

**WATER SYSTEM**—Cost not stated. San Rafael, Marin Co., Cal. Engineer, County Surveyor, San Rafael. Owners, Marin County. The Municipal Water District bond election carried by a vote of 4 to 1. The bonds voted amounted to \$3,000,000. Plans for a considerable amount of work will be entered in the near future. Laying of mains, ditching, etc., are among the improvements to be made on the newly wired system.

**RETAINING WALL**—Reinforced concrete. Cost not stated. Mill Valley, Sonoma Co., Cal. Engineers, Sloan & Olson, Nevada Bank Bldg., S. F. Owners, Mill Valley. Bids will be opened on September 14th for the construction of a reinforced concrete retaining wall for the town of Mill Valley. The following are the approximate quantities of work and material: 14,120 lbs. reinforcing steel, 142 cu. yds. concrete, 140 lin. ft. of drain tile, 275 lin. ft. of 1½ inch galvanized pipe and 142 yds.

**ELECTRIC LINE CONSTRUCTION**—Cost not stated. Martinez, Contra Costa Co., Cal. Engineer's name not given. Owners, Great Western Power Co., S. F. Application has been filed with the County Supervisors by the Great Western Power Co. to erect lines, distributing electricity, along, cross, upon, over, through and under certain parts of the roads of Contra Costa County.

**STREET IMPROVEMENT**—Cost not stated. Sebastopol, Sonoma Co., Cal. Engineer, City Engineer, Sebastopol. Owners, City of Sebastopol. Bids will be opened on September 11th for grading and rocking of Litchfield avenue, and bids for constructing cement sidewalks and gutters on said avenue, according to specifications.

**STREET PAVING**—Cost not stated. Eureka, Contra Costa Co., Cal. Engineer,

neer, Town Engineer, Crockett. Owners, town of Crockett. Main street of this city from the Southern Pacific station to the outskirts of the city is being torn up and will be macadamized. Supervisor J. F. Casey is in charge of the work.

**STREET IMPROVEMENT**—Cost not stated. Fairfield, Solano Co., Cal. Engineer, Town Engineer, Fairfield. Owners, Town of Fairfield. Bids will be received up to September 14th for oil and gravel street improvements as follows: Two intersections in Texas street at Clay and Washington streets, each about 80 feet square.

**STORES AND OFFICES**—2 story and base, concrete. Cost not stated. Martinez, Contra Costa Co., Cal. Architect, none. Owners, L. M. Lassell Co. Location, Castro and Thompson streets. Will contain stores on the first floor and offices above. Interior finish pine. Patent store fronts. Exterior covered with cement plaster on metal lath. Plans complete and work to be done by Day Labor.

**HOTEL AND STORES ADDITION AND ALTERATION**—Frame, \$8,000 to \$10,000. Martinez, Contra Costa Co., Cal. Architect, James T. Narbett, 704 Macdonald avenue, Richmond. Owner, L. M. La Selle. Work will consist of rearranging upper floor for rooms, interior trim, painting, plastering, electric work and plumbing. Plans being prepared.

**ROAD CONSTRUCTION**—Cost not stated. Martinez, Contra Costa Co., Cal. Engineer, County Surveyor, Martinez. Owners, Contra Costa County. Plans for the final link in the road to connect Martinez and Bay Point will be presented to the Board of Supervisors at their next meeting by County Surveyor Ralph C. Arnold. They will consist of specifications for the erection of the concrete overhead crossing at Leyton. This will go over the Southern Pacific tracks, and will be 62 feet wide with a length of 105 feet. On approval of the plans, bids will be called.

### Contracts Awarded.

**STORE ALTERATION AND ADDITION**—Frame, \$1,000. Richmond, Contra Costa Co., Cal. Architect, James T. Narbett, 704 Macdonald avenue, Richmond. Owner, A. Hunkelmann. Work will consist of new interior finish, electric work, plumbing and painting. Some exterior work is also specified. Plans are being prepared.

**ELECTRICIAN SYSTEM**—\$2,717. Sausalito, Marin Co., Cal. Engineer, Town Engineer, Sausalito. Owners, Town of Sausalito. Contractors, Pacific Fire Extinguisher Co., S. F. Contract price, \$2,717.

## FRESNO, MODESTO STANISLAUS AND CENTRAL CALIFORNIA

**PIPE LINE CONSTRUCTION**—Cost not stated. McKittrick, Kern Co., Cal. Engineer, Engineering Dept. Valley Pipe Line Co., 313 Sansome street, S. F. Owners, Valley Pipe Line Co. It is reported here that the Valley Pipe Line Co., a subsidiary of the Royal Dutch Shell interests, is planning to build a pipe line from Coalinga to the tank farm located four miles south of McKittrick, and that the present intention

is to begin the work of construction probably this fall. The distance between these two points is approximately 36 miles, and several months would be required for the distribution of the pipe, the ditching and the filling in. Further information will be given on this work when definite action has been taken by the owners.

**IRRIGATION WORK**—Cost not stated. Oakdale, Stanislaus Co., Cal. Engineer, Chief Engineer South San Joaquin irrigation District, Oakdale. Owners, South San Joaquin Irrigation District. The directors of the South San Joaquin and Oakdale Irrigation Districts have recently returned from a trip into the mountains to investigate the reservoir sites. On returning it was suggested that a reservoir be constructed in the Ramsey reservoir site, owned by E. R. Pattee et al. It was also thought that the suggestion offered by the Utica Mining Co. for a dam built by the company was a good one. The proposal of the Utica Co. is that it and the district each pay half the cost of a \$1,200,000 reservoir at Spicer's Meadows, which would store 61,000 acre feet of water. The dam would be 150 feet high. This dam site is wide, while at the Ramsey site a narrow dam would have to be built, perhaps 250 feet high. About 500,000 acre feet could be stored here. The dam would cost between \$750,000 and \$1,250,000. It is probable that a meeting will be called to discuss the proposed work.

**PACKING HOUSE**—1 story, frame. Cost not stated. Porterville, Tulare Co., Cal. Architect, O. H. Huber, Porterville. Owners, Mid-California Citrus Association. Will cover an area of 72 by 100 feet. Capacity six cars per day. Special machinery. Exterior rustic. Plans complete and work to be done under direction of H. F. Bray.

**SCHOOL ADDITION**—C, frame. Cost not stated. Hanford, Kings Co., Cal. Architect's name not given. Owners, Hanford School District. Bids are now being received for the construction of an addition to the present high school building manual training quarters until September 15th. Plans, specifications and full information regarding the work may be had from L. E. Hall, Clerk of the High School Board of Trustees.

### Contracts Awarded.

**STORES AND OFFICES**—2 story and base, brick. Cost not stated. Exeter, Tulare Co., Cal. Architect, A. M. Bowser, 1007 Broadway, Oakland. Owner, E. R. Frey, Martinez. Contractors, Graham & Buckmaster, Exeter. Contract price not stated.

**STREET PAVING**—Cost not stated. Tulare, Tulare Co., Cal. Engineer, Town Engineer, Tulare. Owners, Town of Tulare. Contractors, Federal Construction Co., Sharon Bldg., S. F. Contract price not stated. Note: The contract covers paving of approximately 15 city blocks.

**IRRIGATION PROJECT**—\$1,000,000. Terra Bella, Tulare Co., Cal. Engineer, D. W. Albert, Yuba City. Owners, Terra Bella Irrigation District. In connection with the development of the Terra Bella irrigation project, a bond of \$1,000,000 was recently issued by Messrs. T. W. McChesney and A. J.

Ballardie, of the McClenahan-Ballardie Contracting Co., 180 Jessie street, S. F., and D. W. Albert, a hydraulic engineer of Yuba City, are now in Terra Bella looking over the proposed work. A detailed investigation will be made with a view of bidding on the work. It is their purpose to put in a bid for the entire project, including the diversion dam, intake, ditch, reservoir dam, canals, etc., taking pay for the same in bonds of the irrigation district. Consulting Engineer Stephen K. Kieffer is preparing a final report, which will be submitted to the directors of the district shortly. Final action will probably be taken when the report is submitted.

**BATH HOUSE ADDITION**—Frame and concrete. Cost not stated. Paso Robles, San Luis Obispo Co., Cal. Architect, none. Owner, E. J. Burlingham, the new proprietor of the Sparks Bathing House, is planning to make several additions to the present building. An addition will be made on the rear of the present building for a plunge, which will be 25 by 75 feet and a depth of from 3 to 7 feet, and which will probably be of concrete and tile construction. The proposition of adding two stories, making the structure three stories for bath rooms and apartments is also being considered.

## SACRAMENTO, STOCKTON AND NORTHERN CALIFORNIA.

**STREET IMPROVEMENT**—Cost not stated. Stockton, San Joaquin Co., Cal. Engineer, City Engineer, Stockton. Owners, City of Stockton. In response to a petition presented by residents and property owners the City Council has directed the City Engineer to prepare plans for the improvement of North Aurora street from Weber avenue to Lindsay street. Bids on the work will soon be called for.

**STREET IMPROVEMENT**—Cost not stated. Sacramento, Cal. Engineer, City Engineer, Sacramento. Owners, City of Sacramento. The City Commission has passed a resolution calling for bids for the improvement of Front street south of N street to S street. Bids were also called for a granite block street fronting the new city wharf. Further information relative to this work may be had from the City Engineer of Sacramento.

**TUNNEL CONSTRUCTION**—\$5,000. Greenwood Creek, Mendocino Co., Cal. Engineer's name not given. Owners, L. C. White Lumber Co., Greenwood. The L. C. White Lumber Co., on Greenwood Creek has been ordered to build a tunnel 100 feet long through solid rock, as the State Fish and Game Commission declare the company's plant is obstructing the free travel of fish.

**DISPOSAL PLANT**—Cost not stated. Stockton, San Joaquin Co., Cal. Engineer, City Engineer, Stockton. Owners, City of Stockton. The City Council has passed an ordinance authorizing the purchase of five acres of land situated on the San Joaquin River about 1,000 feet north of the Santa Fe bridge. The city will use this site for the disposal site in connection with the new sewer system.

**CURBS, GUTTERS AND SIDE-**

**WALKS**—Cost not stated. Stockton, San Joaquin Co., Cal. Engineer, City Engineer, Stockton. Owners, City of Stockton. Plans and specifications for curbs, gutters and sidewalks on Weber avenue between Monroe and Edison streets were adopted.

**OFFICE BUILDING**—1 story, reinforced concrete, \$10,000. Eureka, Humboldt Co., Cal. Architect's name not given. Owners, City of Eureka. Eureka's water department will soon be housed in a reinforced concrete building, the matter having been taken up by the City Council at the last meeting. The structure will be located at the corner of D and 6th streets, and will contain a number of offices.

**HOTEL AND INNS**—1 and 2 story, frame. Cost not stated. Yosemite Valley, Cal. Architects, Daniels & Wilheim, Monadnock Bldg., S. F. Owners, Desmond Park Service Co., Underwood Bldg., S. F. Hotel will contain 120 to 140 rooms, office, lounging rooms and dining rooms. There will be 15 small one-story inns, five of which will be erected this year and three a year following. Interior finish rustic. Exterior, stone and shakes. Plans complete and work to be done by Day Labor.

**RESIDENCE**—1 story, frame. Sacramento, Cal. Architect, none. Owner, H. F. Carstens, 215 Ochser Bldg., Sacramento. Will contain five rooms and bath. Interior finish pine. Hardwood floors, open fire place and tile mantel. Exterior cement plaster and rustic. Plans complete and work to be done by Day Labor.

**BRIDGES**—14, timber, \$500 each. Oroville, Butte Co., Cal. Engineer County Surveyor, Oroville, Owners, Butte County. Permission has been granted Supervisor Evans to proceed with the construction of 14 small bridges in his district, the cost of each not to exceed \$500. The structures, which will replace those pronounced a menace to the traveling public, are as follows: Six bridges on the Biggs-Princeton road; bridge over Dry Creek west of Nelson, the Crain bridge on the Shippee road; four bridges on the Day-non road; two small bridges on the Shippee road.

### Contracts Awarded.

**STREET PAVING**—\$26,025.25. Stockton, San Joaquin Co., Cal. Engineer, City Engineer, Stockton. Owners, City of Stockton. Contractors, Ransome-Crummey Co., Oakland. Contract price, \$26,025.25.

## LOS ANGELES AND SOUTHERN CALIFORNIA.

**RESIDENCE**—1 and 2 story, reinforced concrete. Cost not stated. Chino, San Bernardino Co., Cal. Architect, Myron Hunt, Hibernian Bldg., L. A. Owner, E. M. Fowler, Pasadena. Location, near Chino. Will consist of several buildings besides the residence all of which will be of reinforced concrete. Interior finish, pine and hardwood with hardwood floors and white enamel. Central heating system, open fire places and brick mantels. Hot water system. Bath rooms finished in tile. Exteriors covered with cement plaster. Plans being figured.

**APARTMENT HOUSE**—2 story a base, frame. Cost not stated. Los Angeles, Cal. Architects, Buchanan & Brockway, Chamber of Commerce Bldg., L. A. Owner, Dr. Rinehart. Location, Park street near Los Angeles avenue. Arranged for bungalow cottages and will contain three two-story and eight one-story buildings. Interior finished in pine and hardwood with hardwood floors. Central heating system, wall beds and vacuum cleaning. Bath rooms finished in tile. Exterior covered with shingles and cement plaster on metal lath. Plans being prepared.

**APARTMENT HOUSE**—3 story a base, brick and frame, \$20,000. Los Angeles, Cal. Architect, Edgar Dorr, 1425 Winfield street, L. A. Owner, W. J. Dorr. Location, 1425 Winfield Court, covering an area of 50 x 90 feet. Will contain 42 suites of two and three rooms. Interior finish pine and hardwood with some hardwood floors. Steam heat, hot water system and wall beds. Bath rooms finished in tile. Exterior covered with brick veneer. Plans being prepared.

**APARTMENT HOUSE**—3 story a base, frame. Cost not stated. Pasadena, Los Angeles Co., Cal. Architect, Arthur S. Heineman, 331 San Fernando Bldg., L. A. Owner's name withheld. Location, South Los Robles avenue. Will contain total of 20 suites of two and three rooms. Interior finish pine and hardwood. Wall beds, steam heat and hot water system. Tile in bath rooms. Exterior covered with cement plaster on metal lath. Plans being prepared.

**SCHOOL**—1 story and base, frame and plaster. Cost not stated. San Jacinto, Riverside Co., Cal. Architect, Leo Kroonen, Corona. Owners, S. Jacinto School District. Will cover an area of 114 by 114 and contain nine class rooms, office and auditorium. Interior finish pine with maple floors. Central heating system, progressive clocks and vacuum cleaning. Exterior cement plaster. Plans complete. Bids to be opened on September 15th.

**STORES AND LOFTS**—3 story a base. Class C construction. Cost not stated. Los Angeles, Cal. Architect, W. J. Saunders, Laughlin Bldg., L. A. Owner, F. W. Braun. Location, South Main street. Will contain six store and two lofts. Interior finish pine. Elevator service, metal window sash and frames. Patent store front. Exterior pressed brick. Plans complete and work to be done by Day Labor.

### Contracts Awarded.

**RESIDENCE**—2 story and base, brick. Cost not stated. Los Angeles, Cal. Architects, Morgan, Walls & Morgan, Van Nuys Bldg., L. A. Owner's name withheld. Contractor, Thomas C. Marlowe, Story Bldg., L. A. Contract price not given.

**SCHOOL**—2 story and base. Class C construction, \$25,999. Los Angeles, Cal. Architect, Homer W. Glidden, Wright & Callender Bldg., L. A. Owner, Amelia School District. Contractor, G. W. Gilbreth & Co., Hollingsworth Bldg., L. A. Contract price, \$25,999.

## Clover Leaf Toilet Cream

### A Delight of the Toilet

The one Perfect Preparation for Bringing  
that Delicate Beauty to the Skin so desired  
by the Ladies and admired by the Gentle-  
men. Fine for the face after shaving.  
At all Druggists 25c.

Manufactured By

**Clover-Leaf Pharmacy, Inc.**

Cloverdale

California

It is worth more to you  
than the cost of your first  
order, to know about

**"TOXEMENT"**

Try it in your concrete,  
Try it in your cement mortar.

# Building and Engineering News

Devoted to the Architectural, Building, Engineering and Industrial Activities  
of the Pacific Coast.

Issued Weekly, \$3.00 per year

San Francisco, September 15, 1915

Fifteenth Year, No. 37

The mule teams are losing their jobs on the streets of the City of Los Angeles collecting non-combustible garbage. Their inefficiency has been established by the motor truck.

The result of the recent tests conducted under the personal supervision of Lute Mather, superintendent of this department of city affairs, furnish figures that will prove a surprise.

In every way the trucks have proven their superiority. They are faster, more sanitary and more economical. The tests have been complete and the trucks have been adopted. Each truck is taking the place of four mule teams and in reality eight teams, for the trucks are covering the territory every week where the teams only made the collections semi-monthly.

On the official tests 90,000 pounds were collected, covering a territory of 228 miles, with a total fuel and oil cost of \$2.30. Figured down to the finest detail, the actual cost was 34 cents per cubic yard for every yard collected.

One of the most important features of the work of the Los Angeles manufactured power wagons in this work is the record they have established for reliability. For five months seven trucks have been in regular service, covering a daily mileage averaging in the neighborhood of fifty miles. Not one of the trucks have failed to make its regular trip for a single day.

San Francisco, with over 5,000 Southern Pacific employees, including the general officers of the company, had a payroll last year of approximately \$5,000,000; 25,000 persons in Los Angeles are directly dependent on the Southern Pacific for their livelihood, while no less than \$4,000,000 yearly is spent by them over the counters of their business houses.

Oakland, with a wage disbursement last year of nearly \$4,500,000, followed closely on the heels of Los Angeles, while Sacramento and Roseville, with their great shops, had combined pay rolls comparable with that of Oakland.

Outside of the great terminals and shop centers, Bakersfield is in a class by itself, with 860 employees last year and a pay roll of \$1,000,000. Incidentally, Bakersfield, surrounded as it is by a great and growing farming community, is rapidly increasing in importance as a division point.

Other division points with large pay rolls last year are: Dunsmuir, 630 employees and a disbursement of \$750,000; Fresno and Tracy with 500 employees each, and pay rolls of \$400,000; Stockton and San Luis Obispo, 400 employees each, with pay rolls of \$375,000, and San Jose, 360 employees and a pay roll of \$335,000.

State Engineer W. F. McClure has just returned from an inspection of roads in Northern California, which took him along the east side of the Sierra Nevada Mountains, from Modoc County to Lake Tahoe. The principal purpose of the trip was to begin the building of the bridge and road across Middle Lake, Modoc County, connecting Western Nevada with Cedarville and other Modoc sections. This new road will keep traffic open the year round between the two States. Hitherto the road has always been flooded during the winter and early spring.

The new road will also open up the 70,000-acre reclamation and irrigation project in the Surprise Valley, which has been financed by Los Angeles capitalists. Surprise Valley, although little known, is one of the largest wheat producing sections in the State.

McClure reports that the State road along the west side of Lake Tahoe to Placerville is in excellent condition.

The recent election in Mojave County, Ariz., of which Kingman is the county seat, resulted in the adoption of the proposition to issue \$100,000 of good roads bonds. Most of the proceeds from the issue will be used for improving the main east and west highway across the county, which is a part of the National Old Trails route.

The decision by the Department of the Interior granting to C. J. Young a reservoir site in Pete Valley insures the construction of an irrigation system that will water approximately 400,000 acres of land in Lassen County, Cal., and Washoe County, Nev.

The project, which the decision makes possible, will be constructed by private capital and control twenty-five miles of ditches already constructed, also three dams and one reservoir in addition to the site in Pete Valley. The project will provide for the storage of 156,000 acre feet of water from Pete and Willow Creeks.

There will be a double system of canals, one on the lower levels and one known as the East High Line Canal, which will pass through Susanville township and permit the irrigation of 40,000 acres of rich loamy uplands. In addition to this the high line canal will irrigate 210,000 acres in Nevada. The project also includes the draining of Honey Lake, which the Government has had in view for some years. A great irrigation company is to be formed.

The section affected is one that promises great things in the way of development. The soil is rich and deep and the climate as near perfect for standard agriculture and fruit raising as possible.

The most important publication ever issued in the interest of the California Petroleum Industry is Bulletin No. 69 of the California State Mining Bureau.

"Bulletin 69" consists of a volume of history, current facts and statistics amply illustrated that covers 519 pages. Accompanying this book is a large map folio that is the most complete of anything of the kind that has ever been prepared for the public.

In his letter of official transmission of this bulletin, State Mineralogist Hamilton calls attention to the fact that "the economic and financial aspect of the subject has been given particular attention," and that scientific and engineering data form the necessary basis of the report.

"Bulletin No. 69" deals with the extent and location of the California oil deposits, cost of extracting the oil and the marketing and financial conditions governing the industry. The aim to make the work thoroughly comprehensive has been successfully accomplished, for it will be found to be of great value to all interested.

# Lessons from the Exposition.

Collected by George Nelson, C. E.

## RECORDING INSTRUMENTS IN THE BRISTOL BOOTH.

"Up to the minute" is the proper term to apply to both the Bristol Exhibit and also to the Bristol Instruments. The exhibit, with its hand-operated demonstration models, is complete in every detail, and, with a few words from the demonstrator, shows the basic principles upon which the many instruments are constructed.

### RECORDING INSTRUMENTS.

INDUCE UNIFORM OPERATING EFFICIENCY,  
i. e. they help the Superintendents to maintain uniformly

### TEMPERATURE.

Bristol's Recording Thermometers, Indicating Thermometers, Thermostats, Recording and Indicating Electric Pyrometers, Resistance Thermometers, High Temperature Regulators.

### ELECTRICITY.

Bristol's Recording Voltmeters, Milli-Voltmeters, Ammeters, Wattmeters, Frequency Meters and Power Factor Meters, both Round Chart and Strip Chart Types.

### TIME, MOTION AND SPEED.

Bristol's Time Recorders, Operation Recorders and Recording Electric Counters, Recording Motion Meters, Recording Tachometers.

The Bristol Company Exhibition Booth, Palace of Machinery, Section 22.

efficient operating conditions in hundreds of different industries and processes.

### PRESSURE AND VACUUM.

Bristol's Recording Pressure Gauges, Vacuum Gauges, Combination Gauges, Draft Gauges, Barometers.

### LIQUID LEVEL.

Bristol's Recording Liquid Level Gauges furnished, if desired, with long-distance electric transmitting system.

### DIFFERENTIAL PRESSURE AND FLOW.

Bristol's Recording Differential Pressure Gauges and Flow Meters, Spring Type and Float Type.

### HUMIDITY.

Bristol's Wet and Dry Bulb Recording Thermometers or Psychrometers.

This booth occupies space 30x40 feet in the Palace of Machinery. This booth was built in Waterbury, Conn., and shipped in sections to San Francisco.

It will be noted that Bristol Instruments themselves are used almost exclusively for decorating the booth. The color of the structure is very light pearl gray with dark green burlap-covered panels.

A feature of this exhibit is the set of demonstration models mounted on tables for hand operation. Several of these are shown separately on the following pages. Most of these models are so constructed that they can be operated by hand by the visitor and the operating principles studied in this way.

There are more than 200 decorative models installed in this exhibit in addition to about 100 complete calibrated working models.

**Recording Pressure Gauges.**

For all ranges of pressure and vacuum from full vacuum to 20,000 lbs. per square inch. The first Bristol Recording Pressure Gauges were put into service in 1889, and their extreme simplicity of construction has been responsible for their great durability. More than 35,000 Bristol Recording Gauges have been sold. They are furnished for use on air, steam and liquids and are graduated in many different units, such as pounds, ounces and metric units.

**Recording Pressure and Vacuum Gauges.**

These three demonstration models of the Bristol Recording Pressure Gauges are exhibited in skeleton form to show the simple construction and principle of operation of the moving elements. Both helical and diaphragm types of pressure tubes are shown with pen arm attached direct to the moving element without any multiplying devices or other complicated mechanism.

**Long-Distance Electric Transmitter and Recorder.**

This exhibit shows one of the new Long-Distance Electrical Bristol Recording Gauges with which the record may be transmitted over long distances. The electrical transmitting and receiving instruments employ the principle of the induction balance, and may be adapted to recorders for pressure, temperature and motion.

**Portable Recording Pressure Gauges.**

This light, compact, portable recorder has been extensively used by gas companies for recording pressures. The absence of multiplying devices, bearings and other complicated mechanism insures accuracy and sensitivity, and dependability even when roughly handled.

**Long-Distance Electric System.**

Bristol's Recorders for Pressure, Temperature and Motion can now be furnished with patented electrical transmitting devices for adapting them to record over long distances, as, for instance, twenty-five miles. The recorder and transmitter are shown above in skeleton form with pressure bulb for manual demonstration.

**Recording Thermometer.**

This type recording thermometer is especially suitable for use in cold storage rooms or for outdoor atmospheric temperatures, as, for instance, in orange grove. Similar moisture-proof cases are furnished on other Bristol Recorders when needed.

**Recording Liquid Level Gauge.**

To illustrate the working principle of the Bristol Liquid Level Gauge, this complete model is exhibited with an open tank into which the bulb can be lowered by hand and a record of the depth obtained.

**Electric Pyrometers.**

Used with the Bristol Patent Thermo-couples for measuring high temperatures.

**Temperature Controller and Recording Thermometer.**

In this working exhibit the temperature inside a small gas oven is automatically controlled and maintained at a

constant point by means of a Bristol Thermometer-Thermostat and Electric Gas Valve. The Recording Thermometer, which is shown mounted with these, provides a continuous record of the oven temperature and, therefore, a check on the operation of the controlling devices.

**Recording Differential Pressure Gauge or Flow Meter for Air.**

Bristol's Recording Differential Pressure Gauges are designed for use in connection with Pitot Tubes, Orifices and Venturi Tubes to record velocity or volume of flow of air, gas, liquids and steam. The above recorder is exhibited with connections to three of these measuring elements and an air pump for circulating air through any one of these.

**Recording Voltmeter, Ammeter and Wattmeter.**

This exhibit shows in an interesting way the use of Bristol Recording Voltmeter, Ammeter and Wattmeter with a miniature hand-operated electric lighting dynamo.

**Combination Indicating and Recording Electric Pyrometer.**

For many practical applications of electric pyrometers it is desirable to have the furnace temperature indicated at the furnace operator's post of duty and a recorder installed in the office of the superintendent or foreman. This combination indicating and recording unit of Bristol Pyrometers, as shown above, provides for both these requirements and many such outfits are in service, as, for instance, in connection with heat treatment furnaces for steel, blast furnaces, water gas machines and galvanizing baths. Each of these instruments includes a Weston milli-voltmeter movement.

**Recording Thermometers.**

For all commercial ranges of temperature from 60 degrees below zero to 800 degrees F. More than 20,000 have been sold for use for hundreds of different purposes.

**Recording Voltmeters.**

For all ranges of alternating and direct current.

Thousands of these voltmeters are in daily service.

Bristol's Recording Voltmeters, Ammeters, and Wattmeters for both D. C. and A. C., can now be furnished either in the round chart or strip chart type.

**High-Resistance Electric Pyrometer.**

This portable Pyrometer for temperatures up to 3,000 degrees F., or a range of about eighteen milli-volts, is one of the high-resistance type and it is used with more than 100 ohms in circuit.

**Recording Differential Pressure Gauge or Flow Meter for Water.**

In this demonstration unit the Bristol Recording Differential Pressure Gauge has been applied for recording the flow of water with the Bristol Differential Tube.

By means of the hand pump water can be circulated through the pipe in which the Differential Tube is installed and a record of its flow obtained.

**Time and Motion Recorder.**

For continuously recording time and extent of mechanical movements. Valuable for recording the motion and position of sluice gates for turbines and water wheels, gas holders, alternating current feeder regulators, steam exhaust relief valves, elevators; also for recording the operation of automatic welding machines, conveyors, etc., also with floats for recording liquid level.

**Indicating Electric Pyrometer and Automatic High Temperature Controller.**

Here is shown one of the new Bristol High Temperature Regulators with electric gas valve applied to a miniature gas furnace. With this automatic electrical equipment the temperature in a furnace is continuously maintained constant at the desired point.

**Electric Time Recorders.**

For recording electrically the time of mechanical movements and the operation of machinery. Especially valuable for recording the operation of power plant equipment, valves, switches, pumps, tilt traps, automatic weighers, conveyors, circuit breakers, elevators, blast furnaces, coke ovens, reversing valves of open hearth furnaces, paper machines, cement kilns, trolley cars, railway switches, etc.

**Strip Type Recording Milli-Voltmeter.**

This strip type recorder is here shown equipped with two Weston milli-voltmeter movements, and records are secured from these by a frictionless method. The same general type of strip recorder is also furnished for single full-strip width scale, as shown on the switchboard on the opposite page.

**Strip Type Operating Recorder.**

This strip type Bristol Electric Time Recorder is designed to record twenty different operations on one chart. The chart can be advanced at speeds varying from three-fourths of an inch per hour to twelve inches per minute.

**Recording Pneumatic Tachometers.**

For continuously recording the variations in the speed of shafting, machines, engines, etc. This patented pneumatic type of recording tachometer consists of recording instrument, flexible connecting tube and revolving mechanism. Special sprockets and chains are furnished for connecting to shaft, as shown above.

**Recording Electric Tachometer.**

This exhibit demonstrates the hand operation of a pneumatic tachometer like that shown complete at top of page. The recording instrument is a low-range vacuum gauge. The motion of the revolving tube causes a partial vacuum the degree of which determines the position of the recording pen on the chart scale reading in revolutions per minute.

**Bristol-Durand Radii Averaging Instrument.**

The Bristol-Durand Radii Averaging Instrument shown here is designed for securing the average of records on round charts having uniform graduations.

A curve is used with each uniform chart to interpret the readings obtained with this instrument.

Bristol Instruments were exhibited at the Columbian Exposition in Chicago, 1893, and at St. Louis and other expositions, and medals awarded, but this exhibit at the Panama Exposition is by far the largest and best exhibit of recording instruments ever shown.

This business was founded in 1889 by Wm. H. Bristol, the present President and General Manager, for the purpose of manufacturing two of his patented inventions, the Bristol Recording Pressure Gauges, and Bristol's patent Steel Belt Lacing. Since the first the growth has been consistent, and during the last twenty years the floor space has increased at the rate of doubling once every five years. Two factors have been largely responsible for the development of this most extensive line of recording instruments in the world.

Firstly, Bristol's Recording Instruments are unique in their extreme simplicity of construction, and for this reason have proved to be well adapted for use under ordinary shop conditions, and extremely durable in service.

Secondly, the service rendered by Bristol Recording Instruments is a much needed service, namely, Bristol Recorders help the manager or superintendent to secure and maintain uniformly efficient operating conditions in hundreds of different industries and processes. The continuous night and day records obtained with these recorders give the superintendent a check on operating conditions at all times.

Switchboard with A. C. Recorders for Volts, Amperes, Watts, Cycles and Power Factor.

This board includes recording instruments as follows: a Voltmeter, an Ammeter, two Wattmeters, Frequency Meter, and Power Factor Meter.

Recording Electric Counter.

Bristol's Recording Electric Counter connected to a miniature press arranged for hand operation. Each revolution of the press closes a contact in the battery circuit to the recorder and the pen is thus advanced a certain distance on the chart scale toward the outside of the chart and when this is reached the pen automatically drops back to the beginning of the scale at center.

Indicating and Recording Tachometer.

This combination indicating and recording unit of the Bristol Recording Electric Tachometer is exhibited with an A. C. magneto arranged for hand operation.

With the powerful magneto used a robust type of recorder is available. The recording pen is in continuous contact with surface of chart so that a complete record of every speed variation is obtained.

Recording Wet and Dry Bulb Thermometer or Recording Psychrometer.

For determining the degree of humidity or moisture in the atmosphere. The special design and the use of fan and motor insures accurate psychrometric readings. The temperature of the wet bulb and the dry bulb are recorded side by side on the chart and by referring these readings to a table or chart the actual percentage of relative humidity can be determined.

Long-Distance Electric Thermometer.

This demonstration equipment is arranged to measure the temperature of the hand applied to the coil bulb. When the sensitive bulb is grasped in the hand, the pointers of both transmitter and remote indicator rise on the scale to indicate the hand temperature.

#### PAN-AMERICAN ROAD CONGRESS.

A. B. Fletcher, State Highway Engineer of California, M. M. O'Shaughnessy, City Engineer of San Francisco, and William R. Roy, State Highway Commissioner of Washington, have been selected by the program committee to take active parts in the work of the Pan-American Road Congress, which is to be held in Oakland during September.

Fletcher's paper will on the subject of "Organization and System in Highway Work"; O'Shaughnessy will lead the discussion on the subject of "Street Pavements."

The advance official programme of the Pan-American Congress shows that twenty-seven separate subjects will be discussed during the ten sessions, these subjects covering practically the entire field of road and street construction and maintenance, and the organization and administration of highway affairs.

The Pan-American Road Congress will convene in the Municipal Auditorium, Oakland, Monday morning, September 13, and continue until Friday night.

The opening address will be made by Governor Charles W. Gates of Vermont, chairman of the executive committee.

He will be followed by Governor Johnson of California, Mayor Davie of Oakland, and Director of Congresses Barr of the Panama-Pacific Exposition, who will deliver the address of welcome.

Addresses in response will be made by George W. Tillson, president of the American Road Builders' Association, and Fairfax Harrison, president of the American Highway Association.

The congress will be held under the joint auspices of these two associations, assisted by the Tri-State Good Roads Association of California, Oregon and Washington, and the Pacific Highway Association.

Previously, the two great associations, which are of national character, have held separate annual conventions.

On Wednesday, September 15, a diversion from the usual place of meeting has been announced. That day has been dedicated as Pan-American Road Congress Day, and the sessions of the congress will be held in Festival Hall at the Exposition.

### APARTMENT HOUSES.

**SAN FRANCISCO**—Apartment house, 3 story and base, frame, \$15,000. Architects, Rousseau & Rousseau, 110 Sutter street, S. F. Owner, William Linden, 1100 Dolores street, S. F. Location, east Seventh south of Howard, covering an area of 25 by 154 feet. Will contain 41 suites of two rooms and bath. Interior finish, pine, some hardwood floors, steam heat, hot water system, wall beds and tile bath rooms. Exterior covered with rustic and brick veneer. Plans complete and work to be done by Day Labor.

**SAN FRANCISCO**—Apartment house, 4 story and base, brick and steel, \$40,000. Architects, Rousseau & Rousseau, 110 Sutter street, S. F. Owners, Girard Investment Co. Location, east Leavenworth south Geary, covering an area of 41 by 65 feet. Will contain 23 suites of two and three rooms. Interior finish pine and elm panels. Hardwood floors, steam heat, automatic elevator, hot water system and vacuum cleaning. Tile floors and wainscot in bath rooms. Marble and tile entrance. Wall beds. Exterior faced with pressed brick. Plans complete and work being done by Day Labor.

**SAN FRANCISCO**—Apartment house, 4 story and base, brick and steel, \$65,000. Architects, Rousseau & Rousseau, 110 Sutter street, S. F. Owners, Girard Investment Co. Location, southwest corner Bush and Jones, covering an area of 77½ feet square. Will contain 27 suites of two and three rooms and three stores. Interior finish, pine, southern gum and hardwoods. Hardwood floors, steam heat, hot water system, automatic elevator, vacuum cleaning and wall beds. Bath rooms finished in tile. Marble and tile wainscot in entrance. Patent store fronts. Exterior faced with pressed brick and terra cotta. Plans complete and work to be done by Day Labor.

**FRUITVALE ALAMEDA CO., CAL.**—Apartment house and stores, 2 story and base, frame, \$7,000. Architect, C. M. Norgrove, 2220 Roosevelt avenue, Berkeley. Owner's name withheld. Will contain two stores on first floor and three suites of four rooms on upper floor. Interior finish, pine. Hot water system and wall beds. Tile in bath rooms. Patent store fronts. Exterior covered with rustic and shiplap. Plans being prepared.

**SAN FRANCISCO**—Apartment house, 3 story and base, frame, \$12,700. Architect, John H. Powers, 460 Montgomery street, S. F. Owner, John Biller. Location, Southeast Vallejo and Polk streets, covering an area of 37½ by 90 feet. Will contain 14 suites of two and three rooms. Interior finish, pine with some elm panels and hardwood floors. Steam heat and hot water system, wall beds. Tile in bath rooms. Exterior covered with cement plaster

on metal lath. Plans complete and work to be done by Day Labor.

**SAN FRANCISCO**—Apartment house, 4 story and base, reinforced concrete, \$40,000. Architect, none. Owner, J. M. Dempliak, 1658 Washington street, S. F. Location, Hyde between Sutter and Bush, covering an area of 25 by 92 feet. Owner is now taking figures for reinforced concrete work, steam heating, plumbing, grading and automatic elevator work. Can be seen at his home mornings between 8 and 10 o'clock. Phone Prospect 2663.

**SAN FRANCISCO**—Apartment house and stores, 2 story and base, frame. Cost not stated. Architect, none. Owner, Emilie Fabish, 192 Valley street, S. F. Location, 31st avenue, Richmond District. Will contain two stores on first floor and two suites of three rooms each on upper floor. Interior finish, pine with elm panels. Some hardwood floors. Open fire places and tile mantels. Bath rooms finished in tile. Wall beds. Exterior covered with shiplap. Plans complete and work to be done by Day Labor.

### BANKS

**PORTLAND, ORE.**—Bank and lodge hall, 2 story and base, reinforced concrete, \$90,000. Architects, Camp & Dupuy, 426 East Alder street, Portland. Owners, East Side Business Men's Club. Location, East Alder and Grand avenue, covering an area of 90 by 100 feet. Entire ground floor to be occupied by the bank. Interior finish pine, hardwood, marble and tile. Hardwood and tile floors, metal window sash and frames, hollow tile interior partitions in first floor, steam heat, vacuum cleaning system, special bank equipment and ornamental plaster. Exterior faced with terra cotta. Plans being prepared.

### BONDS.

**MARYSVILLE, BUTTE CO., CAL.**—In accordance with a pre-election promise the three Marysville banks have purchased the \$18,000 worth of municipal bonds voted recently to finance the construction of a sewer system and the improvement of streets. Bids on the work are now being taken.

**RED BLUFF, TEHAMA CO., CAL.**—The proposition to bond the county for \$140,000 for the building of sand slough bridges, east of Red Bluff, was defeated. The bonds required a two-third majority to carry. The direct tax levy system will be used to raise the money for the construction of the bridges.

**HOLLYWOOD, LOS ANGELES CO., CAL.**—The Hollywood Board of Trade has prepared petitions calling for an election to vote bonds for the purchase of the Hollywood Union Water Company. It is expected that the election will be held this fall. H. T. Wright

Secretary of the Hollywood Board of Trade.

**RED BLUFF, TEHAMA CO., CAL.**—The Trustees of the Red Bluff Union High School have adopted a resolution calling for a special bond election on October 19th for the purpose of submitting a \$30,000 bond issue for the high school district. The money is to be used in remodeling and building an addition to the present high school.

**MADERA, MADERA CO., CAL.**—By a vote of 416 to 73, bonds of \$12,000 for the construction of a concrete wall at the foot of D street, to replace the wooden structure now condemned, carried. The majority was 30 more than the necessary two-thirds.

**OROVILLE, BUTTE CO., CAL.**—First steps toward municipal ownership of the distributing system in Oroville of the Oro Electric Corporation were taken by the City Trustees, when they adopted a resolution instructing the City Clerk to ascertain from the State Railroad Commission the conditions under which the system can be appraised.

**WINTERS, YOLO CO., CAL.**—The Winters Trustees have issued a statement urging the issuing of bonds for the construction of a new City Hall.

The Supervisors will appropriate \$5,000 if the city will give an equal amount.

**REDWOOD CITY, SAN MATEO CO., CAL.**—A special bond election will be held October 5th for the purpose of raising funds to purchase two or more school sites and to erect school building in the district when needed.

**AUBURN, PLACER CO., CAL.**—On account of a misunderstanding between the members of the City Council and City Attorney Tuttle over the time which must elapse between the passing of the ordinance and the holding of the election, the bond election which was to have been held on September 21st to vote on a \$22,000 bond issue for the extension of the sewers and the purchasing of fire trucks, the election will now be delayed for at least ninety days.

**SACRAMENTO, CAL.**—Friend W. Richardson, State Treasurer, has been authorized by Governor Johnson to sell the \$1,500,000 4½ per cent University of California bonds to provide new buildings and improvements at the University. Richardson will proceed with the sale as soon as the legal papers are drawn up by the Attorney General.

**BAKERSFIELD, KERN CO., CAL.**—Within three weeks petitions will be in circulation asking the Board of Supervisors to call a special election to bond the county for the purpose of building a road from Bakersfield to the Kern County line via Weldon, the same to be the first link in the road to the top of Mt. Whitney.

The petition will call for a scenic road up the Kern River from this city, into the Hot Springs Valley, on to Weldon and from Weldon to the plateau. Roughly, it is estimated that the road will cost in the neighborhood of \$260,000, though it may run under that figure.

**RED BLUFF, TEHAMA CO., CAL.**—The Supervisors have adopted a motion instructing County Clerk H. G. Kuhn to notify the State Highway Commis-

sion that Tehama County now is prepared to pay the bonus on highway bonds sufficient to build the State Highway link between the Butte County line and Los Molinos, on the east side of the Sacramento River.

**EL CENTRO, IMPERIAL CO., CAL.**—Bonds in the sum of \$135,000 have been voted and sold by the Trustees of the Central Union High School District for the purpose of erecting new buildings and additions to the high school at El Centro. The commission to prepare plans for the work was originally awarded to Architect F. T. Harris of El Centro in a competition conducted under the Law of 1912 but the contract was never consummated. Since the repeal of the law requiring a competition for the selection of an architect for public school work, it is stated that the Board of Trustees plans to appoint an architect for the work direct without competition. The funds from the sale of the bonds will probably be available shortly and the Board will appoint an architect soon thereafter.

**TURLOCK, STANISLAUS CO., CAL.**—The Turlock Irrigation District has voted bonds in the sum of \$185,478 for the operation and repair of the canal system already constructed and \$14,250 for completing the outlet gate and strengthening dams C, H and J of the Davis reservoir.

**VICTORVILLE, SAN BERNARDINO CO., CAL.**—Bonds of \$30,000 have been voted for the erection of a new high school building.

**BURBANK, LOS ANGELES CO., CAL.**—An election will be held on October 12th to vote on the question of issuing bonds as follows: \$12,000 for addition to fire fighting equipment; \$20,000 for the installation of an electric lighting plant and distributing system, and \$12,500 for a new city hall.

### BRIDGES, DAMS AND HARBOR WORK.

**SANTA BARBARA, SANTA BARBARA CO., CAL.**—Bridges, 26, steel and reinforced concrete, \$350,000. Engineer, County Surveyor, Santa Barbara. Owners, Santa Barbara County. Santa Barbara County, while turning down the good roads bonds, voted favorably on the \$350,000 bond issue for building bridges along the state highway. The character and location of the proposed structures are as follows. More detailed information can be secured from the County Surveyor at Santa Barbara.

One bridge at the crossing over Southern Pacific Railroad track at station 109 plus 10, section "G."

A reinforced concrete girder bridge over Eagle Canyon Creek where state highway crosses creek, being at station 181 plus 00, section "G."

A steel truss bridge over Dos Pueblos Creek where state highway crosses creek, being at station 285 plus 50, section "G."

A reinforced concrete bridge over Gato Canyon where state highway crosses said canyon, said bridge to be at station 379 plus —, section "G."

A reinforced concrete bridge over El Capitan Creek, where state highway crosses creek at station 488 plus 50, section "G."

A reinforced concrete bridge over Corral Canyon Creek, where state high-

way crosses creek, at station 60 plus 25, section "F."

A reinforced concrete bridge over Tajiguas Canyon Creek where state highway crosses creek, being at station 243 plus 80, section "F."

A reinforced concrete bridge over Arroyo Sumada where state highway crosses arroyo, being at station 306 plus 00, section "F."

Two steel truss bridges over Gaviota Creek between Gaviota Gorge and the Pacific Ocean at points where state highway crosses creek, to wit: One bridge at station 104 and one bridge at station 109, both in section "E."

A steel truss bridge at Gaviota Gorge over Gaviota Creek where state highway crosses creek, being at station 149 plus 40, section "E."

A reinforced concrete bridge over Las Cruces Creek at place known as Sheep Camp, where state highway crosses creek, being at station 312 plus —, section "E-2."

Four bridges across Najoqui Creek at points where state highway crosses creek in Cuesta Canyon, said bridges to be located at the following points on the official survey of state highway: One reinforced concrete bridge at station 2 plus 50; one reinforced concrete bridge at station 160 plus —; one reinforced concrete bridge at station 218 plus —; one steel truss bridge at station 218 plus —, all in section "D."

A bridge across Santa Ynez River at the point where state highway crosses river near mouth of Zaca Creek, the cost to said county to construct and build said bridge not to exceed \$50,000; the cost in excess of said sum to be paid by the State of California.

Six reinforced concrete girder bridges over Zaca Creek between Santa Ynez River and Zaca Station at points on Zaca Creek where said state highway crosses Zaca Creek, indicated on official survey of state highway as follows, to wit: One bridge at station 309 plus —; one bridge at station 448 plus —; one bridge at station 472 plus —; one bridge at station 562 plus —; one bridge at station 566 plus 00, and one bridge at station 575 plus 00, all in section "D."

Three reinforced concrete girder bridges between Zaca Station and Los Alamos at points indicated on official survey of state highway as follows: One bridge at station 165 plus 75; one bridge at station 382 plus 25; and one bridge at station 399 plus 25, all in section "C."

**MADERA, MADERA CO., CAL.**—Bridge, reinforced concrete, \$12,000. Engineers, Leonard & Day, Rialto Bldg., S. F. Owners, Madera County. Bonds have been carried in this county for the construction of the proposed D street bridge over the Fresno River by a vote of 416 to 73, and bids for the construction will be called for shortly. Plans provide for a reinforced concrete bridge 270 feet long with a 20-foot roadway and two four-foot sidewalks.

**MODESTO, STANISLAUS CO., CAL.**—Bridge, reinforced concrete, \$85,000. Engineer, County Surveyor, Modesto. Owners, Stanislaus County. The Board of Supervisors, in fixing the tax rate for Stanislaus County for the ensuing year at \$2.00, included the construction of a new \$85,000 concrete bridge over the Tuolumne River at Modesto

and the building of a permanent paved road from the city limits of Modesto to the southeast corner of the Bald Eagle ranch to connect with the Sonora lateral from Salida to Oakdale. But \$35,000 of the cost of the bridge was included in the present levy.

NICOLAUS, SUTTER CO., CAL.—Bridge, steel and reinforced concrete, \$60,000. Engineer, County Surveyor, Yuba City. Owners, Sutter County. The County Surveyor has been instructed to prepare plans and specifications for the construction of a bridge over the Feather River at Nicolaus. The proposed structure will be 600 feet long and of steel and concrete construction.

SEATTLE, WASH.—Bridge, steel and reinforced concrete, \$500,000. Engineer, City Bridge Engineer Rapp, Seattle. Owners, City of Seattle. Plans are nearing completion for the proposed city bridge over the Lake Washington Canal at 10th avenue N. E., and will probably be ready for contractors in about 60 days. It will have a span of 216 feet center to center, and will be 80 feet wide of the double leaf bascule type similar to the Fremont bridge. Temporary wooden approaches 3,000 feet long are called for. The substructure will cost about \$135,000 and the superstructure about \$365,000.

HANFORD, KINGS CO., CAL.—Bridges and culverts, reinforced concrete. Cost not stated. Engineer, County Surveyor, Hanford. Owners, Kings County. The Board of Supervisors has directed the Clerk to advertise for bids for the construction of culverts and bridges for the improved highway. Three hundred barrels of Portland cement will be used in the work. Bids close on September 20th. Further information may be had from the County Surveyor.

RED BLUFF, TEHAMA CO., CAL.—Bridges, 3, steel and concrete. Cost not stated. Engineer, County Surveyor, Red Bluff. Owners, Tehama County. Plans and specifications prepared by County Surveyor W. F. Lunning for three bridges to be built on the Cone Grove road were approved at the last meeting of the Supervisors and bids have been ordered received. Bids close October 5th. The structures will be built over Antelope Creek, Salt Creek, and a small slough. All will be of steel construction.

RED BLUFF, TEHAMA CO., CAL.—Fill, earth. Cost not stated. Engineer, County Surveyor, Red Bluff. Owners, Tehama County. Bids will be received by the County Supervisors until October 5th for the construction of a fill on the Red Bluff-Harrison Gulch road at the new bridge over Salt Creek near Rosewood. Plans and specifications have been adopted by the Supervisors and bids will be received until October 5th for the fills and the Sand Slough bridges.

#### Contracts Awarded.

SALINAS, MONTEREY CO., CAL.—Bridge repairs, \$3,350. Engineer, County Surveyor, Salinas. Owners, Monterey County. Contractors, Kunz & Wolfe, Monterey. Contract price, \$3,350.

RED BLUFF, TEHAMA CO., CAL.—Bridges, reinforced concrete. Cost as follows. Engineer, County Surveyor, Red Bluff. Owners, Tehama County.

Contractors, Ross Construction Co., Sacramento. Contract prices, Dibble bridge, \$12,580; Blue Tent bridge No. 1, \$3,100; Blue Tent bridge No. 2, \$1,301. C. E. McCartney, Red Bluff, steel bridge across Mill Creek, \$1,293.

SAN LUIS OBISPO, SAN LUIS OBISPO CO., CAL.—Bridge, steel and reinforced concrete, \$11,773. Engineer, County Surveyor, San Luis Obispo. Owners, San Luis Obispo County. Contractors, Gutleben Bros., New Call Bldg., S. F. Contract price, \$11,773.

#### COURT HOUSES.

OROVILLE, BUTTE CO., CAL.—Hall of Records, 2 story and base, reinforced concrete, \$43,813. Architect, Charles S. Kaiser, Mechanics' Institute Bldg., S. F. Owners, Butte County. Contractors, Western Building and Engineering Co., Phelan Bldg., S. F. Contract price, \$43,813.

#### Contracts Awarded.

OAKLAND, CAL.—Court house addition, brick, \$13,760. Architect, Henry H. Meyers, Kohl Bldg., S. F. Owners, Alameda County. Contractor, Lester H. Stock, 12 Geary street, S. F. Contract price, \$13,760. A complete list of the bids received will be found under the heading of Oakland and Alameda County.

#### FACTORIES AND WAREHOUSES

BAKERSFIELD, KERN CO., CAL.—Oil supply station, concrete and steel. Cost not stated. Engineer, Engineering Department Union Oil Co., Bakersfield. Owners, Union Oil Co. The Union Oil Company will construct a storage and oil service station on the Southern Pacific reservation in East Bakersfield. The station is to be located near the Union avenue crossing, and it is planned to erect a large establishment. Big storage tanks and large office structure will be constructed to handle the refinery products.

LOS ANGELES, CAL.—Warehouse, 2 story and base. Class A construction. Cost not stated. Architect, Thomas Preston, Investment Bldg., L. A. Owners, National Transfer Co. Location, Ann street, covering an area of 50 by 110 feet. Reinforced concrete walls, floors and roof slabs. Steel rolling doors, metal window sash and frames. Exterior, cement plaster. Plans complete and figures being taken.

SEATTLE, WASH.—Warehouse, 4 story and base, reinforced concrete, \$150,000. Architect, J. R. West, Port of Seattle Commission, Seattle. Owners, City of Seattle. Location, Whatcom avenue, covering an area of 90 by 268 feet. Fireproof construction with reinforced concrete walls, floors and roof. Metal window sash and frames and steel rolling doors. Exterior cement plaster. Plans complete and figures to be called for at once.

MODESTO, STANISLAUS CO., CAL.—Oil distributing system, \$15,000. Engineer's name not given. Owners, Associated Oil Co., S. F. A permit has been granted by the City Council to the Associated Oil Co. to construct a new distributing station on the east side of the Salida road between the Lateral No. 1 bridge and the Modesto Re-pressed Brick Company's yard. The entire plant will cost about \$15,000.

#### Contracts Awarded.

SAN FRANCISCO—Warehouse, 2 story and base, reinforced concrete. Cost not stated. Architect, Charles Paff, Merchants' Exchange Bldg., S. F. Owners, American Marine Paint Co. Contractors, Pacific Construction Co., 16 California street, S. F. Contract price not stated.

#### FLATS

SAN FRANCISCO—Flats, 2 story and base, frame. Cost not stated. Architects, Falch & Knoll, Hearst Bldg., S. F. Owner, Mrs. Bunner. Location, southeast corner Bryant and 20th streets. Will contain four flats of four rooms and bath. Interior finish, pine with some hardwood floors and wall beds. Open fire places and tile mantels. Automatic water heaters. Exterior covered with shiplap. Plans complete and figures being taken.

SAN FRANCISCO—Flats, 3 story and base, frame, \$6,000. Architect, Carl Geiffuss, 16 Kearny street, S. F. Owner, Louis Laubscher. Location, Clementina west 4th street, covering an area of 25 by 60½ feet. Will contain three flats of five and six rooms. Interiors finished in pine and elm panels. Hardwood floors, open fire places and tile mantels. Imitation tile in bath rooms. Automatic water heaters. Exterior covered with rustic and cement plaster on metal lath. Plans complete and contract will be awarded in a few days.

SAN FRANCISCO—Flats, 2 story and base, frame, \$4,000. Architect, none. Owner, G. Lindner, 4029 26th street, S. F. Location, east Castro north 26th street, covering an area of 33 by 49 feet. Will contain four flats of four rooms each. Interior finish pine with some hardwood floors, wall beds and tile baths. Automatic water heater. Exterior covered with rustic and cement plaster. Plans complete and work will be done by Day Labor.

#### FIRE REPORT

MADERA, MADERA CO., CAL.—The Fairmead Inn, a pioneer hotel of this city, was destroyed by fire last week. The loss is estimated at \$15,000, partly covered by insurance.

GRASS VALLEY, NEVADA CO., CAL.—Fire, causing a loss of about \$12,000, destroyed the Union Ice Company's building, a residence and a plumbing shop owned by Cornelius Clauson.

WILLOWS, GLENN CO., CAL.—The Carson School, about a mile and a half east of Butte City, was destroyed by fire, causing a loss of \$6,000. A new building will be erected immediately.

BRAWLEY, IMPERIAL CO., CAL.—Fire of an unknown origin destroyed an entire business block in the heart of the city with a loss of \$100,000.

The fire started in the Imperial Hardware Company and spread rapidly to the surrounding buildings, eight of which, comprising the block, were leveled by the blaze.

SAN JOSE, SANTA CLARA CO., CAL.—Fire destroyed the Pacific Shingle Mill and Box Factory on Park avenue and threatened Mobley's Wood and Feed yard adjoining as well as a block of other buildings along the railway

tracks. The loss is estimated at \$50,000.

**LOS ANGELES, CAL.**—Fire destroyed the three-story Garden Hotel building, doing \$15,000 damage. Five stores on the ground floor were burned out.

## GARAGES

**SAN FRANCISCO.**—Garage and shop, 1 story and base, brick, \$8,500. Architect, O. R. Thayer, 20 Montgomery street, S. F. Owners, J. B. Reite and E. V. Lacey. Location, south Bush east Van Ness avenue, covering an area of 36½ by 120 feet. Concrete floor, metal window sash and frames, special tanks, machinery and patent store fronts. Exterior faced with cement plaster. Plans complete and work will be done by Day Labor.

## GOVERNMENT WORK & SUPPLIES

### Coast and Geodetic Survey, Vessel.

The following bids were received at the San Francisco suboffice of the U. S. coast and geodetic survey Aug. 25 in addition to those received at Washington on the same date, which appeared in our last issue:

Navy Yard, Mare Island, Cal., \$211,900; alternate proposal, \$209,300.

United Engineering Works, San Francisco, Cal., \$234,000; alternate proposal, \$226,000.

These bids are now under consideration at Washington, but no action has yet been taken in connection with awarding the contract. The lowest bid received was that of the U. S. navy yard at Portsmouth, N. H., their price being \$163,250.

### Denver, Colo., Lighting Fixtures.

The contract for installing lighting fixtures in the U. S. post office at Denver, Colo., has been awarded to Horn & Brannen Manufacturing Co., Philadelphia, Pa., at \$9,867.

### Pearl Harbor, H. T., Elevators.

The following bids were received by the chief of the bureau of yards and docks, Navy Department, Washington, D. C., for furnishing 3 hydropneumatic freight elevators installed, complete, at the naval station, Pearl Harbor, H. T.:  
Elevators Co., Washington, D. C., \$8,484.

A. Kieckhefer Elevator Co., Milwaukee, Wis., \$8,600.

### Elephant Butte Dam Spillway.

The chief engineer of the Reclamation Service has withdrawn the advertisement calling for bids to be opened September 2, for the cylinder gates and spillway. Elephant Butte dam, specifications No. P-5. Advertisement and specifications covering modification of design will soon be issued and new bids requested.

### St. Ignace, Mont., Earth Work, Etc.

The following bids were received at the U. S. Reclamation Service, St. Ignace, Mont., for earth work and structures for Pablo laterals A, 31-A, 73-A and sublaterals:

Bid 1. Two Miracle Concrete Corporation, Kalspell, Mont.

2. Wilson Brothers, Polson, Mont.

3. Percy M. Ross, Polson, Mont.

4. J. E. Hilton, Billings, Mont.

Item 1. 25,000 cu yds class 1 excavation—Bid 1, 16.5c; 2, 16c; 3, 15.8c; 4, 15c.

2. 250 cu yds class 2 excavation—Bid 1, 36c; 2, 50c; 3, 25c; 4, 30c.

3. 50 cu yds class 3 excavation—Bid 1, 1.2; 2, 50c; 3, 50c; 4, \$1.50.

4. 1,000 yds overhaul—Bid 1, \$20; 2, \$20; 3, \$20; 4, \$20.

5. 2,000 yds class 1 excavation—Bid 1, 50c; 2, 50c; 4, 35c.

6. 1,000 cu yds class 2 excavation—Bid 1, \$1; 2, \$1; 4, 60c.

7. 5 cu yds class 3 excavation—Bid 1, \$2; 2, \$1; 4, \$1.50.

8. 140 cu yds concrete in structures—Bid 1, \$13.50; 2, \$15; 4, \$15.90.

9. 8,400 lbs reinforcing steel—Bid 1, 3c; 2, 3.5c; 4, 2c.

10. 1,800 cu yds back filling—Bid 1, 20c; 2, 20c; 4, 25c.

11. 600 cu yds puddling—Bid 1, 60c; 2, 55c; 4, 10c.

12. 290 sq yds grouted paving—Bid 1, \$2; 2, \$2.10; 4, \$1.86.

13. 120 sq yds dry paving—Bid 1, \$1.75; 2, \$1.80; 3, \$1.10.

14. 74 lineal ft 12-in concrete pipe—Bid 1, 50c; 2, \$1; 3, 85c.

15. 30-in concrete pipe—Bid 1, \$4.50; 2, \$1; 3, \$2.61.

16. 160 sq yds rubble concrete paving—Bid 1, \$3; 2, \$4.15; 3, \$3.

17. 21,000 ft b. m. lumber in structures—Bid 1, \$22; 2, \$35; 4, \$28.

18. 5,500 cu yds class 1 excavation—Bid 1, \$50c; 3, 35c.

19. 300 cu yds class 2 excavation—Bid 1, \$1; 4, 60c.

20. 5 cu yds class 3 excavation—Bid 1, \$1; 4, \$1.50.

21. 420 cu yds concrete in structures—Bid 1, \$16; 4, \$15.90.

22. Placing 25,100 lbs reinforcing steel—Bid 1, 3c; 4, 2c.

23. Erecting 210 lbs of structural steel—Bid 1, 5c; 4, 4.5c.

24. 5,000 cu yds back filling—Bid 1, 20c; 2, 25c.

25. 1,200 cu yds puddling—Bid 1, \$60c; 4, 40c.

26. 840 sq yds grouted paving—Bid 1, \$2.75; 2, \$1.86.

27. 620 sq yds dry paving—Bid 1, \$2.50; 4, \$1.10.

28. 212 lineal ft 12-in concrete pipe—Bid 1, \$1; 4, 85c.

29. 354 lineal ft 18-in concrete pipe—Bid 1, \$1.30; 4, \$1.33.

30. 310 lineal ft 24-in concrete pipe—Bid 1, \$1.50; 4, \$1.50.

31. 1,500 sq yds rubble concrete paving—Bid 1, \$3; 4, \$3.

32. 53,000 ft b. m. lumber in structures—Bid 1, \$24; 4, \$27.

### Alameda, Cal., Painting.

The following bids were received by the supervising architect, Treasury Department, Washington, D. C., for painting plastering in the U. S. post office at Alameda, Cal.:

Jarvis & Co., St. Louis, Mo., \$354.

Alfred Olson & Co., Chicago, Ill., \$183.

O. J. Inman, Danville, Ill., \$123.

John Heritage & Son, Alameda, Cal., \$110.

Unifaced proposal, \$395.

Paifrax Bros., Geneva, N. Y., \$428.

J. P. Sullivan, Chicago, Ill., \$590.

Grohne Contracting Co., Joliet, Ill., \$628.

Isidore Kissel, San Francisco, Cal., \$650.

The Jewelllyn Co., Oakland, Cal., \$720.

Charles Lamont, Alameda, Cal., \$999.

Gardner & Hayes, Alameda, Cal., \$1,500.

### Treasury Department, Vault Shelving.

The following bids were received by the supervising architect, Treasury Department, Washington, D. C., for installing metal vault shelving in the following post office buildings: Item 1, Greeley, Col.; New Rochelle, N. Y.:

The General Fireproofing Co., Washington, D. C., item 1, \$136.50.

### Pearl Harbor, H. T., Officers' Quarters.

The chief of the bureau of yards and docks, Navy Department, Washington, D. C., has awarded the contract for constructing one four-story officers' quarters at the naval station, Pearl Honolulu, H. T., at \$19,590.

### San Francisco, Wharf.

The contract for constructing an extension to the wharf at the naval training station, San Francisco, Cal., bids for which were opened at the bureau of yards and docks, Navy Department, Washington, D. C., August 21, has been awarded to Hyde, Harjes & Co., San Francisco, Cal., at \$9,341.

### Berkeley, Cal., Light Fixtures.

The contract for installing lighting fixtures in the U. S. post office, Berkeley, Cal., has been awarded to Horn & Brannen Mfg. Co., Philadelphia, Pa., at \$2,140.35; time, October 31.

### Yards and Docks.

Specifications for work under the bureau of yards and docks, Navy Department, have been furnished to the following firms in addition to those previously mentioned in these columns:

### Storage Plants for Fuel Oil—Specification No. 2176, October 10.

Carnegie Steel Co., Pennsylvania Building, Philadelphia, Pa.

Schuttee & Koerting Co., Philadelphia, Pa.

Frank Shippe, 916 D street, Washington, D. C.

Paul B. Fenton, North American Building, Philadelphia, Pa.

L. C. Holmes, Ouray Building, Washington, D. C.

Edwin S. Denise, 17 South Hanover street, Baltimore, Md.

Day & Zimmerman, Philadelphia, Pa.

Nelson Valve Co., Philadelphia, Pa.

Norristown Magnesia and Asbestos Co., Norristown, Pa.

Boiler Centrifugal Pump and Machine Co., Philadelphia, Pa.

Almairall & Co., Dominick and Clark streets, New York City.

Noland-Clifford Co., Newport News, Va.

John W. Danforth Co., 72 Elliott street, Buffalo, N. Y.

Pittsburgh-Des Moines Steel Co., Pittsburgh, Pa.

### Elevators for Public Buildings.

The following bids were received by the supervising architect, Treasury Department, Washington, D. C., for installing elevators in the U. S. post office at Medford, Ore., and Amarillo, Texas:

Item 1, Medford, Ore., \$1,000.

Item 2, Amarillo, Texas, \$1,000.

Otis Elevator Co., Washington, D. C., item 1, \$3,482, time May 11; 2, \$3,284, time April 12.

Llewellyn Iron Works, Los Angeles, Cal., item 1, \$5,475; 2, \$5,680; 120 days.  
Kaestner & Hecht Co., Chicago, Ill., item 1, \$3,394, time May 11; 2, \$3,119, time April 12.

#### Transportation of Coal.

The following bids were received at the bureau of supplies and accounts, Navy Department, Washington, D. C., for transporting one cargo of coal from Hampton Roads to the naval coaling depots at Tiburon, Cal., San Diego or Puget Sound, Wash.:

Bowring & Co., all places, \$4.44.

W. R. Grace & Co., Washington, D. C., Tiburon, \$4.20.

Holder, Weir & Boyd, all places, \$4.50.

Whitney & Co., all places, \$4.25.

### HALLS AND SOCIETY BUILDINGS

HEPPNER, ORE. — Lodge hall, 2 story and base, brick, \$20,000. Architect, C. C. Robbins, Ainsworth Bldg., Portland. Owners, Masonic Hall Association. Will cover an area of 50 by 100 feet and has been designed for stores on the first floor. Interior finish, pine and hardwood with hardwood floors, steam heat, metal window sash and frames and patent store fronts. Exterior faced with pressed brick. Plans being prepared.

MARSHFIELD, ORE. — Lodge hall and stores, 3 story and base, reinforced concrete, \$60,000. Architects, Hough-taling & Dougan, Henry Bldg., Portland. Owners, Elks' Hall Association. Will cover an area of 50 by 100 feet. First floor will contain two stores, upper floors lodge rooms, auditorium and social rooms. Interior finish pine and hardwood with hardwood floors. Steam heat, patent store fronts and metal window sash and frames. Exterior faced with pressed brick. Plans being prepared.

### HOSPITALS.

SEATTLE, WASH. — Hospital and sanitarium group of Class A buildings, \$1,500,000. Architect, F. F. Travis, Raleigh Hotel, Seattle. Owners' names not given. What will eventually be a \$1,500,000 building venture is now projected by local and eastern capitalists associated with several prominent physicians, on 160 acres of ground between Seattle and Tacoma, on which initial payments have already been made. The first unit to cost \$300,000 will be erected at once, the plans being practically completed by Architect F. F. Travis, who will also handle the general contract on a percentage basis. The first unit will be five stories, 120 by 215 feet, of reinforced concrete construction, faced with brick and terra cotta. Additional units to be built from time to time will include a three-story, 60 by 95 foot building for nurses, wharf, natatorium, heating plant, power house and ice refrigerating building, one and two stories, 70 by 112 feet. All will be of reinforced concrete and brick. The sanitarium will be the largest in the west.

SELAN, FRESNO CO., CAL. — Hospital, 2 story and base, frame and plas-

ter. Cost not stated. Architect, Ernest J. Kump, Rowell Bldg., Fresno. Owner, Mrs. M. Christensen. Will contain two wards, operating room and dispensary. Interior finish pine and white enamel. Hardwood and tile floors. Central heating system. Exterior covered with cement plaster. Plans being prepared.

#### Contracts Awarded.

SUSANVILLE, LASSEN CO., CAL. — Hospital, 2 story and base, frame and plaster, \$20,000. Architect, George C. Sellon, Sacramento. Owners, Lassen County. Contractor, James L. McLaughlin, 244 Kearny street, S. F., general construction; Latourette, Fical & Co., Sacramento, plumbing. Contract prices not stated.

### HOTELS.

PITTSBURG, CONTRA COSTA CO., CAL. — Hotel and garage, 3 story and base, brick. Cost not stated. Architect, A. W. Cornelius, Merchants' National Bank Bldg., S. F. Owners, S. Carusa & Bros. Location 4th and Railroad avenue, covering an area of 40 by 110 feet. Will contain garage and 40 guest rooms. Interior finish, pine and redwood. Steam heat, hot water system and special garage storage tanks. Bath rooms finished in tile. Exterior faced with pressed brick. Plans complete and figures being taken.

### IRRIGATION PROJECTS

MODESTO, STANISLAUS CO., CAL. — Facing dam, \$10,000. Engineer, Herrmann, Modesto. Owners, Modesto Irrigation District. Plans and specifications prepared by Engineer Herrmann, of the Modesto Irrigation District, for a reinforced concrete facing for the upstream side of Dam No. 6 of the Dallas reservoir have been adopted by the directors. Bids have been ordered advertised.

RED BLUFF, TEHAMA CO., CAL. — Levee construction. Cost not stated. Engineer, County Surveyor, Red Bluff. Owners, Tehama County. At the last meeting of the Supervisors bids were ordered called for the construction of a levee across the head of a small slough on the Chipman ranch in Antelope Valley. The levee will be built of dirt and faced with concrete. Bids for the work will be opened on October 5th. Further information may be had from the Surveyor at Red Bluff.

MODESTO, STANISLAUS CO., CAL. — Repairing dam. Cost not stated. Engineer, Herrmann, Modesto. Owners, Modesto Irrigation District. At the last meeting of the Modesto Irrigation District plans and specifications for the repairing of Dam No. 1 of the Dallas Reservoir were adopted and bids will be received until October 2nd. Further information may be had from Engineer Herrmann of the district.

SAN LUIS OBISPO, SAN LUIS OBISPO CO., CAL. — Reclamation work. Cost as follows. Engineer, County Surveyor, San Luis Obispo. Owners, San Luis Obispo County. All bids received by the County Supervisors for protection work on the state highway leading from Nipomo to Santa Marina were rejected. The bids received were as follows. Mercereau Bridge and Construction Co., L. A., \$18,995, including royalty to River Current Control Co.;

Boardman Construction Co., L. A., \$10,903, excluding royalty; Charles W. Corbaley Co., L. A., \$11,000, excluding royalty; Mesmer & Rice, L. A., \$11,100, excluding royalty; The River Current Control Co., S. F., \$14,870. What further action will be taken by the Supervisors has not yet been made known.

#### Contracts Awarded

OAKDALE, STANISLAUS CO., CAL. — Irrigation pipe, \$11,114.35. Engineer, Chief Engineer, Oakdale. Owners, Oakdale Irrigation District. Contractors, Western Pipe and Steel Co., Richmond. Contract price, \$11,114.35.

### LIBRARIES.

SAN FRANCISCO — Library, 4 story and base. Class A construction, \$1,200,000. Architect, George William Kelham, Sharon Bldg., S. F. Owners, City and County of San Francisco. Larsen-Sampson Co. has requested the Library Board to withdraw their bid of \$397,500 for the general construction. This leaves Lindgren & Co., Monadnock Bldg., low at \$124,000. It will be two weeks before an award is made. Ralston Iron Works presented the low figure at \$35,900 for furnishing the metal book stacks. No award was made. A complete list of these bids will be found under the heading of San Francisco in this issue.

### RAILROAD CONSTRUCTION AND EQUIPMENT.

YREKA, SISKIYOU CO., CAL. — Lumber bar. Cost not stated. Engineer, none. Owners, McCloud River Lumber Co. The McCloud River Lumber Company will start immediately on the extending of its logging operations by building a new railroad spur six miles into the Pumice Mountain country, northeast of Bartle, which will be ready for use with the next season's operation.

#### Contracts Awarded

OAKLAND, CAL. — Railroad construction. Cost not stated. Engineer, City Engineer, Oakland. Owners, City of Oakland. Contractors, Blake Bros. Quarry Co., Richmond. Contract price not stated.

### RESIDENCES.

SAN FRANCISCO — Residence, 2 story and base, frame, \$5,000. Architect, C. Coleman, Merchants' National Bank Bldg., S. F. Owner, M. Fisher, 683 Mission street, S. F. Location, Claremont Court. Will contain eight rooms, two baths and sleeping porch. Interior finished in pine and hardwood with some white enamel. Hardwood floors, furnace heat, open fire places, tile or brick mantels and automatic water heaters. Bath rooms will have tile floor and wainscot. Exterior covered with cement plaster on metal lath. Plans complete and work will be done by Day Labor.

SAN FRANCISCO — Residence, 2 story and base, frame, \$3,000. Architect, none. Owner, Emil Nelson, 244 Rivalto street, S. F. Location, east Bryant north Army. Will contain seven rooms and bath. Interior finish pine with some elm panels and hardwood

rooms. Furnace heat, open fire places and tile mantels. Automatic water heater. Tile floor and wainscot in bath room. Exterior covered with cement plaster on metal lath. Plans complete and work will be done by Day Labor.

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$4,500. Architect, E. G. Bolles, 660 Market street, S. F. Owner, A. S. Born Building Co., 660 Market street. Location, Ashbury Heights. geles. Contractors, G. W. Gilbreth & Co., Hollingsworth Bldg., L. A. Contract price, \$26,097.

YREKA, SISKIYOU CO., CAL.—School gymnasium, 2 story, frame, \$8,105. Architect, none. Owners, Siskiyou Union High School District. Contractor, D. M. Reid, Yreka. Contract price, \$8,105.

**SEWERS, STREET WORK & WATER SYSTEMS.**

OAKLAND, CAL.—Street work. Cost not stated. Engineer, City Engineer, Oakland. Owners, City of Oakland. Bids are now being taken for the improvement of 25th avenue from the southwest line of E-14th street to the southwest line of block 4 of the Kennedy Tract. The work includes sewers, conduit, curbs, gutters, etc. Bids close September 16th between 11 a. m. and 12 noon. Further information may be had from the City Engineer.

BERKELEY, ALAMEDA CO., CAL.—Street improvements. Costs as follow. Engineer, City Engineer, Berkeley. Owners, City of Berkeley. The following appropriations have been asked for improvements to be made in the City of Berkeley: \$1,000 for the improvement of the south half of Allston Way fronting the corporation yard, a distance of 312 feet east from West street; \$1,000 for the improvement of the east half of Curtis street fronting the West Berkeley School; \$1,000 for the improvement of the north half of Dwight Way fronting the McKinley School, a distance of 150 feet; \$3,000 for the cost of construction of a concrete bridge over Cordones Creek on Walnut street north Berryman street; \$2,500 for the cost of labor and materials to construct a fire cistern in South Berkeley; \$5,000 for the necessary material to grade the new Corporation Yard, construct sheds, buildings and shops and for the equipment and machinery; \$6,000 for encasing in concrete the piles under the inner landing of the Municipal Wharf, \$3,800 for the purchase of an auto truck for the Street Department.

SAUSALITO, MARIN CO., CAL.—Street paving. Cost not stated. Engineer, Town Engineer, Sausalito. Owners, Town of Sausalito. Plans and specifications for the improvement of Central avenue, North street and one block of West street from Richardson to Main were adopted at the last meeting of the Trustees. All to be asphaltic macadam 18 feet between curbs, except on North street from Fourth to West streets, and on West street from Main to Richardson street. Bids will soon be called.

SAUSALITO, MARIN CO., CAL.—Street work. Cost not stated. Engineer, Town Engineer, Sausalito. Owners, Town of Sausalito. The Trustees will receive bids until September 20th at 8 p. m. for improvement work to be done in West and Valley streets. Plans and further information may be had from the Town Engineer at Sausalito. Bids for the above work were opened at the last meeting, but were rejected as they were too high. Leech & De Camp bid \$1,865 on the work, while the engineer's estimate was placed at \$1,350.

SAUSALITO, MARIN CO., CAL.—Sewer construction. Cost not stated.

Engineer, Town Engineer, Sausalito. Owners, Town of Sausalito. The Town Trustees at their last meeting adopted revised plans and specifications with estimated cost of the construction of sewer work in District F. Bids will soon be called for.

LINDSAY, TULARE CO., CAL.—Street improvement. Cost not stated. Engineer, City Engineer, Lindsay. Owners, City of Lindsay. At a special meeting the City Trustees adopted specifications providing for the improvement of Hermosa street with the following exceptions: A crushed rock base to be 4 inches instead of 3½ inches after being rolled, and a change in width from 16 to 18 feet, with the same 2-foot shoulder on each side, making practically a 22-foot pavement. The proposition of improving Honolulu street will be taken up by the Board at their next meeting. Bids on both projects will probably be called for immediately.

VISALIA, TULARE CO., CAL.—Sewer construction, \$65,000. Engineer, City Engineer, Visalia. Owners, City of Visalia. Bonds have been sold and bids are now being advertised for the construction of the new Visalia sewer system. The work will consist of a main sewer, outfall system and sewage disposal plant. Plans and specifications may be had from the City Engineer at Visalia.

WOODLAND, YOLO CO., CAL.—Street pavement, etc. Cost not stated. Engineer, City Engineer, Woodland. Owners, City of Woodland. Plans and specifications have been adopted for the improvement of Main, North College and East streets. Plans and specifications prepared by City Engineer Arnold provide for the construction of concrete curbs and gutters, and for the grading of roadways and constructing thereon a strip of asphaltic pavement 18 feet wide in the center, consisting of hydraulic concrete base 5 inches in thickness and an asphaltic wearing surface ½ inch thick, the rest of the road to be paved with 5½ inches of waterbound macadam. Bids will soon be called for.

STOCKTON, SAN JOAQUIN CO., CAL.—Street paving. Cost as follows. Engineer, City Engineer, Stockton. Owners, City of Stockton. Bids opened at the last meeting of the City Council for street paving show the following low bidders: North Commerce and North Center streets, W. H. Paul, Oakland, \$26,148.76; engineer's estimate, \$21,560.57. North El Dorado street, Clarke & Henery Co., Sacramento, \$20,267.82; engineer's estimate, \$23,384.20; and North Commerce and North Center streets north of Wyandotte, W. H. Paul, Oakland, \$21,969; engineer's estimate, \$25,942.06. Contracts will be awarded at the next meeting of the Council.

HOLLISTER, SAN BENITO CO., CAL.—Street paving. Cost not stated. Engineer, City Engineer, Hollister. Owners, City of Hollister. A resolution of intention for the paving improvement of South street from San Benito to Powell street was passed at the last meeting of the Trustees. Bids on the work will soon be called.

SANTA CRUZ, SANTA CRUZ CO., CAL.—Street paving. Cost not stated. Engineer, City Engineer, Santa Cruz. Owners, City of Santa Cruz. At the

last meeting of the Santa Cruz City Council the following action was taken on street work. The resolution for work on Bay street was adopted. It is for paving the street the full width and detached curbs where the work was not done. Plans and specifications were ordered for pavements, sewer, waterway and walks on King, Kirby, Peyton, Laurel and Miles streets, and the resolution was adopted. The Clerk was ordered to advertise for plans and specifications for resurfacing Walnut avenue.

**SOUTH SAN FRANCISCO, SAN MATEO CO., CAL.**—Street improvement. Cost not stated. Engineer, City Engineer, South San Francisco. Owners, City of South San Francisco. A resolution of intention providing for the improvement of Lux avenue, between Maple avenue and San Bruno road, was adopted; also for the improvement of Cypress avenue, between Linden and Lux avenues, by grading, laying asphaltic concrete pavement and the construction of concrete gutters, was adopted at the last meeting of the City Board of Trustees. Bids on the work will soon be called.

**REDWOOD CITY, SAN MATEO CO., CAL.**—Highway work, \$5,404.29. Engineer, County Surveyor, Redwood City. Owners, San Mateo County. Bids received by the County Supervisors for the macadamizing of the road from Moss Beach to Montara were rejected, as there were not sufficient funds available in the Fourth District. The following bids were received on the work: James Wilson, \$5,404.29; Barrett & Hulp, \$6,557.61.

**SAN RAFAEL, MARIN CO., CAL.**—Street paving. Cost not stated. Engineer, City Engineer, San Rafael. Owners, City of San Rafael. The City Council has instructed the City Manager to prepare plans and specifications for macadamizing portions of C street, D street, Clark street, Sixth street, Center street, Cijos street, San Rafael avenue and San Rafael and San Quentin Turnpike. Bids will be called on the approval of the plans.

**MARTINEZ, CONTRA COSTA CO., CAL.**—Water system, \$43,000. Engineer, City Engineer Elam C. Brown, Martinez. Owners, City of Martinez. According to the figures submitted to the City Trustees by City Engineer Elam C. Brown, it will cost \$43,000 to install a water system such as the Board of Trustees has under contemplation. This includes the reservoir and laying of suitable mains throughout the city. It is probable that a bond election will be called in the near future to vote funds to finance the cost of the system.

**MARTINEZ, CONTRA COSTA CO., CAL.**—Street paving. Cost not stated. Engineer, County Surveyor, Martinez. Owners, Contra Costa County. The County Supervisors have issued a call for bids for the concrete paving of the main street in Danville in conformance with the plans now on file with the Clerk of the Board. Bids close on September 27th.

**STOCKTON, SAN JOAQUIN CO., CAL.**—Highway construction. Cost not stated. Engineer, County Surveyor, Stockton. Owners, San Joaquin County. The Board of Supervisors are considering plans and specifications in con-

nection with the Borden Highway. Estimates of the work are now being prepared and provide for the construction of a number of bridges and other minor details. Bids on the work will soon be called.

**VISALIA, TULARE CO., CAL.**—Sewer system, \$65,000. Engineer, City Engineer, Visalia. Owners, City of Visalia. Bids will be received by the Board of Trustees up to October 6, 1915, for the construction of an outfall sewer, disposal works and extensions to the present municipal sewer system in accordance with plans and specifications on file in the office of the City Engineer. Bonds in the sum of \$65,000 have been voted and sold for the work.

**REDWOOD CITY, SAN MATEO CO., CAL.**—Grading and paving. Cost not stated. Engineer, City Engineer, Redwood City. Owners, Redwood City. The City Engineer has been instructed to prepare plans and specifications for the grading and macadamizing of Brewster street from the county road to Arguello street, excepting the S. P. right of way. Plans were also ordered for the construction of sidewalks and curbs on the county road at the end of Main street and also at Whipple avenue.

**VENTURA, VENTURA CO., CAL.**—Paving. Cost not stated. Engineer, County Surveyor, Ventura. Owners, Ventura County. Bids will be received by the Board of Supervisors up to 11 a. m. or September 21, 1915, for paving the extensions to the Bardsdale bridge in accordance with plans and specifications on file in the office of the Board. The work will require about 23,340 square feet bituminous macadam pavement of an average thickness of three inches. Certified check for 10 per cent is required. J. B. McCloskey is the County Clerk.

**SANTA ANA, ORANGE CO., CAL.**—Boulevard construction. Cost not stated. Engineer, County Surveyor, Santa Ana. Owners, Orange County. Bids will be opened on September 21 for constructing and rebuilding Section No. 2 of the Irvine Boulevard. Plans can be secured from the County Clerk.

### Contracts Awarded

**CROCKETT, CONTRA COSTA CO., CAL.**—Street improvement. Cost as follows. Engineer, Town Engineer, Crockett. Owners, Town of Crockett. Contractor, S. C. Rogers, Richmond. Contract price, curbs, \$30 per lineal foot, and gutters, \$12½ per square foot.

**STOCKTON, SAN JOAQUIN CO., CAL.**—Road improvements. Costs as follows. Engineer, County Surveyor, Stockton. Owners, San Joaquin County. The Board of Supervisors at their last meeting awarded the following contracts: Improvement of the Jack Tone road to C. W. McIntyre at \$11,000; improvement of the Murphy Ferry road to Cy Moreing & Sons at \$13,512; improvement of the West Lane and Weber roads to Cy Moreing & Sons at \$16,000.

**SALINAS, MONTEREY CO., CAL.**—Road construction, \$16,155.10. Engineer, County Surveyor, Salinas. Owners, Monterey County. Contractor, D. C. Howard, Redwood City. Contract price, \$16,155.10.

**REDWOOD CITY, SAN MATEO CO., CAL.**—Road improvement, \$1,964.92. Engineer, County Surveyor, Redwood City. Owners, San Mateo County. Contractor, James Wilson, Redwood City. Contract price, \$1,964.92.

**SANTA ANA, ORANGE CO., CAL.**—Road construction, \$14,689.80. Engineer, County Surveyor, Santa Ana. Owners, Orange County. Contractor, Oscar Ford, Riverside. Contract price, \$14,689.80.

**RIVERSIDE, RIVERSIDE CO., CAL.**—Street improvement. Cost as follows. Engineer, County Surveyor, Riverside. Owners, Riverside County. Contractors, Isbell Construction Co., San Diego, \$22,074.78, and Brashear-Burns, Los Angeles, \$10,995.

### STORES AND OFFICES.

**WATTS, LOS ANGELES CO., CAL.**—Restaurant, 1 story, frame. Cost not stated. Architect, Fred Noonan, Brockman Bldg., L. A. Owner, A. Levy. Will contain an area of 134 by 153 feet and will contain besides a main dining room seating 700 people, kitchen, office, dance pavilion, rest rooms and lobby. Interior finish plaster board. Steam heat, modern plumbing and electric work. Exterior covered with rustic. Plans being prepared.

**SEATTLE, WASH.**—Stores, 1 story and base, brick, \$40,000. Architects, Charles Behb and Carl Gould, Denny Bldg., Seattle. Owners, Puget Sound Mill Co. Location, 3rd street between Madison and Spring, covering an area of 60 by 240 feet. Will contain eight modern stores. Patent store fronts, marble bases, hardwood and pine trim. Cement floor. Exterior faced with pressed brick and terra cotta. Plans complete add figures being taken.

## More Library Bids Received By Board.

**Bids on Metal Book Stacks Opened. Larsen-Sampson Co. Request Withdrawal of Bid on General Construction.**

At Tuesday's meeting of the Public Library Trustees Larsen-Sampson Co., low bidders on the general construction of the main library in the Civic Center, asked that their bid be withdrawn. The request was granted by the Library Board. Larsen-Sampson Company's bid was \$297,500 or \$26,500 below the second bid, that of Lindgren & Co. at \$424,000. Secretary Mullin of the Board states that it will be at least two weeks before an award is made.

Bids were opened at the same meeting for furnishing and installing metal book stacks and book lifts for the main library. Ralston Iron Works submitted the lowest figures at \$35,900. No award was made. Following is a complete list of the bids:

#### Metal Book Stacks, Etc.

Artistic Metal Constr. Co.	\$54,425
Library Bureau	39,497
Ralston Iron Works	35,900
Paltridge Co.	39,990
General Fireproofing Co.	44,550
Smead & Co.	39,123

City of Hollister. A resolution of  
entention for the paving improvement  
South street from San Benito to  
well street was passed at the last  
meeting of the Trustees. Bids on the  
work will soon be called.

**STREET PAVING**—Cost not stated.  
Santa Cruz, Santa Cruz Co., Cal. En-  
gineer, City Engineer, Santa Cruz.  
Owners, City of Santa Cruz. At the  
last meeting of the Santa Cruz City  
Council the following action was taken  
on street work. The resolution for  
work on Bay street was adopted. It is  
paving the street the full width,  
and detached curbs where the work  
is not done. Plans and specifications  
are ordered for pavements, sewer,  
terway and walks on King, Kirby,  
Wilton, Laurel and Milles streets, and  
a resolution was adopted. The Clerk  
is ordered to advertise for plans and  
specifications for resurfacing Walnut  
street.

**HIGHWAY WORK**—\$5,404.29. Red-  
wood City, San Mateo Co., Cal. En-  
gineer, County Surveyor, Redwood City.  
Owners, San Mateo County. Bids re-  
ceived by the County Supervisors for  
macadamizing of the road from  
Beach to Montara were rejected,  
there were not sufficient funds avail-  
able in the Fourth District. The fol-  
lowing bids were received on the work:  
James Wilson, \$5,404.29; Barrett &  
Co., \$6,557.61.

**RESIDENCE**—1 story and base,  
same, \$1,400. San Jose, Santa Clara  
Co., Cal. Architect, none. Owner, A.  
Foley, 8th and Virginia, San Jose.  
Foundation, 8th and Virginia streets. Will  
contain four rooms and bath. Interior  
leah pine. Open fire place and tile  
mantel. Exterior rustic. Plans com-  
plete and work to be done by Day  
bor.

**GRADING AND PAVING**—Cost not  
stated. Redwood City, San Mateo Co.,  
Cal. Engineer, City Engineer, Redwood  
City. Owners, Redwood City. The City  
Engineer has been instructed to pre-  
pare plans and specifications for the  
grading and macadamizing of Brew-  
ster street from the county road to Ar-  
rabello street, excepting the S. P. right  
way. Plans were also ordered for  
the construction of sidewalks and  
curbs on the county road at the end  
of Main street and also at Whipple  
avenue.

### MARIN, CONTRA COSTA AND SONOMA COUNTIES

RESIDENCE—1½ story and base, frame, \$4,000. Martinez, Contra Costa Co., Cal. Architect, Carl Geiffuss, 46 Kearny street, S. F. Owner's name withheld. Will contain seven rooms, bath and sleeping porch. Interior finish, pine and white enamel. Hardwood floors, furnace heat, open fire places, brick and tile mantels and automatic water heater. Bath room finished in tile. Exterior covered with cement plaster on metal lath. Plans prepared and figures to be called for shortly.

HOTEL AND GARAGE—3 story and base, brick. Cost not stated. Pittsburg, Contra Costa Co., Cal. Architect, A. W. Cornelius, Merchants' National Bank Bldg., S. F. Owners, S. Carusa & Bros. Location, 4th and Railroad avenue, covering an area of 40 by 110 feet. Will contain garage and 40 guest rooms. Interior finish, pine and redwood. Steam heat, hot water system and special garage storage tanks. Bath rooms finished in tile. Exterior faced

with pressed brick. Plans complete and figures being taken.

STREET PAVEMENT—Cost not stated. Sausalito, Marin Co., Cal. Engineer, Town Engineer, Sausalito. Owners, Town of Sausalito. Plans and specifications for the improvement of Central avenue, North street and one block of West street from Richardson to Main were adopted at the last meeting of the Trustees, all to be asphaltic macadam 18 feet between curbs except on North street from Fourth to West street, and on West from Main to Richardson street. Bids will soon be called for.

STREET WORK—Cost not stated. Sausalito, Marin Co., Cal. Engineer, Town Engineer, Sausalito. Owners, Town of Sausalito. The Trustees will receive bids until September 20th, 8 p. m. for improvement work to be done in West and Valley streets. Plans and further information may be had from the Town Engineer at Sausalito. Bids for the above work were opened at the last meeting, but were rejected as they were too high. Leech & De Camp bid \$1,865 on the work, while the engineer's estimate was placed at \$1,350.

SEWER CONSTRUCTION—Cost not stated. Sausalito, Marin Co., Cal. Engineer, Town Engineer, Sausalito. Owners, Town of Sausalito. The Town Trustees at their last meeting adopted revised plans and specifications with estimated cost of the construction of sewer work in District F. Bids will soon be called for.

STREET PAVING—Cost not stated. San Rafael, Marin Co., Cal. Engineer,

City Engineer, San Rafael. Own City of San Rafael. The City Council has instructed the City Manager to prepare plans and specifications for repaving portions of C street, Clark street, Sixth street, Center street, Cijos street, San Rafael avenue and San Quentin Turnpike. Bids will be called on approval of the plans.

WATER SYSTEM—\$43,000. Martinez, Contra Costa Co., Cal. Engineer, Engineer Elam C. Brown, Martinez. Owners, City of Martinez. According to figures submitted to the City Trustees by City Engineer Elam C. Brown it will cost \$43,000 to install a water system, such as the Board of Trustees has under contemplation. This includes the reservoir and laying of main lines throughout the city. It is probable that a bond election will be called in the near future to vote for to finance the cost of the system.

STREET PAVING—Cost not stated. Martinez, Contra Costa Co., Cal. Engineer, County Surveyor, Martinez. Owners, Contra Costa County. County Supervisors have issued a call for bids for the concrete paving of the main street in Danville in performance with the plans now on file with the Clerk of the Board, close on September 27th.

## FRESNO, MODESTO STANISLAUS AND CENTRAL CALIFORNIA

BRIDGE—Reinforced concrete, \$12,-  
000. Madera, Madera Co., Cal. Engi-  
neers, Leonard & Day, Rialto Bldg., S.  
F. Owners, Madera County. Bonds  
have been carried in this county for the  
construction of the proposed D street  
bridge over the Fresno River by a vote  
of 416 to 73, and bids for the construc-  
tion will be called for shortly. Plans  
provide for a reinforced concrete bridge  
270 feet long with a 20-foot roadway  
and 2 four-foot sidewalks.

BRIDGE—Reinforced concrete, \$85,-  
000. Modesto, Stanislaus Co., Cal. En-  
gineer, County Surveyor, Modesto.  
Owners, Stanislaus County. The Board  
of Supervisors in fixing the tax rate  
for Stanislaus County for the ensuing  
year at \$2.00 included the construction  
of a new \$85,000 concrete bridge over  
the Tuolumne River at Modesto and the  
building of a permanent paved road  
from the city limits of Modesto to the  
southeast corner of the Bald Eagle  
ranch to connect with the Sonora lat-  
eral from Salida to Oakdale. But \$35,-

less and crackless and will last in-  
definitely, then insist on **WYBRO**  
Panels.

Wybro Panels cost no higher than  
others, but their quality is unsurpass-  
ed by any other panels on the market.  
Insist on Wybro Panels. You will  
be pleased with the ultimate result.

**White Brothers**

5th and Brannan Streets

San Francisco

000 of the cost of the bridge was included in the present levy.

**OIL SUPPLY STATION**—Concrete and steel. Cost not stated. Bakersfield, Kern Co., Cal. Engineer, Engineering Department Union Oil Co., Bakersfield. Owners, Union Oil Co. The Union Oil Company will construct a storage and oil service station on the Southern Pacific reservation in East Bakersfield. The station is to be located near the Union avenue crossing, and it is planned to erect a large establishment. Big storage tanks and large office structure will be constructed to handle the refinery products.

**FACING DAM**—\$10,000. Modesto, Stanislaus Co., Cal. Engineer, Herrmann, Modesto. Owners, Modesto Irrigation District. Plans and specifications prepared by Engineer Herrmann, of the Modesto Irrigation District, for a reinforced concrete facing for the upstream side of Dam No. 6 of the Dallas reservoir, have been adopted by the directors. Bids have been ordered advertised.

**STREET IMPROVEMENT**—Cost not stated. Lindsay, Tulare Co., Cal. Engineer, City Engineer, Lindsay. Owners, City of Lindsay. At a special meeting the City Trustees adopted specifications providing for the improvement of Hermosa street with the following exceptions: A crushed rock base to be 4 inches instead of 3½ inches after being rolled, and a change in width from 16 to 18 feet, with the same 2-foot shoulder on each side, making practically a 22-foot pavement. The proposition of improving Honolulu street will be taken up by the Board at their next meeting. Bids on both projects will probably be called for immediately.

**SEWER CONSTRUCTION**—\$65,000. Visalia, Tulare Co., Cal. Engineer, City Engineer, Visalia. Owners, City of Visalia. Bonds have been sold and bids are now being advertised for the construction of the new Visalia sewer system. The work will consist of a main sewer, outfall system and sewage disposal plant. Plans and specifications may be had from the City Engineer at Visalia.

**BRIDGES AND CULVERTS**—Reinforced concrete. Cost not stated. Hanford, Kings Co., Cal. Engineer, County Surveyor, Hanford. Owners, Kings County. The Board of Supervisors has directed the Clerk to advertise for bids for the construction of culverts and bridges for the improved highway. Three hundred barrels of Portland cement will be used in the work. Bids close on September 20th. Further information may be had from the County Surveyor.

**OIL DISTRIBUTING SYSTEM**—\$15,000. Modesto, Stanislaus Co., Cal. Engineer's name not given. Owners, Associated Oil Co., S. F. A permit has been granted by the City Council to the Associated Oil Co. to construct a new distributing station on the east side of the Salida road between the Lateral No. 4 bridge and the Modesto Re-pressed Brick Company's yard. The entire plant will cost about \$15,000.

**LEVEE CONSTRUCTION**—Cost not stated. Red Bluff, Tehama Co., Cal. Engineer, County Surveyor, Red Bluff.

Owners, Tehama County. At the last meeting of the Supervisors bids were ordered called for the construction of a levee across the head of a small slough on the Chipman ranch in Antelope Valley. The levee will be built of dirt and faced with concrete. Bids for the work will be opened on October 5th. Further information may be had from the Surveyor at Red Bluff.

**RECLAMATION WORK**—Cost as follows: San Luis Obispo, San Luis Obispo Co., Cal. Engineer, County Surveyor, San Luis Obispo. Owners, San Luis Obispo County. All bids received by the County Supervisors for protection work on the state highway leading from Nimopo to Santa Marina were rejected. The bids received were as follows: Mercereau Bridge and Construction Co., L. A., \$18,995, including royalty to River Current Control Co.; Boardman Construction Co., L. A., \$10,903, excluding royalty; Charles W. Corbaley Co., L. A., \$11,000, excluding royalty; Mesmer & Rice, L. A., \$11,100, excluding royalty; The River Current Control Co., S. F., \$14,870. What further action will be taken by the Supervisors has not yet been made known.

**SCHOOL**—1 story and base, brick, \$20,000. Los Angeles, Cal. Architects, Dennis & Hewitt, Pay Bldg., L. A. Owners, City of Los Angeles. Location, 2055 west 24th street, covering an area of 60 by 80 feet. Will contain eight rooms. Interior finish pine with maple floors. Central heating system, program clocks and vacuum cleaning. Exterior faced with pressed brick. Plans complete and revised figures being taken. Bids open on September 23rd.

**SCHOOL**—1 story and base, brick, \$20,000. Los Angeles, Cal. Architect, W. C. Pennell, Baker-Betwiler Bldg., L. A. Owners, City of Los Angeles. Location, Olive street at Vernon, covering an area of 68 by 80 feet. Will contain eight class rooms. Interior finish pine with maple floors. Central heating system, program clocks and vacuum cleaning. Exterior faced with pressed brick. Plans being prepared.

**REPAIRING DAM**—Cost not stated. Modesto, Stanislaus Co., Cal. Engineer, Herrmann, Modesto. Owners, Modesto Irrigation District. At the last meeting of the Modesto Irrigation District plans and specifications for the repairing of Dam No. 1 of the Dallas Reservoir were accepted and bids will be received until October 2nd. Further information may be had from Engineer Herrmann of the District.

**SCHOOL**—1 story and base, brick, \$14,000. Fresno, Fresno Co., Cal. Architect, Ernest J. Kump, Rowell Bldg., Fresno. Owners, West Park School District. Will contain four class rooms and assembly hall. Interior finish pine with maple floors in class rooms. Central heating system. Exterior faced with pressed brick. Plans complete and figures being taken. Bids will be opened on September 20th.

**SEWER SYSTEM**—\$65,000. Visalia, Tulare Co., Cal. Engineer, City Engineer, Visalia. Owners, City of Visalia. Bids will be received by the Board of Trustees up to October 6, 1915, for the construction of an outfall sewer, disposal works and extensions to the present municipal sewer system, in ac-

cordance with plans and specifications on file in the office of the city engineer. Bonds in the sum of \$65,000 have been voted and sold for the work.

**HOSPITAL**—2 story and base, frame ad plaster. Cost not stated. Selma, Fresno Co., Cal. Architect, Ernest J. Kump, Rowell Bldg., Fresno. Owner, Mrs. M. Christensen. Will contain two wards, operating room and dispensary. Interior finish pine and white enamel. Hardwood and tile floors. Central heating system. Exterior covered with cement plaster. Plans being prepared.

## SACRAMENTO, STOCKTON AND NORTHERN CALIFORNIA

BRIDGE—Steel and reinforced concrete, \$60,000. Nicolaus, Sutter Co., Cal. Engineer, County Surveyor, Yuba City. Owners, Sutter County. The County Surveyor has been instructed to prepare plans and specifications for the construction of a bridge over the Feather River at Nicolaus. The proposed structure will be 600 feet long and of steel and concrete construction.

STREET PAVEMENT, ETC. — Cost not stated. Woodland, Yolo Co., Cal. Engineer, City Engineer, Woodland. Owners, City of Woodland. Plans and specifications have been adopted for the improvement of Main, North College and East streets. Plans and specifications prepared by City Engineer Arnold provide for the construction of concrete curbs and gutters, and for the grading of roadways and constructing thereon a strip of asphaltic pavement 18 feet wide in the center, consisting of hydraulic concrete base 5 inches in thickness and an asphaltic wearing surface 1/2 inch thick, the rest of the road to be paved with 5 1/2 inches of waterbound macadam. Bids will soon be called.

STREET PAVING—Cost as follows. Stockton, San Joaquin Co., Cal. Engineer, City Engineer, Stockton. Owners City of Stockton. Bids opened at the last meeting of the City Council for street paving show the following low bidders: North Commerce and North Center streets, W. H. Paul, Oakland, \$26,148.76; engineer's estimate, \$31,560.37. North El Dorado street, Clarke & Henry Co., Sacramento, \$20,267.32; engineer's estimate, \$29,534.29; and North Commerce and North Center streets north of Wyandotte, W. H. Paul, Oakland, \$21,969; engineer's estimate, \$25,942.06. Contracts will be awarded at the next meeting of the Council.

BRIDGES—Reinforced concrete. Cost as follows. Red Bluff, Tehama Co., Cal. Engineer, County Surveyor, Red Bluff. Owners, Tehama County. Contractors, Ross Construction Co., Sacramento. Contract prices, Dibble bridge, \$12,580; Blue Tent bridge No. 1, \$3,100; Blue Tent bridge No. 2, \$1,501. C. E. McCartney, Red Bluff, steel bridge across Mill Creek, \$1,293.

LUMBER ROAD—Cost not stated. Yreka, Siskiyou Co., Cal. Engineer, none. Owners, McCloud River Lumber Co. The McCloud River Lumber Company will start immediately on the extending of its logging operations by building a new railroad spur six miles into the Pumice Mountain country, northeast of Bartle, which will be ready for use with the next season's operation.

BRIDGES—2, steel and concrete. Cost not stated. Red Bluff, Tehama Co., Cal. Engineer, County Surveyor, Red Bluff. Owners, Tehama County. Plans and specifications prepared by County Surveyor W. F. Lanning for three bridges to be built on the Concho river road were approved at the last meeting of the Supervisors and bids have been ordered received. Bids close October 5th. The structures will be built over Antelope Creek, Salt Creek and a small slough. All will be of steel construction.

PHIL—Earth. Cost not stated. Red Bluff, Tehama Co., Cal. Engineer, County Surveyor, Red Bluff. Owners, Tehama County. Bids will be received by the County Supervisors until October 5th for the construction of a fill on the Red Bluff-Harrison Gulch road at the new bridge over Salt Creek, near Rosewood. Plans and specifications have been adopted by the Supervisors and bids will be received until October 5th for the fills and the Sand Slough bridges.

HIGHWAY CONSTRUCTION — Cost not stated. Stockton, San Joaquin Co., Cal. Engineer, County Surveyor, Stockton. Owners, San Joaquin County. The Board of Supervisors are considering plans and specifications in connection with the Borden Highway. Estimates of the work are now being prepared and provide for the construction of a number of bridges and other minor details. Bids on the work will soon be called.

ROAD IMPROVEMENTS — Costs as follows. Stockton, San Joaquin Co., Cal. Engineer, County Surveyor, Stockton. Owners, San Joaquin County. The Board of Supervisors at their last meeting awarded the following contracts: Improvement of the Jack Tone road to C. W. McIntyre at \$11,000, improvement of the Murphy Ferry road to Cy Moring & Sons at \$15,512; improvement of the West Lane and Weber roads to Cy Moring & Sons at \$10,000.

### Contracts Awarded.

SCHOOL—1 story and base, frame, \$21,347. Stockton, San Joaquin Co., Cal. Architects, Stone & Wright, San Joaquin Bldg., Stockton. Owners, City of Stockton. Contractors, Daniels & Green, Stockton. Contract price, \$21,347.

HALL OF RECORDS—2 story and base, reinforced concrete, \$13,813. Oroville, Butte Co., Cal. Architect, Charles S. Kaiser, Mechanics' Institute Bldg., S. E. Owners, Butte County. Contractors, Western Building and Engineering Co., Phelan Bldg., S. E. Contract price, \$13,813.

HOSPITAL—2 story and base, frame and plaster, \$29,000. Susanville, Lassen Co., Cal. Architect, George C. Sellen, Sacramento. Owners, Lassen County. Contractor, James L. McLaughlin, 214 Kearny street, S. E., general construction; Latourette, Fical & Co., Sacramento, plumbing. Contract price not stated.

SCHOOL, GYMNASIUM — 2 story, frame, \$8,105. Yreka, Siskiyou Co., Cal. Architect, none. Owners, Siskiyou Union High School District. Contractor, D. M. Reid, Yreka. Contract price, \$8,105.

## Open Figures For Hall Of Records.

Butte County Supervisors Receive Figures For New Hall of Records Building at Oroville.

(By Special Wire.)

OROVILLE, Butte Co., Cal. Fifteen sets of figures were opened this morning by the Board of Supervisors for the construction of the two-story and

basement reinforced concrete and brick Hall of Records, designed by Architect Charles S. Kaiser, San Francisco. Western Building & Engineering Co. submitted the lowest bid at \$12,813 and will probably be awarded the contract as their bid is well within the architect's estimate. Following is a complete list of the figures presented:

#### Hutte County Hall of Records.

Howard S. Williams.....	\$18,422
McLernan & Peterson.....	46,992
Collman & Collman.....	47,410
Booster Vogt Co.....	53,337
Harvey A. Klyden.....	50,876
Pacific Const. Co. (no check or bond).....	44,923
Tringle-Dunn & Co.....	48,644
Bestor H. Stock.....	49,421
MacDonald & Kahn (no check or bond).....	46,750
Van Sant-Houghton Co.....	51,900
Louge & Bergstrom.....	52,000
Randa & Spivock (no check or bond).....	47,500
Robert Frost.....	46,884
Western Bldg. & Eng. Co.....	43,843
Teichert & Ambrose.....	47,985

### BUILDING CONTRACTS

#### SACRAMENTO COUNTY.

##### FRAME BUILDING

S 68 FEET OF E 1/4 and S 50 feet of W 1/2 of E 1/2 of Lot 2, K, L, 8th and 9th Sts., Sacramento. One-story and basement tile and frame building. Owner.....Lusien Caen. Architect.....None. Contractor.....Charles Vanina, 2022 M St., Sacramento.

COST, \$4650

##### ALTERATIONS

No. 2133 BONITA AVE, on Lot 10 Bonita Terrace, Sacramento. Build sleeping porch and finish off basement. Owner.....R G. Johnson, Nicolas, Cal. Architect.....None. Contractor.....F. A. Holdener, 522 1/2 M St., Sacramento. COST, \$600

No. 1027, 1029 K ST., Sacramento. Alterations to store. Owner.....The Cherry's Co., 1009 Market, San Francisco. Architect.....None. Contractor.....Barton & Hite, 1009 1/2 9th St., Sacramento.

Filed Aug. 26, '15. Dated Aug. 23, '15. COST, \$2500

NOTE.—If completed on or before Sept. 17, contract price shall be \$2459.

### LOS ANGELES AND SOUTHERN CALIFORNIA

BRIDGES—26 steel and reinforced concrete, \$350,000. Santa Barbara, Santa Barbara Co., Cal. Engineer, County Surveyor, Santa Barbara. Owners, Santa Barbara County. Santa Barbara County, while turning down the good roads bonds, voted favorably on the \$350,000 bond issue for building bridges along the state highway. The character and location of the proposed structures are as follows. More detailed information can be secured from the County Surveyor at Santa Barbara.

One bridge at the crossing over Southern Pacific Railroad track at station 109 plus 10, section "G."

A reinforced concrete girder bridge over Eagle Canyon Creek where state

highway crosses creek, being at station 181 plus 00, section "G."

A steel truss bridge over Dos Pueblos Creek where state highway crosses creek, being at station 285 plus 550, section "G."

A reinforced concrete bridge over Gato Canyon where state highway crosses said canyon, said bridge to be at station 379 plus —, section "G."

A reinforced concrete bridge over El Capitan Creek, where state highway crosses creek at station 488 plus 50, section "H."

A reinforced concrete bridge over Corral Canyon Creek, where state highway crosses creek, at station 60 plus 25, section "F."

A reinforced concrete bridge over Tajiguas Canyon Creek where state highway crosses creek, being at station 243 plus 80, section "F."

A reinforced concrete bridge over Arroyo Quemada where state highway crosses arroyo, being at station 306 plus 00, section "F."

Two steel truss bridges over Gaviota Creek between Gaviota Gorge and the Pacific Ocean at points where state highway crosses creek, to wit: One bridge at station 104 and one bridge at station 109, both in section "E."

A steel truss bridge at Gaviota Gorge over Gaviota Creek where state highway crosses creek, being at station 149 plus 40, section "E."

A reinforced concrete bridge over Las Cruces Creek at place known as Sheep Camp, where state highway crosses creek, being at station 312 plus —, section "E-2."

Four bridges across Najoqui Creek at points where state highway crosses creek in Cuesta Canyon, said bridges to be located at the following points on the official survey of state highway: one reinforced concrete bridge at station 2 plus 50; one reinforced concrete bridge at station 160 plus —; one reinforced concrete bridge at station 218 plus —; one steel truss bridge at station 248 plus —, all in section "D."

A bridge across Santa Ynez River at the point where state highway crosses river near mouth of Zaca Creek, the cost to said county to construct and build said bridge not to exceed \$50,000; the cost in excess of said sum to be paid by the State of California.

Six reinforced concrete girder bridges over Zaca Creek between Santa Ynez River and Zaca Station at points on Zaca Creek where said state highway crosses Zaca Creek, indicated on official survey of state highway as follows, to wit: One bridge at station 309 plus —; one bridge at station 418 plus —; one bridge at station 472 plus —; one bridge at station 562 plus —; one bridge at station 566 plus 00, and one bridge at station 575 plus 00, all in section "D."

Three reinforced concrete girder bridges between Zaca Station and Los Alamos at points indicated on official survey of state highway as follows: one bridge at station 165 plus 75; one bridge at station 382 plus 25; and one bridge at station 399 plus 25, all in section "C."

RESTAURANT—1 story, frame. Cost not stated. Watts, Los Angeles Co., Cal. Architect, Fred Noonan, Brockman Bldg., L. A. Owner, A. Levy. Will contain an area of 131 by 153 feet, and

will contain besides a main dining room seating 700 people, kitchen, office, dance pavilion, rest rooms and lobby. Interior finish plaster board. Steam heat, modern plumbing and electric work. Exterior covered with rustic. Plans being prepared.

110 feet. Reinforced concrete walls, exterior cement plaster. Plans complete and figures being taken.

WAREHOUSE—2 story and base. Class A construction. Cost not stated. Los Angeles, Cal. Architect, Thomas Preston, Investment Bldg., L. A. Owners, National Transfer Co. Location, Ann street, covering an area of 50 by 200 feet, metal window sash and frames, floors and roof slabs. Steel rolling

RESIDENCE—2 story and base, frame. Cost not stated. Los Angeles, Cal. Architects, De Remer & Hewitt, title Insurance Bldg., L. A. Owner, W. H. Baback Co. Location, Fremont Place. Will contain twelve rooms, three baths, sleeping porch and separate garage. Interior finish pine, hardwood and white enamel with hardwood floors throughout. Steam heat, open fire places and tile mantels. Tile wainscot and floors in baths. Hot water circulating system. Exterior cement plaster on metal lath. Plans being prepared.

# Building and Engineering News

Devoted to the Architectural, Building, Engineering and Industrial Activities  
of the Pacific Coast.

Issued Weekly, \$3.00 per year

San Francisco, September 22, 1915

Fifteenth Year, No 38

The need for an outlet through Bunker Hill north of Third street has been generally recognized in Los Angeles for a decade or more and it has long been a foregone conclusion that some means of direct communication between the downtown district and the rapidly advancing western and northwestern parts of the city would sooner or later have to be provided. When it has come to the question of deciding upon methods to be employed in overcoming the obstacle to traffic and proper city development presented by this huge natural barrier, however, the doctors have disagreed.

Some have urged a major surgical operation to remove the entire hill bodily, thereby bringing the whole area now comprised within the confines of the elevation down to the level of the districts all around it. Other topography correctors a little less drastic have wanted to confine the cutting to the area extending through the hill between First and Second streets. Tunnels at both First and Second streets, a tunnel at Second street alone, a bore at first street only, have been in their turn strongly advocated.

Each of these plans has at one time or another been officially approved by the municipal authorities and brought almost to the point of consummation, only to be held up at the last minute through the failure of the proponents of the various schemes to agree upon and work untidily for some one method of opening the hill to traffic. Delay in the realization of the great objective itself has been the inevitable consequence. On another page will be found a discussion of the various methods and their cost.

Sir William Van Horne, for years prominent in transcontinental railroad development in Canada, died in the Royal Victoria Hospital in Montreal.

Sir William had been seriously ill for more than two weeks. He went to the hospital for an operation for abdominal abscess.

Sir William Van Horne rose from the foot of the ladder to wealth and fame as one of the so-called empire builders of Canada. Although he was born in the United States in Will County, Illinois, February 3, 1843, and gained railway experience through many years' connection with railroads in the Central and Western United States, it was after his moving to Canada and becoming general manager of the Canadian Pacific Railway in 1882 that he achieved his most notable triumph by pushing the railway to completion across the continent.

Sir William was the son of Cornelius Covenhoven Van Horne, who was a lawyer at Joliet, Ill. The death of his father left young Van Horne to fight the battle of life when he was only 13 years of age. It appears he was fascinated from the first with the life of a railway man, for his first job was in the railroad yards. He soon afterward became a telegraph operator for the Illinois Central, and his strides ahead in various capacities with the Michigan Central Railway and the Chicago and Alton brought him up to his first important executive position as general superintendent of the St. Louis, Kansas City and Northern in 1872. Before going to Canada he also served as general manager of the Southern Minnesota Railway and general superintendent of the Chicago and Alton and the Chicago, Milwaukee and St. Paul.

He superintended the extension of the Canadian Pacific to the Western Coast, and was present at the driving of the last spike on November 7, 1885. The total mileage which later came under his control was over 3,500. He was said to be the "Bill and Hartman" of Canada.

He was knighted by Queen Victoria in May, 1904, in recognition of his remarkable work in Canada, which included not only his railway and industrial interest, but semi-public service as governor of McGill University, the Royal Victoria Hospital and numerous other institutions.

The State Railroad Commission has been asked by the Pacific Telephone and Telegraph Company to undertake an investigation of the company's rates, tolls and rentals and to fix such charges uniform throughout the State on the basis of a fair return on the capital invested. It has agreed to comply with the findings of the commission.

The company hopes in this way to obviate complaints arising over charges of sectional discrimination. It has promised to supply the commission with inventories of all its California holdings.

In its application to the Railroad Commission for a uniform schedule of tariffs the telephone company pointed out that its California system is an integral unit of its system in Nevada, Washington, Oregon and Idaho, and that exchanges in each individual instance should be considered in their relation to the whole system when uniform rates are being fixed.

The application of the company stated that it was its desire that rates not only fair to itself, but fair also to the public, be fixed.

Experts of the company have been working for some time on the valuations of the California units. The inventories of its San Francisco and Los Angeles operative and non-operative properties have been accomplished and are ready for submission to the commission. The work of inventory will be continued.

Some time ago the Railroad Commission upon complaint of the company's patrons made various reductions in the company's rates, decreasing the annual return by \$400,000.

An injunction to prevent the city of Los Angeles from purchasing Monolith cement from the county for aqueduct construction work was denied by Superior Judge Wellborn. The suit was brought several days ago by the Riverside Portland Cement Company, which contended that the county's bid did not conform either with the terms of the advertisement for bids or with the city charter provisions.

Particular exception was made to the failure of the county to accompany its bid with a certified check to guarantee the signing of the contract. Attorneys for the cement company announced they would appeal.

The essential principles of the Cottonwood Creek and Division Creek hydro-electric plants of the Los Angeles aqueduct are involved in a suit for hearing before Judge Trippett of the United States District Court for September 16.

The suit is brought by George J. Henry, an electrical and civil engineer of San Francisco, against the city. Attorneys for both sides say that should the plaintiff win the case the city will be liable to injunction proceedings and will be forced to pay big royalties.

Santa Barbara County is threatening an injunction suit to prevent San Luis Obispo County from building a deflection dam on Santa Maria River.

Santa Barbara County maintains the deflection dam on which bids were to have been opened will throw the Santa Maria River stream water on to Santa Barbara County, where it will tear out roads, bridges and fertile farming land.

# Los Angeles Northwest Outlook.

Collected by George Nelson, C. E.

With a view to hastening as much as possible the creation of a northwest outlet which is to be more than ever imperative now that the great San Fernando Valley irrigation zone has become a part of the city, the Public Works Committee of the City Council asked the City Engineer to prepare careful estimates of costs and damages for a plan that has never as yet been officially considered and which seems to afford a satisfactory solution of the problem for all concerned. The idea calls for an open cut along the line of First street and including sixty feet of ground on either side of that thoroughfare. The scheme is well worth considering because it bids fair to be an extremely economical way out of the dilemma.

It is conceded that the proposed open cut from First to Second street would offer the best permanent solution of the problem, but the enormous cost associated with a project of such magnitude makes it out of the question at present. The cheapest, easiest, quickest way through the hill is the one which ought to be supported by all. Tunnels at both First and Second streets would fill the bill, but these would cost too much and would take too much time to construct, besides being less desirable than a route or routes open to daylight and outside ventilation.

One of the main arguments for the cut at First street, as against the wide chasm between First and Second, is that it would be quite feasible to bridge the narrow gap at Olive, Grand, Bunker Hill, Oak, Flower and Figueroa, leaving these streets without breaks, such as would be necessitated in the event the larger project were to be undertaken. The cost of this plan as compared with that of the huge open cut approved by the last Council, would be small.

The open-cut plan as it stands at present—that from First to Second street—Would involve the regrading of an area approximately 900 feet from north to south and 2,500 feet from east to west. The lowest estimates fix the amount of dirt to be removed at 3,500,000 yards and the cost of the whole project at \$7,700,000. The cost of actual excavation need not be over a fifth of that amount in the narrow cut at First street.

It is proposed that the Council order a postcard vote be taken among the property owners within a district that might reasonably be asked to participate in the expense of the enterprise. If this brings evidence of strong public approval everything will be done to carry the thing through to completion.

Something must be done soon to open a route through Bunker Hill, both as a means of giving West and Northwest Los Angeles and all the territory beyond decent access to the downtown district and of relieving the congestion on Sixth and Seventh streets. New traffic arteries are urgently needed all through this great area and these must have a direct outlet downtown. The city cannot have all the enormous and growing traffic of the most rapidly developing quarter of Los Angeles and of the San Fernando Valley and Cahuenga region beyond straggling indefinitely on a roundabout course around Bunker Hill into a part of the business section that is already almost hopelessly congested. It must settle once and for all upon the plan we expect to follow in opening the hill to traffic and then get to work.

The proponents of the open cut from First to Second streets have not as yet shown any inclination to yield to another plan, holding that the street-level values that would be created on the wide floor of such an artificial valley as they propose would more than justify the greater expenditure. There are also many who have never been willing to agree to anything but tunnels. The plan of boring a roomy, well-lighted and airy tunnel at First Street alone has numerous advocates. The question of cost inclines a large number to waver on any plan, as it appears to be settled that the improvement notwithstanding its immeasurable benefit to the city at large, will have to be paid for by an assessment district. So there are many to be heard from.

The postcard vote promises to play an important part in determining whether the property owners directly interested are willing to go ahead with anything at this time, as well as in ascertaining the point as to whether the proponents of the various plans that have been suggested for overcoming the hill barrier will be able to "get together" for concerted effort on one scheme.

The three separate plans for easy access to the business district from the west and north, through First street, have been summarized by the City Engineer at the request of the Public Works Committee of the Council. The cost of each of these improvements has also been estimated with care and, according to the plan of Chairman Topham of the Public Works Committee, the cost to each individual property owner will now be estimated and the question of the open cut, tunnel or wide cut through Bunker Hill will be placed squarely before the people interested.

One of the plans which have been under discussion is for a double-bore tunnel in First street from Hill to Figueroa street. This, according to the City Engineers estimates, may be built at a cost of \$939,628, not including damages.

The second proposal, which was suggested and looked upon with favor by the Public Works Committee, provides for an open cut through First street from Broadway to Fremont street and including 110 feet each side of First street, with bridges over the cut at Grand avenue, Olive, Hope and Flower streets. This, according to the City Engineer's estimate, would cost \$1,204,553, exclusive of damages. In addition, a new street opened along the cut would cost \$80,000, bringing the total cost of the improvement to \$1,284,553.

The third proposal, which is practically the "original" proposition, calls for an open cut through Bunker Hill, extending from 120 feet south of Second street to 120 feet north of First street. This plan for the improvement will, in the estimation of the City Engineer, cost \$2,076,655 for the actual work and another \$1,634,040 for damages, while the expense that will be incurred by the public utility companies in reconstructing their facilities is not estimated.

The City Engineer's estimate on the cost of a double-bore tunnel in First street, from Hill to Figueroa street, the tunnel to serve the surface of Hill street and to have the same approach grades as the proposed open cut, are as follows:

2,000 lin. ft. double bore tunnel at \$400.....	\$800,000
Portal structures and walls at ends of tunnel.....	41,360
Underpin city's part of Hill street tunnel.....	32,000
Regrade and pave streets outside ends of tunnel..	63,268
Change in water pipes and sewers.....	3,000
Damages to property between Broadway and Hill, and between Figueroa unknown, but same as for cut .....	
Damages to property on Hill over tunnel less than for cut .....	
Total not including damages .....	\$939,628

## Second Plan Cost.

The estimate for cutting First street and 110 feet each side from Broadway to Fremont street, using 3 per cent grades between Hill and Fremont, is as follows:

930,983 cubic yards cut at 50c.....	\$ 465,467
246,318 square feet pavement at 20c.....	49,264
8,665 lineal feet curb at 30c.....	2,581
87,464 square feet sidewalk at 11c.....	9,621
Underpin city's part of Hill street tunnel.....	32,000
Changes in water pipes and sewers.....	6,000
Value of buildings destroyed (Assessor's estimate)	471,620
Bridge across cut at Grand avenue.....	42,000
Bridges across cut at Olive, Hope and Flower....	126,000
Damages to property between Broadway and Hill and between Figueroa and Fremont unknown, but same as for tunnel.....	
Damages to property on hill outside of cut unknown, but greater than for tunnel.....	

\$1,204,553

ost to open a new street along one side of cut is estimated at ..... \$9,000

..... \$1,284,553

ote—The land area consumed by slopes at the sides of the cut amounts to 150,000 square feet. The value of this is about .....\$60,000

#### Most Costly Scheme.

The biggest proposal for an open cut through Bunker Hill from 120 feet north of First street to a point 120 feet south of Second street, is itemized by the City Engineer as follows:

grading streets, 1,331,000 cubic yards at 35c....	\$466,900
grading property, 2,407,000 cubic yards at 35c....	842,450
changes in sanitary sewers .....	37,000
maintaining sewers during construction .....	3,000
changes in storm drain .....	1,500
changes in water pipes .....	25,000
highways and retaining walls .....	486,400
lowering city's portion of the Hill street tunnel...	32,000
payment for street improvements destroyed .....	132,105
superintendence, legal expenses condemning land, etc., and other incidental expenses not above included .....	50,000

\$2,076,655

In addition the following sum should be added for damages. These items are based on the Assessor's estimate of the market value:

cost of land for new streets .....	\$ 271,450
payment for improvements now on site of new streets .....	129,360
payment for improvement on private property which is to be lowered .....	1,000,000
damages due to grade changes outside razed area .....	253,000

\$1,654,040

Total .....\$3,730,695

Expense which will fall upon public utility companies constructing their facilities not included.

#### CALIFORNIA INLAND WATERWAYS ASSOCIATION CONVENTION IN LOS ANGELES.

Declaring for a national mercantile marine, the conservation of flood waters and the development of water ways in California, the Inland Waterways Association of California began its fourth convention in Blanchard Hall, Los Angeles.

Following is the convention program:

##### FRIDAY.

At 10 a. m.—Address of welcome, Mayor Sebastian; address, "Purpose of the Association," President Jacobs; appointment of chairmen of committees on credentials, resolutions and finance.

At 2 p. m.—Address, "California Harbors," Congressman Stephens, Congressman Randall, Congressman Kettner; address, "Conservation," Willis S. Jones.

##### SATURDAY.

At 10 a. m.—Address, "Los Angeles County and its Relation to the Inland Waterways Association," R. W. Pridham; "Flood Control, Los Angeles County," J. B. Lippincott; address, "United States Government and its Relation to Our Internal Improvements," George H. Maxwell.

##### FRIDAY.

Isidor Jacobs, president of the association, in the opening speech of the convention, vigorously attacked the dictators of various chambers of commerce for the part they played in the defeating the ship purchase bill. That they are being controlled by the ship trust pool, with headquarters in England, was his open charge.

"Many persons in the northern part of the state have been much exercised by reports industriously spread regarding the American merchant marine," he said in part. "One might be led to imagine from these reports that the American flag was being driven from the seas. That is false. As a matter of fact the total ship tonnage in foreign trade under the American flag is greater than at any time in the history of the country since 1863."

"I believe that California will double in population within seven years after the war closes," said Isidor Jacobs. He believed that it is for us to say whether the expansion of the state in an agricultural and industrial way shall be finite or circumscribed."

Due to the press of official business, Governor Johnson was not able to attend the convention and deliver an address. A note from the Governor, expressing regret at not being able to attend, was read by President Jacobs.

David B. Livingstone, secretary of the Long Beach Chamber of Commerce, was unanimously elected secretary of the convention.

That the people of Los Angeles County will never stand for any system of flood control in which conservation is not the paramount consideration was the assertion of Chairman Pridham of the Board of Supervisors.

"I believe that we should first determine the amount of water that can be retained in the mountains, then the quantity that can be forced into the underground reservoirs by seepage and conserved in reservoirs. Afterward we can take up other problems of flood control," said Mr. Pridham.

Surveying the work that has been done by the County Board of Engineers, Flood Control, Mr. Lippincott threw the engineering problems into high relief.

"The water level of the wells from Compton to Santa Ana and through the whole artesian belt is falling," he said. "In the city wells at Long Beach the drop has averaged two feet a year for some years past. There is a real necessity of augmenting the supply."

But that reforestation of the Coast Range as one means is more alluring than practicable was unequivocally asserted by Mr. Lippincott. He showed by records that it is nearly impossible to grow trees on the southern slope of this range. He pointed out that of 40,000 trees planted by the park department in Griffith Park there are but fifty now growing.

"As for reservoir sites," he said, "our board surveyed many and decided on one impounding dam, that at the Devil's Gate in the Arroyo Seco. However, this dam will impound 406,000 acre feet of water. But the people of this county should not pin too much faith to reservoirs. It is a solution that promises much and many times realizes nothing."

Regulation by spreading the waters for percolation was suggested as extremely desirable by Mr. Lippincott, who pointed out that ranchers along the Santa Ana River have long been forcing water underground at a cost of 14 cents an acre foot.

This same water for irrigation purposes costs \$7.50 an acre foot," he said, "so the profit is appreciable."

Retardation of the waters by a series of intercepting dams in the mountains has yet to prove itself, according to Mr. Lippincott.

"In my opinion," he said, "there will never be a successful handling of the flood problems of this county until there is a series of levees from the mountains to the sea. But these levees will have to be heavily ripped, and their policing and maintenance must be assured."

How one portion of the State has handled the instrument of water with results that have astonished the world was told by Col. W. H. Holabird, receiver of the California Development Company. It was the story of the Imperial Valley told by a man whose part in the development work has been second to none.

The opening of the conference brought a little tilt on the subject of State unity, with President Jacobs urging that the north and south have interests in common. This brought the retort from Frank H. Olmsted of Los Angeles that the interests of the north seemed to be principally in getting the south's tax money and applying it to its own use.

Addresses by Willis S. Jones on "Conservation," George H. Maxwell on "The United States Government and its Relation to Our Internal Improvements," and by Congressman Stephens concluded the first day's program.

##### SATURDAY.

After spirited controversy the Inland Waterways Association of California yesterday went on record as favoring the Newlands-Broussard bill, a Federal measure providing for the appropriation of \$600,000,000 for river regulation and flood control.

This bill gives the Federal government authority to initiate, and money necessary to carry out, plans for the control of stream freshets, the use of surplus waters in the promotion of agriculture, power, and other developments, and furthering of navigation interests in the eight districts. For the California Pacific division the appropriation is \$50,000,000 and for the Colorado River division a similar amount. The Missouri River-Great Plains-Gulf division, and the lower Mississippi, Ohio River and Appa-

lachian-Atlantic divisions get \$100,000,000 each, and the Mississippi-Great Lakes division \$50,000,000.

There was strong opposition to indorsing the bill as a whole, the committee on resolutions reporting that the principle of the measure only was favored. This aroused those who had demanded that the bill be indorsed without equivocation, and it was declared that if the principle only were supported by the association it would be a move to play into the hands of the railroads and other large corporations that would profit by obstructing the improvement of waterways.

"It is just what the big railroads want and have been trying to get in their sly and crafty way," declared George H. Maxwell, executive director of the National Reclamation Association. "They want the principle of the bill indorsed, but they don't want the bill indorsed. It would cut into them too hard."

Isidor Jacobs of San Francisco, president of the association, and A. W. Frye of Hynes, lead in the effort to have the principle and not the bill indorsed, but they gracefully gave their support to a resolution to indorse the whole bill when they found a majority of those in attendance at the conference so desired.

Following is the resolution as it was finally adopted:  
RESOLVED, That the Inland Waterways Association of California reiterates its indorsement of the Newlands-Broussard river regulation bill and urges the early enactment of legislation by Congress to secure co-operation between the Nation and States, municipalities and other local agencies and districts looking to the complete conservation of all forest and water resources, control of floods and the regulation and standardization of the flows of all rivers and source streams for all beneficial uses and to promote irrigation and navigation.

The association also went on record as favoring an appropriation by the Federal government of approximately \$1,750,000 for the diversion of the Los Angeles River into Alamitos Bay, though George H. Maxwell took exception to the arbitrary ruling of the Board of Engineers for Rivers and Harbors, War Department, on the matter.

"We should make it plain," he said, "that we don't propose to be bound by the stupidity and stubbornness of army engineers that say that the government can only build a dam to keep the silt out of the harbor, when everybody knows that the silt comes from mountains that are owned by the government."

Indorsement was also given President Jacobs' proposition in his semi-annual report for closer co-operation between Southern and Northern California in matters of Federal appropriations.

"Such co-operation," said resolutions that were passed without a dissenting vote, "will make the people of the State present a solid front on all propositions of conservation and flood control in which Federal appropriations are desirable or imperative."

The association also gave its indorsement to the project to connect Long Beach and Los Angeles Harbors by a connecting channel, thus making them twin ports. Bonds to aid in this work have already been voted by the City of Long Beach, and the matter of government aid is under advisement. The project has been indorsed by Maj. R. R. Raymond, district engineer.

Indorsement was also given by the association to the plan of flood control favored for Los Angeles County by the board of engineers. This is the plan submitted several months ago calling for conservation of waters and a reservoir system.

A step towards broadening the scope of the association and increasing its activities was taken by establishing an auxiliary to the Inland Waterways Association in Southern California. A. W. Frye was appointed executive officer and David B. Livingstone of Long Beach, secretary.

#### SHOULD DETAILS BE FURNISHED BEFORE A CONTRACT IS SIGNED?

By G. Alexander Wright.

The difficulty of obtaining full detailed information of what is really wanted when bidding upon work is one of the serious problems which confronts the contractor today, for it is largely the "detail" which determines what work is really worth.

Ordinary small scale drawings and specifications which are sometimes lacking in information certainly do not sufficiently disclose what may possibly be insisted upon,

in detail, after a bidder has signed a contract—some owners imagine they do, and that they tell a bidder all that is necessary. Others are indifferent. It's up to the contractors they think; whilst still others may secretly hope that some things may slip through without being noticed. This is the particular type of owner who is ever ready to profit by a bidder's error.

Of late years, however, there has arisen among contractors a strong desire, arising partly from numerous sad experiences to know more of what is required "before" a contract is signed, rather than be obliged to await the details afterwards, as so often happens. In common fairness there should be some way of disclosing the details beforehand, or at least as far as may be possible so that all bidders may receive reliable and identical data to figure upon. Not only that, but if for any reason the character of any of the details should be simplified, after a contract is let, it would be more likely to serve to check against any possible unfairness.

In estimating the cost of building work, the writer knows of no legitimate reason why all the cards should not be laid upon the table face side up.

Fortunately for the building industry there are many architects who give as well as expect a square deal. These gentlemen are well known by bidders and they are very properly honored and respected as men and as members of an honorable profession. But it seems to be now very generally understood that there are others, and it is from the office of this latter class principally that the contractors obtain a more accurate idea of what is wanted, "after" the contract is signed, than it is possible for them to get before. Then it is too late. Many a contractor has been caused financial difficulty because of the, shall we say (?) peculiar temperament (?) or business viewpoint (?) such architects display, not provided for of course by any clause in the contract. These men are well known and scheduled in the contractors' mind just where they belong. The better type of contractors avoid such offices, or when invited to figure, they discreetly raise their bids high enough to cover possible contingencies, and in the long run somebody suffers.

But the point under consideration is, whether details should be furnished before or after a contract is let? To fair minded men it is obvious that there can be only one answer to the question. If details are not ready when the job is being figured they should certainly be in the hands of the contractor before he is called upon to sign up. It would surely be a more equitable way of letting a contract. Now as details must be prepared and furnished at some time, is there any logical reason why this should not be done at a time when such information would be of the greatest value to the bidder? I. e., when he is making up his prices. Why this keeping back of vital information at that time? It is not to the bidder's advantage of course. Who is it that benefits? Is it the owner? Or is it for the greater convenience of the architect? But whatever the reason, can it be regarded as fair to the bidder? It is obvious that an individual bidder is helpless. He cannot force the issue himself in any particular instance. But collectively through their organizations contractors might make reasonable and proper representations of these facts to their local architects with a view to betterment of the conditions named.

Certain remedies have been suggested from time to time. One is the quantity system which would go a long way towards determining all details beforehand, but pending the general adoption of this modern method of inviting bids, some other remedy is necessary. One that would seem to afford desired relief without causing hardship to anyone, would be the passage of a city ordinance providing that applications for building permits, for work above a certain estimated cost, should be accompanied, not only by the usual plans and specifications, but by details to a scale of say, not less than 1½ inches to the foot, or sufficient to indicate the character of the work which is to be performed in detail.

It takes no longer to study the details of a structure before a contract is entered into, than afterward. It has to be done sometime. The owner who is now so often unduly impatient to see his building started, would soon learn to adapt himself to the new condition, if he realized his architect was simply conforming to the law. There would be just as many buildings erected, and bidders would understand more clearly what it was they were bidding upon.

### APARTMENT HOUSES.

**SAN FRANCISCO**—Apartment house, 3 story and base, frame, \$15,000. Architect, Earl B. Scott, Humboldt Bank Bldg., S. F. Owner's name withheld. Location, Taylor between Clay and Washington streets. Will contain twelve suites of two rooms each. Interior finish pine. Ornamental plaster in lobby. Steam heat, hot water system, coal furnace, tile in bath rooms and wall beds. Marble wainscot in entrance. Exterior covered with cement plaster on metal lath. Plans complete and figures being taken.

**SAN FRANCISCO**—Apartment house, 4 story and base, brick and steel, \$25,000. Architect, Edward E. Young, 251 Kearny street, S. F. Owner, Herman Hogrefe, 110 Upper Terrace. Location, south Bush west of Jones, covering an area of 30 by 79 feet. Will contain eight suites of three and four rooms. Interior finish pine and hardwood with some hardwood floors. Steam heat, automatic elevator, oil burning plant, hot water system and vacuum cleaning. Wall beds. Bath rooms finished in tile. Exterior faced with pressed brick. Plans complete and work to be done by Day Labor.

**OAKLAND, CAL.**—Apartment house, 2 story and base, frame, \$7,000. Architect, Charles W. McCall, Central Bank Bldg., Oakland. Owner, Robert Farmer, 3526 11th avenue, Oakland. Location, east 24th street and 11th avenue. Will contain a number of two and three room suites. Interior finish pine and hardwood with hardwood floors. Steam heat, hot water system and wall beds. Bath rooms finished in tile. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

**OAKLAND, CAL.**—Apartment house, 4 story and base, brick and steel, \$150,000. Architects, Richardson & Burrell, Albany Bldg., Oakland. Owner's name withheld. Will cover an area of 250 by 250 feet, and will be erected in three units. Will contain a total of 94 suites of three, four and five rooms. Interior finish pine and hardwood with ornamental plaster in lobby. Hardwood floors, steam heat, oil burning furnace, hot water system, automatic elevator and vacuum cleaning. Bath rooms finished in tile. Exterior faced with pressed brick. Working drawings being prepared.

### BATH HOUSES.

**SAN RAFAEL, MARIN CO., CAL.**—Filtering plant for baths. Cost not stated. Engineer, County Surveyor, San Rafael. Owners, City of San Rafael. At the last meeting of the City Council the matter of installing a new filtering plant for the baths was considered. Bids have been ordered ad-

vertised for the work, which will cost in the neighborhood of \$5,000.

### BONDS.

**SAN LUIS OBISPO, SAN LUIS OBISPO CO., CAL.**—An election will be held in the San Luis Obispo School District on October 1st to decide the question of issuing and selling bonds of \$100,000, the proceeds to be used in the purchase of school lots, erecting one or more school buildings, making additions to the present schools and the purchase of the necessary apparatus.

**ABERDEEN WASH.**—It has been made known that the City Council will exceed the bond limit if it issues bonds of \$500,000 to build the proposed water system recently voted by the people. What steps will now be taken has not been decided upon. According to bond men the city can issue only to the amount of \$409,000.

**HEMET, RIVERSIDE CO., CAL.**—by a vote of 15 to 1 the people of Hemet voted bonds of \$8,000, the proceeds of the sale to be used in the paving of Florida avenue, the main thoroughfare of the city.

**EUREKA, HUMBOLDT CO., CAL.**—E. W. Wilson has purchased the property at the corner of Fifth and G streets and will construct a modern brick building.

**SAN RAFAEL, MARIN CO., CAL.**—The Clerk of the Supervisors has been directed to notify the State Highway Commission that the county is ready to pay \$25,000, its portion of the cost of constructing the Black Point cut-off and the bridge over the Petaluma River, whenever the work is progressing.

**WINTERS, YOLO CO., CAL.**—The City Trustees are considering a bond issue for the building of a new city hall, a much needed structure in this city. The Supervisors will appropriate \$6,000, provided the city of Winters will give an equal amount.

**SALEM, ORE.**—State Engineer Lewis has approved plans for the Suttles Lake Irrigation District for issuance of \$600,000 in bonds for the irrigation of 12,000 acres, including the construction of a 58-foot dam, with 21,500 acre feet of water capacity and 15 miles of canal. George S. Young is project engineer. O. Laugaard of Portland is consulting engineer.

**WOODLAND, YOLO CO., CAL.**—Giving the property owners ten years in which to pay for their street work, the City Trustees have decided to issue serial bonds.

**NEWPORT BEACH, ORANGE CO., CAL.**—According to statements of a local newspaper, enough signatures have been secured to insure the preliminary surveys of the Newport harbor lines. L. C. Wallace, who is interested in the work, says: "Newport Beach will be just as good as her boast and immediately prepare for the bond election to vote the \$100,000 necessary

Iachian-Atlantic divisions get \$100,000,000 each, and the Mississippi-Great Lakes division \$50,000,000.

There was strong opposition to indorsing the bill as a whole, the committee on resolutions reporting that the principle of the measure only was favored. This aroused those who had demanded that the bill be indorsed without equivocation, and it was declared that if the principle only were supported by the association it would be a move to play into the hands of the railroads and other large corporations that would profit by obstructing the improvement of waterways.

"It is just what the big railroads want and have been trying to get in their sly and crafty way," declared George H. Maxwell, managing director of the National Reclamation Association. "They want the principle of the bill indorsed, but they don't want the bill indorsed. It would cut into them too hard."

Isidor Jacobs of San Francisco, president of the association, and A. W. Frye of Hynes, lead in the effort to have the principle and not the bill indorsed, but they gracefully gave their support to a resolution to indorse the whole bill when they found a majority of those in attendance at the conference so desired.

Following is the resolution as it was finally adopted:

**RESOLVED**, That the Inland Waterways Association of California reiterates its indorsement of the Newlands-Broussard river regulation bill and urges the early enactment of legislation by Congress to secure co-operation between the Nation and States, municipalities and other local agencies and districts looking to the complete conservation of all forest and water resources, control of floods and the regulation and standardization of the flows of all rivers and source streams for all beneficial uses and to promote irrigation and navigation.

The association also went on record as favoring an appropriation by the Federal government of approximately \$1,750,000 for the diversion of the Los Angeles River into Alamitos Bay, though George H. Maxwell took exception to the arbitrary ruling of the Board of Engineers for Rivers and Harbors, War Department, on the matter.

"We should make it plain," he said, "that we don't propose to be bound by the stupidity and stubbornness of army engineers that say that the government can only build a dam to keep the silt out of the harbor, when everybody knows that the silt comes from mountains that are owned by the government."

Indorsement was also given President Jacobs' proposition in his semi-annual report for closer co-operation between Southern and Northern California in matters of Federal appropriations.

"Such co-operation," said resolutions that were passed without a dissenting vote, "will make the people of the State present a solid front on all propositions of conservation and flood control in which Federal appropriations are desirable or imperative."

The association also gave its indorsement to the project to connect Long Beach and Los Angeles Harbors by a connecting channel, thus making them twin ports. Bonds to aid in this work have already been voted by the City of Long Beach, and the matter of government aid is under advisement. The project has been indorsed by Maj. R. R. Raymond, district engineer.

Indorsement was also given by the association to the plan of flood control favored for Los Angeles County by the board of engineers. This is the plan submitted several months ago calling for conservation of waters and a reservoir system.

A step towards broadening the scope of the association and increasing its activities was taken by establishing an auxiliary to the Inland Waterways Association in Southern California. A. W. Frye was appointed executive officer and David B. Livingstone of Long Beach, secretary.

#### SHOULD DETAILS BE FURNISHED BEFORE A CONTRACT IS SIGNED?

By G. Alexander Wright.

The difficulty of obtaining full detailed information of what is really wanted when bidding upon work is one of the serious problems which confronts the contractor today, for it is largely the "detail" which determines what work is really worth.

Ordinary small scale drawings and specifications which are sometimes lacking in information certainly do not sufficiently disclose what may possibly be insisted upon,

in detail, after a bidder has signed a contract—some owners imagine they do, and that they tell a bidder all that is necessary. Others are indifferent. It's up to the contractors they think; whilst still others may secretly hope that some things may slip through without being noticed. This is the particular type of owner who is ever ready to profit by a bidder's error.

Of late years, however, there has arisen among contractors a strong desire, arising partly from numerous sad experiences to know more of what is required "before" a contract is signed, rather than be obliged to await the details afterwards, as so often happens. In common fairness there should be some way of disclosing the details beforehand, or at least as far as may be possible so that all bidders may receive reliable and identical data to figure upon. Not only that, but if for any reason the character of any of the details should be simplified, after a contract is let, it would be more likely to serve to check against any possible unfairness.

In estimating the cost of building work, the writer knows of no legitimate reason why all the cards should not be laid upon the table face side up.

Fortunately for the building industry there are many architects who give as well as expect a square deal. These gentlemen are well known by bidders and they are very properly honored and respected as men and as members of an honorable profession. But it seems to be now very generally understood that there are others, and it is from the office of this latter class principally that the contractors obtain a more accurate idea of what is wanted, "after" the contract is signed, than it is possible for them to get before. Then it is too late. Many a contractor has been caused financial difficulty because of the, shall we say (?) peculiar temperament (?) or business viewpoint (?) such architects display, not provided for of course by any clause in the contract. These men are well known and scheduled in the contractors' mind just where they belong. The better type of contractors avoid such offices, or when invited to figure, they discreetly raise their bids high enough to cover possible contingencies, and in the long run somebody suffers.

But the point under consideration is, whether details should be furnished before or after a contract is let? To fair minded men it is obvious that there can be only one answer to the question. If details are not ready when the job is being figured they should certainly be in the hands of the contractor before he is called upon to sign up. It would surely be a more equitable way of letting a contract. Now as details must be prepared and furnished at some time, is there any logical reason why this should not be done at a time when such information would be of the greatest value to the bidder? I. e., when he is making up his prices. Why this keeping back of vital information at that time? It is not to the bidder's advantage of course. Who is it that benefits? Is it the owner? Or is it for the greater convenience of the architect? But whatever the reason, can it be regarded as fair to the bidder? It is obvious that an individual bidder is helpless. He cannot force the issue himself in any particular instance. But collectively through their organizations contractors might make reasonable and proper representations of these facts to their local architects with a view to betterment of the conditions named.

Certain remedies have been suggested from time to time. One is the quantity system which would go a long way towards determining all details beforehand, but pending the general adoption of this modern method of inviting bids, some other remedy is necessary. One that would seem to afford desired relief without causing hardship to anyone, would be the passage of a city ordinance providing that applications for building permits, for work above a certain estimated cost, should be accompanied, not only by the usual plans and specifications, but by details to a scale of say, not less than 1½ inches to the foot, or sufficient to indicate the character of the work which is to be performed in detail.

It takes no longer to study the details of a structure before a contract is entered into, than afterward. It has to be done sometime. The owner who is now so often unduly impatient to see his building started, would soon learn to adapt himself to the new condition, if he realized his architect was simply conforming to the law. There would be just as many buildings erected, and bidders would understand more clearly what it was they were bidding upon.

### APARTMENT HOUSES.

**SAN FRANCISCO**—Apartment house, 3 story and base, frame, \$15,000. Architect, Earl B. Scott, Humboldt Bank Bldg., S. F. Owner's name withheld. Location, Taylor between Clay and Washington streets. Will contain twelve suites of two rooms each. Interior finish pine. Ornamental plaster in lobby. Steam heat, hot water system, coal furnace, tile in bath rooms and wall beds. Marble wainscot in entrance. Exterior covered with cement plaster on metal lath. Plans complete and figures being taken.

**SAN FRANCISCO**—Apartment house, 4 story and base, brick and steel, \$25,000. Architect, Edward E. Young, 251 Kearny street, S. F. Owner, Herman Hogrefe, 110 Upper Terrace. Location, south Bush west of Jones, covering an area of 20 by 79 feet. Will contain eight suites of three and four rooms. Interior finish pine and hardwood with some hardwood floors. Steam heat, automatic elevator, oil burning plant, hot water system and vacuum cleaning. Wall beds. Bath rooms finished in tile. Exterior faced with pressed brick. Plans complete and work to be done by Day Labor.

**OAKLAND, CAL.**—Apartment house, 2 story and base, frame, \$7,000. Architect, Charles W. McCall, Central Bank Bldg., Oakland. Owner, Robert Farmer, 2526 11th avenue, Oakland. Location, east 24th street and 11th avenue. Will contain a number of two and three room suites. Interior finish pine and hardwood with hardwood floors. Steam heat, hot water system and wall beds. Bath rooms finished in tile. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

**OAKLAND, CAL.**—Apartment house, 4 story and base, brick and steel, \$150,000. Architects, Richardson & Burrell, Albany Bldg., Oakland. Owner's name withheld. Will cover an area of 250 by 250 feet, and will be erected in three units. Will contain a total of 94 suites of three, four and five rooms. Interior finish pine and hardwood with ornamental plaster in lobby. Hardwood floors, steam heat, oil burning furnace, hot water system, automatic elevator and vacuum cleaning. Bath rooms finished in tile. Exterior faced with pressed brick. Working drawings being prepared.

### BATH HOUSES.

**SAN RAFAEL, MARIN CO., CAL.**—Filtering plant for baths. Cost not stated. Engineer, County Surveyor, San Rafael. Owners, City of San Rafael. At the last meeting of the City Council the matter of installing a new filtering plant for the baths was considered. Bids have been ordered ad-

vertised for the work, which will cost in the neighborhood of \$5,000.

### BONDS.

**SAN LUIS OBISPO, SAN LUIS OBISPO CO., CAL.**—An election will be held in the San Luis Obispo School District on October 1st to decide the question of issuing and selling bonds of \$100,000, the proceeds to be used in the purchase of school lots, erecting one or more school buildings, making additions to the present schools and the purchase of the necessary apparatus.

**ABERREEN, WASH.**—It has been made known that the City Council will exceed the bond limit if it issues bonds of \$500,000 to build the proposed water system recently voted by the people. What steps will now be taken has not been decided upon. According to bond men the city can issue only to the amount of \$409,000.

**HEMET, RIVERSIDE CO., CAL.**—by a vote of 15 to 1 the people of Hemet voted bonds of \$5,000, the proceeds of the sale to be used in the paving of Florida avenue, the main thoroughfare of the city.

**EUREKA, HUMBOLDT CO., CAL.**—E. W. Wilson has purchased the property at the corner of Fifth and G streets and will construct a modern brick building.

**SAN RAFAEL, MARIN CO., CAL.**—The Clerk of the Supervisors has been directed to notify the State Highway Commission that the county is ready to pay \$35,000, its portion of the cost of constructing the Black Point cut-off and the bridge over the Petaluma River, whenever the work is progressing.

**WINTERS, YOLO CO., CAL.**—The City Trustees are considering a bond issue for the building of a new city hall, a much needed structure in this city. The Supervisors will appropriate \$5,000, provided the city of Winters will give an equal amount.

**SALEM, ORE.**—State Engineer Lewis has approved plans for the Suttles Lake Irrigation District for issuance of \$600,000 in bonds for the irrigation of 12,000 acres, including the construction of a 58-foot dam, with 21,500 acre feet of water capacity and 18 miles of canal. George S. Young is project engineer. O. Laurgaard of Portland is consulting engineer.

**WOODLAND, YOLO CO., CAL.**—Giving the property owners ten years in which to pay for their street work, the City Trustees have decided to issue serial bonds.

**NEWPORT BEACH, ORANGE CO., CAL.**—According to statements of a local newspaper, enough signatures have been secured to insure the preliminary surveys of the Newport harbor lines. L. C. Waller, who is interested in the work, says: "Newport Beach will be just as good as her boast and immediately prepare for the bond election to vote the \$100,000 necessary

to start the jetty which must be built to try the theories of the engineers and experienced mariners who say that the bay can be scoured of sand and mud by the outgoing tides when the jetty has been built."

WOODBURN, ORE.—The election to vote \$10,000 for a new high school carried, and a site for the structure has already been purchased. An architect will be selected immediately.

YREKA, SISKIYOU CO., CAL.—The bonds of the Summit Union High School District, amounting to \$6,500, have been sold to Blyth, Witter & Company at a premium of \$142. Bids for the construction of the building will be called for at once.

MARTINEZ, CONTRA COSTA CO., CAL.—Hollis A. Lasell has purchased lot 10, block 3, in the Tormey-Merriethew Addition. The site is one of the choice pieces in the tract. Lasell will erect a building on the site.

VICTORVILLE, SAN BERNARDINO CO., CAL.—Bonds of \$30,000 have been voted, which assures the voters of the Victorville School District a new high school.

MANHATTAN BEACH, LOS ANGELES CO., CAL.—An election will be held on September 25th to vote bonds of \$20,000 for the purchase of a city hall site and \$6,000 for fire protection.

MARTINEZ, CONTRA COSTA CO., CAL.—An election will be held some time in October to decide the question of issuing and selling bonds of \$43,000 for a municipal water system. The Board of Trustees will set the date at a later meeting.

GLENDALE, LOS ANGELES CO., CAL.—An election will be called at an early date by the Trustees of La Canada School District, near Glendale, to vote on an issue of \$25,000 school bonds, \$20,000 of which will be for a new school building, and \$5,000 for site, etc.

POMONA, LOS ANGELES CO., CAL.—The City Council contemplates calling a special election in November to vote bonds in the sum of \$50,000 for municipal needs. A portion of the funds will be used for the erection of a chamber of commerce building.

LAMANDA PARK, LOS ANGELES CO., CAL.—A special election will be held at Lamanda Park to vote on the question of installing an ornamental lighting system on the principal streets of the city. The cost is estimated at approximately \$25,000.

VISALIA, TULARE CO., CAL.—The Supervisors of Tulare County are planning this year to spend about \$400,000 for roads, including the bridges and depreciation in State Highway bonds.

FAIRFAX, MARIN CO., CAL.—The question of issuing bonds of \$17,000 for a new school will be voted on October 9th.

FAIRVIEW, ORE.—At the regular city election in December this city will vote on a proposal to install municipal water system. Bond issue of \$12,600 to be voted to drill well and lay pipe.

MODESTO, STANISLAUS CO., CAL.—The question of erecting additional schools is now being considered by the school officials, owing to the large attendance in the present buildings.

## BRIDGES, DAMS AND HARBOR WORK.

BAKERSFIELD, KERN CO., CAL.—Pile bridges, culverts and head walls. Cost not stated. Engineer, County Surveyor, Bakersfield. Owners, Kern County. Bids will be opened by the Board of Supervisors on October 1th for construction of pile bridges, culverts and reinforced concrete head walls on Division 5, Section 4, Bakersfield-McKittrick road, being that portion lying between the end of Section 3 and Lo-Kern; length approximately 8 miles. Plans can be secured from the County Surveyor.

MERCED, MERCED CO., CAL.—Bridge, reinforced concrete. Cost not stated. Engineer, County Surveyor, Merced. Owners, Merced County. The County Surveyor has been directed to prepare plans and specifications for the construction of a concrete bridge to be erected over the Santa Rita Slough on the road from Dos Palos to Los Banos. Bids will soon be called.

CHICO, BUTTE CO., CAL.—Bridges, reinforced concrete. Cost not stated. Engineer, County Surveyor, Oroville. Owners, Butte County. Two bridges have been ordered built under the "Emergency Act" on the Biggs-Princeton road. One bridge is to be built on Lone Pine avenue over Chico Creek near Chico, and will cost \$3,000. The other bridge is to be built over Campbell's Creek on the Shasta road near the Tehama County line north of Chico.

WILLOWS, GLENN CO., CAL.—Bridges, 4, reinforced concrete. Cost not stated. Engineer, County Surveyor Bayard Knock. Willows. Owners, Glenn County. The County Supervisors have instructed County Surveyor Bayard Knock to prepare plans and specifications for four bridges, one at Newville, 190 feet long, of concrete, one at Butte City, some 40 feet in length, also of concrete, and two small concrete structures on the State Highway.

SAN JOSE, SANTA CLARA CO., CAL.—Culverts, 3, reinforced concrete. Cost not stated. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. At the last meeting of the County Supervisors the County Surveyor was instructed to prepare plans for the following work: One concrete culvert on Scott Lane; two concrete culverts on Kifer road; two concrete culverts on Coffin road, and four concrete culverts on Mt. View and Alviso road. Further information may be had from the County Surveyor.

SAN JOSE, SANTA CLARA CO., CAL.—Bridge, reinforced concrete. Cost stated. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. Plans and specifications were presented at the last meeting of the Supervisors by the County Surveyor for a reinforced concrete bridge on Payne avenue over San Tomas Aquinas Creek in Santa Clara County. Bids will be opened on October 4th at 11 a. m. Plans and full information may be had from the County Surveyor at San Jose.

SAN JOSE, SANTA CLARA CO., CAL.—Bridge, reinforced concrete. Cost stated. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. The County Engineer has been directed to prepare plans and specifications

for a reinforced concrete bridge over Campbell Creek on the Prospect road. On completion and adoption of plans bids will be called.

VENTURA, VENTURA CO., CAL.—Bridge, reinforced concrete and steel, \$15,000. Engineer, County Surveyor, Petitt. Owners, Ventura County. The County Supervisors have accepted the plans and specification prepared by County Surveyor Petitt for the construction of the La Croix bridge. The plans call for a structure with a 150-foot span, 19 feet above the creek, and four openings on the north side each 24 feet. Bids will be called for this week.

MARTINEZ, CONTRA COSTA CO., CAL.—Culvert, reinforced concrete, \$900. Engineer, County Surveyor, Martinez. Owners, Contra Costa County. All bids received by the Trustees for the concrete culverts on the Bay Point Pittsburg road were rejected, as a were considered too high. The bids received were: Uppsbrom, Dalin Barmwell, \$1,235; Macrae & Layaz, \$1,144. The culvert has a span of about 12 feet and it is believed can be built for under \$900. New bids will probably be called.

MARTINEZ, CONTRA COSTA CO., CAL.—Viaduct, steel and concrete. Cost not stated. Engineer, County Surveyor, Ralph R. Arnold. Martinez. Owner, Contra Costa County. Plans and specifications for the overhead crossing of the Southern Pacific tracks at Peyton on the line of the Martinez-Bay Point road have been completed by County Surveyor Ralph R. Arnold. A call for bids for building the steel crossing is to be issued soon. The bridge is to be built jointly by the railroad and the county, each paying half of the cost in conformance with the orders of the Railroad Commission issued some time ago.

PETALUMA, SONOMA CO., CAL.—Furnishing and placing piles. Cost follows. Engineer, City Engineer, Petaluma. Owners, City of Petaluma. The City Council has ordered plans and specifications prepared for the placing of piles on the east bank of the Petaluma River. The cost is estimated at approximately \$7 a front foot for 24 feet. Further information relative to the work may be had from the City Engineer.

### Contracts Awarded.

SAN JOSE, SANTA CLARA CO., CAL.—By-pass construction, \$10,230. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. Contractor, M. E. Kilcourse, 53 West Santa Clara avenue, San Jose. Contract price, \$10,230. Note: The by-pass will be known as the Canoas By-Pass.

SAN JOSE, SANTA CLARA CO., CAL.—Bridge, reinforced concrete, \$1,912. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. Contractor, S. Sciarrino, San Jose. Contract price, \$1,912. Bridge over Penitence Creek at Noble avenue.

SAN JOSE, SANTA CLARA CO., CAL.—Bridge, reinforced concrete, \$6,840. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. Contractor, M. J. Kilcourse, 53 West Santa Clara avenue, San Jose. Contract price, \$6,840. Bridge over Guadalupe Creek

**SAN ANSELMO, MARIN CO., CAL.**—Bridge repairs. Cost not stated. Engineer, Town Engineer, San Anselmo. Owners, Town of San Anselmo. Contractor, E. Harrington, San Anselmo. Contract price not stated.

**DIXON, SOLANO CO., CAL.**—Bridge construction, \$30,500. Engineer, County Surveyors, Fairfield and Woodland. Owners, Solano and Yolo Counties. Contractors, Clinton Fireproofing Co., Modanock Bldg., S. F. Contract price, \$30,500. At a joint session of the Supervisors of Yolo and Solano Counties it was decided to proceed with the construction of a bridge across the creek on the line where the west side of the State Highway passes from Yolo into Solano County. Some months ago the two Boards of Supervisors entered into a joint contract with the Clinton Fireproofing Co. for the construction of the bridge, but the Yolo Board rescinded its part of the contract when the State Highway Commission failed to relieve Yolo County of the interest on the bonds of the Yolo Causeway between Davis and Sacramento. Recently the Yolo Board decided to build. The structure will cost \$30,500 and will unite the two units of the State Highway system in Yolo and Solano Counties.

**MODESTO, STANISLAUS CO., CAL.**—Bridges, 9, reinforced concrete, \$14,525. Engineer, County Surveyor, Modesto. Owners, Stanislaus County. Contractors, Barrett & Hilp, Sharon Bldg., S. F. Contract price, \$14,525.

**EUREKA, HUMBOLDT CO., CAL.**—Bridge, \$2,523. Engineer, County Surveyor, Eureka. Owners, Humboldt County. Contractors, Mercer-Fraser Co., Eureka. Contract price, \$2,523.

**OROVILLE, BUTTE CO., CAL.**—Bridges, reinforced concrete. Cost as follows. Engineer, County Surveyor, Oroville. Owners, Butte County. Contractors, Chico Construction Co., Chico, 8 bridges between Nelson and Butte Creek. Contract price, \$12,927. Chico Construction Co., Chico, Borham Slough bridge. Contract price, \$1,190, and O. A. Peter, Oroville, North Channel of Butte Creek bridge. Contract price, \$2,713.

## FACTORIES AND WAREHOUSES

**SAN PEDRO, LOS ANGELES CO., CAL.**—Reinforcing steel. Cost not stated. Engineer, Harbor Engineer, Los Angeles. Owners, City of Los Angeles. Bids will be received by the Board of Harbor Commissioners up to 10:30 a. m. September 29th, 1915, for furnishing the city with the reinforcing steel required for the erection of a six-story reinforced concrete warehouse on Municipal Dock No. 1 at San Pedro, in accordance with plans and specifications on file in the office of the Harbor Engineer. Forms of proposals, contract and bond and instructions to bidders will be furnished upon application. Certified check for ten per cent is required. A. C. Matson is secretary of the board. Bids will also be opened on the same date for furnishing spiral reinforcing for the same structure.

**BERKELEY, ALAMEDA CO., CAL.**—Laundry, 1 story and base, reinforced concrete, \$30,000. Architect, John Galen Howard, 604 Mission street, S. F. Own-

ers, Regents of the University of California. Location, University Campus. Will have a capacity of 3,000 pieces daily. Interior finish, pine. Concrete floor. Steam heat and hot water system. Special machinery. Exterior faced with cement plaster. Plans being prepared.

**PITTSBURG, CONTRA COSTA CO., CAL.**—Auxiliary pumping plant, \$40,000. Engineer's name not given. Owners, Contra Costa Gas Co., Pittsburg. The Contra Costa Gas Company is installing an auxiliary pumping system in Pittsburg. The new pumps will have a capacity of 15,000 cubic feet of gas and will supply the towns of Pittsburg, Antioch, Concord and Martinez.

**ASTORIA, ORE.**—Grain elevator, reinforced concrete and steel. Cost not stated. Engineers, Port of Astoria Commission, Astoria. Owners, City of Astoria. Plans and specifications have been completed by the engineers of the Port of Astoria Commission, and bids are now being taken for the construction of a large grain elevator. Bids close September 25th, 2 p. m. The contract is to include excavation, sheet piling, reinforced concrete work and iron work necessary to construct the superstructure. The approximate quantities follow: 3,600 yards sand excavation, 360 feet sheet piling, 1,300 cubic yards concrete, 115 tons reinforcing steel, 3 tons structural steel, 150 quarts waterproofing, 16 tons miscellaneous cast and wrought iron.

## FIRE REPORT

**SANTA ROSA, SONOMA CO., CAL.**—Fire destroyed the Forestville Winery, about fourteen miles from Santa Rosa and one of the largest independent wineries in this county, last week. The building loss is estimated at \$50,000 and which is partly covered by insurance.

**MADERA, MADERA CO., CAL.**—A grass fire near Oakdale destroyed more than 250 feet of the Madera-Sugar Pine Lumber flume last Saturday. A barn owner by C. W. Meyers was also destroyed. The rebuilding of the flume will commence immediately.

**SAN BERNARDINO, SAN BERNARDINO CO., CAL.**—Fire destroyed the entire contents of the concrete warehouse owned by R. E. Katz and leased by Heap & Heap, just south of Rialto avenue and west of H street. The loss is \$10,000. Work on repairing the building will commence in a few days, according to the lessees.

**REDDING, SHASTA CO., CAL.**—The Presbyterian Church and parsonage and a dwelling on the south was destroyed by fire here last week. The loss is estimated at \$8,700.

**KENNETT, SHASTA CO., CAL.**—At a loss of \$6,000, the home of Albert Kopping was destroyed by fire.

## FLATS

**SAN FRANCISCO**—Flats, 2 story and base, frame, \$5,000. Architect, Paul F. De Martini, 2123 Powell street, S. F. Owner, Carl Lerner. Location, south Union near Hyde. Will contain two six room flats and a basement garage. Interior finished in pine and elm panels. Hardwood floors. Open fire places and tile or brick mantels. Bath rooms

finished in tile. Automatic water heaters. Exterior cement plaster on metal lath. Plans complete and figures being taken.

**SAN FRANCISCO**—Flats, 2 story and base, frame, \$4,000. Architects, Koenig & Christiansen, Humboldt Bank Bldg., S. F. Owner, H. C. Christiansen. Location, north Cabrillo west 7th avenue. Will contain two flats and basement garage. Interior finish pine, hardwood and white enamel. Hardwood floors and open fire places. Mantels tile. Tile wainscot in bath rooms. Automatic water heaters. Exterior covered with cement plaster on metal lath. Plans complete and work to be done by Day Labor.

**SAN FRANCISCO**—Flats and store, 2 story and base, frame, \$7,000. Architect, Paul F. De Martini, 2123 Powell street, S. F. Owner's name withheld. Location, 48th avenue and J street. Will contain one store and two flats of four and five rooms. Interior finish pine and elm panels with some hardwood floors. Open fire places and tile or brick mantels. Bath rooms finished in tile. Automatic water heaters. Exterior covered with rustic and cement plaster on metal lath. Plans being prepared.

**SAN FRANCISCO**—Flats, 3, 2 story and base, frame, \$4,000 each. Architects, Oliver & Thomas, Pantages Theatre Bldg., Oakland. Owner, Mr. Read. Location, south Filbert between Pierce and Steiner. Will contain two flats each. Interior finish pine, white enamel and hardwood. Hardwood floors. Open fire places, tile or brick mantels and automatic water heaters. Bath rooms finished in tile. Exteriors covered with cement plaster and ship-lap. Plans complete and work to be done by Day Labor.

**SAN FRANCISCO**—Flats, 2 story and base, frame, \$2,000. Architect, none. Owner, Michael Cain, 1277 21st avenue, S. F. Location, west 21st avenue north of Irwin, covering an area of 25 by 44 feet. Will contain two flats of five rooms. Interiors finished in pine and white enamel with some hardwood floors. Open fire places and tile mantels. Bath rooms finished in tile. Exterior covered with cement plaster on metal lath. Plans complete and work to be done by Day Labor.

**SAN FRANCISCO**—Flats, 3 story and base, frame, \$7,500. Architect, Paul F. De Martini, 2123 Powell street, S. F. Owner, G. De Martini. Location east Mason south of Broadway. Will contain three flats of six rooms each. Interior finish, pine with some hardwood floors. Open fire places and tile or brick mantels. Bath rooms will have tile wainscot. Automatic water heaters. Exterior, brick veneer and cement plaster on metal lath. Plans being prepared.

**SAN FRANCISCO**—Flats, 2 story and base, frame, \$4,000. Architect, none. Owner, Mrs. Marie Steiner, 1621 Lake street, S. F. Location, east 6th avenue north of Geary, covering an area of 25 by 66 feet. Will contain two flats of five and six rooms and a basement garage. **SAN JOSE, SANTA CLARA CO., CAL.**—Road construction and improvement. Cost not stated. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. Plans and specifications have been adopted by the County Supervisors and bids will be received up to 11 a. m. September 27th for the repair and construction of 4.65 miles of the Stevens Creek road and Saratoga avenue in Road District No. 4 of Santa Clara County. Further information may be had from the County Surveyor at San Jose.

**SOUTH SAN FRANCISCO, SAN MATEO CO., CAL.**—Street paving. Cost not stated. Engineer, Town Engineer,

South San Francisco. Owners, South San Francisco. At the last meeting of the City Trustees bids for paving and avenue between Chestnut avenue and Mission road were opened. They were as follows: F. R. Ritchie & Co., Chronicle Bldg., S. F., \$3,687.50; Patton & Smith, 407 11th street, S. F., \$213, and Blanchard-Brown Co., 660 Market street, S. F., \$1,223. The awarding of the contract was laid over until next meeting.

BURLINGAME, SAN MATEO CO., CAL.—Paving, sidewalks and curbs. Cost not stated. Engineer, Town Engineer, Burlingame. Owners, Town of Burlingame. Bids will be received for a few days only for cement sidewalks, curbing and laying of concrete base for paving. Specifications obtainable from J. J. Farey, Superintendent, Burlingame Subdivision P. O. Box 6, Easton, CAL., or phone Burlingame 90.

MODESTO, STANISLAUS CO., CAL.—Street paving. Cost not stated. Engineer, City Engineer, Modesto. Owners, City of Modesto. The City Council has directed City Clerk O. W. Thompson to advertise for bids for the paving of L Street from Seventh to Ninth. Further information may be had from the City Clerk or Engineer at Modesto.

BAKERSFIELD, KERN CO., CAL.—Road pavement. Cost not stated. Engineer, County Surveyor, Bakersfield. Owners, Kern County. Bids will be opened on October 7th by the Board of Supervisors for grading and construction, Section 1, Bakersfield-McKittrick road, being that portion lying between the westerly end of the Kern River bridge and Rosedale; length approximately 6 miles. Plans can be secured from the County Surveyor's office.

VISALIA, TULARE CO., CAL.—Road construction, \$18,850. Engineer, County Surveyor, Visalia. Owners, Tulare County. The Tulare County Supervisors have taken all bids received for the construction of the Three Rivers road to connect the valley with a trunk line to the hills under advisement until September 15th, at which time the contract will be awarded. The bid of J. E. Hines to build the road for the sum of \$18,850 was the lowest received. This bid was so much below the estimated cost that the Supervisors desired to look into the matter thoroughly before entering into the contract.

BAKERSFIELD, KERN CO., CAL.—Road construction. Cost not stated. Engineer, County Surveyor, Bakersfield. Owners, Kern County. Bids will be opened on October 7th by the Board of Supervisors for grading and construction of concrete pavement on Division 10, Section 5, being that portion known as the Weed Patch Loop, beginning at the State Highway at the northwest corner of Section 17, T. 31 S., R. 28 E. and extending in an easterly direction 5 miles to the northeast corner of Section 13, T. 31 S., R. 28 E. Plans can be secured from the County Surveyor.

GRASS VALLEY, NEVADA CO., CAL.—Street improvement. Cost not stated. Engineer, Town Engineer, Grass Valley. Owners, Town of Grass Valley. The Board of Trustees has ordered the City Engineer to prepare plans for the widening of lower Main street.

SAN FRANCISCO.—Esplanade construction, \$50,000. Engineer, City Engineer, Temporary City Hall, S. F.

Owners, City and County of San Francisco. The Board of Public Works has approved plans and specifications for the proposed esplanade at the ocean beach and has requested the Board of Supervisors to permit them to call for bids on the work, which is estimated to cost \$50,000. This amount was appropriated in the last budget, and provided for the construction of 650 linear feet of esplanade south from the Cliff House. Bids were opened by the Board of Public Works for the construction of a boulevard through the city property from Corbett avenue to the Twin Peaks Reservation. F. R. Ritchie presented the low bid at \$34,745.

COLUSA, COLUSA CO., CAL.—Street lighting system. Cost not stated. Engineer, County Surveyor, Colusa. Owners, Colusa County. No bids were received by the Supervisors for the installation, etc., of a lighting system in the Arhuckle Lighting District, and the Clerk was instructed to advertise again for bids to be opened on October 5th, 5 p. m. Further information may be had from the Clerk of the Supervisors at Colusa.

DURHAM, BUTTE CO., CAL.—Water system. Cost not stated. Engineer's name not given. Owner, Frank Barnard, Durham. Application has been made to the Butte County Supervisors by Frank Barnard, of Butte County, for a franchise to lay water pipes and conduits in certain streets and roads in Butte County, as follows: In all of the streets, alleys and public highways in the Town of Durham, and also all other roads, streets, alleys and public highways situate within the boundaries of Section 30, Township 21. Also to replace, repair, enlarge and extend the same along such roads, streets, alleys and other public highways. All for the purpose of furnishing, selling and supplying water to the inhabitants of the Town of Durham and vicinity.

STOCKTON, SAN JOAQUIN CO., CAL.—Street paving, etc. Cost not stated. Engineer, City Engineer, Stockton. Owners, City of Stockton. Bids will be opened on September 24th for work provided for under the following resolution: That Scotts avenue, from Lincoln street to Monroe; Van Buren street, from Taylor avenue to Hazelton avenue; Monroe street, from Scotts avenue to Hazelton, etc., be graded, curbed and guttered, having the curb portion thereof 13 inches deep and 6 inches wide, and the gutter portion thereof 21 inches wide and 6 inches thick after being rolled, bound with liquid asphaltum applied hot, using one and three-quarter gallons to the square yard of pavement.

STOCKTON, SAN JOAQUIN CO., CAL.—Street improvement. Cost not stated. Engineer, City Engineer, Stockton. Owners, City of Stockton. Bids will be opened on September 24th for work provided for under the following resolution: That Della street, from Fair Oaks avenue to the Jensen Addition, and Lafayette street, from East street to Locust street, be graded, curbed and guttered with combined concrete curb and gutter, having the curb portion thereof 12 inches deep and 6 inches wide and the gutter portion thereof 21 inches wide and 6 inches thick, the roadways paved with mac-

adam 4 inches thick after rolling, bound with liquid asphaltum applied hot, using one and three-quarter gallons to square yard of pavement. That concrete sidewalks 5 feet wide and 4 inches thick be constructed on both sides of said Della and Lafayette streets, as above described, except where already laid.

STOCKTON, SAN JOAQUIN CO., CAL.—Sewer construction. Cost not stated. Engineer, City Engineer, Stockton. Owners, City of Stockton. A resolution of intention providing for laying sanitary sewers in South Stockton from South to Ninth street, inclusive, and from McKinley avenue to the Southern Pacific tracks was passed at the last meeting of the City Council. Bids will soon be called for.

SONOMA, SONOMA CO., CAL.—Street improvements. Cost as follows. Engineer, City Engineer, Sonoma. Owners, City of Sonoma. At the last meeting of the City Trustees the following appropriations were set aside for improvements to be made in Sonoma: \$1,200 for a concrete bridge on France street, \$1,500 for the Plaza improvement and 1,500 for street work.

RICHMOND, CONTRA COSTA CO., CAL.—Street improvement. Cost not stated. Engineer, City Engineer, Richmond. Owners, City of Richmond. Bids will be opened on September 27th for work to be done under the following resolution: That 31st street, from Cutting Boulevard to the City of Pullman Tract, be graded and paved with Richmond Standard Macadam, consisting of rock and asphaltum having a penetration of from 125 to 140 degrees, District of Columbia Standard, and guttered and curbed and sidewalk with cement concrete, and that an open drain of cement concrete be constructed across the existing alley. Also that Anita avenue, from the south line of the City of Pullman Tract to the north line of Potrero avenue, be graded, paved with Richmond Standard Macadam.

SAN RAFAEL, MARIN CO., CAL.—Sewer construction. Cost not stated. Engineer, County Surveyor, San Rafael. Owners, Marin County. Bids will be opened on September 23rd for the construction of a wooden box storm sewer in Pastori road from the San Rafael and Olema county road to the Arroyo San Anselmo; also for the construction of an iron stone pipe sewer (in lieu of said wooden box).

SALINAS, MONTEREY CO., CAL.—Street improvement. Cost not stated. Engineer, City Engineer, Salinas. Owners, City of Salinas. The City Council has ordered bids received for the parking and improvement of North Main street. Plans and specifications may be had from the City Engineer.

SALINAS, MONTEREY CO., CAL.—Earth approach. Cost not stated. Engineer, County Surveyor, Salinas. Owners, City of Salinas. The City Council ordered received by the County Supervisors for the construction of earth approaches for the Espinosa bridge on the Salinas-Castroville road, Bids close September 24th. Further information may be had from the County Surveyor at Salinas.

RIVERSIDE, RIVERSIDE CO., CAL.—Street improvement. Cost not stated. Engineer, City Engineer, River-

side. Owners, City of Riverside. The City Engineer has been directed to prepare plans and specifications for the improvement of Jurupa avenue from New Magnolia to Brockton. Bids will be called on approval of the plans.

#### Contracts Awarded

SAN ANSELMO, MARIN CO., CAL.—Street improvement. Cost not stated. Engineer, Town Engineer, San Anselmo. Owners, Town of San Anselmo. Contractors, Sunset Construction Co., 62 Post street, S. F. Contract price not stated. The contract covers the improvement of Pine and Cedar streets and San Anselmo avenue.

HANFORD, KINGS CO., CAL.—Furnishing asphaltum. Cost as follows. Engineer, County Surveyor. Owners, Kings County. Contractors, Standard Oil Co. Contract price, 4,800 tons at \$4.35 per barrel f. o. b. cars at Seguro.

STOCKTON, SAN JOAQUIN CO., CAL.—Street improvement, \$1,509.88. Engineer, City Engineer, Stockton. Owners, City of Stockton. Contractor, E. Bishop, Stockton. Contract price, \$1,509.88.

SACRAMENTO, CAL.—Street improvement. Cost not stated. Engineer, City Engineer, Sacramento. Owners, City of Sacramento. Contractors, McGillivray Construction Co., 1007 7th street, Sacramento. Contract includes improvement of Front street from Q to S and from N to Q street. Contract price not stated.

RIVERSIDE, RIVERSIDE CO., CAL.—Road construction. Cost not stated. Engineer, County Surveyor, Riverside. Owners, Riverside County. Contractors, C. L. Hyde Construction Co., 954 3rd street, San Diego. Contract price not stated.

#### STORES AND OFFICES.

SAN FRANCISCO—Wholesale building, 3 story and base. Cost not stated. Architect, none. Owners represented by Edgar Painter, Kohl Bldg., S. F. Mr. Painter, Secretary of the North Central Improvement Association, states that a corporation is about to have plans prepared for a three-story and basement brick and steel building to be erected on Broadway, occupying the entire frontage between Battery and Front streets. It is understood that an architect has already submitted plans for the building, but details and the owners' names are withheld for a few days.

CALEXICO, IMPERIAL CO., CAL.—Stores and offices, 2 story and base, steel and concrete, \$34,000. Architects, Zimmer & Tichenor, Calexico. Owner, M. Harris. Location, on southwest corner 2nd and Rockwood. Will contain a number of stores on the first floor and modern offices above. Interior finish, pine and hardwood. Patent store fronts. Marble base and wainscot. Exterior covered with cement plaster. Plans complete and figures being taken. Bids close on October 1st.

PITTSBURG, CONTRA COSTA CO., CAL.—Offices, 2 story and base, reinforced concrete, \$15,000. Architect, none. Owners, Grabstein Bros., Pittsburg. Location, Railroad avenue and East 3rd street. Ground floor will contain stores and upper floor has been arranged for offices. Interior finish pine. Central heating system, patent

store fronts and oil burning equipment. Exterior faced with cement plaster. Plans complete and figures being taken by the owners.

PORTLAND, ORE.—Stores and offices, 2 story and base, reinforced concrete, \$25,000. Architect, Martin Schacht, Yeon Bldg., Portland. Owners, Harrington Estate. Location, Broadway, covering an area of 100 by 100 feet. Will contain sales rooms on the first floor and offices above. Interior finish, pine and hardwood. Central heating system, patent store fronts. Exterior faced with pressed brick. Plans being prepared.

#### Contracts Awarded.

PORTLAND, ORE.—Office building plastering, \$40,000. Architect's name not given. Owners, First National Bank. Contractor, A. Knowles, 985 Folsom street, S. F. Contract price, \$40,000.

SEATTLE, WASH.—Stores and offices, 4 story and base, reinforced concrete, \$50,000. Architects, Carl Gould and Charles Bebb, associated, Denny Bldg., Seattle. Owners, Puget Sound News Co. Contractors, A. W. Quist Co., Hoge Bldg., Seattle. Contract price, \$50,000.

MARTINEZ, CONTRA COSTA CO., CAL.—Office, 1 story and base, reinforced concrete, \$3,421. Architect, James T. Nabett, 704 Macdonald avenue, Richmond. Owners, Pacific Gas and Electric Co. Contractors, Ludden & Lambley, Martinez. Contract price, \$3,421.

#### SEALED PROPOSALS

##### PROPOSALS FOR CEMENT.

CEMENT—U. S. Engineering Office, 2nd District, Portland, Ore.—Sealed proposals for cement will be received here until 11 a. m. October 7, 1915, and then opened. Further information on application.

##### NOTICE TO CONTRACTORS.

SEALED bids will be received by W. F. McClure, State Engineer, Forum Building, Sacramento, California, up to and including 12 o'clock, noon, Monday, October 18, 1915, said bid, then and there to be publicly opened and read for furnishing all plant, materials and labor, and doing the work required for the complete construction and erection of buildings to be known as "Two Cottages" and "Detention Building," California School for Girls, near Ventura, California, in accordance with the plans and specifications therefor, copies of which may be obtained on application to the State Department of Engineering, Sacramento, California.

Such bids will be received for the Entire Work and must be submitted on plans prepared and furnished by the State Department of Engineering. Cash, a bidder's bond, or a certified check in the sum of ten per centum (10%) of the amount of the bid must accompany each bid.

A deposit of Twenty-five (\$25.00) Dollars will be required on plans and specifications, the deposit to be returned immediately on the return of the plans and specifications to the State Department of Engineering, at Sacramento, California, in good condition.

The State Department of Engineering reserves the right to reject any and all bids and to waive any informality in any bid received.

All bids must be addressed to W. F. McClure, State Engineer, Sacramento, California, and plainly marked on the envelope: "Proposal for Two Cottages" and "Detention Building," California School for Girls, near Ventura, California." (Signed) W. F. McClure, State Engineer.

#### PROPOSALS FOR CANAL SUPPLIES.

PANAMA CIRCULAR 966—Proposals for Wrought Iron or Steel Pipe, Cast Iron Pipe, Steel Boiler Tubes, Steel Tubing, Chain, Locomotive Driving Wheel Tires, Dust Guards for Journals, Grip Nuts, Twist Drills, Journal Jacks, Steel Hand Trucks, Platinum Wire, Air-brake Hose, Glass Packing, Putty Knives, Window Flax, Crash Toweling and Fish Oil. Sealed proposals will be received at the office of the general purchasing officer, the Panama Canal, Washington, D. C., until 10:30 a. m. September 24, 1915, at which time they will be opened in public, for furnishing the above mentioned articles. Bids and general information relating to this circular (No. 966) may be obtained from this office or the offices of the assistant purchasing agent, Fort Mason, San Francisco, Cal.; also from the chief engineer's office in the following cities: Seattle, Wash.; Los Angeles, Cal. F. C. BOGGS, major, corps of engineers, U. S. army, general purchasing officer.

#### PROPOSALS FOR BUILDING.

BUILDING—Sealed proposals indorsed "Proposals for Stable at Puget Sound" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m. September 25, 1915, and then and there publicly opened, for a stable at the naval hospital, navy yard, Puget Sound, Wash. Plans and specifications may be obtained on application to the bureau or to the commandant of the navy yard, Bremerton, Wash. WM. M. SMITH, acting chief of bureau.

##### Proposal for Building.

BUILDING—Sealed proposals indorsed "Proposals for Marine Barracks, Mare Island," will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m. September 25, 1915, and then and there publicly opened, for a three-story and basement marine barracks building of reinforced concrete construction with steel trusses. Plans and specifications may be obtained on application to the bureau or to the commandant of the navy yard, subject to a deposit of \$25 to insure their return, or may be seen at the navy yard, New York, N. Y. WM. M. SMITH, acting chief of bureau.

#### ELECTRIC STARTER AND OTHER STATISTICS.

No less than 261,860 cars were equipped with electric lighting and starting systems during 1914, out of a total production of 611,695 cars. The value of this equipment exceeded \$10,000,000. The total wholesale value of the 611,695 cars was \$380,000,000, which figures out an average value of \$621.50 per car, dealer's price. An idea of the quantities of raw materials used up in the manufacture of motor cars in 1914 in this country may be obtained from the following partial list: Steel, 670,000 tons; aluminum and alloys, 4,020 tons; brass, 2,141 tons; hair for upholstery, 1,065 tons; moss, 2,050 tons; hides, 67,222, on the basis of one third hide per car, where real leather was used; artificial leather, 2,350,000 square yards; upholstery fittings, \$917,542 worth; burlap, 6,560,000 yards; top materials, 11,405,250 yards, valued at \$2,447,780; manufactured cotton in ties on new cars only, 7,950 tons; celluloid, 300,000 pounds; rubber and compounds, 9,238 tons; hinges, 2,446,750 pairs; door catch fittings, 2,446,750; carpet, 489,356 square yards; linoleum, 642,908 square yards; boards for floors, wheels and bodies, 8,450,000 running feet.

It is understood that an architect has already submitted preliminary plans for the building, but details and the owners' names are withheld for a few days.

#### Contracts Awarded.

**CLEARING RESERVOIR SITE**—\$35,000. San Francisco. Engineer, City Engineer, Temporary City Hall, S. F. Owners, City and County of San Francisco. Three figures were received at the Wednesday afternoon meeting of the Board of Public Works for clearing a portion of the Hetch Hetchy reservoir site. Karl Ehrhart submitted the low bid at \$24,984.50. Other bids were as follows: A. J. Reeder, \$43,987; MacArthur Bros., \$45,217.75.

## Fourteen Millions For Building Construction.

### Building Inspector Horgan Reports on Building Activities For Past Fiscal Year.

Building operations in the City and County of San Francisco for the past fiscal year, ending June 30th, 1915, amounted to \$14,226,125, according to figures compiled in the report of Chief Building Inspector John P. Horgan, and which will be submitted to the Board of Public Works immediately.

During this time 6,387 permits were granted and the fees collected aggregated \$24,348.90, of which \$202 was for billboard permits. In addition to the granting of building permits Horgan reports having received 7,028 applications in all, among which were 175 to raze buildings; 57 to move; 362 complaints and 122 applications withdrawn or rejected.

"The majority of applications withdrawn were in direct violation of the Building Law and would not be made in compliance therewith," says Horgan. "Approximately sixty per cent of the total number of applications filed required revision of minor and major importance, and upon such being complied with the permits were granted."

The complete and tabulated report of Horgan follows:

Character of		Permits	No. Amount
Class "A"	17	\$1,029,600	
Class "B"	5	151,300	
Class "C"	149	3,524,662	
Frames	1794	5,984,425	
Alterations, additions & repairs (general)	4370	1,731,151	
Exposition Bldgs.	39	1,152,877	
Public Bldgs.	13	652,110	
Total	6387	\$14,226,125	

## City Bids Opened

### Board of Works Opens Bids for First Work of Clearing Reservoir Site for Hetch Hetchy Project.

## SAN JOSE AND THE SANTA CLARA VALLEY

**STREET PAVEMENT**—Cost not stated. San Jose, Santa Clara Co., Cal. Engineer, City Engineer Maggini, San Jose. Owners, City of San Jose. Work in paving all streets about Washington Square will be started shortly. City Engineer Maggini has been instructed to prepare plans and specifications for the work, and bids will be opened by the City Council on September 27th. Further information relative to this work may be had from the City Engineer.

**ROAD CONSTRUCTION AND IMPROVEMENT**—Cost not stated. San Jose, Santa Clara Co., Cal. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. Plans and specifications have been adopted by the County Supervisors and bids will be received up to 11 a. m. September 27th for the repair and construction of 4.65 miles of the Stevens Creek road and Saratoga avenue in Road District No. 4 of Santa Clara County. Further information may be had from the County Surveyor at San Jose.

**STREET PAVING**—Cost not stated. South San Francisco, San Mateo Co., Cal. Engineer, Town Engineer, South San Francisco. Owners, South San Francisco. At the last meeting of the City Trustees bids for paving Grand avenue between Chestnut avenue and Mission road were opened. They were as follows: F. R. Ritchie & Co., Chronicle Bldg., S. F., \$3,657.50; Eaton & Smith, 407 11th street, S. F., \$4,213; Blanchard-Brown Co., 660 Market street, S. F., \$4,229. The awarding of the contract was laid over until the next meeting.

**PAVING, SIDEWALKS AND CURBS**—Cost not stated. Burlingame, San Mateo Co., Cal. Engineer, Town Engineer, Burlingame. Owners, Town of Burlingame. Bids will be received for a few days only for cement sidewalks, curbing and laying of concrete base for paving. Specifications obtainable from W. J. Farey, Superintendent, Burlingame Subdivision P. O. Box 5, Easton, Cal., or phone Burlingame 90.

**CULVERTS**—3, reinforced concrete. Cost not stated. San Jose, Santa Clara Co., Cal. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. At the last meeting of the County Supervisors the County Surveyor was instructed to prepare plans for the following work: One concrete culvert on Scott Lane; two concrete culverts on Kifer road; two concrete culverts on Coffin road; and four concrete culverts on Mt. View and Alviso road.

Further information may be had from the County Surveyor.

**BRIDGE**—Reinforced concrete. Cost not stated. San Jose, Santa Clara Co., Cal. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. Plans and specifications were presented at the last meeting of the Supervisors by the County Surveyor for a reinforced concrete bridge on Payne avenue over San Tomas Aquinas Creek in Santa Clara County. Bids will be opened on October 4th, 11 a. m. Plans and full information may be had from the County Surveyor at San Jose.

**BRIDGE**—Reinforced concrete. Cost not stated. San Jose, Santa Clara Co., Cal. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. The County Engineer has been directed to prepare plans and specifications for a reinforced concrete bridge over Campbell Creek on the Prospect road. On completion and adoption of plans bids will be called.

**RESIDENCE**—2 story and base. Class A construction, \$150,000. Burlingame, San Mateo Co., Cal. Architect, Willis Polk, Hobart Bldg., S. F. Owner, W. B. Bourne. Location near Crystal Springs Lake. Will contain in the neighborhood of twenty rooms, several baths, sleeping porches and numerous out buildings. Reinforced concrete and steel construction, design classic. Interior finish, pine, hardwood and white enamel. Hardwood floors, tile bath rooms. Steam heat, oil burning equipment, vacuum cleaning, elevator service. Tile and marble in bath rooms. Exterior faced with pressed brick and terra cotta. Plans for excavating and concrete work being figured.

**STREET IMPROVEMENT**—Cost not stated. Salinas, Monterey Co., Cal. Engineer, City Engineer, Salinas. Owners, City of Salinas. The City Council has ordered bids received for the parking and improvement of North Main street. Plans and specifications may be had from the City Engineer.

**EARTH APPROACH**—Cost not stated. Salinas, Monterey Co., Cal. Engineer, County Surveyor, Salinas. Owners, Monterey County. Bids have been ordered received by the County Supervisors for the construction of earth approaches for the Espinosa bridge on the Salinas-Castroville road. Bids close September 24th. Further information may be had from the County Surveyor at Salinas.

**RESIDENCE**—1 story and base, frame, \$2,000. San Jose, Santa Clara Co., Cal. Architect, none. Owner, J. F. Raiston, 725 Miller street, San Jose. Location, Miller street. Will contain five rooms, bath and sleeping porch. Interior finish pine and white enamel. Hardwood floors. Open fire place. Automatic water heater. Tile mantel. Exterior covered with rustic and cement plaster. Plans complete and work to be done by Day Labor.

**SCHOOL ADDITION**—1 story and base, frame, \$20,000. San Jose, Santa Clara Co., Cal. Architect, Charles S. McKenzie, Bank of San Jose Bldg., San Jose. Owners, City of San Jose. Bids will be opened on October 5th for the construction of a frame and plaster addition to the present High School Building. Plans can be secured from the architect.

## Contracts Awarded.

**BY-PASS CONSTRUCTION**—\$10,230. San Jose, Santa Clara Co., Cal. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. Contractor, M. E. Kilcourse, 58 West Santa Clara avenue, San Jose. Contract price, \$10,230. Note: The by-pass will be known as the Canoas By-Pass.

**BRIDGE**—Reinforced concrete, \$1,912. San Jose, Santa Clara Co., Cal. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. Contractor, S. Solarrino, San Jose. Contract price, \$1,912. Bridge over Penitencia Creek at Noble avenue.

**BRIDGE**—Reinforced concrete, \$6,840. San Jose, Santa Clara Co., Cal. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. Contractor, M. E. Kilcourse, 58 West Santa Clara avenue, San Jose. Contract price, \$6,840. Bridge over Guadalupe Creek.

#### MARIN, CONTRA COSTA AND SONOMA COUNTIES

SEWER CONSTRUCTION--Cost not  
stated. San Anselmo, Marin Co., Cal.  
Engineer, Town Engineer, San Anselmo.  
Owners, Town of San Anselmo.  
At the last meeting of the Town Trust-  
tees, Trustee Schrader offered a reso-  
lution adopting the plans and speci-  
fications for the construction of a storm  
sewer on Willow avenue, and on its  
adoption of Resolution of Intention No.  
15, ordering the work done, was passed.  
Bids on the work will soon be taken.

STREET IMPROVEMENT--Cost not  
stated. San Anselmo, Marin Co., Cal.  
Engineer, Town Engineer, San Anselmo.  
Owners, Town of San Anselmo.  
At the last meeting of the Town Trust-  
tees, Trustee Crisp introduced a reso-  
lution establishing the elevation of the  
curb grade of Medway road and For-  
est avenue, which was read and adopt-  
ed by the board. Mr. Crisp also offered  
a resolution adopting the plans and  
specifications for the improvement of  
Forest avenue, and after its adoption  
offered Resolution of Intention No. 14  
to order the work done, which was also  
adopted.

FURNISHING CRUSHED ROCK --  
Cost not stated. San Anselmo, Marin  
Co., Cal. Engineer, Town Engineer  
San Anselmo. Owners, Town of San  
Anselmo. The Town Engineer has been  
instructed by the town officials to se-  
cure bids for furnishing 25 or 30 cars  
of crushed rock to be used on the roads  
this winter.

**MUNN & CO.** 364 Broadway, New York  
Branch Office, 625 F St., Washington, D. C.

**STREET IMPROVEMENTS**—Cost not  
stated. Petaluma, Sonoma Co., Cal.  
Engineer, City Engineer, Petaluma.  
Owners, City of Petaluma. The City  
Engineer has been directed by the  
Council to prepare plans and specifica-  
tions for the establishing of the grade  
Webster street from the Hill tract  
to Hayes Lane, and for Hayes Lane  
from Hill street to the city limits. A  
resolution has been passed by the City  
Council for the improvement of Kent  
street from the northeast line of  
ward street to the west line of Wal-  
street.

**SEWER CONSTRUCTION**—Cost not  
stated. Pittsburg, Contra Costa Co.,  
Cal. Engineer, Town Engineer, Pitts-  
burg. Owners, Town of Pittsburg.  
Plans and specifications for the con-  
struction of a sewer in East Third  
street from the city limits to the east  
end of Los Medanos street have been

approved. Bids on this work will soon  
be called for.

**CULVERT**—Reinforced concrete,  
\$900. Martinez, Contra Costa Co., Cal.  
Engineer, County Surveyor, Martinez.  
Owners, Contra Costa County. All bids  
received by the Trustees for the con-  
crete culverts on the Bay Point-Pitts-  
burg road were rejected, as all were  
considered too high. The bids received  
were: Uppsbrom, Dalin & Barmwell,  
\$1,235; Macrae & Layaz, \$1,114. The  
culvert has a span of about 12 feet,  
and it is believed can be built for  
under \$900. New bids will probably be  
called.

**VIADUCT**—Steel and concrete. Cost  
not stated. Martinez, Contra Costa Co.,  
Cal. Engineer, County Surveyor Ralph  
R. Arnold, Martinez. Owners, Contra  
Costa County. Plans and specifications  
for the overhead crossing of the South-  
ern Pacific tracks at Peyton on the line  
of the Martinez-Bay Point road  
have been completed by County Sur-  
veyor Ralph R. Arnold. A call for  
bids for building the street crossing is to  
be issued soon. The bridge is to be  
built jointly by the railroad and the  
county, each paying half of the cost  
in conformance with the orders of the  
Railroad Commission issued some time  
ago.

**FURNISHING AND PLACING PILES**  
—Cost as follows. Petaluma, Sonoma  
Co., Cal. Engineer, City Engineer,  
Petaluma. Owners, City of Petaluma.  
The City Council has ordered plans and  
specifications prepared for the placing  
of piles on the east bank of the Petal-  
uma River. The cost is estimated at  
approximately \$7 a front foot for 240  
feet. Further information relative to  
the work may be had from the City  
Engineer.

**BRIDGE CONSTRUCTION**—\$30,500.  
Dixon, Solano Co., Cal. Engineer,  
County Surveyors, Fairfield and Wood-  
land. Owners, Solano and Yolo Coun-  
ties. Contractor, Clinton Fireproofing  
Co., Monadnock Bldg., S. E. Contract  
price, \$30,500. At a joint session of the  
Supervisors of Yolo and Solano Coun-  
ties it was decided to proceed with the  
construction of a bridge across the  
creek on the line where the west side  
of the State Highway passes from Yolo  
into Solano County. Some months ago  
the two Boards of Supervisors entered  
into a joint contract with the Clinton  
Fireproofing Co. for the construction of  
the bridge, but the Yolo Board re-  
scinded its part of the contract when  
the State Highway Commission failed  
to relieve Yolo County of the interest  
on the bonds of the Yolo Causeway

between Davis and Sacramento. Re-  
cently the Yolo Board decided to build.  
The structure will cost \$30,500 and  
will unite the two units of the State  
Highway system in Yolo and Solano  
Counties.

**STREET LIGHTING SYSTEM**—Cost  
not stated. Colusa, Colusa Co., Cal.  
Engineer, County Surveyor, Colusa.  
Owners, Colusa County. No bids were  
received by the Supervisors for the in-  
stallation, etc., of a lighting system for  
the Alameda Lighting District, and  
the Clerk was instructed to advertise  
again for bids to be opened on October  
5th, 4 p. m. Further information may  
be had from the Clerk of the Super-  
visors at Colusa.

**STREET IMPROVEMENTS**—Cost as  
follows. Sonoma, Sonoma Co., Cal.  
Engineer, City Engineer, Sonoma. Own-  
ers, City of Sonoma. At the last meet-  
ing of the City Trustees the following  
appropriations were set aside for im-  
provements to be made in Sonoma:  
\$1,200 for a concrete bridge on France  
street, \$1,500 for the Plaza improve-  
ments, and \$1,500 for street work.

**STREET IMPROVEMENT**—Cost not  
stated. Richmond, Contra Costa Co.,  
Cal. Engineer, City Engineer, Rich-  
mond. Owners, City of Richmond.  
Bids will be opened on September 25th  
for work to be done under the follow-  
ing resolution: That 31st street, from  
Cutting Boulevard to the City of Pull-  
man Tract, be graded and paved with  
Richmond Standard Macadam, consist-  
ing of rock and asphaltum having a  
penetration of from 125 degrees to 140  
degrees, District of Columbia Stand-  
ard, and guttered and curbed and side-  
walked with cement concrete, and that  
an open drain of cement concrete be  
constructed across the existing alley.  
Also that Anita avenue, from the south  
line of the City of Pullman Tract to the  
north line of Potrero avenue, be grad-  
ed, paved with Richmond Standard  
Macadam.

**SEWER CONSTRUCTION**—Cost not  
stated. San Rafael, Marin Co., Cali-  
fornia. Engineer, County Surveyor, San Ra-  
fael. Owners, Marin County. Bids will be  
opened on September 23rd for the con-  
struction of a wooden box storm sewer  
in Pastori road from from the San Ra-  
fael and Olma county road to the Ar-  
royo San Anselmo; also for the con-  
struction of an iron stone pipe storm  
sewer in Iron said wooden box.

**FILTERING PLANT FOR BATHS**—  
Cost not stated. San Rafael, Marin Co.,  
Cal. Engineer, County Surveyor, San  
Rafael. Owners, City of San Rafael.  
At the last meeting of the City Coun-  
cil

## White Brothers

5th and Brannan Streets

San Francisco

oil the matter of installing a new filtering plant for the baths was considered. Bids have been ordered advertised for the work, which will cost in the neighborhood of \$5,000.

**AUXILIARY PUMPING PLANT**—\$10,000. Pittsburg, Contra Costa Co., Cal. Engineer's name not given. Owners, Contra Costa Gas Co., Pittsburg. The Contra Costa Gas Company is installing an auxiliary pumping system in Pittsburg. The new pumps will have a capacity of 15,000 cubic feet of gas and will supply the towns of Pittsburg, Antioch, Concord and Martinez.

School—1 story and base, frame, \$30,000. Suisun, Solano Co., Cal. Architects, W. H. Crim, Jr., and Edward J. Symmes, Pacific Bldg., S. F. Owners, Suisun School District. Working drawings are being completed and bids will be called for within a week or ten days for this building. There will be six class rooms. Exterior covered with cement plaster.

**OFFICES**—2 story and base, reinforced concrete, \$15,000. Pittsburg, Contra Costa Co., Cal. Architect, none. Owners, Grabstein Bros., Pittsburg. Location, Railroad avenue and East 3rd street. Ground floor will contain stores and upper floor has been arranged for offices. Interior finish pine. Central heating system, patent store fronts and oil burning equipment. Exterior faced with cement plaster. Plans complete and figures, being taken by the owners.

#### Contracts Awarded.

**OFFICE**—1 story and base, reinforced concrete, \$3,121. Martinez, Contra Costa Co., Cal. Architect, James T. Narbett, 704 Macdonald avenue, Richmond. Owners, Pacific Gas and Electric Co. Contractors, Ludden & Lambiey, Martinez. Contract price, \$3,121.

**STREET IMPROVEMENT**—Cost not stated. San Anselmo, Marin Co., Cal. Engineer, Town Engineer, San Anselmo. Owners, Town of San Anselmo. Contractor, Sunset Construction Co., 62 Post street, S. F. Contract price not stated. The contract covers the improvement of Pine and Cedar streets and San Anselmo avenue.

**BRIDGE REPAIRS**—Cost not stated. San Anselmo, Marin Co., Cal. Engineer, Town Engineer, San Anselmo. Owners, Town of San Anselmo. Contractor, E. Harrington, San Anselmo. Contract price not stated.

### FRESNO, MODESTO STANISLAUS AND CENTRAL CALIFORNIA

**STREET PAVING**—Cost not stated. Modesto, Stanislaus Co., Cal. Engineer, City Engineer, Modesto. Owners, City of Modesto. The City Council has directed City Clerk O. W. Thompson to advertise for bids for the paving of L street from Seventh to Ninth. Further information may be had from the City Clerk or Engineer at Modesto.

**ROAD PAVEMENT**—Cost not stated. Bakersfield, Kern Co., Cal. Engineer, County Surveyor, Bakersfield. Owners, Kern County. Bids will be opened on October 1th by the Board of Supervisors for grading and construction of concrete pavement on Division 5, Section 1, Bakersfield-McKittrick road, being that portion lying between the westerly end of the Kern River bridge and Rosedale; length approximately 6 miles. Plans can be secured from the County Surveyor's office.

**ROAD CONSTRUCTION**—\$18,850. Visalia, Tulare Co., Cal. Engineer, County Surveyor, Visalia. Owners, Tulare County. The Tulare County Supervisors have taken all bids received for the construction of the Three Rivers road to connect the valley with a trunk line to the hills, under advisement until September 15th, at which time the contract will be awarded. The bid of J. E. Hines to build the road for the sum of \$18,850 was the lowest received. This bid was so much below the estimate cost that the Supervisors desired to look into the matter thoroughly before entering into the contract.

**ROAD CONSTRUCTION**—Cost not stated. Bakersfield, Kern Co., Cal. Engineer, County Surveyor, Bakersfield. Owners, Kern County. Bids will be opened on October 7th by the Board of Supervisors for grading and construction of Concrete pavement on Division 10, Section 5, being that portion known as the Weed Patch Loop, beginning at the State Highway at the northwest corner of Section 17, Tp. 31 S., R. 28 E., and extending in an easterly direction 5 miles to the northeast corner of Sec. 17, T. 31 S., R. 28 E. Plans can be secured from the County Surveyor.

**PILE BRIDGES, CULVERTS**—AND HEAD WALLS—Cost not stated. Bakersfield, Kern Co., Cal. Engineer, County Surveyor, Bakersfield. Owners, Kern County. Bids will be opened by the Board of Supervisors on October 7th for construction of pile bridges, culverts and reinforced concrete head walls on Division 5, Section 4, Bakersfield-McKittrick road, being that portion lying between the end of Section 3 and LoKern; length approximately 8 miles.

**BRIDGE**—Reinforced concrete. Cost not stated. Merced, Merced Co., Cal. Engineer, County Surveyor, Merced. Owners, Merced County. The County Surveyor has been directed to prepare plans and specifications for the construction of a concrete bridge to be erected over the Santa Rita Slough on the road from Dos Palos to Los Banos. Bids will soon be called.

ENCE — 2 story and base, cost not stated. Fresno, Fresno, Cal. Architects, Bowen & McKenzie Bldg., Fresno. Own- Chapazian. Location N street, main seven rooms, bath, sleep- and garage. Interior finish wood and white enamel floors. Open fire places and brick mantels. Bath room fin- tile. Automatic water heater. covered with cement plaster bath. Plans being prepared. L. ADDITION—Frame. Cost \$1,000. Modesto, Stanislaus Co., architect, none. Owners, City of Bids will be opened on Sep- 15th or a one-story addition to ent school building. Plans can- ed from the Secretary of the Education.

AL—1 story and base, brick, cost stated. Dinuba, Tulare Co., architects, Glass & Buttner, Re- Bldg., Fresno. Owners, Town- na. The building will contain six rooms. Interior finish pine- ple floors. Modern plumbing- tal heating system. Exterior- pressed brick. Plans being- l.

**SACRAMENTO, STOCKTON AND NORTHERN CALIFORNIA.**

WATER SYSTEM—Cost not stated. Durham, Butte Co., Cal. Engineer's name not given. Owner, Frank Barnard, Durham. Application has been made to the Butte County Supervisors by Frank Barnard of Butte County, for a franchise to lay water pipes and conduits in certain streets and roads in Butte County, as follows: In all of the streets, alleys and public highways in the Town of Durham, and also all other roads, streets, alleys and public high- ways situate within the boundaries of Section 30, Township 21. Also to re- place, repair, enlarge and extend the same along such roads, streets, alleys and other public highways. All for the purpose of furnishing, selling and supplying water to the inhabitants of the Town of Durham and vicinity.

BRIDGES—Reinforced concrete. Cost not stated. Chico, Butte Co., Cal. Engineer, County Surveyor, Oroville. Owners, Butte County. Two bridges have been ordered built under the "Emergency Act" on the Biggs-Prince- ton road. One bridge is to be built on Lone Pine avenue over Chico Creek, near Chico, and will cost \$3,000. The other bridge is to be built over Camp- bell's Creek on the Shasta road, near the Tehama County line north of Chico.

BRIDGES — 1, reinforced concrete. Cost not stated. Willows, Glenn Co., Cal. Engineer, County Surveyor Bay- ard Knock, Willows. Owners, Glenn County. The County Supervisors have instructed County Surveyor Bayard Knock to prepare plans and specifica- tions for four bridges, one at New- ville, 190 feet long, of concrete; one at Butte City, some 40 feet in length, also of concrete, and two small concrete structures on the State Highway.

STREET PAVING, ETC.—Cost not stated. Stockton, San Joaquin Co., Cal. Engineer, City Engineer, Stockton. Owners, City of Stockton. Bids will be opened on September 24th or work provided under the following resolution: That Scott's avenue from Lincoln street to Monroe; Van Buren street from Taylor avenue to Hazelton avenue; Monroe street from Scott's avenue to Hazelton, etc., be graded, curbed and guttered, having the curb portion thereof 12 inches deep and 6 inches wide and the gutter portion thereof 21 inches wide and 6 inches thick after rolling, bound with liquid asphaltum applied hot, using 1½ gallons to the square yard of pavement.

STREET IMPROVEMENT—Cost not stated. Stockton, San Joaquin Co., Cal. Engineer, City Engineer, Stockton. Owners, City of Stockton. Bids will be opened on September 24th for work provided under the following resolu- tion: That Della street from Fair Oaks avenue to the Jensen addition, and Lafayette street from East street to Locust street, be graded, curbed and guttered with combined concrete curb

and gutter, having the curb portion thereof 12 inches deep and 6 inches wide and the gutter portion thereof 21 inches wide and 6 inches thick; the roadways paved with macadam 6 inches thick after rolling, bound with liquid asphaltum applied hot, using one and three-quarters gallons to the square yard of pavement. That con- crete sidewalks 5 feet wide and 1 inches thick be constructed on both sides of Della and Lafayette streets, as above described, except where already laid.

SEWER CONSTRUCTION—Cost not stated. Stockton, San Joaquin Co., Cal. Engineer, City Engineer, Stockton. Owners, City of Stockton. A resolu- tion of intention providing for laying sanitary sewers in South Stockton from South to Ninth street, inclusive, and from McKinley avenue to the Southern Pacific tracks was passed at the last meeting of the City Council. Bids will soon be called for.

RAILROAD CONSTRUCTION — Cost not stated. Stockton, San Joaquin Co., Cal. Engineer's name not given. Own- ers, Tidewater Southern Railroad Co., Stockton. Application has been filed with the City Council by the Tidewater Southern Railroad Company for a fran- chise along Sutter street for a single track along the center line of that thoroughfare from Hazelton avenue to Main street. The construction of freight sheds is also included in the proposed work. Byron A. Bearce is president of the company.

## Contracts Awarded.

BRIDGES—Reinforced concrete. Cost as follows. Oroville, Butte Co., Cal. Engineer, County Surveyor, Oroville. Owners, Butte County. Contractors, Chico Construction Co., Chico. Eight bridges between Nelson and Butte Creek. Contract price \$12,927. Chico Construction Co., Chico, Durham Slough bridge. Contract price, \$1,190, and O. A. Peter, Oroville, North Chan- nel of Butte Creek bridge. Contract price, \$2,712.

## LOS ANGELES AND SOUTHERN CALIFORNIA.

BRIDGE—Reinforced concrete and steel, \$15,000. Ventura, Ventura Co., Cal. Engineer, County Surveyor Petit, Ventura. Owners, Ventura County. The County Supervisors have accepted the plans and specifications prepared by County Surveyor Petit for the con- struction of the La Crosse bridge. The

plans call for a structure with a 150-foot span, 19 feet above the creek, and four openings on the north side, each 24 feet. Bids will be called for this week.

**STREET IMPROVEMENT**—Cost not stated. Riverside, Riverside Co., Cal. Engineer, City Engineer, Riverside. Owners, City of Riverside. The City Engineer has been directed to prepare plans and specifications for the improvement of Juniper avenue, from New Magnolia to Brockton. Bids will be called on the approval of the plans.

**RESIDENCE**—2 story and base, hollow tile. Cost not stated. Los Angeles, Cal. Architect, E. B. Rust, Title Insurance Bldg., L. A. Owner, Frank A. Keith. Location, Kingsley Drive and 11th street. Will contain twelve rooms, three baths and sleeping porch. Separate garage. Interior finish pine, hardwood and white enamel. Hardwood floors. Bath rooms finished in tile. Central heating system, open fire places and tile mantels. Hot water circulating system. Vacuum cleaning. Exterior covered with cement plaster. Plans being prepared.

**HOSPITAL, COTTAGES**—\$34,999. Patton, San Bernardino Co., Cal. Architect, State Architect George B. McDougall, Sacramento. Owners, State of California. Contractors, W. E. Kier Construction Co., San Diego. Contract price, \$34,999. A complete list of the bids will be found under the heading of Los Angeles and Southern California.

**LIBRARY**—1 story and base, brick and concrete, \$35,000. Architect, W. J. Dodd, Marsh-Strong Bldg., L. A. Owners, City of Los Angeles. Location, First and Soto streets. Revised plans have been completed and new figures are being taken for the building. Bids will close on September 24th.

## Bids For Cottages At Patton Hospital.

W. E. Kier Construction Co. Present  
Low Bid For Cottages N and O at  
Southern State Hospital.

(By Special Wire.)

SACRAMENTO, CAL., Sept. 14, 1915.—Fifteen sets of figures were opened by the State Department of Engineering today for the construction of Cottages N and O at the Southern State Hospital at Patton, San Bernardino County. W. E. Kier Constr. Co., San Diego, presented the low bid at \$34,999 and will probably be awarded the contract. Following is a list of the bids received:

Cottages N and O at Patton.	
W. E. Kier Constr. Co.	\$34,999
Robert Jordan	38,190
The Kling Co.	38,472
John Harnish Co.	38,700
James P. Dawson	38,890
L. G. Bergen & Son	39,172
F. O. Engstrom	39,979
John Simpson Co.	40,500
E. A. Daniels	42,590
Cresler Mfg. Co.	42,854
Fred Peter	44,200
Jacobs Constr. Co.	44,773
Daubenspeck & Dryden	47,950
Wingett Constr. Co.	48,265
Willard-Brent Co.	49,432

## Associated Catalogues.

Here is where the Architect usually files the circulars, catalogues, announcements, etc., that come to his office. He can't take care of them. There are too many of them.

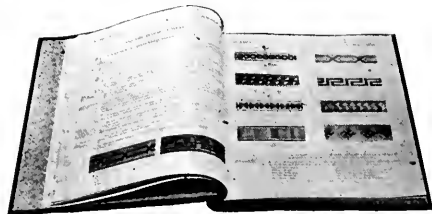

the Remedy:

Associated Catalogues is a collection of catalogues of Building Materials, Building Equipment and Building Machinery available on the Pacific Coast, bound in one volume, thoroughly indexed for instant reference for Architects use.

Every Architect, Consulting Engineer and Large Corporation Purchasing Agent on the Pacific Coast will receive a copy Free. When

Size of pages, 11x14 inches.

the Architect is preparing his plans and specifications, he wants to know how to specify your goods. It's up to you, Mr. Dealer, to make it easy to specify your products.

Associated Catalogues presents the solution. Price per page \$30.00.

Send for specimen pages.

San Francisco, September 29, 1915

Fifteenth Year, No 39

In seeking to provide a market for electricity from the municipal power plants and to simultaneously provide a market for the surplus water supply from the aqueduct, the city of Los Angeles is encountering a problem that, in the opinion of the advocates of both propositions, will bring a series of legal complications and delay the accomplishment of one or both of these propositions.

The most serious question, according to the men who are living freely of their time and energy to the movement or annexing desirable contiguous territory is, "Shall the plan for condemning the Southern California Edison Company system for a municipal distributing system be permitted to stop the annexation program?"

The other side, presented by the advocates of a municipal power plant which shall sell direct to the consumer, is, "Shall the annexation program be permitted to spoil our plans for condemning and acquiring immediately the Southern California Edison Company's system."

Litigation whereby the city has started to have the Edison plant condemned at an appraisal to be made by the State Railroad Commission, has already been complicated by the annexation of the San Fernando, the Palms, and Fairmount districts in the last few months. In an effort to keep pace with this annexation the Council has, on recommendation of the Public Service Commission, passed a resolution amending its appeal to the Railroad Commission by including that part of the Southern California Edison Company's lines within the limits of the newly-annexed territory. This action upsets the work already done by the Railroad Commission engineers in placing a valuation on the Southern California Edison Company's plant. Instead of simply requiring a new start and leaving the "day open for completing the condemnation proceedings, the worst is yet to come." For instance, property owners in the immense district extending from The Palms on to the ocean, through Sawtelle and to the north of Santa Monica, have appealed to the annexation Commission for assistance in their plan to join the city and citizens of Eagle Rock are also considering consolidation, with sentiment in that district favoring the move.

If the city is to continue its most excellent annexation program, we must at least postpone our attempt to condemn the Southern California Edison Company property. The question of providing a market for the aqueduct water through annexation is the most important matter before the city right now in connection with our water and power system. The production and marketing of electricity is, though also important, incidental to the operation of the water system. If, as seems apparent now, the city must choose between the annexation program and the condemnation proceedings for a power distributing system, it seems that there is only one choice and that is to get a market for the water first.

Engineers who have gone over the Southern California Edison system have pointed out that the value of the property is not all tangible and any lines that the city seeks to acquire must be considered as a part of an immense and well-organized system. Thus the problem of valuation is changed throughout when more territory is included in the proposed part of the system to be condemned.

Changes in routing, operation of trams and terminal facilities for the Pacific Electric system which are designed to relieve congestion in Main and Hill streets were dis-

cussed recently at a meeting of the Public Utilities Board with Paul Shoup, president of the Pacific Electric. Mr. Shoup presented plans for remodeling and rearranging the Hill street station at a cost of approximately \$20,000, and said the Pacific Electric is ready to go ahead with this work at once. In general, these plans were approved by the Public Utilities Board, and details will be worked out in the near future.

Regarding changes in main street there was no complete agreement between the Public Utilities Board and Mr. Shoup.

Mr. Shoup presented to the board complete schedules showing the operation of trains in Main and Hill streets showed that there are 967 trains a day on the sixteen lines operating in Main street. Of these there are 770 single cars, 172 trains of two cars each and 25 trains of three cars each. The total number of cars is 1,187 a day, and of these 262 pass by the Sixth street station and 927 pass in and out of the station.

The schedules in Hill street show that a total of 759 trains a day are operated on ten Pacific Electric lines. Of these, 667 are single cars, 115 are two-car trains, while there are three trains of four cars each, making a total of 896 cars a day. Of these, 799 pass in and out of the Hill street station and ninety-seven pass by.

At a time when "conservation" was rampant much land was withdrawn from entry and placed in the "so called" forest reserves, the only excuse for this being that "nobody" knew what the land was good for.

Some of this land is now being thrown open and the land office is already doing a "land office" business in inquiries.

Much valuable land in the Santa Barbara national forest will be contested for when 55,000 acres will be thrown open to entry. The land was withdrawn from entry in 1906 and restored this year. It was opened for settlement August 11, and for filing August 19.

The land is mountainous, near Saugus and Castaic. On one piece there already have been twenty-seven settlers. Water was struck on this land within seven feet of the surface. This prize, said to be worth \$20,000, will go to the man who can show the first claim, upon payment by him of \$22 filing fee.

By a proclamation of President Wilson, 750,000 acres of the Cleveland National forest reserve will be thrown open to entry early in November, according to information received by Recorder Mitchell of the Federal land office.

Most of the reserve lies in San Diego County and a portion in Riverside County. Because of prior patents, however, it is estimated by the local Federal officials that less than 330,000 acres will actually be opened to new settlers.

A great portion of the land, according to Recorder Mitchell, is rock covered and unfit for farming. Since rumors of the opening have been in circulation the local land office has been besieged with inquiries. The information is not in the hands of the local office, but when it arrives notice will be given to the public.

That the land is somewhat mountainous in character does not mean that it is unfit for use. The building of good roads of easy grade into the mountain district of California has just started and will soon prove a paying investment, as our mountain riches have barely been scratched.

# LESSONS FROM THE FAIR.

Collected by George Nelson, C. E.

## WHITE LEAD MANUFACTURE.

The exhibit of W. P. Fuller & Co., showing the manufacture of White Lead, is very instructive and should be studied by our readers, as it is typical of one of the coming big industries of this State.

White lead is first mentioned in history by Theophrastus about 300 B. C., and again by the Roman historian, Pliny, 79 A. D., in his description of Roman arts and manufactures. In the fifteenth century the Dutch discovered that when pig lead, in the presence of vinegar, was subjected to the action of moisture and carbon dioxide from fermenting tan bark or manure, a basic lead carbonate was formed, the White Lead of commerce.

Since then no change has occurred in the basic principles underlying the corrosion of White Lead, which is still manufactured by the old Dutch process. Despite the fact that many quick processes to shorten the time of corrosion have been patented, none is able to produce the same dense, opaque pigment that is obtained by the Dutch or stack method.

White Lead has stood out preeminently above all other pigments and is the only white pigment that has been used successfully by itself. The reasons for this are many: White Lead wears longer, works easier, dries and covers better, and leaves the best surface for repainting. When combined with colored pigments, it retains these same superior qualities and, for this reason, is the basis or foundation of the paint industry.

The ultimate test of a paint pigment is durability, which reaches its maximum in White Lead. Moisture, that forerunner of decay, is the most destructive agent of steel and wood. White Lead not only resists but also repels moisture, and to this fact is attributed its remarkable preserving qualities.

Because of the importance of White Lead as a paint pigment and by reason of the many interesting processes involved in its manufacture, we give below a description of its manufacture as it is practiced at the Pioneer White Lead Works at South San Francisco.

To insure perfect corrosion and a pure white product, the pig lead used in the manufacture is doubly refined and all impurities, especially bismuth and silver, removed. This pure softened lead is known as coroder's lead and commands a higher price than ordinary pig lead.

The pigs of lead, weighing 100 pounds each, are piled in the vicinity of the lead-melting kettle, a large iron pot heated by fuel oil, and, one by one, are fed into this kettle where they are melted and kept in an even temperature of 750 degrees F.; this temperature is accurately registered by a self-recording electric pyrometer.

From the kettle the molten lead flows on to a revolving endless double belt of iron molds, where it is cast into perforated discs, known as buckles, about eight inches in diameter and one-quarter inch thick. The term "buckle" is derived from the fanciful resemblance of these discs to the metallic buckles worn upon shoes in earlier times. As they travel the full top length of this endless belt, the buckles solidify and are then discharged, at the rate of 100 per minute, into a belt conveyor, which, in turn, drops them into large piles.

Great care must be taken to prepare the buckles so that they will corrode properly. Rolling would harden the lead and destroy the crystalline structure, and for this reason it is necessary to cast the discs. The temperature at which the lead is run into the molds, the length and speed of the mold chain, all are carefully and uniformly regulated. From the huge piles the buckles are loaded into wheelbarrows, weighed, and removed to the corroding stacks to be converted into White Lead.

In the yard surrounding the buckle machine and corroding stacks are great steaming piles of spent tan bark. New tan bark from the tanneries is mixed with used bark from

the stacks, then properly wetted, worked over and over, and allowed to age. When fermentation has commenced, it is ready for removal to the corroding stacks. The same care must be taken in the tempering of the tan bark as in the casting of the lead buckles and for almost similar reasons.

When empty, the corroded stacks are a series of large bins or stalls about 20 by 50 feet, constructed of heavy timbers tightly boarded on both ends and the back. About eighteen inches of prepared tan bark is first spread evenly on the bottom of the stacks. Then on top of the bark comes a layer of strong, peculiarly shaped, earthenware pots with the inside bottom portion glazed. Into this glazed well is poured a pint of a weak solution of vinegar or acetic acid.

The projecting collar of each pot supports about ten lead buckles, laid flat one upon the other. This layer of filled pots extends to within eighteen inches of each wall. The intervening space is filled with tan bark and the front section of the stack held in place by boards tightly fitted as the stack progresses in height.

Each layer of pots is covered with a double layer of boards, another layer of tan bark placed upon them, and then more pots, until ten layers of pots, buckles, boards and tan bark have been built in the stack, which now contains about 100 tons of lead buckles.

During the erection of each successive layer of pots and buckles, large wooden vent pipes or flues are installed, which lead up through the remaining layers into the atmosphere and thus afford the only means of controlling the temperature during corrosion.

To permit the chemical agents to complete the action of corrosion, the filled stack is allowed to stand 100 days. Following wonderful chemical laws, these agents work silently in the darkness, changing gray metallic lead, atom by atom, into the white pigment known as the basic carbonate of lead or—White Lead.

For the first few days after the stack is erected no apparent action exists. Small microscopic organism, the bacteria of fermentation, have been at work, however, and in six or seven days the tan bark commences to ferment, liberating heat, moisture and carbon dioxide.

At the expiration of three or four weeks, the temperature in the stack has reached 165 to 170 degrees Fahrenheit, where it is maintained uniformly by opening or closing the vent pipes described above. The heat vaporizes the vinegar or acetic acid in the well of the pot, and the vapors, in turn, react with the lead buckles to form lead acetate. The reason for the peculiar shape of the buckles may now be understood. The perforations allow a free circulation of the vapors and gases and at the same time present a larger surface of the buckle to their attack.

Next, moisture and carbon dioxide, from the tan bark, attack the lead acetate, change it into basic lead carbonate, and release the acetic acid, which again reacts with the metallic lead.

The transition of pig lead to lead acetate and then to the basic carbonate continues for over three months until practically all of the lead buckles have been converted to a hard, white, porcelain-like substance—the White Lead of commerce.

The stack is now taken down layer by layer, with the operation of building it just reversed. When the top layer of tan bark with its covering layer of boards has been removed, a wonderful change from the bright metallic buckles to the snow-white mass of swollen shapes is observed. Upon close inspection, it will be noticed that in most instances the metallic buckle is completely changed in some there are strips of uncorroded lead; and in rare cases a buckle is entirely unaffected. All uncorroded and discolored buckles are carefully removed from each layer and the perfect buckles are then dumped through dust col-

ectors into wheelbarrows, weighed, and taken to the crushing rolls.

From the time the buckles are cast from pig lead until removed from the corroding stacks in the form of White Lead, the process has much in common with the old Dutch methods. Modern conveying and grinding machinery, however, have revolutionized the processes to which the Lead is now subjected. With almost human intelligence these machines produce a cheaper, better and more uniform White Lead than that obtained by the obsolete hand methods of a century ago.

As many of the lead buckles do not completely corrode in the stack, they are run through large, grooved crushing rolls where the corroded portion is crushed and separated from the uncorroded lead core by a revolving screen. That portion passing through the screen, which still contains considerable metallic lead, is then run through the flattening rolls, where all remaining particles of metallic lead are flattened out into chips and retained on a fine mesh screen, through which the White Lead passes. The White Lead, comparatively free from metallic lead, is then conveyed to a series of jig screens where all impurities, such as tan bark, pieces of pots, and any remaining metallic lead are separated out by means of a patented vacuum cleaning device.

The removal of the tan bark before the White Lead comes in contact with water is highly essential, as water extracts certain tannin dyes which would stain the White Lead a reddish yellow.

The purified dry White Lead is now run into water and carried to huge burrstone grinding mills over five feet in diameter. From the mills the Lead is pumped to large drag tanks, where the coarser particles settle to the bottom and are drawn off by an endless chain conveyor. The finer particles float over an agitating tub and are washed free from any vinegar and lead acetate. At the same time any coarser particles which may have come from the drag tank are settled out.

That Lead which is sufficiently fine to float over the agitating tub passes to a gyratory screen covered with silk bolting cloth, which has 40,000 meshes to the square inch. The coarser particles which have settled in the drag box, agitating tub, or have passed over the silk screen, are all returned to the water mills for regrinding. The ground

White Lead which has passed through the silk bolting cloth is pumped into a series of settling tanks, and here the lead settles from suspension in the water to the bottom of the tanks. After standing overnight, the water is drawn off, and the pasty mass of finely ground White Lead known as Pulp Lead, which has settled to the bottom of the tanks, is pumped into the Pulp Stock Tanks.

Beneath the Pulp Stock Tanks is a large weighing box into which is run 2,500 pounds of Pulp Lead, the equivalent of one ton of dry White Lead. Directly under this weighing box is a long, narrow, cylindrical mixing tank, equipped with an agitator. The Pulp Lead is discharged from the weighing box into the mixing tank, where another interesting phenomenon occurs. Into this tank, the contents of which are in motion, raw linseed oil is poured from a gauged container. Every particle of Lead is seized by the oil and together they go to the bottom, while the clear water, separated from the Lead, comes to the top. This process of mixing Pulp Lead and raw linseed oil, with the ultimate separation of the Lead and oil, is continuous. The White Lead paste is carried off the bottom by a screw conveyor, while the clear water is pumped off the top.

The strong affinity of White Lead for linseed oil is a property possessed by no other pigment. This fact may be demonstrated by mixing raw linseed oil and water with any pigment other than White Lead. When agitated, the pigment will settle to the bottom and the oil will float on top of the water; no union of the oil and pigment will occur.

Because of this property White Lead is highly desirable as a protective coating for wood and metal; it not only resists moisture but actually repels it.

To remove any remaining moisture, the White Lead paste from the pulp mixer passes through a "pony" mixer and then into the oil mills.

Two large water-jacketed French burrstone mills grasp the Lead paste, grinding the oil and pigment into a still closer union than ever, discharging it from the second mill into a water-jacketed cooler. Here it is packed into wooden or steel kegs and casks or run into large cars for subsequent use in liquid paints. And whether as lead in oil in kegs and casks or as ready mixed paints in cans and barrels, Pioneer White Lead eventually reaches the consumer of the Pacific Coast, South and Central America, Alaska, Hawaii, the Orient and Australasia.

## Items Of Interest.

George Nelson, C. E.

## New Cement Plant.

The deposits of the Southwest Portland Cement Company of El Paso, Tex., which is starting construction on a \$1,000,000 cement plant at Victorville in San Bernardino County, were recently examined by three of the most eminent practical experts in this line in the West and pronounced by them ideal in situation and practically inexhaustible in quantity.

This great enterprise is to be conducted under the personal direction of Carl Leonardt, for many years a leading contractor of Los Angeles, who has made a close study of the latest German methods of cement production.

These advanced methods, and the unusual value of the deposits, have inspired attempts on the part of rivals to thwart construction of the new plant, according to the statements of the parties interested therein.

An injunction suit was brought by minority stockholders of the Southwest company in the Federal Circuit Court at El Paso, but failed for lack of a damage bond of \$20,000. It was claimed at the hearing that the suit was really instigated by a rival cement company, which recognized the drop in prices certain to follow the installation of the new plant and processes. The complainants sought to limit operations to El Paso. Some of these, who have since seen

the Victorville prospects, have become enthusiastic converts.

Obstructions to right of way purchases for a branch line from the Santa Fe railroad to the deposit were also encountered and have been attributed to the same rivalry. These counter efforts were fruitless, however, and the railroad line has been graded between the plant site and the Mojave River, and is in process of construction between river and main line.

Rails and ties have been bought, and machinery is to be laid down on the factory site as soon as the line is completed from Victorville.

Actual operation of the complete plant is expected to begin in nine or ten months, with immediate reduction in the cost of high quality cements.

The company has a proposition here which can be described as ideal from every standpoint. As to the size of the deposit, it is practically inexhaustible, and is pure and free from refuse, from the grass roots down. It can be run by gravity down to the plant, the location of which cannot be beaten for a accessibility and convenience.

The plans for the plant represent the last word in cement factory construction at the present date. The combination cannot be surpassed by any plant on the American continent.

## The New Oil Field Protection Law.

The new law which went into effect the 9th inst., was drafted by the State Mining Bureau in response to appeals from numerous operators who stated that if speedy action was not taken, the oil fields of the State were in danger of becoming flooded with water, causing a partial paralysis of the industry.

In Texas and in the oil fields of other States damage beyond estimate has resulted from owners of wells neglecting to properly shut off abandoned wells and to prevent water from wells in operation, from seeping into the oil-bearing sand of the district.

Supervisor McLaughlin has made it clear that while the law provides drastic measures in meeting the question it is the aim of the officials to work hand in hand with the producer and eliminate "red tape" and officialdom. A reasonable compliance with the new law will be required, but the main object is to secure protection for the oil fields and not to impose numerous useless conditions and restrictions where none are needed.

To handle the subject, the department of petroleum and gas has been created under the supervision of the State Mining Bureau. At the head of the new department is the supervisor, appointed for four years at a salary of \$4,500 per year. Not less than four deputies are provided for.

The oil operators will be required to furnish the department with detailed records monthly of operation of wells, including the number operated and the amount and gravity of oil produced. A minimum penalty of \$100 fine is provided for failure to comply with the provision. The reports are to be confidential and may not be used or produced as evidence in court except in certain prescribed cases.

The new law provides that all wells shall have metal casing, which shall effectually prevent water from entering the field. The provision applies to all wells in operation and all wells which may be drilled in the future.

Before starting to drill or redrill a well, written notice must be furnished the department giving details of the proposed work. During the drilling a record of the work shall be kept and information given the department from time to time as requested. Five days' notice must be furnished before shutting off the water in any such well and the deputies are charged with being present at the test for shut-off.

Provision is made in the statute that assessments be levied on all oil property, both productive and non-productive, and the fund so levied be used in carrying on the work of the department and for providing an emergency fund of from \$5,000 to \$25,000 in each of the territories under the direction of a deputy. The latter fund to be used in making necessary repairs, where the owner re-

fuses to do the work. The cost of the work done then becomes a lien on the property.

Gas wells, in a district where there are no petroleum wells, are not to be assessed, and non-productive but oil-bearing land may not be assessed for more than 10 per cent of the total assessment levied for the support of the department. The rate of assessment is to be determined by the State Board of Control. A tax per barrel on all oil products will also be levied and paid into the State treasury. The brunt of the expense of the department will be met by the latter tax.

Mr. McLaughlin is a practical oil man, having been in the employ of the Associated Oil Company for several years as an expert and has been in the employ of the State Mining Bureau for the past three years.

Four deputies have been appointed. These deputies will be stationed in the various oil fields and their duties will consist largely in becoming thoroughly informed of all the physical conditions of those fields and advising the operators as to the most effective method of controlling underground water. They will also furnish the supervisor with information necessary for the enforcement of the new law dealing with the subject of water in the oil wells.

The appointments are as follows:

H. J. Kirwin will attend to the work in Fresno and Kings Counties and a portion of Kern County. He will be stationed at Coalinga. Mr. Kirwin is a civil engineer and has, for some years, filled the position of Oil Well Commissioner for Fresno County. For a number of years before entering public service he was employed by the engineering department of the Associated Oil Company.

Mr. E. B. Latham will have charge of work in the following counties: Kern, Santa Barbara and Ventura, his headquarters being at Santa Maria. Mr. Latham is a geologist, and for several years has been in charge of the work carried on by the Kern County Oil Protective Association in the Midway field. This association was a voluntary affair, but accomplished a great deal of very valuable work.

R. B. Moran will look after the work in Orange, Los Angeles and Ventura Counties, being stationed in this city. Mr. Moran is an engineer and geologist of great experience. He is at present actively interested in several oil-producing concerns and has at various times been in the employ of nearly all of the large oil companies of California.

Chester Naramore will be in charge of work in Kern and Ventura Counties. His headquarters will be at Taft. Mr. Naramore is a mining engineer with wide experience in managing producing oil properties, having had under his supervision parties in several California fields, and more recently having been in charge of operations for Canadian companies located near Calgary.

## Potash From Feldspar.

A young Yale graduate chemist has submitted to Dr. Thomas K. Norton, the Department of Commerce commercial chemical agent, a new process for extracting potash from feldspar. Dr. Norton is in New York to help solve the problems of a war shortage in dyestuffs and other substances and potash is one of them. He was so much impressed with the young inventor's feldspar process that he said:

"I have examined the chemical factors of this process and am convinced that it is reliable and of value. Tests have been successfully made with several hundred tons of feldspar.

"In the first place, it promises an economical way of liberating aluminum and silica from feldspar. Aluminum, silica and potash are closely united in the feldspar of the Allegheny Mountains and acids do not liberate them. We have to use an alkaline process before we can split with acids. Now the release of this aluminum quickly and cheaply is of great importance to the aluminum industry

in the United States, which uses 400 tons of pure aluminum daily.

"Secondly, the new process of getting potash from feldspar is more direct than extracting it from kelp. This young man's method will give us potassium carbonate almost directly from the rock and potassium carbonate is the great desideratum.

"Having this, we can immediately get any kind of potash salts, including nitrate. To get potassium carbonate from the kelp we have to use rather a roundabout method.

"So, I think the new feldspar process will be an important as a competitor with kelp in the potash industry that we should have and must have in this country. Germany has the one great natural monopoly of potash. We have been taking half her output. Now we cannot get it and we need it badly. Besides, the American farmer has never learned to use enough potash as a fertilizer. The Germans get thirty-eight bushels of wheat per acre to our fifteen—just by being liberal with potash. And we are letting kelp containing 150,000,000 worth of fertilizer go to waste on the Pacific Coast each year."

## MIDWAY GAS.

Under a supplemental order issued recently by the State Railroad Commission at the solicitation of the Midway Gas Company, some radical changes are made in the order of June 25, 1915, in which the company was authorized to issue \$2,172,000 of first and refunding mortgage 6 per cent bonds, \$88,395 of five-year 6 per cent notes and \$737,350 par value of preferred stock.

In its supplemental order the commission states that data submitted by the Midway Gas Company emphasizes the necessity of changes, and the company is directed to issue bonds as follows: \$660,000 face value at 90 per cent to buy the compressor plant and gathering lines of the Southern California Gas Company in the Midway oil fields in Kern County, and for other purposes.

These other purposes are the taking over of the rights and obligations of the Southern California Gas Company in the contracts between the Honolulu Consolidated Oil Company, Midway Gas Company, Southern Pacific Land Company, Kern County Trading and Oil Company, and Associated Oil Company.

The company is also authorized to issue 3,600 shares of preferred stock at \$100 a share to buy the property of the northern Exploration Company, consisting of gas well improvements and other items, and to obtain the release of claims of this concern against the Southern California Gas Company and the Midway Gas Company for compensation for natural gas. Bonds of a face value of \$23,000 are also to be issued to pay claims against the Southern California Gas Company, aggregating \$20,834.

The commission also authorized the Midway Gas Company to mortgage its property under certain conditions and to execute a trust agreement with the Mercantile Trust Company of San Francisco to secure an issue of \$88,395 five-year, 6 per cent gold notes.

as the tank has never been a great success. Only those repairs that are absolutely necessary will be made at the present time, probably costing from \$3,000 to \$5,000.

City Engineer Orbison and Deputy Dewey concur in terming the affair an inexcusable blunder. Mr. Dewey says it is well known to everyone who has worked on the City Farm that the Cameron type tanks are always full of dangerous gases and expressed surprise that any City Farm employee could have thought of starting a fire near the tank.

The tank was completed in December, 1910, and was built by Andrew Holloway. It was regarded as a fine piece of reinforced concrete work.

## BUTTONLATH FACTORY.

The Buttonlath Manufacturing Company is constructing a plant at the corner of Vernon and Boyle avenues in Vernon for the purpose of manufacturing its product known as buttonlath. It is described as a "rust-proof, sound-proof and fireproof substitute for metal or wooden lath." It has been approved by the building commission for use in all classes of buildings in Los Angeles. The buildings cover two and a half acres. This is a Los Angeles invention patented by James P. Saxon of this city. It started a year ago in small quarters, and now has installed a machine with a capacity of 18,000 boards per day, equal to 96,000 square feet. The material used is gypsum plaster, which abounds in the section, on paper board, also a local product from two companies operating in the vicinity.

## CEMENT PIPE VS. CLAY PIPE.

Now that the main sewerage system is well under way, under the \$300,000 contract given by the city to Bent Bros., war between the concrete sewer pipe men and the manufacturers of vitrified clay pipe over \$100,000 worth of lateral and extension contracts has reached the trench stage with the soldier agents of each throwing verbal hand grenades at each other.

For the purpose of deciding which pipe to use in their laterals connecting with the main sewer, the residents have formed groups of districts. They have held meetings, gotten up petitions and counter-petitions, hired lawyers and agitated the merits of the two brands of pipes before the City Commissioners, always egged on by the pipe agents. As the taxpayers do their own lateral building, the kind of pipe they use "is their funeral."

Half-page advertisements in the local newspapers set forth the alleged defects of one pipe or the other. Charges and counter-charges have been hurled by the various men at each other. The two pipe materials have been placed under the microscope, pulverized, squinted at, chewed, and even swallowed by the zealots of the armed camps in their endeavor to prove one or the other pipe is the best or the worst.

## EXPLOSION AT PASADENA SEPTIC TANK.

Burning grass ignited gases in a septic sewer tank at the City Farm at the City of Pasadena and 6,000 square feet of heavily reinforced concrete cover was blown skyward. It is estimated by City Engineer Orbison that 50,000 cubic feet of gas—sufficient to illuminate the whole city—exploded and damaged the tank to the extent of thousands of dollars.

That nobody was injured is due to the fact that the lone watchman, who stands guard on top of the tank had left his post to go down to the orchard only a moment or so before the explosion occurred.

The fire which caused the explosion was started by a workman who was burning weeds in the orchard. On the west bank where dirt had been thrown up against the tank, weeds had gathered, and the laborer, not realizing there was danger, set them on fire. Several minutes afterwards the gas in the tank exploded, wrenching and tearing the concrete slab top into thousands of pieces.

In its thinnest place the top is three and a half inches thick, and is reinforced with great twisted iron rods imbedded in the concrete. Commissioner Salisbury states that he is quite confident the cover will never be replaced,

### APARTMENT HOUSES

**SAN FRANCISCO**—Apartment house, 3 story and base, frame, \$10,000. Architect, none. Owner, Thomas Hamill, 268 25th avenue, S. F. Location, southeast corner Geary and 20th avenue. Will contain six suites of two and three rooms besides two stores. Interior will be finished in pine with some elm panels. Hardwood floors. Patent store fronts. Private baths and wall beds. Hot water system. Bath rooms finished in tile. Exterior covered with rustic and cement plaster on metal lath. Plans complete and work to be done by Day Labor.

**SAN FRANCISCO**—Apartment houses 2, 2 story and base, frame, \$10,500 each. Architect, none. Owner, F. W. Lurmann, 1246 Sacramento street. Location, north Washington street east of Leavenworth. Will contain a number of two and three room suites with wall beds and private baths. Interiors finished in pine and hardwood veneer. Hardwood floors. Steam heat, hot water system. Bath rooms finished in tile. Exterior covered with shiplap and cement plaster on metal lath. Plans complete and work to be done by Day Labor.

**MARTINEZ, CONTRA COSTA CO., CAL.**—Apartment house and stores, 2 story and base, brick and concrete, \$10,000. Architect, James T. Narbett, 704 Macdonald avenue, Richmond. Owner, Frank Prosser. The following bids were received for the construction of this building. No award has been made. Carl Nelsion, \$10,143; C. D. Mohr, \$10,190; C. A. Jeffers, \$10,400; Guttlebin Bros., \$10,575; J. J. Widmer, \$10,584; J. S. Hannah, \$10,993; D. H. McQuiddy, \$10,997; M. Morton, \$10,997; Fletcher & Winlund, \$10,927.

**SAN FRANCISCO**—Apartment house, 6 story and base, brick and steel, \$150,000. Architect, J. C. Hladik, Monadnock Bldg., S. F. Owner's name withheld. Location, northeast corner Van Ness and McAllister. Will contain a total of 200 rooms, arranged in two and three room suites. First floor arranged for nine stores and lobby. Interior finish pine, hardwood and ornamental plaster. Hardwood floors, tile bath rooms and wall beds. Patent store fronts. Steam heat, oil burning system, hot water supply and vacuum cleaning. Exterior faced with white glazed brick. Plans complete and figures being taken.

**SAN FRANCISCO**—Apartment house, 3 story and base, frame, \$35,000. Architect, C. O. Clausen, Hearst Bldg., S. F. Owner's name withheld. Location, Jordan Park. Will contain twelve suites of four and five rooms. Interior finished in pine, red gum and hardwood. Hardwood floors. Wall beds, steam heat, oil burning furnace, hot water supply. Bath rooms finished in tile. Exterior, brick veneer and ce-

ment plaster. Plans complete and figures being taken.

**SAN FRANCISCO**—Apartment house, 3 story and base, frame, \$15,000. Architect, none. Owners, S. J. Sterner and C. M. Olson, 374 6th avenue, S. F. Location, northeast corner Pacific and Leavenworth, covering an area of 45 by 59½ feet. Will contain twelve suites. Interior finish, pine, hardwood and white enamel. Hardwood floors. Steam heat, wall beds and tile bath rooms. Lobby finished in tile and ornamental plaster. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

**SAN FRANCISCO**—Apartment house, 3 story and base, frame, \$15,000. Architects, Rousseau & Rousseau, 110 Sutter street, S. F. Owner's name withheld. Location, Jones street north of Washington. Will contain six suites of four rooms each. Interiors will be finished in pine with some hardwood veneer and hardwood floors. There will be steam heat, oil burning system and hot water supply. Wall beds. Bath rooms finished in tile. Marble and tile wainscot. Exterior covered with cement plaster. Plans complete and figures being taken.

**SAN FRANCISCO**—Apartment house 4 story and base, Class C construction. Cost not stated. Architects Rousseau & Rousseau, 110 Sutter street, S. F. Owner's name withheld. Location, northwest corner of Geary and Hyde streets, covering an area of 57½ feet by 87 feet. Will contain 63 suites of two and three rooms. Interior finish pine and hardwood with hardwood floors. Steam heat, oil burning plant, automatic elevator, hot water system and vacuum cleaning. Wall beds. Bath rooms finished in tile. Marble and tile wainscot. Exterior faced with cement plaster. Plans complete and figures being taken.

### Contracts Awarded.

**SAN FRANCISCO**—Apartment house 3 story and base, frame, \$14,000. Architect, Charles J. Rousseau, 46 Kearny street, S. F. Owner, James K. Fraser. Contractor, W. S. Fraser, 1205 11th avenue, S. F. Contract price, \$14,000.

### BONDS.

**MODOC, MODOC CO., CAL.**—At a meeting of the Board of Supervisors it was decided to bid for \$200,000 of state highway bonds at par and accrued interest to date of delivery. It was further ordered that the money be expended for road work in Modoc County on the Pit River route and for no other purpose.

**HOOQUIAM, WASH.**—The proposition to vote bonds of \$115,000 for the paving of arterial streets across the city and the construction of two bridges failed to carry.

**GLENDORA, LOS ANGELES CO., CAL.**—The Board of Trustees is con-

templating the calling of an election to vote bonds of \$60,000 to defray one-half of the expense of street improvements.

**NEVADA CITY, NEVADA CO., CAL.**—A petition has been circulated here asking Congressman John E. Raker to use his services in securing an appropriation to put in a big dam on Bear River in order that the hydraulic properties on Dutch Flat, You Bet, Lowell Hill, Quaker Hill, Liberty Hill and that entire section may be worked. The petition prays for an endeavor to secure \$150,000 for works on the Bear River.

**TUCSON, ARIZ.**—A special election will be held in Pima County on October 26th for the purpose of voting \$400,000 in bonds for the improvement of county highways.

**MODESTO, STANISLAUS CO., CAL.**—The Board of Supervisors has provided a fund in the budget for the construction of an \$85,000 concrete bridge over the Tuolumne River at Modesto.

**GLOBE, ARIZ.**—The Board of School Trustees contemplates calling a special election for the purpose of voting bonds of \$30,000 for the construction of additions to the grammar school buildings.

**SANTA CLARA, SANTA CLARA CO., CAL.**—The proposition to call an election to vote bonds for the paving of the principal streets in this city is meeting with the approval of the voters, and from present indications the election will carry by a large majority.

**SELBY, CONTRA COSTA CO., CAL.**—The bonds of the Selby School District have been sold to Mrs. M. M. Wells of Concord for \$11,517. An architect will be selected immediately to prepare plans for the building for which the bonds were voted.

**GOODING, IDA.**—The following sums have been appropriated for expenditure this fall: Bliss Highway District, \$50,000; Hagerman Highway District, \$18,000, and the Appleton District, \$25,000.

**DEMING, N. MEX.**—Bonds of \$100,000 have been voted by Luna County for the improvement of the main county highways.

**BAKERSFIELD, KERN CO., CAL.**—Petitions will be circulated here to ask the Board of Supervisors to call a special election for the purpose of voting bonds in the sum of \$200,000 for the construction of a scenic road from Bakersfield to the Kern River at Weldon. This will be the first link of the contemplated road to Mt. Whitney.

**MADERA, MADERA CO., CAL.**—Bonds of \$12,000 have been voted for the construction of a concrete wall at the foot of D street.

**RIVERDALE, PRESNO CO., CAL.**—Bonds of \$25,000 have been voted for the erection of a school building.

**EAGLE ROCK, SCHOOL DISTRICT, CAL.**—Following a mass meeting of the citizens of Eagle Rock School District, the Board of Trustees has been instructed to call a special election for the purpose of voting bonds in the sum of \$65,000 for school purposes. It is proposed to erect a four-room and auditorium building at a central location at a cost of \$35,000 and two two-room buildings in the ends of the district at a cost of \$15,000 each.

**RICHMOND, CONTRA COSTA CO., CAL.**—A selection will be made on Oc-

tober 15th by the voters for a site for the new city hall building. On selection of the site plans for the structure will be ordered.

**PORTLAND, ORE.**—Dr. K. A. J. MacKenzie, dean of the medical department of the State University, is supervising the raising of the \$25,000 funds necessary to construct the proposed \$100,000 unit to the group of buildings.

The last legislature appropriated \$75,000 on condition that an additional sum of \$25,000 was raised.

**PORTLAND, ORE.**—O. Laugaard, Railway Exchange Building, Portland, is acting in the capacity of consulting engineer for several large irrigation projects.

An election will be held October 2 in the Suttle's Lake Irrigation District to vote on the question of issuing bonds in the sum of \$600,000 for the construction of an irrigation system for 12,000 acres.

Another large project, the cost of which has been given at \$1,250,000, is to be constructed near Brewster, Wash. The Brewster Irrigation District has already voted the bonds with which to build 50 miles of canal, 20 miles of dump and other improvements.

## BRIDGES, DAMS AND HARBOR WORK.

**OAKLAND, CAL.**—Bridge repairs, \$1,350 and \$2,500. Engineer, County Surveyor, Oakland. Owners, Alameda County. Bids will shortly be advertised by the Supervisors for the construction of an asphaltic mastic or alternate surfacing on the Calaveras Creek and the Bay Farm Island bridges.

**UKIAH, MENDOCINO CO., CAL.**—Bridge construction, reinforced concrete. Engineer, County Surveyor, Ukiah. Owners, Mendocino County. Plans and specifications for the construction of the Wages Creek and Westport grade bridges have been adopted by the County Supervisors and bids have been ordered called to be received up to 2 p. m. October 5th. Further information may be had from the County Surveyor at Ukiah.

**OROVILLE, BUTTE CO., CAL.**—Bridges, reinforced concrete. Cost not stated. Engineer, County Surveyor, Oroville. Owners, Butte County. Bids will be opened on October 4th by the Board of Supervisors for the construction of bridges Nos. 5 and 7 on the Biggs and Princeton road. Plans can be secured from the architect.

**NAPA, NAPA CO., CAL.**—Bridges, steel and reinforced concrete. Cost not stated. Engineer, County Surveyor, Napa. Owners, Napa County. The County Supervisors of Napa County have ordered bids received for the following bridges. For the construction of a steel and concrete highway bridge across Nigger Creek on the county road leading from Napa to Berryessa Valley. For the construction of a steel and concrete highway bridge across Walnut Grove Creek on the county road leading from Napa to Berryessa. For the construction of a steel and concrete highway bridge across Steel Canyon Creek on the county road leading from Napa to Berryessa Valley. Bids will be received for the above work until Octo-

ber 13th, 10 a. m. Plans and specifications and full information may be had from the County Surveyor at Napa.

**HANFORD, KINGS CO., CAL.**—Canal construction. Cost not stated. Engineer, County Surveyor Ben Duffield, Hanford. Owners, Kings County. Plans and specifications prepared by County Surveyor Ben Duffield have been approved by the County Supervisors and State Highway Commission, and bids will be received until October 4th for the construction of a concrete bridge to span the Lakeside Canal, 4 miles east of this city. The structure will be about 20 feet in width and 60 feet in length across the canal. Further information may be had from the County Surveyor at Hanford.

**VENTURA, VENTURA CO., CAL.**—River protection work. Cost not stated. Engineer, County Surveyor, Ventura. Owners, Ventura County. Bids are now being received for the protection work on the Foothill Boulevard. Approximate quantities are: Timber piles 20 feet long, 54; 1½ inch galvanized wire cable, 2,000 feet; barb wire, 3,000 feet. Bids will be opened on October 5th at 3 p. m.

**SAN LUIS OBISPO, SAN LUIS OBISPO CO., CAL.**—Jetty, pile construction. Cost not stated. Engineer, County Surveyor, San Luis Obispo. Owners, San Luis Obispo County. The Board of Supervisors has ordered bids received until October 11th for the construction of a pile jetty on the north side of Santa Maria River. The proposed jetty will be built in a northwesterly direction and will extend out into the river for a distance of 3,600 feet. Plans and specifications may be had from the County Surveyor at San Luis Obispo.

**MARYSVILLE, YUBA CO., CAL.**—Bridges, 2, reinforced concrete. Cost not stated. Engineer, County Surveyor, L. B. Cook, Marysville. Owners, Yuba County. Plans of County Surveyor L. B. Cook for two bridges to be located on the road between this city and Smartsville have been adopted by the Supervisors. The plans call for a 19-foot bridge to span a creek near Smartsville and a 24-foot extension to the Timbuektoo bridge. Both bridges are in the Fourth District, of which J. J. Casey is representative. The County Clerk was authorized to advertise for bids for the bridge construction work.

## Contracts Awarded.

**SONORA, TUOLUMNE CO., CAL.**—Bridge, reinforced concrete, \$4,060. Engineer, County Surveyor, Sonora. Owners, Tuolumne County. Contractor, W. A. Stratton, Richmond. Contract price, \$4,060.

**UKIAH, MENDOCINO CO., CAL.**—Bridges, timber and concrete, \$900 and \$1,290. Engineer, County Surveyor, Ukiah. Owners, Mendocino County. Contractor, Al. Carlson, Ukiah. Contract price, \$900 and \$1,290.

**SAN ANDREAS, CALAVERAS CO., CAL.**—Bridge, reinforced concrete, \$5,000. Engineer, County Surveyor, San Andreas. Owners, Calaveras County. Contractors, Blumoxe & Co., Menadnock Bldg., S. P. Contract price \$5,000.

**SANTA ROSA, SONOMA CO., CAL.**—Bridges and retaining wall, reinforced concrete, \$2,772 and \$1,301. Engineer, County Surveyor, Santa Rosa. Owners,

Sonoma County. Contractor, Walter L. Proctor, Santa Rosa. Contract price, \$2,772 and \$1,304.

## FACTORIES AND WAREHOUSES

PORTLAND, ORE. — Factory and salesroom, 2 story and base, reinforced concrete, \$30,000. Architects, Jacobberger & Smith, Board of Trade Bldg., Portland. Owner, Gay Lombard. Location, southeast corner of Park and Davis streets. The main portion of the building will be occupied by salesrooms, which will be finished in pine and hardwood with a tile floor. The upper floor will contain shipping rooms and machine shop. Interior finish will be of pine. Exterior will be faced with cement plaster. Plans are complete and figures are being taken.

SAN FRANCISCO—Factory, 4 story and base, reinforced concrete, \$200,000. Architect, Charles Peter Weeks, Mutual Bank Bldg., S. F. Owner, John Bollman. Location, 4th and Brannan streets, covering a large ground area. Construction fireproof. Interior finish pine, hardwood in offices. Steam heat, elevator service, special machinery, hot water system and conveyor machinery. Hollow tile interior partitions. Metal window sash and frames. Fireproof doors. Exterior faced with cement plaster. Plans nearly ready for figures.

WHITTIER, LOS ANGELES CO., CAL.—Packing house, 1 story and base, hollow tile. Cost not stated. Architect, Alfred W. Reed & Charles E. Garstang, Black Bldg., L. A. Owners, Murphy Oil Co. Will cover an area of 162 by 251 feet. Concrete floor. Special machinery. Exterior faced with cement plaster. Plans complete and figures being taken.

## FIRE REPORT

LOS ANGELES, CAL.—Fire destroyed the Union Warehouse Company building at Alameda and North Main streets, last week, causing a loss of \$1,000,000. Preparations are now being made to have the structure rebuilt.

THE DALLES, ORE.—The Masonic Temple building was destroyed in a recent fire, causing a loss of \$55,000.

WEED, SISKIYOU CO., CAL.—The Southern Pacific roundhouse has been destroyed by fire at a loss of \$10,000. Machinery, buildings and several cars were destroyed.

SAN BERNARDINO, SAN BERNARDINO CO., CAL.—A blaze in the kitchen of the San Bernardino County Hospital threatened to destroy the entire building. The fire was extinguished only when damage to the amount of \$75,000 was done.

MONTREAL, CANADA.—The Princess Theatre, located on St. Catherine street, was destroyed by fire last week at a loss of \$100,000. The owners state that the structure will be rebuilt.

UPPER LAKE, LAKE CO., CAL.—Fire caused a loss of \$20,000 when three business buildings and one residence were totally destroyed. The owners of the destroyed structures are Frank Howe and George Scott.

## FLATS

SAN FRANCISCO—Flats, 2 story and base, frame, \$5,000. Architect, none. Owner, J. Harold Johnson, 745 9th avenue, S. F. Location, west 15th avenue south of Anza. Will contain two flats of five and six rooms. Interior finish, pine and hardwood veneer. Hardwood floors. Open fire places and tile or brick mantels. Automatic water heaters. Bath rooms finished in tile. Exterior covered with cement plaster and rustic. Plans complete and work to be done by Day Labor.

SAN FRANCISCO—Flats, 2 story and base, frame, \$1,000. Architect, none. Owner, Mrs. Marie Sterner, 1621 Lake street, S. F. Location, east 6th avenue north of Geary, covering an area of 25 by 66 feet. Will contain two flats of six rooms each. Interiors finished in pine, hardwood veneer and white enamel. Hardwood floors. Open fire places and tile or brick mantels. Bath rooms finished in tile. Automatic water heaters. Exterior covered with shiplap and cement plaster. Plans complete and work to be done by Day Labor.

SAN FRANCISCO—Flats, 2 story and base, frame, \$10,000. Architects, Fabre & Bearwald, Merchants' National Bank Bldg., S. F. Owner's name withheld. Location, Bartlett near 26th street. Will contain four flats. Interior finish pine and elm panels. Some hardwood floors. Open fire places and tile mantels. Bath rooms finished in imitation tile. Automatic water heaters. Exterior covered with shiplap. Plans complete and figures being taken.

SAN FRANCISCO—Flats, 2 story and base, frame, \$3,000. Architect, none. Owner, A. M. Sylvia, 371 30th avenue, S. F. Location, east 20th avenue north of Anza, covering an area of 25 by 50 feet. Will contain two flats of five and six rooms. Interior finish pine and redwood. Hardwood floors. Open fire places and tile mantels. Bath rooms finished in tile. Automatic water heaters. Exterior covered with cement plaster on metal lath. Plans complete and work to be done by Day Labor.

SAN FRANCISCO—Flats, 3, 2 story and base, frame, \$5,000 each. Architects, Thomas & Oliver, Pantages Theatre Bldg., Oakland. Owner, Henry Lehfeldt. #### Lighthouse Service, Mineral Oil.

The following bids were received by the lighthouse inspector, 19th district, Honolulu, H. T., for 8,000 gallons mineral oil for light stations for the fiscal year ending June 30, 1916:

Associated Oil Co., \$1,280; does not comply with government specifications.

H. Hackfeld & Co., Honolulu, H. T., \$1,356; accepted.

Standard Oil Co., \$1,400.

#### Greely, Colo., Shelving.

The contract for installing metal vault shelving in the U. S. post office at Greely, Colo., has been awarded to the General Fireproofing Co., Washington, D. C., at \$136.50; time 90 days.

#### HALLS AND SOCIETY BUILDINGS

SAN FRANCISCO—Lodge hall alterations, \$4,000. Architect, W. H. Crim, Jr., 425 Kearny street, S. F. Owners, Independent Order of Foresters. Location, 1144 Market street. Work will consist of changing stairs, interior partitions and plastering. Plans being prepared.

VISALIA, TULARE CO., CAL.—Auditorium, 2 story and base, brick, \$35,000. Architects, Coates & Traver, Rowell Bldg., Fresno. Owners, City of Visalia. Will contain large auditorium, display rooms and offices. Interior finish pine with maple floor in auditorium. Steam heat, oil burning plant and vacuum cleaning. Exterior faced with pressed brick. Plans being prepared.

TULARE, TULARE CO., CAL.—Lodge hall and stores, 2 story and base, brick. Cost not stated. Architect, Ernest J.

Kump, Rowell Bldg., Fresno. Owner, E. J. Ryan. Will contain stores on the first floor and lodge rooms above. Interior finish pine with maple floor. Central heating system and patent store fronts. Exterior faced with pressed brick. Plans being prepared.

#### HOSPITALS.

EUREKA, HUMBOLDT CO., CAL.—Hospital, 1 and 2 story and base, frame and plaster, \$20,000. Architect, E. J. Burke, Eureka. Owners, Humboldt County. Will contain three wards and several private rooms. Interior finish pine and white enamel. Hardwood and tile floors. Central heating system. Hot water system and vacuum cleaning. Special hospital plumbing. Exterior covered with cement plaster on metal lath. Plans being prepared.

VENTURA, VENTURA CO., CAL.—Hospital cottages, etc., 1 and 2 story frame and concrete. Cost not stated. Architect, State Architect George B. McDougall, Sacramento. Owners, State of California. Bids will be received until October 18th for the construction of two cottages and a detention building at the California State Home for Girls near Ventura. Plans and specifications can be secured from the architect. An official proposal appears in another column of this issue.

SAN FRANCISCO—Removing buildings, \$4,995. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Fred C. Jones presented the lowest bid at \$4,995 for removing the frame buildings on the old Tuberculosis Hospital site. He will be awarded the contract. A complete list of the figures received appears under the heading of San Francisco in this issue.

#### Contracts Awarded.

OLYMPIA, WASH. — State hospital buildings, reinforced concrete and steel, \$227,000. Architect's name not given. Owners, State of Washington. Contractors, Boyajohn-Arnold Co., Panama Bldg., Portland. Contract price, \$227,000.

#### HOTELS.

#### Contracts Awarded.

ELSINORE, RIVERSIDE CO., CAL.—Hotel, 1 and 2 story and base, frame, \$41,000. Architect, Sam Neighbors, Owner, Mrs. Orpha Eastman, Elsinore. Contractors, G. W. Gilbreth & Co., Hollingsworth Bldg., L. A. Contract price, \$41,000.

#### IRRIGATION PROJECTS

PORTERVILLE, TULARE CO., CAL.—Irrigation project. Cost not stated. Engineer's name not given. Owners, Strathmore-Lindsay Irrigation District. Members of the Board of Supervisors approved the plans for the proposed Strathmore-Lindsay Irrigation District, to be organized under the terms of the Wright law. By impounding the flood waters it is proposed to irrigate upward of 20,000 acres of fine foothill orange land. It is estimated that the eventual cost of the work, including diversion canals and laterals, will total nearly \$2,000,000. Boundary

lines of the proposed district are still at issue before the Supervisors.

### LIBRARIES.

OAKLAND, CAL.—Library, 2 story story and base, brick and steel, \$35,000. Architect, W. H. Weeks, 75 Post street, S. F. Owners, City of Oakland. Will contain two reading rooms, assembly hall and stack room. Interior finish, pine and hardwood with maple floors. Steam heat, oil burning furnace and vacuum cleaning. Metal book stacks. Exterior faced with pressed brick. Plans complete and figures being taken. Bids close on October 5th.

GRASS VALLEY, NEVADA CO., CAL.—Library, 1 story and base, brick, \$15,000. Architect, William Mosser, Nevada Bank Bldg., S. F. Owners, Town of Grass Valley. Will contain reading room, stack rooms and office for the librarian. Interior finish pine and hardwood with maple floors. Furnace heat. Metal book stacks. Exterior faced with pressed brick. Plans complete and figures to be called for shortly.

### RAILROAD CONSTRUCTION AND EQUIPMENT.

SAN DIEGO, CAL.—Railroad construction. Cost as follows. Engineer's name not given. Owners, Atchison, Topeka and Santa Fe. The State Railroad Commission has ordered the Atchison, Topeka and Santa Fe Railroad to construct a line connecting Ocean-side in San Diego County with Temecula, 25 miles northeast. The order makes it optional to route the line by way of Fallbrook, 12 miles from Temecula, or to run it through the Rainbow Valley. The cost of the Rainbow Valley route is placed at \$822,000, and the Fallbrook and Temecula, \$627,000.

### RESIDENCES.

SAN FRANCISCO—Residences, 2, 2 story and base, frame, \$4,500 each. Architect, D. C. Coleman, Merchants' National Bank Bldg., S. F. Owner, M. Fisher, 683 Mission street, S. F. Location, Claremont Court. Each house will contain seven rooms, two baths and sleeping porch. Interior finish, pine, hardwood and white enamel. Hardwood floors, furnace heat and open fire places. Mantels tile and brick. Tile floors and wainscot in bath rooms. Automatic water heaters. Exterior covered with brick veneer and cement plaster. Plans complete and work to be done by Day Labor.

SAN FRANCISCO — Residence, 2 story and base, frame, \$3,000. Architect, none. Owners, William Bahrs and J. B. Spaeth, 2645 McAllister street, S. F. Location, east 17th avenue north of Balboa. Will contain seven rooms, bath and sleeping porch. Interior finish pine and hardwood veneer. Hardwood floors. Open fire place and tile mantel. Plans complete and work to be done by Day Labor.

SAN FRANCISCO — Residence, 2 story and base, frame, \$2,500. Architect, none. Owner, J. S. McClelland, 520 12th avenue, S. F. Location, east 12th avenue south of Balboa. Will contain six rooms, bath and sleeping

porch. Interior finish pine and hardwood veneer. Hardwood floors, open fire place and tile mantel. Bath room finished in tile. Automatic water heater. Exterior covered with cement plaster on metal lath. Plans complete and work to be done by Day Labor.

SAN FRANCISCO — Residence, 2 story and base, frame, \$2,900. Architect, none. Owner, A. T. Morris, 501 11th avenue, S. F. Location, west 11th avenue north of Balboa. Will contain six rooms, bath and basement garage. Interior finish pine with some white enamel and hardwood floors. Open fire place and tile mantel. Bath room finished in tile. Automatic water heater. Exterior covered with cement plaster and rustic. Plans complete and work to be done by Day Labor.

SAN FRANCISCO — Residence, 2 story and base, frame, \$5,000. Architect, none. Owner, Oscar W. Thunberg, 678 9th avenue, S. F. Location, east 10th avenue north of Anza. Will contain seven rooms, baths, sleeping porch and basement garage. Interior finish pine, hardwood and white enamel. Hardwood floors. Furnace heat, open fire place and tile or brick mantel. Bath room finished in tile. Automatic water heater. Exterior covered with cement plaster on metal lath. Plans complete and work to be done by Day Labor.

SAN FRANCISCO—Residences, 2, 2 story and base, frame, \$6,000 each. Architects, Falch & Knoll, Hearst Bldg., S. F. Owners, Eisenbach Co., Flatiron Bldg., S. F. Location, east Cherry north of Sacramento. Will contain eight rooms each, two baths, sleeping porches and basement garages. Interiors finished in pine, hardwood and white enamel. Hardwood floors. Furnace heat, open fire places and tile or brick mantels. Bath rooms finished in tile. Automatic water heaters. Exterior covered with cement plaster on metal lath. Plans complete and figures being taken.

SAN FRANCISCO — Residence, 1 story and base, frame, \$2,000. Architect, none. Owner, Carl Jorgensen, 767 Corbett avenue, S. F. Location, east Corbett avenue south of Moren. Will contain five rooms and bath. Interior finished in pine and redwood. Some hardwood floors. Open fire place and tile mantel. Imitation tile in bath room. Automatic water heater. Exterior covered with rustic and cement plaster. Plans complete and work to be done by Day Labor.

SAN FRANCISCO — Residence, 2 story and base, frame, \$2,500. Architect, G. E. Gottschalk, Phelan Bldg., S. F. Owner, A. McBarnes. Location, east 47th avenue north of Cabrillo. Will contain five rooms, bath and sleeping porch. Interior finish pine with some elm panels. Hardwood floors. Open fire place and tile or brick mantel. Bath room finished in tile. Automatic water heater. Exterior covered with rustic and cement plaster on metal lath. Plans complete and work to be done by Day Labor.

SAN FRANCISCO—Residences, 3, 2 story and base, frame, \$3,000 each. Architect, August G. Headman, New Call Bldg., S. F. Owner, Benj. Schloss. Location, 27th avenue and California street. Will contain seven rooms, bath and sleeping porch. Interiors finished

in pine, hardwood veneer and white enamel. Hardwood floors and open fire places. Mantels tile and brick. Furnace heat. Bath rooms finished in tile. Automatic water heaters. Exterior covered with cement plaster on metal lath. Plans being prepared.

BERKELEY, ALAMEDA CO., CAL.—Residence, 1 story and base, frame, \$2,500. Architect, none. Owner, Z. M. Steves, 1827 Marin avenue. Location, southeast corner of Posen and Carlotta avenues. Will contain six rooms, bath and sleeping porch. Interior finish pine and white enamel. Hardwood floors. Open fire places and tile or brick mantels. Tile wainscot and floor in bath room. Automatic water heater. Exterior covered with cement plaster on metal lath. Plans complete and work to be done by Day Labor.

BERKELEY, ALAMEDA CO., CAL.—Residence alterations and additions, frame, \$8,500. Architect, F. Holberg Reimers, 2145 Shattuck avenue, Berkeley. Owner, W. W. Mackie. Location, Shasta street. Will contain eight rooms, two baths and sleeping porch. Interior finish pine, hardwood and white enamel. Hardwood floors. Furnace heat, open fire place and tile or brick mantel. Bath rooms finished in tile. Automatic water heater. Exterior covered with cement plaster on metal lath. Plans complete and figures being taken.

OAKLAND, CAL.—Residence, 1 story and base, frame, \$2,500. Architect, none. Owner, C. J. Pirang, 5487 Claremont avenue, Oakland. Location, south 58th street well of Call. Will contain five rooms and bath. Interior finish pine, hardwood veneer and white enamel. Hardwood floors. Open fire place and tile or brick mantel. Bath room finished in tile. Automatic water heater. Exterior covered with rustic and cement plaster on metal lath. Plans complete and work to be done by Day Labor.

OAKLAND, CAL.—Residence, 1 story and base, frame, \$2,500. Architect, none. Owners, Collins Bros., 825 57th street, Oakland. Location, west 14th avenue south of Hempel. Will contain six rooms, bath and sleeping porch. Interior finish pine and white enamel. Hardwood floors. Open fire place and tile mantel. Bath room finished in tile. Automatic water heater. Exterior covered with rustic and cement plaster on metal lath. Plans complete and work to be done by Day Labor.

SACRAMENTO, CAL.—Residence, 1 story and base, frame, \$2,500. Architect, none. Owner, W. D. McKoy, 3023 E street, Sacramento. Location, 3145 E street. Will contain five rooms and bath. Interior finish pine and white enamel. Hardwood floors. Open fire place and tile mantel. Bath room finished in imitation tile. Automatic water heater. Exterior covered with rustic. Plans complete and work to be done by Day Labor.

OAKLAND, CAL.—Residence, 1 story and base, frame, \$2,000. Architect, none. Owner, E. L. Higgins, 5250 Mills avenue, Oakland. Location, west Thomas street. Will contain five rooms and bath. Interior finish pine. Hardwood floors and open fire place. Mantel tile. Imitation tile in bath. Automatic water heater. Exterior cov-

ered with rustic and cement plaster. Plans complete and work to be done by Day Labor.

OAKLAND, CAL.—Residence, 1 story and base, frame, \$2,000. Architect, none. Owner, John A. Bischoff, 6045 Harwood avenue, Oakland. Location, east 16th street east of Colby. Will contain six rooms and bath. Interior finish pine and white enamel. Hardwood floors. Open fire place and tile mantel. Bath room finished in tile. Automatic water heater. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

## SCHOOLS.

BERKELEY, ALAMEDA CO., CAL.—University buildings. Class A construction. Cost as follows. Architect, John Galen Howard, 604 Mission street, S. F. Owners, Regents of the University of California. The next work to be undertaken at the University of California will be that of the second unit of the Agricultural Hall, costing approximately \$350,000. This will be followed by the construction of the new portions of the Doe Library, which will double the present size of that structure and will cost about \$400,000. The new chemistry building will then be started. It is understood that these buildings will be placed under construction before the end of 1915. A second unit of the Agricultural Building group will be constructed north and west of Agricultural Hall. The exterior of the building will be of California granite, similar in type to Agricultural Hall. Historic chem pond will be the site of a new chemistry building, similar in type to the other buildings of the Hearst plan. Unusually large window space will be incorporated into the building plans, so that all the light possible will be utilized and laboratory conditions may be more ideal. The new building will not interfere with the existing buildings. The remaining \$400,000 will be used to complete the Doe Library. Two more stories and an attic are to be added. This will provide another reading room two-thirds the size of the present one, and addition similar and administration rooms. Space for additional book shelves to hold 700,000 volumes will also be provided.

ALAMEDA, ALAMEDA CO., CAL.—Schools, 1 and 2 story, brick and frame. Cost not given. Owners, City of Alameda. Architects as follow. The following architects have been selected by the Alameda Board of Education to prepare plans for additions and alterations to be made at several of the city's schools. Henry H. Meyers, Kohl Bldg., S. F., addition to the Washington School, frame and brick. Cost not stated. Cunningham & Politeo, First National Bank Bldg., S. F., 1 story and basement brick building for Lincoln School; addition to Everett School and rehabilitation of the Porter School. Carl Werner, Phelan Bldg., S. F., associated with Charles E. H. Rogers, Kohl Bldg., 1 and 2 story brick building for Porter School. Further mention will be made of the work when bids are called.

SAN FRANCISCO—School, 1 story and base, brick and concrete, \$21,000.

Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Location, corner of Polson street and Tompkins avenue. Will contain six class rooms and an assembly hall. Interior finish, pine with maple floors. Central heating system, program clocks and vacuum cleaning. Exterior faced with pressed brick. Plans being prepared.

DOONVILLE, MENDOCINO CO., CAL.—School, 1 story, frame. Cost not stated. Architect, none. Owners, Anderson Valley School District. Bids will be opened on October 2nd for a district school. Plans can be secured from the Superintendent of Schools at Ukiah.

FLORIN SCHOOL DISTRICT, SACRAMENTO CO., CAL.—School, 1 story, frame. Cost not stated. Architect, George C. Sellon, 1065 K street, Sacramento. Owners, Florin School District. Bids will be opened on October 8th for the construction of a four-class room building. Exterior covered with rustic. Plans can be secured from the architect.

SAN JOSE, SANTA CLARA CO., CAL.—School, 1 and 2 story addition, frame, \$200,000. Architect, State Architect, George B. McDougall, Sacramento. Owners, State of California. Bids will be taken next week for the construction of a 12-room addition to the State Normal School at San Jose. Interior finish, pine with maple floors. Exterior cement plaster. Plans can be had from the State Architect. Further mention will be made of this work.

TORMEY, CONTRA COSTA CO., CAL.—School, 1 story and base, frame, \$10,000. Architect, Norman R. Coulter, 46 Kearny street, S. F. Owners, Selby School District. Will contain four class rooms, library and teachers' room. Interior finish pine. Central heating system, oil burning furnace. Exterior covered with cement plaster on metal lath. Plans being prepared.

LOS ANGELES, CAL.—School buildings, 2, 1 and 2 story, Class C construction. \$200,000. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, Jefferson School District. Construction, reinforced concrete to first floor line and brick above. Interior finish pine with maple floors. Steam heat, oil burning system, vacuum cleaning and program clocks. Exterior, pressed brick and cement plaster. Plans being prepared.

## Contracts Awarded.

SAN PEDRO, LOS ANGELES CO., CAL.—School, 2 story and base, brick, \$34,517. Architect, Lyman Farwell, Lankershim Bldg., L. A. Owners, City of San Pedro. Contractor, A. S. O'Neil, Lankershim Bldg., L. A. Contract price, \$34,517.

## SEWERS, STREET WORK & WATER SYSTEMS.

CALIFORNIA—State Highway construction. Cost not stated. Engineer, State Highway Commission, Forum Bldg., Sacramento. Owners, State of California. Bids will be opened on October 15th by the Highway Commission for construction in the following counties: Placer County, Lincoln to northern boundary, 9 miles, paved with Portland cement, Sonoma County, Redwood to Fairville, 1.2 miles, graded, Mariposa County, from westerly

boundary to Cathay White Rock road, 10 miles, to be graded. Plans can be secured from the State Highway Commission in Sacramento or its branch offices in San Francisco or Los Angeles. An official proposal appears in another column of this issue.

SAUSALITO, MARIN CO., CAL.—Sewer work and sidewalk repair. Cost not stated. Engineer, Town Engineer, Sausalito. Owners, Town of Sausalito. At the last meeting of the Board of Town Trustees the Town Engineer was instructed to prepare plans and specifications for the repair of the sewer on Locust street. The Town Engineer was also instructed to fix grades for sidewalks and streets on Lower San Carlos avenue.

VACAVILLE, SOLANO CO., CAL.—Street paving. Cost not stated. Engineer, Town Engineer Steiger, Vacaville. Owners, Town of Vacaville. The plans and specifications prepared by Town Engineer Steiger for the improvement of certain streets in Vacaville were adopted at the last meeting of the Trustees and the Clerk was instructed to advertise for bids. The plans provide for oiled macadam on Main street from gutter to gutter, while the gutters will be relaid and grouted (that is, the interstices will be filled up with cement, thus affording a smooth passageway for the water). Dobbins street from Main to Merchant, and Merchant street from Dobbins to Main will be similarly improved. The other streets along which the State Highway will pass through town will have a 15-foot roadway of rock in the center, over which will be placed a surface of oiled macadam, which will extend over the shoulders on each side for a distance of 2½ feet. Bush street from McClellan street to the depot will be similarly improved.

ROSEVILLE, PLACER CO., CAL.—Grade crossing, reinforced concrete, \$100,000. Engineer's name not given. Owners, Town of Roseville and Southern Pacific Co. The City Trustees are considering the matter of a subway at the Southern Pacific Railroad crossing in this city. The crossing at the present time is exceedingly dangerous and a blockade to traffic. C. M. Kipp, a local merchant, who is interested in the proposed work, has plans complete for the project, and these the Trustees will consider at their next meeting. The plans call for a structure 210 feet long and 80 feet for each incline and 80 feet level under the tracks, the inclines to have a grade of 6 per cent, and the bottom of the subway to be ten feet below the present level of the sidewalk. The plan calls for the raising of the railroad tracks for a distance of 2,000 feet each side of the crossing, placing them eight feet above the present grade. This would necessitate the raising of the station and all trackage.

STOCKTON, SAN JOAQUIN CO., CAL.—Sewer construction. Cost not stated. Engineer, City Engineer, Stockton. Owners, City of Stockton. The City Council has adopted plans and specifications for the construction of the big sewer system to be installed as a result of the bond election held in this city some time ago. The work consists of the construction of sanitary sewers in the southern part of

the city. A resolution was passed at the last meeting calling for bids on the work to be received October 1st. This particular portion of the work on which bids are now being received will cost approximately \$18,693.35, according to the estimates of the city engineer, and will be on South street, from East to Edison street, then west on South avenue to West street, and on McKinley avenue from South to Eighth street. The South avenue mentioned is a continuation of South street, from Edison to West street.

**HOLTVILLE, IMPERIAL CO., CAL.**—Water system extension. Cost not stated. Engineer, City Engineer, Holtville. Owners, Town of Holtville. The City Trustees have approved a plan submitted by property owners in block 112 to connect their homes with the city sewer system at their own expense. The sewer line is to be built by the property owners under their own contract, but under the supervision of the City Engineer.

**UKIAH, MENDOCINO CO., CAL.**—Road construction. Cost not stated. Engineer, County Surveyor, Ukiah. Owners, Mendocino County. The petition for the completion of the Navarro River project was recognized by the Supervisors last week and the County surveyor was ordered to make final surveys of the road to prepare for its construction.

**OROVILLE, BUTTE CO., CAL.**—Street paving, \$15,845. Engineer, City Engineer S. J. Norris. Owners, City of Oroville. City Engineer S. J. Norris has completed estimates for the Montgomery street pavement from Lincoln street to Fourth avenue, the cost of the work being placed at \$15,845. The average cost per square foot was 14.33 cents as compared with 14.4 cents for Bird street. The cost per lineal front foot was \$3.04 with 48 cents additional for street intersections. Bids on this work will soon be called for.

**VISALIA, TULARE CO., CAL.**—Street improvement. Cost not stated. Engineer, City Engineer, Visalia. Owners, City of Visalia. Bids are now being taken by the City Trustees for the improvement of West Main street, which will be paved to meet the State Highway. Bids close October 13th. Further information may be had from the City Engineer.

**BAKERSFIELD, KERN CO., CAL.**—Street pavement. Cost not stated. Engineer, City Engineer, Bakersfield. Owners, City of Bakersfield. The Bellevue road for a distance of three miles from Oak street to the river bridge west, and Brundage lane from H street to the State Highway east, a distance of one mile, are to be paved by the Board of Supervisors. The pavement in each instance will be 16 feet in width, the specifications calling for roads similar to those on South D and South Chester avenue. Bids are now being taken on the work and will close October 5th, 10:30 a. m. Plans and specifications together with full information may be had from the City Engineer.

**DAILY CITY, SAN MATEO CO., CAL.**—Sewer construction. Cost not stated. Engineer, City Engineer Kneese, Daily City. Owners, Daily City. At the meeting of the City Trustees last week En-

gineer Kneese presented plans and specifications for the Vista Grande District improvement. The work includes the construction of a storm sewer system, manholes, concrete curbing, cement sidewalks, asphalt and concrete paving and on the steep grades leading from Mission road on Knowles, Theta and Vista avenues vitrified brick will be installed. The cost of the work according to Kneese will be much lower than at first estimated. A resolution was adopted approving the plans for the work. Bids will soon be called for.

**SANTA BARBARA, SANTA BARBARA CO., CAL.**—Sewer construction. Cost not stated. Engineer, City Engineer, Santa Barbara. Owners, City of Santa Barbara. The City Council at their meeting last week adopted a resolution for the construction of the east side sewer, and bids will be ordered shortly.

**SAUSALITO, MARIN CO., CAL.**—Street improvement, \$1,465. Engineer, Town Engineer, Sausalito. Owners, Town of Sausalito. Three bids were received by the Sausalito Trustees for the street work on West and Valley streets, all being in excess of the engineer's estimates of \$1,465. The bid of W. H. Cowen was \$1,855; Leech & De Camp, \$1,841; Milbourn & Murray, \$1,573. No check accompanied the latter bid. Action was deferred on the bids.

**NAPA, NAPA CO., CAL.**—Street improvement. Cost not stated. Engineer, City Engineer, Napa. Owners, City of Napa. At the last meeting of the Napa City Council the following action was taken in the matter of street improvements. Resolutions of intention for improvement of Ash avenue from Union street to Grant avenue, on Clay from Jefferson to Madison, and for certain work on Jackson street, were adopted. Specifications for doing sewer work on Caymus street, also for work on Vallejo and Nursery streets were adopted and the work ordered done.

**SACRAMENTO, CAL.**—Street improvement. Cost not stated. Engineer, City Engineer, Sacramento. Owners, City of Sacramento. Bids will be opened on October 5th for the improvement of Schley avenue from east line of 31st street to a point 35 feet east of east line of Yardley avenue, be improved by removing and disposing of all surplus and refuse material, grading the roadway and constructing thereon an asphalt pavement, consisting of a hydraulic concrete foundation four inches in thickness, an asphaltic cement flush coat, and a sheet asphalt wearing surface 1½ inches in thickness.

**STOCKTON, SAN JOAQUIN CO., CAL.**—Sewer construction. Cost not stated. Engineer, City Engineer, Stockton. Owners, City of Stockton. The City Council has approved plans and specifications and will receive bids until October 5th for the third installment of storm water sewers to be done under the 1915 sewer bond fund. The specifications deal with the eastern end of the city and sewers will be laid on East, Eugenia, Della, Locust and Cedar streets, Hazel avenue, A, B, C, D, E, and F streets, East Weber avenue, East Main, East Market, Washington, East Washington, Sonora and East Sonora streets. The City Engineer's estimate for the work is \$17,678.30, and the

money is payable from the storm water sewer 1915 fund.

**REDWOOD CITY, SAN MATEO CO., CAL.**—Road improvement. Cost not stated. Engineer, County Surveyor, Redwood City. Owners, San Mateo County. The attention of the Supervisors was called at the last meeting for immediate action in making provisions for taking care of the new poor farm road. It was ordered that the County Engineer be instructed to put a two-inch Topeka, or other standard top, 16 feet wide from the Halfmoon Bay road past the county hospital to the Belmont road, the money to be paid out of the sum heretofore set aside for the Hillsborough to Crystal Springs Lake road.

**SAN LUIS OBISPO, SAN LUIS OBISPO CO., CAL.**—Street improvement. Cost not stated. Engineer, City Engineer, San Luis Obispo. Owners, San Luis Obispo. The City Engineer has been instructed by the City Council to prepare the necessary plans and specifications for the improvement of Monterey street between Chorro and Broad streets. On completion of plans bids will be called for.

#### Contracts Awarded.

**SANTA BARBARA, SANTA BARBARA CO., CAL.**—Street pavement. Cost not stated. Engineer, City Engineer, Santa Barbara. Owners, City of Santa Barbara. Contractors, F. R. Richie Co., Santa Barbara. Contract price not stated.

**ARBUCKLE, COLUSA CO., CAL.**—Street paving, \$5,574. Engineer, City Engineer, Arbuckle. Owners, City of Arbuckle. Contractors, Clark & Henery, Ochser Bldg., Sacramento. Contract price, \$5,574.

**MARYSVILLE, BUTTE CO., CAL.**—Sewer construction, \$13,500. Engineer, City Engineer, Marysville. Owners, City of Marysville. Contractors, Stanley & Ostrander, Sausalito. Contract price, \$13,500. Hewitt & Felch, Marysville, fill work at 42c per cubic yard.

**SOUTH SAN FRANCISCO, SAN MATEO CO., CAL.**—Street paving. Cost not stated. Engineer, Town Engineer, South San Francisco. Owners, Town of South San Francisco. Contractor, F. R. Richie, Chronicle Bldg., S. F. Contract price not stated.

**EUREKA, HUMBOLDT CO., CAL.**—Street improvement, \$5,069. Engineer, City Engineer, Eureka. Owners, City of Eureka. Contractors, Mercer-Fraser Co., Eureka. Contract price, \$5,069.

**MODESTO, STANISLAUS CO., CAL.**—Street paving. Cost not stated. Engineer, City Engineer, Modesto. Owners, City of Modesto. Contractors, Worswick Paving Co., Modesto. Contract price not stated.

**VISALIA, TULARE CO., CAL.**—Highway construction, \$13,800. Engineer, County Surveyor, Visalia. Owners, Tulare County. Contractor, J. E. Hines, Tulare. Contract price, \$13,800.

#### STORES AND OFFICES.

**OAKLAND, CAL.**—Stores and offices, 10 story and base. Class A construction. Cost not stated. Architect, August G. Headman, New Call Bldg., S. F. Owner's name withheld. Will contain several stores and about 110 offices. Steel frame, brick exterior walls. Interior finish pine and hardwood. Hol-

low tile interior partitions. Marble wainscot. Elevator service, steam heat and hot water system. Patent store fronts. Exterior faced with terra cotta. Plans being prepared.

**OAKLAND, CAL.**—Stores, 1 story, frame, \$2,000. Architect, none. Owner, Richard M. Lamb, Bureau of Licenses and Permits, City Hall, Oakland. Location, southeast corner of 35th and Market streets. Will contain two stores. Interior finish pine. Cement floor. Patent store fronts. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

**Contracts Awarded.**  
**OAKLAND, CAL.**—Stores, 1 story and base, brick and steel, \$12,000. Architect, C. W. Dickey, Central Bank Bldg., Oakland. Owners, Hawley Investment Co., Location, 15th and Franklin streets. Contractor, P. A. Muller, Syndicate Bldg., Oakland. Contract price, \$12,000.

**SEALED PROPOSALS**

**PROPOSALS FOR CANAL SUPPLIES.**

**PANAMA CIRCULAR 971**—Proposals for Transformers, Electric Motor, Electric Cable and Fuses, Outlets, Boxes, Conduits and Covers, Conduit, Cable Taps, Clusters, Copper Connectors, Cutouts, Push buttons, Sockets, Reflectors, Shades, Lamps, Switches and Attachments, Thermometers, Cable End Bells, Brass Screws, Lacquer and Varnish, Vulcanized Fibre and Cement or Fuller Board Paper.—Sealed proposals will be received at the office of the general purchasing officer, the Panama Canal, Washington, D. C., until **10:30 a. m., October 8, 1915**, at which time they will be opened in public, for furnishing the above mentioned articles and Attachments. General information relating to this circular (No. 971) may be obtained from this office or the office of the assistant purchasing agent, Fort Mason, San Francisco, Cal.; also from the U. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal. P. C. BOGGS, major, corps of engineers, U. S. army, general purchasing officer.

**PROPOSALS FOR CANAL SUPPLIES.**

**PANAMA CIRCULAR 969**—Proposals for Hose, Packing, Rubber Valves, Gaskets, Cotton Canvas, Sheeting, Magnesia Pipe Covering, Dust, Paint and Varnish, Brushes, Shovels, Tool Handles, Cable Clips and Thimbles, Gasoline and Locomotive Torches, Brass, Copper and Red Rubber Tubing, Steel Tapes, Soft Steel, Cotters, Turnbuckles, Auger Bits, Wire Nails, Copper Tacks, Hooks and Eyes, Iron Clamps, Station Lamps, Lanterns, Bed Knobs, Gongs, Horseshoes, Brass and Copper Wire, Hinges, Hasps, Screws, Bolts, Joining Shackles, Boat Spikes, Cylinder and Grease Valves, Leather, Leather Belting, Lead Lacing, Boiler Lagging, Iron or Steel Water Buckets, Mop Heads, Ladders, Water Closet Tanks, Slop Sinks, Wheelbarrows, Ships' Felt, Grindstones, Lintens, Globes, Lamp Chimneys, Bronze, Brass, Sheet Lead, Tin, Oil Cans, Marline, Oakum, Potassium Chlorate, Calcium Carbide, Stearic Acid Candles, Window Glass, Iron Brooms, Salt Water Soap, Twine, Candle Wicking, Chalk Line, Locks, Lumber Crayons, Rules, Railway Flags, Oilcloth, Paper Drinking Cups, Sandpaper, Emery Cloth, Toilet Paper, Metal Polish and Redwood and White Oak Lumber.—Sealed proposals will be received at the office of the general purchasing officer, the Panama Canal, Washington, D. C., until **10:30 a. m., October 1, 1915**, at which time they will be opened in public, for furnishing the above mentioned articles. Blanks and general information relating to this circular (No. 969) may be obtained from this office or the office of the as-

sistant purchasing agent, Fort Mason, San Francisco, Cal.; also from the U. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal. P. C. BOGGS, major, corps of engineers, U. S. army, general purchasing officer.

**PROPOSALS FOR BATTLESHIPS.**

**BATTLESHIPS**—Proposals for constructing by contract of two battleships, Nos. 43 and 44, will be received at the Navy Department until **12 o'clock noon, November 17, 1915**, when they will be publicly opened. A circular of requirements for said vessels is now ready and plans and specifications for their construction will be ready September 29 for distribution among prospective bidders. Forms of proposal and contract may be had on application to the department after September 29. JOSEPHUS DANIELS, secretary of the navy.

**PROPOSALS FOR CANAL SUPPLIES.**

**PANAMA CIRCULAR 970**—Proposals for Engine Lathe, Forcing Press, Bench Filing Machines, Valve Resetting Outfits, Bolt Heading and Straightening Rolls, Double Angle Shear, Plate Planer, Flanging Clamp, Pipe Machine, Hand Lever Punch, Metal Cutting Saw, Drill Press, Journal Bearings, Machine Bolts, Grip Nuts, Sarven Patent Wheels, Copper Wire, Copper, Steel and Brass Tubing, Gate Valves, Brass Cocks, Horseshoe Nails, Cant Hooks, night Latches, Soap Polish, Manila Tags, Memorandum and Record Books, Paper and Crossed Lumber and Files.—Sealed proposals will be received at the office of the general purchasing officer, the Panama Canal, Washington, D. C., until **10:30 a. m., October 6, 1915**, at which time they will be opened in public, for furnishing the above mentioned articles. Blanks and general information relating to this circular (No. 970) may be obtained from this office or the offices of the assistant purchasing agent, Fort Mason, San Francisco, Cal.; also from the U. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal. P. C. BOGGS, major, corps of engineers, U. S. army, general purchasing officer.

**PROPOSALS FOR FURNITURE.**

**FURNITURE**—Treasury Department, office of the Supervising Architect, Washington, D. C.—Sealed proposals will be received here until **October 1, 1915**, for installing furniture in the U. S. public buildings at Chico, Cal. For further information address the supervising architect.

**STATE OF CALIFORNIA.**

**DEPARTMENT OF ENGINEERING.**

**CALIFORNIA HIGHWAY COMMISSION**

**NOTICE TO CONTRACTORS.**

SEALED PROPOSALS will be received at the office of the California Highway Commission, 515 Forum Building, Sacramento, Cal., until **2 o'clock P. M. on October 18, 1915**, at which time they will be publicly opened and read for construction in accordance with the specifications therefor, to which special reference is made, portions of State highway as follows:  
Placer County, from Lincoln to northern boundary (H-Pla-3-11), about 9 miles in length, to be paved with Portland cement concrete.  
Sonoma County, from Reclamation to Fairville (V-Son-3-A), about 1.7 miles in length, to be graded.  
Matiposa County, from western boundary to Cathay-White Rock Road (V-Mpa-1-A), about 10 miles in length, to be graded.  
Plans may be seen, and forms of proposals, bonds, contract, and specifications may be obtained, at the said office, and they may be seen at the office of the Division Engineers at Los Angeles and San Francisco, and at the

office of the Division Engineer of the division in which the work is situated. The Division Engineers' offices are located at Willits, Dunsmuir, Sacramento, San Francisco, San Luis Obispo, Fresno, and Los Angeles.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The Department of Engineering reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

CHADLES D. BLANEY,  
NEWELL D. DARLINGTON,  
CHARLES F. STEIN,  
California Highway Commission.  
ALSTIN B. FLETCHER,  
Highway Engineer.  
WILSON R. ELLIS,  
Secretary. (\*)  
Dated: September 21, 1915.

**PROPOSAL FOR BIDS.**

BIDS are requested for the exterior of Benjamin Ide Wheeler Hall, University of California, Berkeley, California. Bids will be received on two bases: First, for granite; second, for cement finish on concrete.

Sealed bids may be received at the office of the Comptroller of the University of California, Berkeley, Calif., at or before **9 A. M., October 25, 1915**, for complete exterior in cement plaster on concrete, as per plans and specifications on file and obtainable after 9 A. M., October 9, 1915, at the Cashier's window in said office.

A deposit of \$50.00 will be required for each set of plans and specifications taken out, which deposit will be refunded upon return of said plans and specifications, accompanied by a regular bid for the work. No bids will be received unless accompanied by a certified check or bond in favor of the undersigned, equal to 10% of the bid, to secure execution of the contract by the successful bidder.

The right is reserved to reject any or all bids.  
**THE REGENTS OF THE UNIVERSITY OF CALIFORNIA.** (\*)

**PROPOSALS FOR CEMENT.**

**CEMENT**—U. S. Engineering Office, 2nd District, Portland, Ore.—Sealed proposals for cement will be received here until **October 7, 1915**, and then opened. Further information on application.

**PROPOSALS FOR THE SALE, WRECKING AND REMOVAL OF THE ILLINOIS STATE BUILDING AT THE PANAMA-PACIFIC INTERNATIONAL EXPOSITION.**

SEALED PROPOSALS for the sale, wrecking and complete removal of the Illinois State Building at the Panama-Pacific International Exposition, at San Francisco, Cal., are asked by the Illinois Commission to the Panama-Pacific International Exposition.

Two proposals are desired, one to be for the sale, wrecking and complete removal of the building and fixtures, and the other for the sale, wrecking and complete removal of the building without lighting fixtures.

Radiators are not to be included in proposals.

All proposals shall be securely sealed accompanied by a certified check for ten per cent. of the amount of the proposal, and mailed as follows: To Adolph Karpen, Chairman, Illinois Commission to the Panama-Pacific International Exposition, Suite 1110, Karpen Building, Chicago, Illinois. Proposals will be received up to and including noon of Tuesday, October 19, 1915.  
**ILLINOIS COMMISSION TO THE PANAMA-PACIFIC INTERNATIONAL EXPOSITION.**  
John G. Oglesby, Secretary. (\*)

Classified according to Location

## SAN FRANCISCO.

**RESIDENCES**—2, 2 story and base, frame, \$4,500 each. San Francisco. Architect, D. C. Coleman, Merchants' National Bank Bldg., S. F. Owner, M. Fisher, 682 Mission street, S. F. Location, Clarendon Court. Each house will contain seven rooms, two baths and sleeping porches. Interior finish, pine, hardwood and white enamel. Hardwood floors, furnace heat and open fire places. Mantels tile and brick. Tile floors and wainscot in bath rooms. Automatic water heaters. Exterior covered with brick veneer and cement plaster. Plans complete and work to be done by Day Labor.

**RESIDENCE**—2 story and base, frame, \$3,000. San Francisco. Architect, none. Owners, William Bahrs and J. B. Spaeth, 2645 McAllister street, S. F. Location, east 17th avenue north of Balboa. Will contain seven rooms, bath and sleeping porch. Interior finish, pine and hardwood veneer. Hardwood floors. Open fire place and tile mantel. Tile wainscot in bath room. Automatic water heater. Exterior covered with cement plaster on metal lath. Plans complete and work to be done by Day Labor.

**RESIDENCE**—2 story and base, frame, \$2,500. San Francisco. Architect, none. Owner, J. S. McClelland, 530 12th avenue, S. F. Location, east 12th avenue south of Balboa. Will contain six rooms, bath and sleeping porch. Interior finish pine and hardwood veneer. Hardwood floors, open fire place and tile mantel. Bath room finished in tile. Automatic water heater. Exterior covered with cement plaster on metal lath. Plans complete and work to be done by Day Labor.

**RESIDENCE**—2 story and base, frame, \$2,900. San Francisco. Architect, none. Owner, A. T. Morris, 501 11th avenue, S. F. Location, west 11th avenue north of Balboa. Will contain six rooms, bath and basement garage. Interior finish pine with some white enamel and hardwood floors. Open fire place and tile mantel. Bath rooms finished in tile. Automatic water heater. Exterior covered with cement plaster and rustic. Plans complete and work to be done by Day Labor.

**RESIDENCE**—2 story and base, frame, \$5,000. San Francisco. Architect, none. Owner, Oscar W. Thunberg, 678 9th avenue, S. F. Location, east 10th avenue north of Anza. Will contain seven rooms, baths and sleeping porch and basement garage. Interior finish, pine, hardwood and white enamel. Hardwood floors. Furnace heat, open fire place and tile or brick mantel. Bath room finished in tile. Automatic water heater. Exterior covered with cement plaster on metal lath. Plans complete and work to be done by Day Labor.

**RESIDENCES**—2, 2 story and base, frame, \$6,000 each. San Francisco. Ar-

chitects, Falch & Knoll, Hearst Bldg., S. F. Owners, Eisenbach Co., Flatiron Bldg., S. F. Location, east Cherry north Sacramento. Will contain eight rooms each, two baths, sleeping porches and basement garages. Interiors finished in pine, hardwood and white enamel. Hardwood floors. Furnace heat, open fire places and tile or brick mantels. Bath rooms finished in tile. Automatic water heaters. Interiors covered with cement plaster on metal lath. Plans complete and figures being taken.

**RESIDENCE**—1 story and base, frame, \$2,000. San Francisco. Architect, none. Owner, Carl Jorgensen, 767 Corbett avenue, S. F. Location, east Corbett avenue south of Moren. Will contain five rooms and bath. Interior finish pine and redwood. Some hardwood floors. Open fire place and tile mantel. Imitation tile in bath room. Automatic water heater. Exterior covered with rustic and cement plaster. Plans complete and work to be done by Day Labor.

**RESIDENCE**—2 story and base, frame, \$2,500. San Francisco. Architect, G. E. Gottschalk, Phelan Bldg., S. F. Owner, A. McBurnes. Location, east 17th avenue north of Cabrillo. Will contain five rooms, bath and sleeping porch. Interior finish pine with some elm panels. Hardwood floors. Open fire place and tile or brick mantel. Bath room finished in tile. Automatic water heater. Exterior covered with rustic and cement plaster on metal lath. Plans complete and work to be done by Day Labor.

**RESIDENCES**—3, 2 story and base, frame, \$3,000. San Francisco. Architect, August G. Headman, New Call Bldg., S. F. Owner, Benj. Schloss. Location, 27th avenue and California streets. Will contain seven rooms, bath and sleeping porch. Interiors finished in pine, hardwood veneer and white enamel. Hardwood floors and open fire places. Mantels, tile and brick. Furnace heat. Bath rooms finished in tile. Automatic water heaters. Interiors covered with cement plaster on metal lath. Plans being prepared.

**APARTMENT HOUSE**—3 story and base, frame, \$10,000. San Francisco. Architect, none. Owner, Thomas Hamill, 268 25th avenue, S. F. Location, southeast corner Geary and 20th avenue. Will contain six suites of two and three rooms besides two stores. Interior will be finished in pine with some elm panels. Hardwood floors. Patent store fronts. Private baths and wall beds. Hot water system. Bath rooms finished in tile. Exterior covered with rustic and cement plaster on metal lath. Plans complete and work to be done by Day Labor.

**APARTMENT HOUSES**—2, 2 story and base, frame, \$10,800 each. San Francisco. Architect, none. Owner, F. W. Lurmann, 1246 Sacramento street.

Location, north Washinton street east of Leavenworth. Will contain a number of two and three room suites with wall beds and private baths. Interiors finished in pine and hardwood veneer. Hardwood floors. Steam heat, hot water system. Bath rooms finished in tile. Interiors covered with ship-lap and cement plaster on metal lath. Plans complete and work to be done by Day Labor.

**SCHOOL**—1 story and base, brick and concrete, \$21,000. San Francisco. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Location, corner of Folsom street and Tompkins avenue. Will contain six class rooms and assembly hall. Interior finish, pine with maple floors. Central heating system, program clocks and vacuum cleaning. Exterior faced with pressed brick. Plans being prepared.

**FACTORY**—4 story and base, reinforced concrete, \$200,000. San Francisco. Architect, Charles Peter Weeks, Mutual Bank Bld., S. F. Owner, John Bollman. Location, 4th and Brannan streets, covering a large ground area. Construction fireproof. Interior finish pine, hardwood in offices. Steam heat, elevator service, special machinery, hot water system and conveyor machinery. Hollow tile interior partitions. Metal window sash and frames. Fireproof doors. Exterior faced with cement plaster. Plans nearly ready for figures.

**GARAGE**—1½ story and base, Class C, \$10,000. San Francisco. Architect, Henry C. Smith, Humboldt Bank Bldg., S. F. Owner, Richard Glazier. Location, west Valencia south of 18th street, covering an area of 75 by 100 feet. Will contain storage space, office and machine shop. Interior finish pine. Cement floor. A considerable amount of special machinery will be installed. Exterior will be faced with cement plaster. Plans complete and figures being taken.

**FLATS**—2 story and base, frame, \$5,000. San Francisco. Architect, none. Owner, J. Harold Johnson, 745 9th avenue, S. F. Location, west 15th avenue south of Anza. Will contain two flats of five and six rooms. Interior finish, pine and hardwood veneer. Hardwood floors, open fire places and tile or brick mantels. Automatic water heaters. Bath rooms finished in tile. Exterior covered with cement plaster and rustic. Plans complete and work to be done by Day Labor.

**FLATS**—2 story and base, frame, \$1,000. San Francisco. Architect, none. Owner, Mrs. Marie Sterner, 1621 Lake street, S. F. Location, east 6th avenue north of Geary, covering an area of 25 by 66 feet. Will contain two flats of six rooms each. Interior finish, pine, hardwood veneer and white enamel. Hardwood floors. Open fire places and

tile or brick mantels. Bath rooms finished in tile. Automatic water heaters. Exterior covered with shiplap and cement plaster. Plans complete and work to be done by Day Labor.

**FLATS**—2 story and base, frame, \$10,000. San Francisco. Architects, Fabre & Bearwald, Merchants' National Bank Bldg., S. F. Owner's name withheld. Location, Bartlett near 26th street. Will contain four flats. Interior finish pine and elm panels. Some hardwood floors. Open fire places and tile mantels. Bath rooms finished in imitation tile. Automatic water heaters. Exterior covered with shiplap. Plans complete and figures being taken.

**FLATS**—2 story and base, frame, \$3,000. San Francisco. Architect, none. Owner, A. M. Sylvia, 371 30th avenue, S. F. Location, east 20th avenue north of Anza, covering an area of 25 by 50 feet. Will contain two flats of five and six rooms. Interior finish pine and redwood. Hardwood floors. Open fire places and tile mantels. Bath rooms finished in tile. Automatic water heaters. Exterior covered with cement plaster on metal lath. Plans complete and work to be done by Day Labor.

**FLATS**—3, 2 story and base, frame, \$5,000 each. San Francisco. Architects, Thomas & Oliver, Pantages Theatre Bldg., Oakland. Owner, Henry Lehfeldt. Location, south Filbert west of Steiner, covering an area of 25 by 64 feet. Each building will contain two flats of five and six rooms. Interiors finished in pine, elm panels and white enamel. Hardwood floors. Open fire places and tile or brick mantels. Bath rooms finished in tile. Automatic water heaters. Exteriors covered with shiplap and cement plaster on metal lath. Plans complete and work to be done by Day Labor.

**LODGE HALL ALTERATIONS**—\$4,000. San Francisco. Architect, W. H. Crim, Jr., 425 Kearny street, S. F. Owners, Independent Order of Foresters. Location, 1144 Market street. Work will consist of changing stairs, interior partitions and plastering. Plans being prepared.

**APARTMENT HOUSE**—6 story and base, brick and steel, \$150,000. San Francisco. Architect, J. C. Hladik, Monadnock Bldg., S. F. Owner's name withheld. Location, northeast corner Van Ness and McAllister. Will contain a total of 200 rooms arranged in two and three room suites. First floor arranged for nine stores and lobby. Interior finish pine, hardwood and ornamental plaster. Hardwood floors, tile bath rooms and wall beds. Patent store fronts. Steam heat, oil burning system, hot water supply and vacuum cleaning. Exterior faced with white glazed brick. Plans complete and figures being taken.

**APARTMENT HOUSE**—2 story and base, frame, \$25,000. San Francisco. Architect, C. O. Clausen, Hearst Bldg., S. F. Owner's name withheld. Location, Jordan Park. Will contain 12 suites of four and five rooms. Interior finished in pine, red gum and hardwood. Hardwood floors. Wall beds, steam heat, oil burning furnace, hot water supply. Bath rooms finished in tile. Exterior brick veneer and cement plaster. Plans complete and figures being taken.

**APARTMENT HOUSE**—3 story and base, frame, \$15,000. San Francisco. Architects, Rousseau & Rousseau, 110 Sutter street, S. F. Owner's name withheld. Location Jones street north of Washington. Will contain six suites of four rooms each. Interiors will be finished in pine with some hardwood veneer and hardwood floors. There will be steam heat, oil burning system and hot water supply. ## Pringle-Dunn & Co. Low On Barracks.

Seventeen Figures Received for Big  
Mare Island Job—Contract to Be  
Awarded Within Ten Days.

(By Special Wire.)

WASHINGTON, D. C., Sept. 25, 1915.—Seventeen sets of figures were opened today by the Bureau of Yards and Docks for the construction of a three-story and basement reinforced concrete barracks building to be erected at Mare Island Navy Yard. Pringle-Dunn & Co. presented the low figure at \$137,543. No official award of contract has been made. Following is a complete list of the bids as opened:

#### Mare Island Barracks.

Foster-Vogt Co. ....	\$142,387
Clinton Fireproofing Co. ....	164,000
Collman & Collman .....	167,940
C. Christensen .....	168,000
Teichert & Ambrose .....	161,500
William A. Newsom .....	143,477

Macrae & Layaz .....	173,655
W. N. Concanon Co. ....	174,277
Pringle-Dunn Co. ....	137,543
Lange & Bergstrom .....	147,918
McLaren & Peterson .....	146,551
P. A. Palmer .....	149,400
Van Sant-Houghton Co. ....	142,000
John Monk .....	168,735
Hert T. Owsley .....	166,932
Dan Gutleben .....	164,355

#### ENLARGING POWDER PLANTS.

The Atlas Powder Company, which recently purchased the plant of the Giant Powder Company at Giant, Contra Costa County, will expend \$500,000 in remodeling the plant.

A ten-year lease has been taken on tideland at Point Isabel, near Stege, Cal., by the Dupont Powder Company for the establishment of a vigorous plant to supply eastern markets. This

has been found necessary, according to officials, owing to overcrowding of the main plant at Hercules.

## City Bids Opened.

### OAKLAND AND ALAMEDA COUNTY.

RESIDENCE — 1 story and base, frame, \$2,500. Berkeley, Alameda Co., Cal. Architect, none. Owner, Z. M. Steves, 1827 Marin avenue. Location, southeast corner of Posen and Carlotta avenues. Will contain six rooms, bath and sleeping porch. Interior finish, pine and white enamel. Hardwood floors, open fire places and tile or brick mantels. Tile wainscot and floor in bath room. Automatic water heater. Exterior covered with cement plaster on metal lath. Plans complete and work to be done by Day Labor.

RESIDENCE ALTERATIONS AND ADDITIONS—Frame, \$5,500. Berkeley, Alameda Co., Cal. Architect, P. Holberg Reimers, 2145 Shattuck avenue, Berkeley. Owner, W. W. Mackie. Location, Shasta street. Will contain eight rooms, two baths and sleeping porch. Interior finish pine, hardwood and white enamel. Hardwood floors, Furnace heat, open fire place and tile or brick mantel. Bath rooms finished in tile. Automatic water heater. Exterior covered with cement plaster on metal lath. Plans complete and figures being taken.

RESIDENCE — 1 story and base, frame, \$2,500. Oakland, Cal. Architect, none. Owner, C. J. Pfrang, 5487 Claremont avenue, Oakland. Location, south 54th street west of Call. Will contain five rooms and bath. Interior finish pine, hardwood veneer and white enamel. Hardwood floors. Open fire place and tile or brick mantel. Bath room finished in tile. Automatic water heater. Exterior covered with rustic and cement plaster on metal lath. Plans complete and work to be done by Day Labor.

RESIDENCE — 1 story and base, frame, \$2,500. Oakland, Cal. Architect, none. Owners, Collins Bros., 253 57th street, Oakland. Location, west 14th avenue south of Hampel. Will contain six rooms, bath and sleeping porch. Interior finish pine and white enamel. Hardwood floors. Open fire place and tile mantel. Bath room finished in tile. Automatic water heater. Exterior covered with cement plaster on metal lath. Plans complete and work to be done by Day Labor.

UNIVERSITY BUILDINGS—Class A construction. Cost as follows. Berkeley, Alameda Co., Cal. Architect, John Galen Howard, 604 Mission street, S. F. Owners, Regents of the University of California. The next work to be undertaken at the University of California will be that of the second unit of the Agricultural Hall, costing approximately \$350,000. This will be followed by the construction of the new portions of the Doe Library, which will double the present size of that

structure and will cost about \$400,000. The new chemistry building will then be started. It is understood that these buildings will be placed under construction before the end of 1915. A second unit of the Agricultural Building group will be constructed north and west of Agricultural Hall. The exterior of the building will be of California granite, similar in type to Agricultural Hall. Historic chem pond will be the site of a new chemistry building, similar in type to the other buildings of the Hearst plan. Unusually large window space will be incorporated into the building plans, so that all the light possible will be utilized and laboratory conditions may be more ideal. The new building will not interfere with the existing buildings. The remaining \$400,000 will be used to complete the Doe Library. Two more stories and an attic are to be added. This will provide another reading room two-thirds the size of the present one, and addition similar and administration rooms. Space for additional book shelves to hold 700,000 volumes will also be provided.

**SCHOOLS**—1 and 2 story, brick and frame. Cost not given. Alameda, Alameda Co., Cal. Owners, City of Alameda. Architects as follows. The following architects have been selected by the Alameda Board of Education to prepare plans for additions and alterations to be made at several of the city's schools. Henry H. Meyers, Kohl Bldg., S. F., addition to the Washington School, frame and brick. Cost not stated. Cunningham & Politeo, First National Bank Bldg., S. F., 1 story and basement brick building for Lincoln School; addition to Everett School, and rehabilitation of the Porter School. Carl Werner, Phelan Bldg., S. F., associated with Charles E. H. Rogers, Kohl Bldg., S. F., 1 and 2 story brick building for Porter School. Further mention will be made of the work when bids are called.

**BRIDGE REPAIRS**—\$1,350 and \$2,500. Oakland, Cal. Engineer, County Surveyor, Oakland. Owners, Alameda County. Bids will shortly be advertised by the Supervisors for the construction of an asphaltic mastic or alternate surfacing on the Calaveras Creek and the Bay Farm Island bridges.

**LIBRARY**—2 story and base, brick and steel, \$35,000. Oakland, Cal. Architect, W. H. Weeks, 75 Post street, S. F. Owners, City of Oakland. Will contain two reading rooms, assembly hall and stack room. Interior finish pine and hardwood with maple floors. Steam heat, oil burning furnace and vacuum cleaning. Metal book stacks. Exterior faced with pressed brick. Plans complete and figures being taken. Bids close on October 5th.

**RESIDENCE**—1 story and base, frame, \$2,000. Oakland, Cal. Architect, none. Owner, E. L. Higgins, 5250 Miles avenue, Oakland. Location west Thomas street. Will contain five rooms and bath. Interior finish pine. Hardwood floors and open fire place. Mantel tile. Imitation tile in bath. Automatic water heater. Exterior covered with rustic and cement plaster. Plans complete and work to be done by Day Labor.

**RESIDENCE**—1 story and base, frame, \$2,000. Oakland, Cal. Architect, none. Owner, John A. Bischoff, 6015 Harwood avenue, Oakland. Location, east 16th street east of Colby. Will contain six rooms and bath. Interior finish pine and white enamel. Hardwood floors. Open fire place and the mantel. Bath room finished in tile. Automatic water heater. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

**STORES AND OFFICES**—10 story and base. Class A construction. Cost not stated. Oakland, Cal. Architect, August G. Headman, New Call Bldg., S. F. Owner's name withheld. Will contain several stores and about 110 offices. Steel frame, brick exterior walls. Interior finish pine and hardwood. Hollow tile interior partitions. Marble wainscot. Elevator service, steam heat and hot water system. Patent store fronts. Exterior faced with terra cotta. Plans being prepared.

**STORES**—1 story, frame, \$2,000. Oakland, Cal. Architect, none. Owner, Richard M. Lamb, Bureau of Licenses and Permits, City Hall, Oakland. Location, southeast corner of 35th and Market streets. Will contain two stores. Interior finish pine. Cement floor. Patent store fronts. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

#### Contracts Awarded.

**STORES**—1 story and base, brick and steel, \$12,000. Oakland, Cal. Architect, C. W. Dickey, Central Bank Bldg., Oakland. Owners, Hawley Investment Co. Location, 15th and Franklin streets. Contractor, F. A. Muller, Syndicate Bldg., Oakland. Contract price, \$12,000.

## NOTICE OF NON-RESPONSIBILITY.

### ALAMEDA COUNTY.

Sept. 17, 1915—PTN LOT 2 BLK 1, Map Plan State University Homestead Ass'n, Bkly. Martin Dooley as to Improvements on leased property .....  
Sept. 20, 1915—LOT 20 BLK 9 Map Northbrae, Bkly. North Berkeley Land Co as to Improvements on leased property .....

gineer Kneese presented plans and specifications for the Vista Grande District improvement. The work includes the construction of a storm sewer system, manholes, concrete curbing, cement sidewalks, asphalt and concrete paving and on the steep grades leading from Mission Road on Knowles, Theta and Vista avenues vitrified brick will be installed. The cost of the work, according to Kneese, will be much lower than at first estimated. A resolution was adopted approving the plans for the work. Bids will soon be called for.

**SCHOOL**—1 and 2 story addition, frame, \$20,000. San Jose, Santa Clara Co., Cal. Architect, State Architect George B. McDougall, Sacramento. Owners, State of California. Bids will be taken next week for the construction of a twelve-room addition to the State Normal School at San Jose. Interior finish pine with maple floors. Exterior cement plaster. Plans can be had from the State Architect. Further mention will be made of this work.

**ROAD IMPROVEMENT**—Cost not stated. Redwood City, San Mateo Co., Cal. Engineer, County Surveyor, Redwood City. Owners, San Mateo County. The attention of the Supervisors was called at the last meeting for immediate action in making provision for taking care of the new poor farm road. It was ordered that the County Engineer be instructed to put a two-inch Topeka, or other standard top, 16 feet wide from the Halfmoon Bay road past the county hospital to the Belmont road, the money to be paid out of the sum heretofore set aside for the Hillsborough to Crystal Springs Lakes road.

#### Contracts Awarded.

**STREET PAVING**—Cost not stated. South San Francisco, San Mateo Co., Cal. Engineer, Town Engineer, South San Francisco. Owners, Town of South San Francisco. Contractor, F. R. Richie, Chronicle Bldg., S. F. Contract price not stated.

### MARIN, CONTRA COSTA AND SONOMA COUNTIES

**SEWER WORK AND SIDEWALK REPAIRS**—Cost not stated. Sausalito, Marin Co., Cal. Engineer, Town Engineer, Sausalito. Owners, Town of Sausalito. At the last meeting of the Board of Town Trustees the Town Engineer was instructed to prepare plans and specifications for the repair of the sewer on Locust street. The Town Engineer was also instructed to fix grades for sidewalks and streets on Lower San Carlos avenue.

**STREET PAVING**—Cost not stated. Vacaville, Solano Co., Cal. Engineer, Town Engineer Steiger, Vacaville. Owners, Town of Vacaville. The plans and specifications prepared by Town Engineer Steiger for the improvement of certain streets in Vacaville were adopted at the last meeting of the Trustees and the Clerk was instructed to advertise for bids. The plans provide for oiled macadam on Main street from gutter to gutter, while the gutters will be relaid and grouted (that is, the Interstices will be filled up with

ment, thus affording a smooth passage way for the water). Dobbins street from Main to Merchant, and Merchant street from Dobbins to Main will be similarly improved. The other streets, along which the State Highway will pass through town, will have fifteen-foot roadway of rock in the center, over which will be placed a surface of oiled macadam, which will extend over the shoulders on each side a distance of 2½ feet. Bush street, from McClellan street to the depot, will be similarly improved.

**APARTMENT HOUSE AND STORES**—Story and base, brick and concrete, \$10,000. Martinez, Contra Costa Co., Cal. Architect, James T. Narbett, 704 McDonald avenue, Richmond. Owner, Frank Prosser. The following bids were received for the construction of a building. No award has been made. Carl Nielson, \$10,143; C. D. Ehr, \$10,190; C. A. Jeffers, \$10,400; Littleben Bros., \$10,575; J. J. Widmer, \$10,584; J. S. Hannah, \$10,993; D. H. Quiddy, \$10,997; M. Morton, \$10,537; Ester & Winlund, \$10,927.

**BRIDGES**—Steel and reinforced concrete. Cost not stated. Napa, Napa Co., Cal. Engineer, County Surveyor, Napa. Owners, Napa County. The County Supervisors of Napa County have ordered bids received for the following bridges. For the construction of steel and concrete highway bridge across Nigger Creek, on the county and leading from Napa to Berryessa Valley. For the construction of a steel and concrete highway bridge across Walnut Grove Creek on the county and leading from Napa to Berryessa. For the construction of a steel and concrete highway bridge across Steel Canyon Creek on the county road leading from Napa to Berryessa Valley. Bids will be received for the above work until October 13th, 10 a. m. Plans and specifications and full information may be had from the County Surveyor at Napa.

**FLOOR ALTERATION**—Frame construction, \$1,000. Sausalito, Marin Co., Cal. Architect, W. J. Cuthbertson, 328 Montgomery street, S. F. Owner, E. H. Ladd. Work will consist of altering first story of residence into flats. There will be new interior trim, hardwood floors, plastering, plumbing and painting. Work will be done by Day Labor.

**SCHOOL**—1 story and base, frame, \$10,000. Torrey, Contra Costa Co., Cal. Architect, Norman R. Coulter, 46 Kearny street, S. F. Owners, Selby School District. Will contain four class rooms, library and teachers' room. Interior finish pine. Central heating system, oil burning furnace. Exterior covered with cement plaster on metal lath. Plans being prepared.

**STREET IMPROVEMENT**—\$1,465. Sausalito, Marin Co., Cal. Engineer, Town Engineer, Sausalito. Owners, Town of Sausalito. Three bids were received by the Sausalito Trustees for the street work on West and Valley streets, all being in excess of the engineer's estimates of \$1,465. The bid of V. H. Cowen was \$1,886; Leech & De Amp, \$1,841; Milbourn & Murray, \$1,732. No check accompanied the latter bid. Actio was deferred on the bids.

**STREET IMPROVEMENT**—Cost not stated. Napa, Napa Co., Cal. Engineer, City Engineer, Napa. Owners, City of

Napa. At the last meeting of the Napa City Council the following action was taken in the matter of street improvements. Resolutions of intention for improvement of Ash avenue from Union street to Grant avenue, on Clay from Jefferson to Madison, and for certain work on Jackson street, were adopted. Specifications for doing sewer work on Caymus street, also for work on Vallejo and Nursery streets, were adopted and the work ordered done.

#### Contracts Awarded

**BRIDGES AND RETAINING WALL**—Reinforced concrete, \$2,772 and \$1,304. Santa Rosa, Sonoma Co., Cal. Engineer, County Surveyor, Santa Rosa. Owners, Sonoma County. Contractor, Walter L. Proctor, Santa Rosa. Contract price, \$2,772 and \$1,304.

### FRESNO, MODESTO STANISLAUS AND CENTRAL CALIFORNIA

**STREET IMPROVEMENT**—Cost not stated. Visalia, Tulare Co., Cal. Engineer, City Engineer, Visalia. Owners, City of Visalia. Bids are now being taken by the City Trustees for the improvement of West Main street, which will be paved to meet the State Highway. Bids close October 13th. Further information may be had from the City Engineer.

**STREET PAVEMENT**—Cost not stated. Bakersfield, Kern Co., Cal. Engineer, City Engineer, Bakersfield. Owners, City of Bakersfield. The Bellevue road for a distance of three miles from Oak street to the river bridge west, and Brundage lane, from H street to the State Highway east, a distance of one mile, are to be paved by the Board of Supervisors. The pavement in each instance will be 16 feet in width, the specifications calling for roads similar to those on South D and South Chester avenue. Bids are now being taken on the work and will close October 8th, 10:30 a. m. Plans and specifications together with full information may be had from the City Engineer.

**CANAL CONSTRUCTION**—Cost not stated. Hanford, Kings Co., Cal. Engineer, County Surveyor Ben Duffield, Hanford. Owners, Kings County. Plans and specifications prepared by County Surveyor Ben Duffield have been approved by the County Supervisors and State Highway Commission, and bids will be received until October 4th for the construction of a concrete bridge to span the Lakeside Canal, 4 miles east of this city. The structure will be about 20 feet in width and 60 feet in length across the canal. Further information may be had from the County Surveyor at Hanford.

**AUDITORIUM**—2 story and base, brick, \$55,000. Visalia, Tulare Co., Cal. Architects, Coates & Traver, Rowell Bldg., Fresno. Owners, City of Visalia. Will contain large auditorium, display rooms and offices. Interior finish pine with maple floor in auditorium. Steam heat, oil burning plant and vacuum cleaning. Exterior faced with pressed brick. Plans being prepared.

**IRRIGATION PROJECT**—Cost not stated. Porterville, Tulare Co., Cal. Engineer's name not given. Owners, Strathmore-Lindsay Irrigation District. Members of the Board of Supervisors approved the plans for the proposed Strathmore-Lindsay Irrigation District, to be organized under the terms of the Wright law. By impounding the flood waters it is proposed to irrigate upward of 20,000 acres of fine foothill orange land. It is estimated that the eventual cost of the work, including diversion canals and laterals, will total nearly \$2,000,000. Boundary lines of the proposed district are still at issue before the Supervisors.

**LODGE HALL AND STORES**—2 story and base, brick. Cost not stated. Tulare, Tulare Co., Cal. Architect, Ernest J. Kump, Rowell Bldg., Fresno. Owner, E. J. Ryan. Will contain stores on the first floor and lodge rooms

above. Interior finish pine with maple floor. Central heating system and patent store fronts. Exterior faced with pressed brick. Plans being prepared.

### Contracts Awarded.

### SACRAMENTO, STOCKTON AND NORTHERN CALIFORNIA

**STATE HIGHWAY CONSTRUCTION**—Cost not stated. California. Engineer, State Highway Commission Forum Bldg., Sacramento. Owners State of California. Bids will be opened on October 15th by the Highway Commission for construction in the following counties: Placer County, Lincoln to northern boundary, 9 miles; paved with Portland cement; Sonoma County, Reclamation to Fairville, 4 miles, graded; Mariposa County, from westerly boundary to Cathay Whit Rock road, 10 miles, to be graded. Plans can be secured from the State Highway Commission in Los Angeles or its branch offices in San Francisco or Los Angeles. An official proposal appears in another column of this issue.

**GRADE CROSSING**—Reinforced concrete, \$100,000. Roseville, Placer Co., Cal. Engineer's name not given. Owners, Town of Roseville and Southern Pacific Co. The City Trustees are considering the matter of a subway at this city. The crossing at the present time is exceedingly dangerous and a blockade to traffic. C. M. Kipp, a local merchant, who is interested in the proposed work, has plans complete for the project and these the Trustees will consider at their next meeting. The plans call for a structure 240 feet long and 50 feet for each incline and 80 feet level under the tracks, the inclines to have a grade of 6 per cent, and the bottom of the subway to be ten feet below the present level of the sidewalk. The plan calls for the raising of the railroad tracks for a distance of 2,000 feet each side of the crossing, placing them eight feet above the present grade. This would necessitate the raising of the station and a trackage.

**SEWER CONSTRUCTION**—Cost not stated. Stockton, San Joaquin Co., Cal. Engineer, City Engineer, Stockton. Owners, City of Stockton. The City Council has adopted plans and specifications for the construction of the sewer system to be installed as a result of the bond election held in this city some time ago. The work consists of the construction of sanitary sewer in the southern part of the city. A resolution was passed at the last meeting calling for bids on the work to be received on October 1st. This particular portion of the work on which bids are now being received will cost approximately \$18,633.55, according to the estimates of the City Engineer and will be on South street, from East to Edison street, then west on Souther Avenue to West street, and on McKinley avenue from South to Eight street. The South avenue mentioned is a continuation of South street, from Edison to West street.

**ROAD CONSTRUCTION**—Cost not stated. Ukiah, Mendocino Co., Cal. Engineer, County Surveyor, Ukiah. Owners, Mendocino County. The petition for the completion of the Navarro River project was recognized by the Supervisors last week, and the County Surveyor was ordered to make final surveys of the road to prepare for its construction.

**RESIDENCE**—1 story and base, frame, \$2,500. Sacramento, Cal. Architect, none. Owner, W. D. McKoy, 3029 E street, Sacramento. Location, 3145 E street. Will contain five rooms and bath. Interior finish pine and white enamel. Hardwood floors. Open fire place and tile mantel. Bath room finished in imitation tile. Automatic water heater. Exterior covered with rustie. Plans complete and work to be done by Day Labor.

**BRIDGE CONSTRUCTION**—Reinforced concrete. Ukiah, Mendocino Co., Cal. Engineer, County Surveyor, Ukiah. Owners, Mendocino County. Plans and specifications for the construction of the Wages Creek and Westport grade bridges have been adopted by the County Supervisors and bids have been ordered called to be received up to 2 p. m. October 5th. Further information may be had from the County Surveyor at Ukiah.

**BRIDGES**—2, reinforced concrete. Cost not stated. Marysville, Yuba Co., Cal. Engineer, County Surveyor L. B. Crook, Marysville. Owners, Yuba County. Plans of County Surveyor L. B. Crook for two bridges to be located on the road between this city and Smartsville have been adopted by the Supervisors. The plans call for a 19-foot bridge to span a creek near Smartsville and a 24-foot extension to the Timbuctoo bridge. Both bridges are in the Fourth district, of which J. J. Casey is representative. The County Clerk was authorized to advertise for bids for the bridge construction work.

**HOSPITAL**—1 and 2 story and base, frame and plaster, \$20,000. Eureka, Humboldt Co., Cal. Architect, E. J. Burke, Eureka. Owners, Humboldt County. Will contain three wards and several private rooms. Interior finish pine and white enamel. Hardwood and tile floors. Central heating system. Hot water system and vacuum cleaning. Special hospital plumbing. Exterior covered with cement plaster on metal lath. Plans being prepared.

**LIBRARY**—1 story and base, brick, \$15,000. Grass Valley, Nevada Co., Cal. Architect, William Mooser, Nevada Bank Bldg., S. F. Owners, Town of Grass Valley. Will contain reading room, stack rooms and office for the librarian. Interior finish pine and hardwood with maple floors. Furnace heat. Metal book stacks. Exterior faced with pressed brick. Plans complete and figures to be called for shortly.

**SCHOOL**—1 story, frame. Cost not stated. Boonville, Mendocino Co., Cal. Architect, none. Owner, Anderson Valley School District. Bids will be opened on October 2nd for a district school. Plans can be secured from the Superintendent of Schools at Ukiah.

**SCHOOL**—1 story, frame. Cost not stated. Florin School District, Sacramento Co., Cal. Architect, George C. Selton, 1005 K street, Sacramento. Own-

ers, Florin School District. Bids will be opened on October 5th for the construction of a four-class room building. Exterior covered with rustie. Plans can be secured from the architect.

**STREET IMPROVEMENT**—Cost not stated. Sacramento, Cal. Engineer, City Engineer, Sacramento. Owners, City of Sacramento. Bids will be opened on October 5th for the improvement of Schley avenue from east line of 31st street to a point 35 feet east of east line of Yardley avenue, be improved by removing and disposing of all surplus and refuse material, grading the roadway and constructing thereon an asphalt pavement, consisting of a hydraulic concrete foundation 4 inches in thickness, an asphaltic cement flush coat and a sheet asphalt wearing surface 1½ inches in thickness.

**SEWER CONSTRUCTION**—Cost not stated. Stockton, San Joaquin Co., Cal. Engineer, City Engineer, Stockton. Owners, City of Stockton. The City Council has approved plans and specifications and will receive bids until October 5th for the third installment of storm water sewers to be done under the 1915 sewer bond fund. The specifications deal with the eastern end of the city and sewers will be laid on East, Eugenia, Della, Locust and Cedar streets, Hazel avenue, A. B. C. D. E. and F streets, East Weber avenue, East Main, East Market, Washington, East Washington, Sonora, and East Sonora streets. The City Engineer's estimate for the work is \$17,678.30, and the money is payable from the storm water sewer 1915 fund.

**BRIDGES**—Reinforced concrete. Cost not stated. Oroville, Butte Co., Cal. Engineer, County Surveyor, Oroville. Owners, Butte County. Bids will be opened on October 4th by the Board of Supervisors for the construction of bridges Nos. 5 and 7 on the Biggs and Princeton road. Plans can be secured from the engineer.

**STREET PAVING**—\$15,842. Oroville, Butte Co., Cal. Engineer, City Engineer S. J. Norris, Oroville. Owners, City of Oroville. The City Engineer S. J. Norris has completed estimates for the Montgomery street pavement from Lincoln street to Fourth avenue, the cost of the work being placed at \$15,842. The average cost per square foot was 14.33 cents as compared with 14.4 cents for Bird street. The cost per lineal front foot was \$3.04 with 48 cents additional for street intersections. Bids on this work will soon be called for.

#### Contracts Awarded.

**SEWER CONSTRUCTION**—\$13,500 Marysville, Butte Co., Cal. Engineer, City Engineer, Marysville. Owners, City of Marysville. Contractors, Stanley & Ostrander, Sausalito. Contract price, \$13,500. Hewitt & Felch, Marysville, fill work at 42c per cubic yard.

### LOS ANGELES AND SOUTHERN CALIFORNIA.

WATER SYSTEM EXTENSION —  
Cost not stated. Holtville, Imperial Co.,  
Cal. Engineer, City Engineer, Holt-  
ville. Owners, Town of Holtville. The  
City Trustees have approved a plan  
submitted by property owners in block  
112 to connect their homes with the  
city sewer system at their own ex-  
pense. The sewer line is to be built  
by the property owners under their  
own contract, but under the supervi-  
sion of the City Engineer.

SEWER CONSTRUCTION—Cost not  
stated. Santa Barbara, Santa Barbara  
Co., Cal. Engineer, City Engineer,  
Santa Barbara. Owners, City of Santa  
Barbara. The City Council at their  
meeting last week adopted a resolution  
for the construction of the east side  
sewer and bids will be ordered shortly.

RIVER PROTECTION WORK—Cost  
not stated. Ventura, Ventura Co., Cal.  
Engineer, County Surveyor, Ventura.  
Owners, Ventura County. Bids are  
now being received for the protection  
work on the Foothill Boulevard. Ap-  
proximate quantities are: Timber

piles 20 feet long, 54 ½ inch galvan-  
ized wire cable, 2,000 feet; barb wire,  
3,000 feet. Bids will be opened on Oc-  
tober 8th at 3 p. m.

PACKING HOUSE—1 story and base,  
hollow tile. Cost not stated. Whittier,  
Los Angeles Co., Cal. Architects, Al-  
fred W. Reed and Charles E. Gar-  
stang, Black Bldg., L. A. Owners, Mur-  
phy Oil Co. Will cover an area of 162  
by 251 feet. Concrete floor. Special  
machinery. Exterior faced with ce-  
ment plaster. Plans complete and fig-  
ures being taken.

JETTY—Pile construction. Cost not  
stated. San Luis Obispo, San Luis  
Obispo Co., Cal. Engineer, County Sur-  
veyor, San Luis Obispo. Owners, San  
Luis Obispo County. The Board of  
Supervisors has ordered bids received  
until October 11th for the construction  
of a pile jetty on the north side of  
Sana Maria River. The proposed jetty  
will be built in a northwesterly direc-  
tion and will extend out into the river  
for a distance of 3,600 feet. Plans and  
specifications may be had from the  
County surveyor at San Luis Obispo.

HOSPITAL, COTTAGES, ETC.—1 and  
2 story, frame and concrete. Cost not  
stated. Ventura, Ventura Co., Cal. Ar-  
chitect, State Architect George B. Mc-  
Dougall, Sacramento. Owners, State of  
California. Bids will be received until  
October 15th for the construction of  
two cottages and a detention building  
at the California State Home for Girls  
near Ventura. Plans and specifications  
can be secured from the architect. An  
official proposal appears in another  
column of this issue.

RAILROAD CONSTRUCTION — Cost  
as follows. San Diego, Cal. Engineer's  
name not given. Owners, Atchison,  
Topeka and Santa Fe. The State Rail-  
road Commission has ordered the At-  
chison, Topeka and Santa Fe Railroad  
to construct a line connecting Ocean-  
side in San Diego County, with Tem-  
ecula, 25 miles northeast. The order  
makes it optional to route the line by  
way of Fallbrook, 12 miles from Tem-  
ecula, or to run it through the Rain-  
bow Valley. The cost of Rainbow Val-  
ley route is placed at \$822,000 and the  
Fallbrook and Temecula, \$627,000.

SCHOOL BUILDINGS—3, 1 and 2  
story, Class C construction, \$200,000.  
Los Angeles, Cal. Architect, Norman  
F. Mars, Broadway Central Bldg., L. A.  
Owners, Jefferson School District.  
Construction, reinforced concrete to  
first floor line and brick above. Inter-  
ior finish pine with maple floors.  
Steam heat, oil burning system, vac-

#### CLEAN WATER, GOOD SEWERS AND FEWER TYPHOID DEATHS.

Clean water to drink—this is the first step to take toward making typhoid fever as rare in California as the mastodon or the sabre-toothed tiger.

To help people get clean water to drink, and to help prevent the present wicked and inexcusable sacrifice of several hundred innocent lives every year to typhoid fever, the State Board of Health has just established a Bureau of Sanitary Engineering, with its offices and laboratories at the University of California, and has appointed as Chief Engineer and Director of the Bureau Chester G. Gillespie, of high reputation as a sanitary engineer and one of the first men who ever completed the full professional course in Sanitary Engineering in the University. He received his professional training at the hands of Charles Gilman Hyde, Professor of Sanitary Engineering in the University of California, who for a number of years has been Consulting Engineer of the State Board of Health and has been doing work of great value for the improvement of public health conditions in California. Since Gillespie's graduation eight years ago he has been actively at work designing and building chlorination and filter plants, sewage-disposal systems, water works, etc., in various parts of the United States.

The State's new Sanitary Engineer is only just arrived in Berkeley to begin his work. Already requests are coming for him from more than thirty California towns for advice as to how they ought to go about getting clean water, and how to protect themselves against typhoid, intestinal complaints of children, and other water-borne diseases.

Not only as to water-supply problems will the new bureau be of great service, but also in the matter of sewage-disposal, for advice will be given to the engineers and authorities of towns and villages throughout California as to how best to treat sewage so as to render it harmless to the community which seeks to dispose of it, and to towns down-stream as well.

There are already laws requiring that all public water supplies must have permits from the State Board of Health, approving the sanitary quality of sources and supply. There are laws, so, that a community must not discharge sewage into inland waters, such as lakes and rivers, nor into tidal waters, without permits from the State Board of Health. In order that this legislation may be carried out, the new bureau will make a careful study of water-supply and sewage-disposal conditions throughout the whole State. Remarkable advance has been made

in California in the last few years in reducing the death-rate from typhoid, last year only about three-fifths as many people died of typhoid in California, in proportion to population, as did four years earlier. In 1910 there were 477 deaths from typhoid, which, with a population of 2,386,000, represented a death rate of 19.9 per hundred thousand from this one disease. In 1914, with an estimated population of 2,630,000, there were 374 deaths, of .54 per hundred thousand.

Yet, most of these 374 deaths were totally unnecessary!

Among the great factors which brought about this gratifying reduction were the work of the State Board of Health in arousing the interest of the whole community in the fight against typhoid, the investigation of typhoid outbreaks by the State Hygienic Laboratory, such as its investigation resulting in the discovery of the woman, a typhoid-carrier, who had given the disease to ninety-four people by preparing one single dish of spaghetti, and the work of the State Board of Health in sending free to any physician in California anti-typhoid vaccine, prepared at the State Hygienic laboratory at the University, a vaccine by the use of which anyone who desires may be immunized against typhoid fever.

The creation of this new Bureau of Sanitary Engineering insures valuable co-operation between the State and the individual communities of California for the suppression of sources of typhoid infection, through purification of contaminated water-supplies and through improved methods of sewage-disposal. Another great task to be done is to arouse every farmer and every country-dweller in California to the importance, for the protection of his own family and of the community

in general, to seeing to it that his own farm or ranch has a proper sanitary method for the disposal of human wastes, so that streams may not become contaminated, and milk-cans and the milk supply be not exposed to infection.

Typhoid is primarily a country and small-town disease, because large cities take more care to have clean water and adequate systems of sewage disposal. There are two rural counties in the interior of California, for example, that have an annual death rate from typhoid eight times as heavy as that of San Mateo County, for instance. The real reason for this is that the sources of water-supply in San Mateo County have been better protected from danger of pollution. Its towns do not pour their sewage into streams from which other people must take their drinking water.

The new Chief Engineer and Director of the Bureau of Sanitary Engineering began his professional work by spending several years in filtration experiments for the People's Water Company of Oakland. Then he aided in the designing and building of the huge swimming pool on the University campus. Then he went east, participated in the designing of the filter plant for Minneapolis, had charge of the designing of a water-filtration plant for Evanston, Ill., and returned recently to Sacramento to design a sewage-screen system for the treatment of sewage from the annexed districts and from certain older portions of the city of Sacramento.

For the first time since the great European war began it is possible to make comparisons with the building record of the same month of last year. For August, 1914, marked the beginning of the great conflict and comparisons with the month show a gain for the present year. Comparative figures returned from some 65 different cities representing building centers show a gain of about 14 per cent in the total returns. The following is the record of the American Contractor:

City	Aug. 1915.	Aug. 1914.

Total .....

Total .....

It will be seen that the comparison shows a substantial gain over August 1914; that the most pronounced gains have been made in the middle west and not in the large cities. And that while the record is not up to normal it is at least coming back to something near that place.

## TO MAKE COAL-TAR DYES IN AMERICA.

It has been announced in the daily press that an American inventor has developed an entirely new process for producing dyestuffs from coal tar, and that preparations are now under way looking to the immediate working of the process, which is stated to be revolutionary in its character. A representative of the Government has been investigating the new process, and is reported as having stated that the process would free this country from dependence on foreign markets. Who the inventor of the new process is has not been disclosed, nor are any details of the invention to be obtained. It is stated, however, that large quantities of dyestuffs will be turned out before the end of the year.

## Associated Catalogues.

Here is where the Architect usually files the circulars, catalogues, announcements, etc., that come to his office. He can't take care of them. There are too many of them.

### the Remedy:

Associated Catalogues is a collection of catalogues of Building Materials, Building Equipment and Building Machinery available on the Pacific Coast, bound in one volume, thoroughly indexed for instant reference for Architects use.

Every Architect, Consulting Engineer and Large Corporation Purchasing Agent on the Pacific Coast will receive a copy Free. When

Size of pages, 11x14 inches.

the Architect is preparing his plans and specifications, he wants to know how to specify your goods. It's up to you, Mr. Dealer, to make it easy to specify your products.

Associated Catalogues presents the solution. Price per page \$30.00.

Send for specimen pages.

## The Sewerage System of Los Angeles.\*

by

W. T. Knowlton, Engineer of Sewers.

### Early History.

The earliest record which has been found of the construction of public sewers in Los Angeles begins in 1873, as 1863. It is probable, however, that city was about 7,000.

Investigation has shown that there were sewers in existence as far back as 1863. It is probable, however, that these earliest sewers were private conduits made of wood and serving but a few residences, which at that time were mostly built of adobe.

It is thought that the location of these private sewers was along Los Angeles street, between Aliso street and the Plaza, and that they may have been connected with the zanjas or drainage ditches. The original sewer of Los Angeles was built by the proprietors of the Bella Union Hotel, and on account of its discharging into a zanja on Commercial street, was ordered closed by the Supreme Court as it was injurious to the health and property of people living below its outlet.

The Los Angeles Evening Telegram of August, 1882, refers to the main sewer of the city in that year as extending along Los Angeles street from Arcadia street to Seventh street; thence deflecting easterly toward San Pedro street; thence southerly to Washington street. It then discharged at a point about 1,000 feet easterly of the intersection of Washington street and San Pedro street onto the land of a Mr. Brisswalter. This sewer, like others constructed before 1880, was made of brick covered with wood.

The same newspaper describes the location of other sewers built at that time, and mentions that the construction of those sewers was similar to the main sewer. As the latter was poorly constructed it was considered objectionable, and it was then felt that it would soon require replacement. It may be mentioned here that this main sewer and those similarly built of wood and brick have been filled in and superseded by sewers which were much deeper and more durable.

Several sewers laid between 1880 and 1883 were constructed of cement pipe. A few years ago it was found that the shells of these cement pipes had in many places deteriorated to such an extent that these sewers were abandoned and others, built of vitrified pipe, constructed in their place.

Since 1886 records show that most of the sewers have been constructed of vitrified pipe, and the length of sewers built of this material at the present time forms over 94 per cent of the length of the sewerage system. The sizes of the vitrified pipes and cement pipes have varied from six inches to twenty-four inches in diameter, and the brick sewers have varied from egg-shaped conduits of sixteen inches smaller diameter to oval-shaped sewers of six feet vertical diameter.

Until 1887 the sewerage system did not consist of more than seventeen miles of sewers. The disposal of sewage up to that time was by irrigation upon the ranches south of Washington street. In 1887, however, the City Surveyor, Mr. Fred Eaton, prepared a comprehensive plan for the construction of sewers in all parts of the city as it then existed, which at that time had an area of 29.2 square miles, or 1.2 square miles more than the area of the original city at the time of its incorporation in 1850.

### System Proposed in 1887.

Mr. Eaton's plan was submitted by the City Council to Mr. Rudolph Hering of New York, Consulting Engineer, for his examination before its adoption. In Mr. Hering's report, reference was made to the construction of an outfall sewer proposed at that time to have a capacity for 200,000 persons. This outfall sewer was planned to intercept the flow from three main sewers, known as the "Western Intercepting Sewer," "Central Intercepting Sewer," and "Southern Intercepting Sewer." Into these three main sewers it was proposed to discharge the sewage of the smaller sewers which would be required in all of the streets of the city as it then existed. It was planned that the outfall sewer should discharge into the Pacific Ocean at a point about 11.5 miles southwest of the southwest corner of the city. This lo-

cation is known at the present time as Hyperion, and is about a mile north of the town of El Segundo, and about midway between Ocean Park and Hermosa Beach. It was further planned that the sewage could be used for irrigation if required.

In Mr. Hering's report it was noted that the system planned was for sewage only, and that the average amount of sewage per capita was assumed at 100 gallons per day with a maximum of 150 gallons during any part of the day. It was considered that the system could be properly ventilated by means of holes in the manhole covers, rather than through the house drains. It may be mentioned at this point that this system of ventilation has since been reversed and that the ventilation of the sewers in Los Angeles at the present time is mainly through the house connections, as this has been found by practice to be the most efficient method in many cities.

### System as First Constructed.

On account of the increased growth of the city, which began about 1895 to be quite rapid, it was later found necessary to make some changes in the plans prepared by Mr. Eaton. These changes did not require any marked difference in the original plan, excepting in the southerly and southeasterly portions of the city. The addition of new streets and the increase of new territory in these locations made it necessary to change the location of the Central Intercepting Sewer.

This sewer, which may be called the main sewer for the center of the city, was originally planned to be built from the intersection of Jefferson street and Grand avenue, northeasterly to the First street bridge, thence across the river, and along its east bank to a point where recently was located the pigeon farm which was destroyed by the floods of 1914. The size of the sewer was to vary from 3 feet 2 inches by 1 foot 9 inches to 1 foot 6 inches by 2 feet 3 inches. As built, however, in 1890, it was laid more than a mile to the east, crossing the river at Sixth street, and varying in size from 1 foot 2 inches to 2 feet 6 inches.

The Western Intercepting Sewer was laid in 1889 along Hoover street, be-

\*Read September 8, 1915, at the 15th Annual Convention of the League of California Municipalities in Oakland, California.

tween Jefferson street and Seventh street. Its size varied from 24 inches to 20 inches in diameter. It may be noted that both of these main interceptors were laid as circular sewers rather than the equivalent capacity in egg-shaped sewers.

The Southern Intercepting Sewer, as planned, was never built. In addition to the two main sewers above mentioned, laterals were laid in 1893 and 1894, along Flower street, Hill street, Maple avenue and Alameda street.

In 1896 the city was extended two miles westerly from Hoover street to Arlington avenue and two miles southerly from the South Charter Boundary to Slauson avenue, thereby adding ten square miles to its area. About this time the annexation of Highland Park and Garvanza to the northeast, and the University section in the southwest were made. Thus in 1900 the area of the city was 50 per cent more than it was in 1887, the population about 100,000 and the mileage of sewers was 160.

#### Old Outfall Sewer.

After the collection system planned by Mr. Eaton had been partially constructed, plans for an outfall sewer were finished, and in 1893 and 1894 this sewer was built. This outfall sewer began at the intersection of Jefferson street and Grand avenue. It was 12.4 miles in length, had a capacity of 30 second feet, and cost \$370,000. In its entire length there were three tunnels, two of which were 1,000 feet long, and the third, driven through the Inglewood Hills, was over a mile long. A part of this sewer was built of wooden stave pipe, banded with iron hoops. This type of construction was made necessary from the fact that the sewer, crossing two depressions in the surface of the land, formed two inverted siphons, each siphon being about three feet in diameter and over three miles in length. The remainder of this outfall sewer was built of brick, except at the ocean end, in which 24-inch cast iron pipe was used to carry the sewage out along the ocean bed for a distance of 600 feet. After the first severe storm, some of these iron pipe joints were broken, causing the sewage to discharge on the beach into a pool. A trestle was placed to prevent any further dislodgment of the pipe, but frequent repairs to both trestle and pipe line were required.

When this outfall sewer had been in use less than twelve years, it was found that the siphons were too small to carry the sewage of the city, and that a deterioration of the brick masonry was taking place, due to acid action caused by the sulphur bacteria in the sewage. The pressure on the wooden stave pipes of the siphons was sufficiently offset by the iron bands. The latter, however, occasionally rusted and deteriorated on account of the action of the alkali in the ground. The amount of sewage carried through, the first siphon became so great that it was necessary to relieve this part of the outfall sewer by overflow laterals which conveyed the excess volume of sewage to points where it would do the least damage. The discharge of sewage on land was, however, producing dissatisfaction, and it was found

impossible to divert the excess flow from the first siphon.

The flow through the outfall sewer to the ocean has been diverted at several places that the ranchers might make use of this source of supply for irrigation. The Cudaby ranch in the southeast, and the lands along the outfall sewer at several points between Santa Barbara avenue and Inglewood may be mentioned as among the places where this irrigation has been in practice.

Because of its growth to the south and southwest, the city encroached upon the farming districts, and objections were raised to this method of sewage disposal. The sentiment prevailing at this time became quite strong and against sewage irrigation, because it was considered that both from a business and also from a residential standpoint the discharge of sewage upon land would lower its value and interfere with the use of the land.

#### New Outfall Sewer.

The City of Los Angeles found it had accordingly outgrown its outfall sewer, and a bond election for funds for a new outfall sewer took place in October, 1902. The plans for the new outfall required a much lower elevation than that of the old outfall, as new additions to the south and southwest could not drain into the latter. This lowering of the grade permitted the new outfall to sewer practically all of the city as it existed in 1906, which was about 27,700 acres in area. On the other hand, however, the lowering of the grade caused considerable trouble and expense in the construction of the new outfall as almost three miles of its length of twelve miles was below ground water. The route for this sewer differed to some extent from that of the old outfall, but it discharged at the same place on the ocean front. Its size varied from 3 feet 3 inches circular to 6 feet 1 inch high by 5 feet 0 inches wide, and it was planned to be made mostly of brick. The capacity of the sewer was constant from the intersection of Slauson avenue and Arlington street to the ocean, and on a basis of 100 gallons per capita, it should provide for a population of 750,000. At the present time the average discharge is about 40 second feet, the total capacity being for a discharge of 116 second feet.

At the outlet end a pier 800 feet long was constructed and a 20-inch steel pipe was connected to the end of the old pipe and supported under the pier. The brick sewer ended 500 feet from shore, and 60 feet above high water.

Connection between the brick sewer and the outfall on the pier was made later by a reinforced concrete sewer 42 inches in diameter, lined with the best quality of vitrified brick to withstand scouring action. At the lower end of this 42-inch connecting sewer were gate valves which served to by-pass the sewage while repairs are made to the pier sewer outfall.

The velocity of flow through the new outfall varied from 4.2 feet per second to 7.8 feet per second. The time of passage between the upper end of the outfall at Jefferson street and University avenue and the outlet at Hype-

rión is estimated to be about four hours.

The work of construction by contract on the new outfall began in 1904. Two years later it was decided to have the City of Los Angeles complete the unfinished parts of its construction by day labor, as the contractors had defaulted on the balance of their contract. The principal and most difficult part of the unfinished work, which was completed by the city, was a tunnel two miles long with a maximum depth of 90 feet. To overcome the ground water encountered, proper machinery was installed which successfully handled the depth of 18 to 20 feet of water which was found above the invert grade. About two-thirds of this tunnel work was in wet ground, but by a continuous day labor work by a special department organized and maintained under the immediate supervision of Mr. Homer Hamlin, City Engineer, all of the new outfall sewer which was left unfinished by the original contractors, was completed and the new sewer was placed in use in 1907.

On account of damages to the outfall pier in 1908, changes were made in that portion of the outfall on the pier by replacing the 30-inch steel pipe with a 34-inch wooden stave pipe, at the outlet end of which was placed a 40-inch riveted steel pipe in a vertical position, thereby causing the sewage to be discharged at a depth of six feet below the mean sea level, and at a distance of 942 feet from shore. At this point the water is sixteen feet deep. During the past spring this vertical part of the pier outfall was washed away, and work is now under way for its replacement.

#### Additions to System Since 1907.

After the new outfall sewer was completed, the South Los Angeles Main Sewer was built. This sewer, laid easterly along Slauson avenue from its junction with the outfall sewer at Arlington street to Compton avenue, thence northerly and easterly through a portion of the City of Vernon, and across the Los Angeles River at McLean road, to the southerly end of Boyle Heights, is the main intercepting sewer for most of the city between Slauson avenue and Jefferson street, and also for the larger part of the Boyle Heights District. Tributary sewers quickly followed the construction of this main sewer. The South Los Angeles Main Sewer was built of brick along its lower end, and had a diameter of about four feet. To economize in cost of construction the upper end of this sewer, which had a diameter varying from 33 inches, to 27 inches, was built of a combination of a concrete invert and a brick arch. It was considered that the use of the brick arch was more durable, where sanitary sewage only is concerned, than the use of a concrete arch.

In 1905, an extension of about three miles was made to the Central Intercepting Main Sewer previously described; which permitted the Highland Park and Garvanza sections of the city to construct their lateral sewers, and thereby afforded the benefit of the system to these sections.

# Items Of Interest.

## Proposed Pittsburg - Pacific Rate Of 55 Cents.

All the transcontinental railroads—the northern roads being the Union Pacific, Great Northern, Northern Pacific and Chicago, Milwaukee & St. Paul and the southern roads, the Atchafalpa, Topeka and Santa Fe and the Southern Pacific—Have sent petitions to the Interstate Commerce Commission asking that they be allowed to make a through rate on finished iron and steel articles from Pittsburg to Pacific coast points of 55c per 100 lbs., which is the same rate as now applies from Chicago to the Pacific coast. No doubt is felt at Pittsburg that the Interstate Commerce Commission will allow the applicants to establish this rate and it is expected to go into effect within a week or not more than ten days. The 55c rate from Pittsburg to the Pacific coast will be extended to apply on tin plate.

The advantage to Pittsburg iron and steel manufacturers of a lower all-rail rate to the Pacific coast is obvious. Considerable time is saved in shipping by rail instead of to New York and via the Panama Canal. Whether the rate from Pittsburg to the Pacific coast via New York and the Panama Canal, which is now 56.3c will be reduced to meet the proposed 55c all-rail rate cannot be stated at this time. Unless it is reduced, it is certain this shipments of iron and steel articles from Pittsburg to the coast, via the transcontinental roads, will be materially increased, both on account of the lower rate and of the time saved.

## Our Export Trade.

Secretary McAdoo has transmitted to President Wilson his report of the proceedings and conclusions of the Pan-American commercial conference last May of representative bankers, business men and statesmen of the United States and eighteen Latin-American republics. Mr. McAdoo summarized his suggestions for carrying on the work of the conference and improving the financial and commercial relations between the participating countries as follows:

That the twelve federal reserve banks establish promptly joint agencies in the leading cities of all the countries of Central and South America for the purpose of providing enlarged credit facilities, as outlined in the first part of this report.

That the government of the United States provide the necessary steamship facilities by subscribing the capital stock of a corporation organized for the purpose of owning and operating the necessary steamship lines.

That the international high commis-

sion on uniformity of laws be granted an appropriation of \$25,000 to enable it to carry on the important work it has undertaken and represent the United States in the meeting of the international high commission of all Latin-American republics.

That a Pan-American financial conference be held annually in the city of Washington and that the congress authorize the President to extend invitations to the republics of Latin-America to attend a conference at the capital during 1916 and that an appropriation of \$50,000 be made for said conference.

In support of his suggestion for the establishment of joint agencies of federal reserve banks in neighboring republics, Mr. McAdoo says that extension of the credit facilities of this nation in those countries will inure to "their and our advantage."

He declares that the plan advanced during the conference here for the amendment of the national bank act so that national banks could become stockholders in an independent bank which would do a foreign business is inferior to that he now proposes for joint agencies of reserve banks.

## A Freight Regulator.

With the motor truck a present fact in our industrial life, and with the general system of excellent roads existing in California, the railroads are going to find a new and live competitor which is sure to prove an efficient regulator of freight charges. The Wichita Transportation Company is operating five trucks between El Centro, Imperial County, and San Diego-by-the-Sea successfully. These five trucks cost about 12,000, less than the cost of building one mile of railroad. The trucks are operated in a region without railroad competition. The railroads have introduced a case into the courts complaining that the truck company is not operating according to the laws of the state governing transportation service.

## Los Angeles Harbor.

The city of Los Angeles is first on the coast in the number of municipally owned docks and warehouses.

With the water frontage at San Francisco controlled by the state, the city of Los Angeles is far ahead of all that have municipal ownership. Complete figures bringing the number of municipal wharves and warehouses right down to date including the Salt Lake wharves, which have just been taken over by the city, were compiled recently at the request of the harbor commission of the city of Montreal.

Here is the tabulation of wharves and warehouses on the inner and outer harbor owned by the city and by private corporations:

Municipal—	Feet.
Dock No. 1 .....	2,520
East Channel .....	402
Fish wharf .....	950
First street wharf .....	295
Banning wharf .....	152
Pier A .....	2,055
Fries street .....	320
Water street .....	670
East San Pedro wharf .....	2,296
Fish harbor wharf .....	1,630
Total .....	11,309
Private—	Feet.
Consolidated Lumber Co. ....	1,800
Crescent Wharf & Warehouse Co. ....	852
E. K. Wood Lumber Co. ....	825
Hammond Lumber Co. ....	1,000
Kerkhoff-Cuzner Mill and Lumber Co. ....	1,196
Outer Harbor Dock & Wharf Co. ....	5,400
Pacific Wharf & Storage Co. ....	1,500
San Pedro, Los Angeles & Salt Lake Railroad .....	1,600
San Pedro Lumber Co. ....	1,081
Pacific Coast Steamship Co. ....	437
Southern Pacific Co. ....	6,121
Southern California Lumber Co. ....	797
Total .....	22,609
Total, municipal and private .....	33,969

Transit sheds are as follows:

Municipal—	Feet long.
Dock No. 1 .....	1800
Pier A, shed No. 1 .....	1000
Pier A, shed No. 2 .....	495
Water street shed .....	510
First street shed .....	250

Total .....

Private—	Feet long.
Crescent Wharf & Warehouse Co. ....	373
Outer Harbor Dock & Wharf Co. ....	1423
Pacific Wharf and Storage Co. ....	510
Southern Pacific Co. ....	640

Total .....

With the exception of one shed of the Outer Harbor Dock and Wharf Company the private sheds are narrow.

Important papers of interest to miners are ready for free distribution by the bureau of mines, Department of the Interior, according to information received here.

Only a limited supply of the publications are available for free distribution and in writing for them persons are requested to ask for only those needed and designate which they want by the number and title. The papers prepared and the subjects dealt with are: Bulletin 75, Rules and Regulations for Metal Mines; technical paper 84, The Buying and Selling of Ores; technical paper 107, Production of Explosives in the United States; technical paper 119, Composition of the Natural Gas Used in Twenty-five Cities; technical paper 110, Monazite, Thorianite and Mesothorium, minerals; circular 18, Notes on Miners' Carbide Lamps.

## Hollywood Water Extension.

The following letter is self-explanatory:

Los Angeles, Cal., Sept. 14, 1915.

H. T. Wright, Esq.,

Secretary of Hollywood Board of Trade, Los Angeles, Cal.

My Dear Mr. Wright: In response to your letter of inquiry of recent date in regard to the purposes and policies of the public service commission with reference to the proposed issue of bonds in the Hollywood, Colegrove and Palms sections, I beg leave to submit the following:

The proposed bond district is in two sections.

1. That portion of Los Angeles city west of Vermont and north of Wilshire, including Hollywood and Colegrove, and

2. That portion south of Wilshire boulevard, including the recently annexed district known as The Palms.

The entire bond issue will be \$1,550,000, the proceeds to be divided as follows:

(a) For north of Wilshire, Hollywood and Colegrove, \$1,000,000  
(b) For south of Wilshire and

The Palms ..... 550,000  
The bonds to run for forty years, interest not to exceed 6 per cent.

Five hundred and fifty thousand dollars south of Wilshire and The Palms to build a new distributing system to cover that territory.

One million dollars north of Wilshire and Hollywood and Colegrove as follows:

1. Payment to Union Hollywood Water Company ..... \$550,000
2. Extensions, enlargements, improvements, Santa Monica boulevard main and replacing Worn out pipe, etc ..... 234,736
3. Cahuenga pass trunk line, Franklin avenue tunnel via Ventura road to Franklin avenue; total cost ..... 136,675  
Amount chargeable to San Fernando Valley ..... \$38,350.00  
Amount chargeable to city and bond district ..... 98,325.00  
Fifty per cent chargeable to bond district (Hollywood) .... 49,162.50
4. Franklin line east total ..... 147,639  
Fifty per cent chargeable to district ..... 73,819.50
5. Franklin line west ..... 42,282

It is a fact that heretofore all the interest and sinking fund on the bonds issued for the purpose of purchasing the water distributing system of the old Los Angeles City Water Company have been paid out of the water revenues and that no taxes have ever been levied for these purposes.

This board, however, is of the opinion that this method is unjust and inequitable, as it compels the users of water to pay for the expense of building and maintaining the water system for the benefit of all property in the city or district and all property is benefited by the building of such a system and should pay its just proportion of the cost.

We believe that the just and equitable method is for the bonds to be paid by an assessment upon all of the property of the district, but if the majority of the water users in the proposed district and the city council desire to continue the policy of paying these charges from the money of the water users of the district, the board will probably adopt that method. It has been suggested that at the bond election an informal vote be taken of the electors of the district so that they may express their preference in this regard.

The present rates must be maintained in this district until funds are provided for the various contingencies above mentioned. No other method of raising this money can be devised except by voting these bonds. As soon as this money has been provided the board will reduce the rates the same as in the balance of the city.

Unless the people provide for the issuance of these bonds it will leave the district in a very bad condition with no adequate system for the supplying of water and no provision for future development, or for making extensions or replacing defective pipe, and it will soon endanger the purchase from the Union Hollywood Water Company, as the income at the present rates is insufficient to make the payments under the contract and provides nothing for betterments or extensions of the system or for the growth of that portion of the city.

Assessed value of property of district, \$34,000,000.

Annual assessment \$0.3874 on each \$100 the first year and \$0.2507 the average rate for the whole time to pay the bonds.

For illustration: A property owner whose property is assessed for \$2,000 would pay an average tax of \$5.01 per year. If he is a user of water, saving to him would be from \$12 to \$25 per year. Very truly,

R. F. DEL VALLE,  
President.

According to Col. W. H. Holabird, receiver for the California Development Company, development of new land in the Imperial Valley must depend on the Federal Government.

"The Development Company has about completed its 900-foot dam at Hanlon heading, eight miles south of Yuma," said Colonel Holabird recently. "When the last gap in that dam is stopped up every drop of water in the Colorado River will be in use in the valley. here will be 150,000 acres still unsettled, but its development must depend on the storage of water by the Government."

## Petroleum In August.

Reaching the highest mark recorded since July, 1914, the shipments to trade of oil produced in California totaled 8,077,86 barrels during the month of August.

In comparison with July the figures prepared by the statistical bureau of the Independent Oil Producers' agency show that last month the shipments advanced approximately 400,000 barrels above the total for the previous month.

While the indications are that August shipments were abnormal the statistics bear positive proof of the assertions that the prospects for the oil industry of this state are brightening. The slump that was occasioned by the declaration of war in Europe has been overcome and the situation may be regarded as steadily becoming stronger.

Following are the statistics for August:

District—	Gross Barrels.
Kern River .....	791,445
McKittrick .....	298,072
Midway-Sunset .....	3,334,516
Lost Hills-Belridge .....	376,200
Coalinga .....	1,148,678
Santa Maria .....	418,110
Ventura-Newhall .....	86,885
Los Angeles-Salt Lake .....	168,266
Whittier-Fullerton .....	1,053,273
Summerland .....	4,500

Total ..... 7,680,047  
July ..... 7,338,643

Difference ..... 341,404

### Shipments and Stocks.

Stocks August 1, 1915.....59,650,219

## News from the California State Commissions.

### STATE CORPORATION DEPARTMENT.

Illustrating some of the methods adopted by Commissioner of Corporations H. L. Carnahan to prevent shares of stock from getting loose on the open market until some definite value is established behind them are two mining cases just passed by the department.

In that of the Mace Asbestos Mining Company, which proposes to operate a lease in Amador County, the request to issue 1,000 shares apiece to four men in payment for their services in securing the lease and turning it over to the company was granted. The permit requires, however, that these shares be deposited as an escrow so that none of them may be sold or offered for sale until the company has accumulated sufficient surplus profits to pay a ten per cent dividend on all outstanding shares. If the lease proves of value the promoters will profit with the stockholders who pay cash for their shares. If it fails to make good, the shares having no value will never reach the public.

The Gold Point Mining Company is practically a close corporation of four individuals proposing to take over a lease and option to purchase certain claims on the North Yuba River above Downieville. The company is permitted to issue approximately 50,000 shares for money. The property, however is involved in litigation, and all shares issued must be deposited and withheld from further sale until the company has acquired good and sufficient title to the property.

Odd Fellows Hall Association, Los Angeles, is permitted to sell \$15,000 bonds for the purpose of retiring outstanding bonds and notes held by various lodges of the order.

G. & M. Sales Co., Inc., is permitted to sell 800 shares at par, \$10 per share, to net not less than \$0 for the purpose of establishing a sales agency for Jackson's Napa Soda water in New York State.

Kellar-Thomason Co., Los Angeles, is permitted to sell 500 shares at par, \$100 per share, to net not less than \$0.

Long Beach Harbor Co. is permitted to sell 5,754 shares to present stockholders at 50 cents to provide funds for meeting interest, taxes and other charges against a tract of land held by the company.

Ibex Springs Mining Company is permitted to issue 26,000 shares to E. S. Armstrong and S. F. Brock in payment for four quartz mining locations in Inyo County, to sell 24,000 shares at 25 cents to subscribers on subscriptions previously taken and to sell an additional 49,997 shares at the same price,

without deduction for commissions or other sales expense.

Allison-McHarg Co. is permitted to issue 124 shares to Mary C. Allison and 123 shares to Edith Allison McHarg in exchange for certain real property.

Co-operative Home Builders Co., San Francisco, is permitted to issue 15,000 shares on subscriptions previously taken, and to sell 10,000 shares at par, \$1 per share, to net 100 per cent. The company was organized among the United Railroad employees.

Pinless Line Sales Company, San Francisco, is permitted to issue seven shares in payment for an agency contract and two shares at par, \$250 per share, the seven shares to be deposited as an escrow pending action by the Patent Office on the device, on which the company has secured territorial rights.

Tuolumne Merchandising Co. is permitted to issue its shares to Paul Morris in exchange for the business and assets of the West Side Store at Tuolumne, Cal.

### American Saw Mills.

For the benefit of all who would know where the hardwoods and the soft woods in their numerous varieties are to be found, the Bureau of Foreign and Domestic Commerce, of the Department of Commerce, and the Forest Service, of the Department of Agriculture, have co-operated in publishing a directory of American sawmills, which might also be described, because of the detailed information regarding timber, as a complete guide to the forest resources of the United States.

This accurate knowledge of the places from which lumber may be obtained is one result of the closer government supervision of forests, as the same service that protects the trees gathers the facts that will aid the factories and dealers.

The history of this branch of American industry is a record of shifting production from extreme northeast, to the northern part of the central section of the country, to the South and West, and the directory of sawmills shows the proportions of the total output now derived from each of these sections.

This publication, with its detailed information, offers almost a glimpse of the mills in operation, for the returns compiled tell of the kinds of wood each produces, the capacity of the plant in board feet per day, and per cent of output in boards, timbers or framing. They indicate mills producing laths, shooks, ties or shingles, and record the largest size a mill can furnish, largest size it can dress, largest it can kiln dry, the least thickness

it can resaw, and its specialties.

A rapid survey of the field of production is afforded by a map of the United States presenting in graphic form the yield of lumber in 1912 by States and kinds of wood. It shows large amounts from such States as Louisiana, Washington, Oregon, Michigan, North Carolina, Wisconsin, Virginia, West Virginia, Mississippi, Arkansas, Pennsylvania, Minnesota and others, with smaller amounts down to the less productive States. There are also tables giving similar data for the various species, and a list of associations with the addresses of their officers and the kinds of wood the members produce. Rail and water routes to the individual mills are indicated in the returns from their owners that are published.

The book, which is Miscellaneous Series No. 27 of the publications of Foreign and Domestic Commerce, may be obtained from the Superintendent of Documents, Government Printing Office, Washington, D. C., or from the branch offices of the Bureau, at 25 cents per copy. San Francisco Branch, Customhouse.

The first clod for the construction of Kings County highway system, for which \$675,000 bonds were voted in May, was turned by Chairman J. M. McClellan of the Board of Supervisors. The same shovel was used which turned the first sod for the construction of Kings County's courthouse twenty-four years ago. A large crowd witnessed the inspiring scene. The highway system will connect all towns and cities of the county.

Three banking institutions holding trust mortgages aggregating \$23,600,000 secured on bonds covering the operative properties of the People's Water Company have commenced six suits for foreclosure in the Superior Court. The trust concerns are the Union Trust Company, San Francisco; Mercantile Trust Company, San Francisco, and the Oakland Bank of Savings. The suits are a necessary step in the reorganization of the company, it was declared.

Owing to ambiguity in the specifications regarding the furnishing of concrete by the county, the bids for the construction of five miles of county road between Palmdale and Lancaster were rejected without being opened by the Board of Supervisors of Los Angeles County, and the road department was instructed to prepare a new set of specifications.

For the same reason the advertisement calling for bids for the Artesia-Anaheim road was ordered withdrawn until the defect can be remedied.

## Technical Societies.

### SAN FRANCISCO ASSOCIATION OF MEMBERS OF THE AMERICAN SOCIETY OF CIVIL ENGINEERS.

Organized April 28, 1905.

This association which this summer rounded out its tenth year of existence has grown steadily since its inception, and now numbers some 200 members.

For the benefit of our readers we give here some extracts from the by-laws and the last annual report.

The object of this association is the advancement of engineering knowledge and practice, the maintenance of a high professional standing amongst its members, and the furtherance of the general welfare of the American Society of Civil Engineers.

Among the means employed for this purpose are meetings for the presentation and discussion of professional papers, particularly those issued by the American Society of Civil Engineers, and the encouragement of engineers who are not members to attend and take part in the professional and social features of such meetings.

The membership of this Association is restricted to persons who are members of the American Society of Civil Engineers in any grade. All such may become members of this Association without payment of entrance fee, but should the membership in the American Society of Civil Engineers of any person cease from any cause, he shall at the same time cease to be a member of this Association.

The annual dues payable by all members are \$5.00, payable annually in advance on the first day of January, and any member whose dues are more than one year in arrears shall cease to be a member of this Association.

The officers of this Association are a president, two vice-presidents, a secretary and a treasurer, who, with the two latest living past presidents, constitute a board of directors, in which the government of the Association is vested.

The officers are elected at the annual meetings of the Association.

The annual meeting of the Association is held on the third Friday of December in each year.

Regular meetings are held bi-monthly at such time and place as may be appointed by the board of directors. The established custom is to meet on the third Fridays of February, April, June, August, October and December. At these meetings the business of the Association is transacted and the discussion of professional papers published by the American Society of Civil Engineers, or specially arranged for the occasion is in order. Such discussions may be furnished to the Secretary of the American Society of Civil Engineers for publication, subject to

the approval of the publication committee of that Society.

Weekly luncheons in College Room. Regular meetings monthly as arranged. Engineers welcome; informal; no program.

Chairman.....	E. R. Northmore
Secretary.....	C. G. Pyle
Asst. Secretary.....	Edward Woodbury

EXECUTIVE COMMITTEE—J. A. Lighthipe, J. E. Barker, Geo. A. Damon, A. W. Nye.

Regular meetings third Tuesday in each month. Address all communications to C. G. Pyle, Secretary, Standard Underground Cable Co., 914 Hibernian Bldg., Los Angeles.

### ENGINEERS AND ARCHITECTS ASSOCIATION OF SOUTHERN CALIFORNIA.

President.....	Samuel Storrow
Vice-President.....	A. H. Koebig
Second Vice-President.....	W. A. E. Noble
Secretary-Treasurer.....	H. Z. Osborne, Jr.

DIRECTORS—Arthur S. Bent, J. J. Backus, A. C. Martin, Kenneth Shibley. Regular monthly meetings as arranged by program committee. Address all communications to H. Z. Osborne, Jr., Secretary, care City Engineer's Office, Los Angeles.

### AMERICAN INSTITUTE OF ARCHITECTS—SOUTHERN CALIFORNIA CHAPTER.

President.....	Albert C. Martin
Vice-President.....	S. Tilden Norton
Secretary.....	Fernand Parmentier
Treasurer.....	August Wackerbarth

DIRECTORS—J. C. Allison, J. J. Blick, J. J. Backus.

Regular meetings second Tuesday evening each month. Address all communications to A. R. Walker, Acting Secretary, 1403 Hibernian Bldg.

## PERSONAL.

W. H. Connel, Chief Highway Engineer of Philadelphia, and W. D. Uhler, Chief Engineer of the Pennsylvania Highway Department, recently made a tour of Los Angeles to inspect methods of street construction, repair and cleaning, in company with City Engineer Hamlin, Chief Deputy City Engineer Hansen, Mr. Nanry and Director Jesse D. Burks of the municipal efficiency department.

O. K. Parker, former engineer for the Southern California Automobile Club, now connected with the Harold L. Arnold organization, has been appointed consulting engineer for the Los Angeles Speedway Association. Mr. Parker is one of the best known men in Southern California to the motoring public. It was due more to his personal efforts than any other one factor that the road sign system south of the Tehachapi has gained national recognition as the best in the United States.

Engineer George P. Robinson, 729 Central Bldg., Los Angeles, has secured the contract for the preliminary surveys for the new Los Angeles speedway.

Mortimer Fleischacker, San Francisco banker and capitalist, has been appointed by Gov. Johnson the fifth member of the Rural Credits Commission, provided for by the last Legislature. The appointments of the other members, announced some time ago by Harris Weinstock, also were made official by the Governor. Besides Fleischacker, the commission members are State Senator W. E. Brown of Los Angeles, David P. Barrows of the University of California, Elwood Mead of the University of California and Harris Weinstock of San Francisco.

The County Highway Commission of Ventura County and the Supervisors have reached the conclusion to name County Surveyor Petit as engineer in charge of the building of \$1,000,000 worth of good roads in that county.

A million dollar good road bond issue was carried there by a vote of 4387 to 446. The money will be expended in building the main line roads of the county.

## APARTMENT HOUSES

**SAN FRANCISCO**—Apartment house, 3 story and base, frame, \$30,000. Architect, W. G. Hind, 46 Kearny street, S. F. Owner's name withheld. Location, Bush near Hyde. Will contain 23 suites of two rooms and bath. Interior finish pine with elm panels and hardwood floors. Steam heat, hot water system and wall beds. Ornamental plaster in lobby. Marble and tile wainscot in vestibule. Exterior covered with pressed brick veneer and cement plaster. Plans complete and segregated figures being taken.

**SAN FRANCISCO**—Apartment house, 4 story and base, brick and steel, \$40,000. Architect, E. H. Denke, 1317 Hyde street, S. F. Owners, Max and Dora Kolander, 1750 Franklin street, S. F. Location, south Bush west of Jones, covering an area of 54 feet 10 inches by 107 feet. Will contain 14 suites of five rooms and two suites of four rooms. Interior finished in hagogany and white enamel. Hardwood floors. Steam heat, oil burning equipment and hot water supply. Automatic elevator. Marble and tile wainscot in lobby. Wall beds. Bath rooms finished in tile. Exterior faced with pressed brick and terra cotta. Plans complete and segregated figures being taken.

**STOCKTON, SAN JOAQUIN CO., CAL.**—Apartments and offices, 3 story and base, brick. Cost not stated. Architect, Franklin Warner, San Joaquin Bldg., Stockton. Owner, Henry B. Budd. Location, East Channel between Sutter and San Joaquin streets, covering an area of 50½ feet by 75 feet. Will contain two stores and twelve suites of three and four rooms. Interior finish pine and elm panels. Some hardwood floors. Wall beds, steam heat, hot water supply and oil burning furnace. Exterior faced with pressed brick. Plans complete and figures being taken.

**SAN FRANCISCO**—Apartment house, 3 story and base, frame, \$15,000. Architect, none. Owner, James Welsh, 519 16th avenue, S. F. Location, southeast corner 15th avenue and Geary street, covering an area of 59 by 64 feet. Will contain eleven suites of two and three rooms. Interiors finished in pine with some elm panels and hardwood floors. Wall beds, steam heat and tile bath rooms. Exterior covered with rustic and cement plaster on metal lath. Plans complete and in the hands of the owner who will do the work by Day Labor.

**SAN FRANCISCO**—Apartment house, 3 story and base, brick and steel, \$150,000. Architect, J. C. Hladik, Monadnock Bldg., S. F. owner, Geodi Frieste. Location, northwest corner of Van Ness and McAllister street. Will contain nine stores, office and lobby on first floor. Upper floors will contain 200 rooms arranged in two,

three and four room suites. Wall beds, steam heat, elevator service, hot water system and vacuum cleaning. Bath rooms finished in tile. Patent store fronts. Exterior faced with white glazed terra cotta. Plans complete and segregated figures being taken.

## BANKS

**LOS ANGELES, CAL.**—Bank and offices, 4 story and base. Class A construction. Cost not stated. Architect, John Parkinson, Security Bldg., L. A. Owners, Security National Bank. Location, Spring street adjoining Security Building. First floor arranged for bank and upper floors for offices. Interior finish pine and hardwoods with marble bases and wainscoting. Hollow tile interior partitions, concrete floors, metal window sash and frames. Ornamental plaster and bronze in bank. Steam heat and elevator service. Exterior faced with granite. Plans complete.

## BONDS

**EUREKA, HUMBOLDT CO., CAL.**—The Fortuna High School District will have to hold another bond election for a new school building, because the former issue has been declared invalid. The bonds were for \$24,000.

**LOS ANGELES, CAL.**—The City Council has decided to submit to the voters at the October 26th election, a proposition calling for a bond issue of \$15,000 for building of a bridge across the Los Angeles River, connecting Lake Shore and Brand Boulevards.

**THE DALLES, ORE.**—The Wasco Good Roads Association recommended to the County Court that an election to vote bonds of \$262,500 be held. Of this amount \$62,500 is to be used on the Columbia Highway.

**CHICHALIS, WASH.**—An election will be held in the immediate future to vote bonds of \$62,000 with which to pay off outstanding warrants.

**CALENICO, IMPERIAL CO., CAL.**—A bond election will be held shortly to vote bonds for the construction of a civic center.

**LOS ANGELES COUNTY, CAL.**—The Board of Supervisors by a vote of three to two decided to submit to vote on October 26 the question of raising \$2,650,000, by a bond issue for road building in the county. If the bonds are voted, Supervisor Hinsaw has submitted the following expenditures:

Completion of Mint Canyon road	\$200,000
Arroyo Seco to Sky Line, to meet proposed State Highway	500,000
Sky Line, 20 miles	150,000
San Gabriel Canyon to Sky Line and Devil's Punch Bowl	750,000
Pico Boulevard	50,000

Harbor Boulevard .....	400,000
Venice to Manhattan Beach....	50,000
La Brea Canyon .....	65,000
Orange Grove avenue, Pasadena, to Central avenue, Sierra Madre .....	75,000
Redondo and Point Firmin....	150,000
Durfee road .....	50,000
Irwindale avenue, Foothill Boulevard to Covina road .....	30,000
Citrus avenue, Covina, to Walnut .....	75,000
Lexington road, south of El Monte .....	30,000
Ventura County, Castaic connection .....	75,000

HOQUIAM, WASH.—Another election will be held to vote \$100,000 bonds with which to construct lateral highway and bridges. Each project will be voted on separately. The issue recently failed to carry.

FRESNO, FRESNO CO., CAL.—The proposition of calling a bond election to vote bonds for needed improvements in this city is now being considered by the officials. It is proposed to enlarge the present sewer system, storm sewers and an extension of fire protection as well as an increase in apparatus.

EUREKA, HUMBOLDT CO., CAL.—Bids will be received up to October 11th by the County Supervisors for the purchase of either one hundred or one hundred and twenty-five California State Highway 4 per cent bonds. Further information relative to the sale may be had from the Clerk of the Supervisors.

BAKERSFIELD, KERN CO., CAL.—Owing to the crowded conditions of the present school buildings, the proposition of bonding the city for several thousand dollars in which to enlarge them is now under consideration.

ABERDEEN, WASH.—Bonds of \$400,000 to build water works and \$25,000 for the construction of a bridge across the Chehalis River, have been voted by the taxpayers.

MANHATTAN BEACH, LOS ANGELES CO., CAL.—Bonds have been voted for the erection of a new city hall building, to cost in the neighborhood of \$15,000. Plans for the structure are now under way in the office of Train & Williams, Exchange Bldg., Los Angeles.

### BRIDGES, DAMS AND HARBOR WORK.

MODESTO, STANISLAUS CO., CAL.—Bridges, reinforced concrete and steel. Cost not stated. Engineer, County Surveyor, Modesto. Owners, Stanislaus County. Bids will be opened on October 12th for the construction of four reinforced concrete bridges located as follows: Over Lower Lateral No. 2, about one and one-quarter miles south of the town of Ceres; over Lateral No. 4 on the Crows Landing road, about nine and one-half miles south of Modesto; over the Elmdale ditch near the corner common to sections 29, 30, 31 and 32. T. 2 S., R. 11 E., about two miles north of the town of Denair, and over a dry creek near the northwest corner of section 5, T. 3 S., R. 10 E., about one and one-half miles north and one and one-quarter miles east of the town of Claus.

HANFORD, KINGS CO., CAL.—Bridges and culverts, reinforced concrete. Cost not stated. Engineer, County Surveyor, Hanford. Owners, Kings County. Bids will soon be called for by the County Supervisors for the construction of bridges and culverts on the unit of the highway running from the east terminus of Seventh street south eight miles. Specifications for this portion of the highway are nearing completion.

BEATRICE, HUMBOLDT CO., CAL.—Culvert, reinforced concrete. Cost not stated. Engineer, County Surveyor, Eureka. Owners, Humboldt County. Bids will be opened on October 13th for the construction of a reinforced concrete culvert in Road District No. 3. Plans and specifications can be secured from the County Surveyor.

EUREKA, HUMBOLDT CO., CAL.—Trestle, timber. Cost not stated. Engineer, County Surveyor, Eureka. Owners, Humboldt County. Bids will be opened on October 15th for the construction of a timber trestle in Road District No. 3. Plans and specifications can be secured from the County Surveyor.

VISALIA, TULARE CO., CAL.—Bridges, reinforced concrete. Cost not stated. Engineer, County Surveyor, Visalia. Owners, Tulare County. Tulare County officials are planning to bridge Cross Creek before the state highway construction crew reaches that point. While four or five bridges are required, only two of them will be concrete, the rest being corrugated pipes. These will be of 24-inch diameter and will be ample to carry off the flood waters.

MADERA, MADERA CO., CAL.—Bridge, reinforced concrete. Cost not stated. Engineers, Leonard & Day, Rialto Bldg., S. F. Owners, City of Madera. Bids will be opened on October 15th for the construction of a 270-foot bridge over the Fresno River at D street. Plans can be secured from the City Engineer at Madera on deposit of \$5.

### Contracts Awarded.

HONOLULU, HAWAII—Coaling station, \$450,000. Engineer's name not given. Owners, Inter Island Steam Navigation Co. Contractors, C. W. Hunt Co., New York. Contract price, \$450,000.

SALINAS, MONTEREY CO., CAL.—Bridge, reinforced concrete, \$2,100. Engineer, County Surveyor Cozzens, Salinas. Owners, Monterey County. Contractor, Lou G. Hare, Salinas. Contract price, \$2,100.

### CHURCHES

SAN FRANCISCO—Church, 2 story and base, brick and steel, \$60,000. Architect, William H. Crim, Jr., 425 Kearny street, S. F. Owners, Second Church of Christ, Scientist. Location, corner of Dolores and Cumberland. Will cover a considerable ground area. Design classic. Interior arranged for auditorium, class rooms and reading rooms. Finish, pine and hardwood. Steam heat and vacuum cleaning. Ornamental plaster. Exterior faired with pressed brick trimmed with terra cotta. Plans nearly complete and figures to be called for shortly.

JAMESTOWN, TUOLUMNE CO., CAL.—Church, 1 story and base, frame, \$12,000. Architect, John J. Foley, 46 Kearny street, S. F. Owners, Roman Catholic Church. Design, Spanish colonial. Will contain main auditorium seating 350 people and Sunday school rooms. Interior finished in pine with some ornamental plaster. Art glass windows. Exterior covered with cement plaster on metal lath. Plans complete and figures being taken.

### FACTORIES AND WAREHOUSES

OAKLAND, CAL.—Warehouse, 3 story and base, brick and steel, \$60,000. Architect, Walter D. Reed, Oakland Bank of Savings, Oakland. Owners, Crane Co. Location, 5th and Webster streets. Will contain large storage space. Interior finish pine. Cement floors. Metal window sash and frames, special conveyor machinery. Exterior faired with pressed brick and stone. Plans complete and figures being taken.

### Contracts Awarded.

ASTORIA, ORE.—Grain elevator, reinforced concrete, \$22,668. Engineer, Port of Astoria Commission, Astoria. Owners, City of Astoria. Contractor, H. E. Doering, Portland. Contract price, \$22,668.

### FIRE HOUSES AND JAILS.

BAKERSFIELD, KERN CO., CAL.—Jail lighting fixtures. Cost not stated. Architect, Orville L. Clark, Brower Bldg., Bakersfield. Owners, Kern County. Bids will be opened on October 9th for furnishing and installing lighting fixtures in the new County Jail Building. Plans and specifications can be secured from the architect.

### FIRE REPORT

BAKERSFIELD, KERN CO., CAL.—The Lowell and Bloom clothing store in this city was destroyed by fire last week, entailing a loss estimated at \$25,000.

GRASS VALLEY, NEVADA CO., CAL.—"Rolda Mun," a summer resort owned by F. C. Luck, and situated on the narrow gauge line in Chicago Park, was destroyed by fire recently, causing a loss of \$4,000. The structure was two stories in height and of frame construction.

CONCORD, CONTRA COSTA CO., CAL.—The Presbyterian Church has been destroyed by fire at a loss of \$3,000. Preparations are being made to have the structure rebuilt.

SAUSALITO, MARIN CO., CAL.—The Miramar Cafe, a landmark of this town, has been destroyed by fire. The loss is estimated at \$5,000.

### FLATS

SAN FRANCISCO—Flats, 3 story and base, frame, \$7,500. Architect, Paul F. De Martini, 2123 Powell street, S. F. Owner, G. De Martini. Location, east Mason south of Broadway. Will contain three flats of six rooms each. Interior finish pine. Some hardwood floors. Open fire places and tile mantels. Bath rooms finished in imitation tile. Exterior covered with brick veneer.

er and shiplap. Plans complete and figures being taken.

**SAN FRANCISCO**—Flats, 3 story and base, frame, \$5,000. Architect, Paul F. Martini, 2123 Powell street, S. F. Owner, O. Torrie. Location, corner of Jackson and Lombard. Will contain six-room flats and a garage. Interior finish, pine with some elm panels and hardwood floors. Open fire places and tile or brick mantels. Imitation tile in bath rooms. Automatic water heaters. Exterior covered with cement plaster and shiplap. Plans are complete and figures are being taken.

**SAN FRANCISCO**—Flats, 2 story and base, frame, \$5,000. Architect, none. Owner, W. L. Hemmings, Inc., 1600 Fell street, S. F. Location, north California street east of 15th avenue, covering an area of 25 by 65 feet. Will contain two modern flats. Interior finished in pine with some elm panels and hardwood floors. Open fire places and tile or brick mantels. Bath rooms finished in tile. Automatic water heaters. Exterior covered with rustic and cement plaster. Plans complete and work to be done by Day Labor.

**SAN FRANCISCO**—Flat and store, 2 story and base, frame, \$7,000. Architect, Paul F. De Martini, 2123 Powell street, S. F. Owner's name withheld. Location 45th avenue and J street. Will contain store on first floor and modern flat above. Interior finished in pine and elm panels. Hardwood floors. Open fire place and tile mantel. Bath rooms finished in tile. Automatic water heaters. Exterior covered with shiplap. Plans complete and figures being taken.

**SAN FRANCISCO**—Flat and store, 2 story and base, frame, \$3,000. Architect, Paul F. De Martini, 2123 Powell street, S. F. Owner, A. Malucelli. Location, corner of 25th avenue and Lane. Will contain one store and a six-room flat. Interior finished in pine. Some hardwood floors. Open fire place and tile mantel. Imitation tile in bath rooms. Automatic water heater. Exterior covered with rustic. Plans complete and figures being taken.

## GARAGES

**SAN FRANCISCO**—Garage, 2 story and base. Class A construction, \$35,000. Architect, August G. Headman, New Call Bldg., S. F. Owner's name withheld. Location down town district, covering an area of 37½ by 137½ feet. Designed for commercial garage. Reinforced concrete walls, floors and steel roof trusses. Interior finish, pine. Metal window sash and frames. Special gasoline storage tanks. Exterior faced with pressed brick. Plans being prepared.

**SAN FRANCISCO**—Garage, 1 story and base. Class C construction, \$25,000. Architect, J. R. Miller, Lick Bldg., S. F. Owner represented by Buckbeorn Co. Location, southwest corner of Bush and Pierce, covering an area of 100 by 100 feet. Will contain stores besides a commercial garage. Interior finish pine. Exterior faced with cement plaster. Plans nearly ready for figures.

## GOVERNMENT WORK & SUPPLIES

### Pearl Harbor, H. T., Piers.

The following bids were received by the chief of the bureau of yards and docks, Navy Department, Washington, D. C., for the construction of reinforced concrete torpedo-boat piers at the naval station, Pearl Harbor, H. T.: Item 1, price for piers Nos. 1, 2, 3, and 4, complete; 2, price for piers Nos. 1, 2 and 3; 3, piers Nos. 1 and 2; 4, price per lin ft increase or decrease in length of concrete piles under items 1, 2, and 3.

Tibbets-Pacific Co., 16 California street, San Francisco, Cal., item 1, \$162,900; 2, \$125,900; 3, \$89,500; 4, \$2,750.

Spaulding Construction Co., Rialto Building, San Francisco, Cal., item 1, \$114,962; 2, \$87,200; 3, \$59,443; 4, \$130.

John Monk, Sharon Building, San Francisco, Cal., item 1, \$111,870; 2, \$55,709; 3, \$55,555; 4, \$140 and \$1.60.

Healy-Tibbets Construction Co., 9 Main street, San Francisco, Cal., item 1, \$151,000; 2, \$119,000; 3, \$86,000; 4, \$150.

McLeran & Peterson, 55 New Montgomery street, San Francisco, Cal., item 1, \$120,000; 2, \$90,000; 3, \$60,000; 4, \$150.

Hawaiian Dredging Co., Honolulu, H. T., item 1, \$112,935; 2, \$85,870; 3, \$58,800; 4, \$150, \$120, \$210 and \$1.40.

Lord-Young Engineering Co., 12 Merchant street, Honolulu, H. T., item 1, \$114,600; 2, \$85,600; 3, \$55,700; 4, \$2,500.

### Pearl Harbor, H. T., Marine Railway.

The following bids were received by the chief of the bureau of yards and docks, Navy Department, Washington, D. C., for constructing a marine railway at the U. S. naval station, Pearl Harbor, H. T.:

Item 1, work complete; 2, work complete in accordance with bidder's design as outlined in paragraph 95 of the specification; 3, deduct from items 1 and 2 for omitting paving.

The Crandall Engineering Co., 102 Border street, East Boston, Mass., item 2, \$181,100; 3, \$800.

The Tibbets-Pacific Construction Co., 16 California street, San Francisco, Cal., item 1, \$164,800; 3, \$1,100.

Booker, Kiehl & Whipple, 305 Central Building, Seattle, Wash., item 1, \$159,000; 3, \$157,900.

The Lord-Young Engineering Co., 12 Merchant street, Honolulu, H. T., item 1, \$122,700; 3, \$1,300.

### Pearl Harbor Wharf.

The following bids were received by the chief of the bureau of yards and docks, Navy Department, Washington, D. C., for constructing a reinforced concrete wharf at the U. S. naval station, Pearl Harbor:

Item 1, wharf complete; 2, price for each 3-column bay, 14 feet long, by which the number of such bays shown on plans may be increased or decreased; 3, price for each 4-column bay, 14 feet long, by which the number of such bays shown on plans may be increased or decreased.

Tibbets-Pacific Co., 16 California street, San Francisco, Cal., item 1, \$229,900; 2, \$2,040; 3, \$3,650.

The Healy-Tibbets Construction Co., 9 Main street, San Francisco, Cal.,

item 1, \$167,300; 2, \$1,600; 3, \$2,300.

The Spaulding Construction Co., 914 Rialto Building, San Francisco, Cal., item 1, \$151,506; 2, \$1,957; 3, \$2,412.

Lord-Young Engineering Co., 12 Merchant street, Honolulu, H. T., item 1, \$164,800; 2, \$2,000; 3, \$2,760.

The Hawaiian Dredging Co., Honolulu, H. T., item 1, \$155,900; 2, \$1,825; 3, \$2,650.

### Grand Junction, Colo., Models.

The contract for furnishing plaster models for the U. S. post office at Grand Junction, Colo., has been awarded to C. W. Buhler, Washington, D. C., at \$200.

### Carson City, Nev., Painting.

The contract for certain interior and exterior painting in the U. S. post office at Carson City, Nev., has been awarded to John S. Graham at \$650.

### Flathead Irrigation Project.

The Reclamation Service is asking for proposals for the construction of about ten miles of laterals and appurtenant structures in connection with the Flathead irrigation project, Mont. The work involves about 43,000 cubic yards of excavation, 140 cubic yards of concrete, 450 square yards of paving, the placing of about 9,860 pounds of reinforcing steel, and the placing in wooden structures of about 32,000 feet h. m., of lumber. The work is situated on the east bank of the Flathead river, from one to seven miles northeast of Dixon. The bids will be opened at the office of the U. S. Reclamation Service at St. Ignatius, Mont., October 12.

### War Prices for Chemicals and Drugs.

Owing to conditions caused by the European war prices for certain chemicals used in laboratory and photographic work and for certain drugs necessary in hospital work have so advanced that the various branches of the Treasury Department are only purchasing such supplies in quantities necessary to cover immediate needs. Other drugs and chemicals are purchased in the usual wholesale quantities. It is stated that aspirin and novocain are practically unobtainable and that the price of phenol is more than nine times greater than it was last year. Some of the greatest advances have been in the prices asked for oxalic, benzoic and carboic acids, potassium salts, mercury salts, balsam of Peru, neosalvarsan and salvarsan, thymol and thymol iodide, sniphonal, acetanilid, beta naphthol, bismuth salts, chloral hydrate, chloroform, venale, chromium trioxide, rocorcin, veronal, trional and sodium salicylate.

## HALLS AND SOCIETY BUILDINGS

**SAN FRANCISCO**—Club house, 3 story and base, frame. Cost not stated. Architect, H. C. Bauman, Hearst Bldg., S. F. Owners, Dorian Olympia Club. Location, northwest corner 22nd avenue and California street. Will contain club rooms for men and women, social hall and several living apartments. Interior finish pine and white enamel. Hardwood floors. Central heating system and open fire places. Mantels, tile or brick. Bath rooms

finished in tile. Exterior covered with cement plaster. Plans being prepared.

**HEPPER, GRE—**Lodge hall, 2 story and base, brick, \$15,000. Architect, C. C. Robbins, Alinsworth Bldg., Portland. Owners, Hepper Masonic Temple Association. Will cover an area of 40 by 100 feet. First floor arranged for stores. Upper floor will contain lodge rooms and offices. Interior finish pine and hardwood with hardwood floor. Central heating system. Patent store fronts. Exterior faced with pressed brick. Plans complete and figures being taken.

### HOSPITALS.

**SAN PEDRO, LOS ANGELES CO., CAL.**—Hospital, 2 and 3 story and base, brick. Cost not stated. Architect, Charles E. Durr Co., 523 South Beacon street, San Pedro. Owners, Sisters of Mercy. Will cover an area of 49 by 80 feet and contain wards for 30 patients, two operating rooms and baths. Interior finish pine with hardwood and tile floors and white enamel. Steam heat, hospital plumbing and hot water system. Vacuum cleaning. Exterior faced with cement plaster. Clay tile roof. Plans complete and figures being taken.

### HOTELS.

**PETALUMA, SONOMA CO., CAL.**—Hotel and stores, 3 story and base, brick and steel. Cost not stated. Architect's name not given. Owners, Matthies Estate. Location, Main street. Will contain several stores besides hotel office and lobby. Upper floors designed for 60 rooms and several baths. Interior finish pine. Steam heat, oil burning furnace and hot water system. Patent store fronts, marble and tile bases. Tile baths. Exterior faced with pressed brick. Plans complete and in the hands of H. C. Matthies, 180 Jessie street, S. E. Work to be done by Day Labor.

**PASADENA, LOS ANGELES CO., CAL.**—Hotel addition, 3 story, frame. Cost not stated. Architect, Myron Hunt, Hibernian Bldg., L. A. Owners, Maryland Hotel Co. Will cover an area of 44 by 120 feet and contain 40 rooms and 23 baths. Interior finish pine. Bath rooms finished in tile. Steam heat, hot water system and vacuum cleaning. Exterior covered with cement plaster on metal lath. Plans being figured.

**MARTINEZ, CONTRA COSTA CO., CAL.**—Hotel, 2 story and base, frame, \$10,000. Architect's name not given. Owner, Mrs. Hooker, Crockett. Location, Alhambra Heights. Will contain 14 rooms, dining room and kitchen. Interior finish pine. Some hardwood floors. Furnace heat and open fire place. Mantel brick. Exterior covered with rustic and cement plaster. Plans complete and contract to be awarded at once.

### IRRIGATION PROJECTS

**COLUSA, COLUSA CO., CAL.**—Reclamation work, levees, etc., \$600,000. Engineer's name not given. Owners,

Reclamation Districts 108, 479 and 787. Practically \$580,000 will be spent in the west side levee district next season to strengthen the Sacramento River levees from Colusa to Knights Landing, a distance of 50 miles. The west side district includes 107,000 acres, the greater part of which composes Reclamation Districts 108, 479 and 787. The newly elected commissioners of the district, J. W. Browning, E. L. Dow, J. H. Ralsdon, Alfred Davis and W. P. Dwyer, held a meeting in Sacramento recently and took preliminary steps towards the construction work, and instructed the engineers to prepare plans for the levee for submission to the State Reclamation Board for approval.

**MODESTO, STANISLAUS CO., CAL.**—Irrigation work. Cost not stated. Engineer, F. C. Herrmann, Modesto. Owners, Modesto Irrigation District. At a recent meeting of the Modesto Irrigation District, plans and specifications for enlargement of the main canal of Modesto Irrigation District between the Upper Dominici and Raliden fills, for enlargement of the canal below the intake at the La Grange dam, and for construction of five reinforced concrete drops on the lower part of the canal were adopted, and the secretary was authorized to advertise for bids to be opened on October 16th. The first two pieces of work are for excavation of earth, hardpan and rock. Further information together with plans for the proposed work may be had from the engineer at Modesto.

**CALIFORNIA** — Irrigation projects. Cost as follows. Engineer, United States Reclamation Service, Washington, D. C. Owners, United States Government. Funds appropriated by Congress for reclamation projects during the fiscal year 1916 were apportioned by the reclamation service to the amount of \$10,948,824. Of this sum California secures the following allotments: Orland project, \$70,195; preliminary investigations, Iron Canyon, \$25,000; Pitt River, \$25,000; Lassen County co-operative work, \$50,000; Shasta County co-operative work, \$100,000; general investigations in the State, \$5,000. For the California-Arizona Yuma project, \$659,460 is allotted, and for the California-Oregon Klamath project, the service set aside \$164,863. For the Colorado River basin \$25,000 was apportioned.

### LIBRARIES.

**DINUBA, TULARE CO., CAL.**—Library, 1 story and base, brick or concrete, \$10,000. Architects, Bowen & Davis, McKenzie Bldg., Fresno. Owners, Town of Dinuba. Will contain reading room, librarian's office and stack rooms. Interior finish pine. Central heating system. Maple floor. Metal book stacks. Exterior faced with pressed brick or cement plaster. Plans being revised.

**EXETER, TULARE CO., CAL.**—Library, 1 story and base, brick or concrete, \$10,000. Architect, A. Merrill Bowser, Fresno. Owners, Town of Exeter. Will contain one reading room, assembly hall, office and stack room. Interior finish pine with maple floor.

Central heating system and vacuum cleaning. Metal book stacks. Exterior faced with cement plaster or pressed brick. Plans being prepared.

**SAN FRANCISCO**—Library, 2 story and base, brick and steel, \$35,000. Architect, John Reed, Jr., First National Bank Bldg., S. F. Owners, City and County of San Francisco. Location, Jersey street. Will contain two reading rooms, office and stack room. Interior finish pine and hardwood with maple floors. Steam heat, oil burning furnace and vacuum cleaning. Metal book stacks and metal window sashes and frames. Exterior faced with pressed brick trimmed with terra cotta. Plans being prepared.

### PANAMA-PACIFIC EXPOSITION WORK.

**SAN FRANCISCO**—Wrecking station building. Cost not stated. Architect, none. Owners, State of Illinois. Bids will be received up to October 19th at 12 noon for wrecking the Illinois station building. Two propositions will be considered: First wrecking complete and second wrecking, not including the electric fixtures. Plans and complete information can be secured from Adolph Karpen, Commissioner, Karpe Bldg., Chicago. An official proposal appears in another column of this issue.

### RAILROAD CONSTRUCTION AND EQUIPMENT.

**MENDOCINO AND HUMBOLDT COUNTIES, CAL.**—Passenger stations, 9, 1 story, frame. Cost not stated. Engineer, Engineering Department Northwestern Pacific Co., Phelan Bldg., S. F. Owners, Northwestern Pacific Railroad Co. Plans are complete and figures have been taken for nine small frame passenger stations to be erected along the line of the Northwestern Pacific in the two counties above mentioned. Awards of contracts will be made shortly.

### RESIDENCES.

**SAN FRANCISCO** — Residence, 1 story and base, frame, \$3,000. Architect, none. Owners, McArthur Bros. 1560 Fell street, S. F. Location east 11th avenue 300 north Cabrillo. Will contain seven rooms, bath and basement garage. Interior finish pine, hardwood and white enamel. Hardwood floors. Open fire places and furnace heat. Tile or brick mantel. Bath room finished in tile. Automatic water heater. Exterior cement plaster. Plans complete and work to be done by Day Labor.

**SAN FRANCISCO** — Residence, 1 story and base, frame, \$3,000. Architect, none. Owners, Johnson and Johnson, 818 14th street, S. F. Location west 17th avenue north of Clemer street. Will contain six rooms, bath and sleeping porch. Interior finish pine and some white enamel. Hardwood floors. Open fire place and tile mantel. Bath room finished in tile. Automatic water heater. Exterior cement plaster. Plans complete and work to be done by Day Labor.

**SAN FRANCISCO** — Residence, 1½ story and base, frame, \$2,500. Architect, John F. Haner, 3579 19th street, S. F. Owner's name withheld. Location San Carlos and 19th street. Will contain five rooms and bath. Interior finish pine with some white enamel. Hardwood floors and open fire places. Bath room finished in tile. Automatic water heater. Exterior covered with rustic. Plans being prepared.

**SAN FRANCISCO** — Residence, 1 story and base, frame, \$4,000. Architect, Joseph A. Leonard, 85 Cerritos, S. F. Owners, Urban Realty Co. Location, west Victoria south Urhano. ### Contracts Awarded.

SAN FRANCISCO—Theatre, 1 story and base, brick and concrete, \$10,000. Architect, Mr. Frazer, Spreckles Bldg., S. F. Owner, H. Stewart, 4041 24th street. Contractor, P. A. Palmer, Menadnock Bldg., S. F. Contract price, \$10,000.

### SEALED PROPOSALS

#### PROPOSALS FOR CANAL SUPPLIES.

##### PROPOSALS FOR EXCAVATION.

EXCAVATION, ETC.—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the United States Reclamation Service at St. Ignatius, Mont., until 3 o'clock p. m. October 12, 1915, for the construction of about ten miles of laterals and appurtenant structures, involving about 13,000 cubic yards of excavation, 110 cubic yards of concrete, 450 square yards of paving, the placing of about 9,800 pounds of reinforcing steel and the placing in wooden structures of about 32,000 feet b. m. of lumber. The work is situated on the east bank of the Flathead River, from one to seven miles northwest of Dixon, Mont. For particulars address P. S. Reclamation Service, Washington, D. C.; Denver, Colo., or St. Ignatius, Mont. A. P. DAVIS, chief engineer.

##### PROPOSALS FOR CANAL SUPPLIES.

PANAMA, CANAL ZONE.—Proposals for material for one locomotive, 100 Crane, 50 Gross Tons Capacity, for Dry Dock No. 1, Balboa Terminals.—Sealed proposals will be received at

the office of the general purchasing officer, the Panama Canal, Washington, D. C., until 10:30 a. m. November 3, 1915, at which time they will be opened in public for furnishing the above mentioned articles. Blanks and general information relating to this circular (No. 973) may be obtained from this office or the offices of the assistant purchasing agent, Fort Mason, San Francisco, Cal.; also from the U. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal. F. C. BOGGS, major, corps of engineers, U. S. army, general purchasing officer.

##### PROPOSALS FOR EARTH WORK.

CANAL WORK—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the United States Reclamation Service at Powell Wyo., until 2 o'clock p. m. October 20, 1915, for the construction of canals and structures on the Shoshone project, Wyoming, involving 560,000 cubic yards of excavation, 400 cubic yards of reinforced concrete, 9,000 square yards of grouted paving and the placing in wooden structures of about 130,000 feet b. m. of lumber. The work is located near the stations of Garland, Mantua, Franine and Beaver, Wyo., on the C. B. & Q. Railway. For particulars address the United States Reclamation Service, Washington, D. C.; Denver, Colo., or Powell Wyo. A. P. DAVIS, chief engineer.

##### PROPOSALS FOR CANAL WORK.

CANAL WORK—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the United States Reclamation Service at Montrose, Colo., until 4 o'clock p. m. October 20, 1915, for the construction of about 11 miles of the Ironstone Canal, Uncompahgre Valley project. In the vicinity of Olathe, Colo. The work involves the excavation of about 205,200 cubic yards of material in open cut. For particulars address the United States Reclamation Service, Montrose, Colo.; Tramway Building, Denver, Colo., or Washington, D. C. A. P. DAVIS, chief engineer.

##### PROPOSALS FOR ICE PLANT.

ICE PLANT—Sealed proposals indorsed "Proposals for ice-making and cold storage plants" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m. October 16, 1915, and then and there publicly opened, for furnishing f. o. b. cars, San Francisco, and the installing in Peking, China, of an ice making and cold storage plant at the U. S. Marine barracks, Peking, China. Plans and specifications may be obtained on application to the bureau. H. R. STANFORD, chief of bureau.

##### PROPOSALS.

OFFICE OF THE BOARD OF PUBLIC WORKS of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m., on Wednesday, the 10th day of October, 1915, for doing the following work:

Electric clock system and mail chutes for the City Hall.

Said work must be done in accordance with the specifications on file in the office of the Board of Public Works, to which reference is hereby made, and must be commenced within five (5) calendar days from the receipt of written notice from the Board of Public Works and completed within one hundred (100) calendar days thereafter.

The amount of bond for faithful performance of contract has been fixed as follows:

Proposition No. 1, \$175,000  
Proposition No. 2, 150,000  
Proposition No. 3, 75,000

All proposals offered must be accompanied by a check certified by the Cashier of the City and County of San Francisco, payable to the order of the Clerk of the Supervisors, for an amount not less than ten per cent of the aggregate of the proposals.

Printed proposal forms will be fur-

nished gratuitously upon application at the office of the Architect, and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids. By order of the Board of Public Works, F. J. CITURCHILL, Secretary.

#### PROPOSALS FOR THE SALE, WRECKING AND REMOVAL OF THE ILLINOIS STATE BUILDING AT THE PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

SEALED PROPOSALS for the sale, wrecking and complete removal of the Illinois State Building at the Panama-Pacific International Exposition, at San Francisco, Cal., are asked by the Illinois Commission to the Panama-Pacific International Exposition.

Two proposals are desired, one to be for the sale, wrecking and complete removal of the building and fixtures, and the other for the sale, wrecking and complete removal of the building without lighting fixtures.

Radiators are not to be included in proposals.

All proposals shall be securely sealed accompanied by a certified check for ten per cent (10%) of the amount of the proposal, and mailed as follows: "To Adolph Karpen, Chairman, Illinois Commission to the Panama-Pacific International Exposition, Suite 1110, Karpen Building, Chicago, Illinois." Proposals will be received up to and including noon of Tuesday, October 19, 1915.

ILLINOIS COMMISSION TO THE PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

John G. Oglesby, Secretary. (\*)

#### PROPOSALS FOR BATTLESHIPS.

BATTLESHIPS—Proposals for constructing by contract of two battleships, Nos. 42 and 44, will be received at the Navy Department until 12 o'clock noon, November 17, 1915, when they will be publicly opened. A circular of requirements for said vessels is now ready and plans and specifications for their construction will be ready September 29, 1915, at which time they will be distributed among prospective bidders. Forms of proposal and contract may be had on application to the department after September 26. JOSEPHUS DANIELS, secretary of the navy.

#### STATE OF CALIFORNIA. DEPARTMENT OF ENGINEERING.

#### CALIFORNIA HIGHWAY COMMISSION

##### NOTICE TO CONTRACTORS.

SEALED PROPOSALS will be received at the office of the California Highway Commission, 515 Forum Building, Sacramento, Cal., until 2 o'clock P. M. on October 29, 1915, at which time they will be publicly opened and read for construction in accordance with the specifications therefor, to which special reference is made, portions of State highway as follows:

Placer County, from Lincoln to northern boundary (III-Pla-3-B), about 9 miles in length, to be paved with Portland cement concrete.

Sonoma County, from Reclamation to Fairville (IV-Son-5-A), about 4.2 miles in length, to be graded.

Mariposa County, from westerly boundary to Cathay White Rock Road (VI-Mpa-18-A), about 10 miles in length, to be graded.

Plans may be seen, and forms of proposals, bonds, contract, and specifications may be obtained, at the said office, and they may be seen at the office of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the division in which the work is situated.

The Division Engineers offices are located at Willits, Dunsmuir, Sacramento, San Francisco, San Luis Obispo, Fresno, and Los Angeles.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The Department of Engineering reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

CHARLES D. BLANEY,  
NEWELL D. BARTINGTON,  
CHARLES F. STERN,  
California Highway Commission.  
AUSTIN B. FLETCHER,  
Highway Engineer.

WILSON R. ELLIS, Secretary. (\*)

Dated: September 21, 1915.

#### PROPOSAL FOR BIDS.

BIDS are requested for the exterior of Benjamin Ide Wheeler Hall, University of California, Berkeley, California. Bids will be received on two bases: First, for granite; second, for cement finish on concrete.

Sealed bids will be received at the office of the Comptroller of the University of California, Berkeley, Calif., at or before 9 A. M., October 25, 1915, for complete exterior in cement plaster on concrete, as per plans and specifications on file and obtainable after 9 A. M., October 9, 1915, at the Cashier's window in said office.

A deposit of \$50.00 will be required for each set of plans and specifications taken out, which deposit will be refunded upon return of said plans and specifications, accompanied by a regular bid for the work. No bids will be received unless accompanied by a certified check or bond in favor of the undersigned, equal to 10% of the bid, to secure execution of the contract by the successful bidder.

The right is reserved to reject any or all bids.

#### LARGEST MECHANICAL POST OFFICE BUILDING.

Prediction Made That New York Plant Will Revolutionize Methods.

NEW YORK.—What is said to be the largest and most elaborately equipped mechanical plant for the handling of mail in the world is now located at the Grand Central terminal here and put in active operation recently. The structure occupies an entire city block. It was constructed by the railroad company, and leased by the post office department. Although the building is at present only three stories high, its construction is of a character that will permit it to be carried up to a maximum of 20 stories in the future, and it is probable that New York will be the first city to have one of the new post office skyscrapers now advocated by the department. The new building has 100,000 square feet of floor space, and its need was due to the rapid growth of the parcel post business now handled from this city. The exterior of the building is of white stone and cream-colored brick. Inside it is a vast net work of belts, chains, conveyors and lifts, all of which are operated by electricity, controlled by the pressing of a button. These devices will eliminate the old system of loading and unloading mail cars by trucks.

The plant is so situated, being directly over the railroad tracks, that eight mail cars can be unloaded or loaded at once, the whole operation being controlled by the pressing of a button. Many of the devices installed to load and unload cars are very new, and are having their first trial. Post office officials and railroad men predict that the new plant with revolutionize the method of handling enormous quantities of mail at big railroad centers.

#### SEARCH FOR TIN IN AMERICA.

In view of the interest in an adequate tin supply for the United States and the discussion of the smelting of Bolivian ore on the Atlantic seaboard, and possibly on Puget Sound, the publication by the United States Geological Survey of a special bulletin on tin mining in Alaska is opportune. It is noteworthy, too, that specimens of stream tin were collected by Survey geologists in Alaska in 1900, before this metal was known to occur in the Territory. Soon after that prospecting for tin became active, and two years later a commercial production of tin ore was made.

The Survey was also closely identified with the finding of lode deposits of tin. In 1903 two prospectors brought to Survey geologists in Alaska some specimens of float from Lost River which they thought might be tin ore. All the specimens but one were worthless. From this one the geologists obtained tin by smelting it in a teacup in their cookstove after which the geologists and the prospectors went to Lost River and discovered a vein of lode tin. This lode on Lost River has since been extensively mined. Some of the Alaska tin ore has been reduced at Seattle, Wash., within the last two years.

The report just issued presents a review of other work by the Geological Survey and the re-examination of the more important tin deposits by Geologist Henry M. Eakin.

The total tin production for the period 1902-1914 amounted to 526 tons of metallic tin, valued at \$380,000. The Alaskan tin ores have heretofore been shipped for reduction to Swansea, Wales, and Singapore. A copy of the report (Bulletin 622-B) may be obtained on application to the Director, United States Geological Survey, Washington, D. C.

#### ROOM FOR THIRTY STUDENTS IN UNIVERSITY ACCOUNTING CLASS.

Thirty places are open in the University Extension course in "Advanced Accounting Practice and Principles" which is offered at the High School of Commerce on Thursday evening from 7 to 10 P. M. Mr. Lewis Lilly, instructor in Accounting at the University of California, is in charge of the class.

The work in the course consists of practical problems with lectures on principles. The subject matter includes incorporation, dissolution, mergers, partnerships, and other problems which would be of value to those who are preparing to enter the profession of accounting and others who are desirous of doing advanced work in accounts.

STREET IMPROVEMENT—Cost as  
 follows. Richmond, Contra Costa Co.,  
 Cal. Engineer, City Engineer, Rich-  
 mond. Owners, City of Richmond. At  
 the last meeting of the City Council  
 the following action was taken on  
 street and sewer improvements. An es-  
 timate of the cost of the proposed con-  
 struction of the sewers in the Canal  
 subdivision was placed at \$11,600; for  
 grading the estimate was placed at  
 \$71,100; for the construction of the  
 sump was placed at \$4,700, a total of  
 \$87,400. This estimate does not include  
 the construction profit or incidental  
 expenses. The improvement of Bay  
 avenue from Potrero to the Southern  
 Pacific was postponed indefinitely.  
 Plans and specifications for the im-  
 provement of the Canal subdivision  
 were ordered prepared.

### FRESNO, MODESTO STANISLAUS AND CENTRAL CALIFORNIA

IRRIGATION WORK—Cost not stat-  
ed. Modesto, Stanislaus Co., Cal. En-  
gineer, F. C. Herrmann, Modesto. Own-  
ers, Modesto Irrigation District. At a  
recent meeting of the Modesto Irriga-  
tion District, plans and specifications  
for enlargement of the main canal of  
the Modesto Irrigation District between  
the Upper Dominici and Raiden fills,  
for enlargement of the canal below the  
intake at the La Grange dam, and for  
construction of five reinforced concrete  
drops on the lower part of the canal  
were adopted, and the secretary was  
authorized to advertise for bids to be  
opened October 16th. The first two  
pieces of work are for excavation of  
earth, hardpan and rock. Further in-  
formation together with plans for the  
proposed work may be had from the  
engineer at Modesto.

BRIDGES—Reinforced concrete and  
steel. Cost not stated. Modesto, Stan-  
islaus Co., Cal. Engineer, County Sur-  
veyor, Modesto. Owners, Stanislaus  
County. Bids will be opened on Octo-  
ber 12 for the construction of four re-  
inforced concrete bridges located as  
follows: Over Lower Lateral No. 2,  
about one and one-quarter miles south  
of Town of Ceres; over Lateral No. 4  
on the Crows Landing road, about nine  
and one-half miles south of Modesto;  
over the Elmdale ditch near the cor-  
ner common to sections 29, 30, 31 and  
32, T. 2 S., R. 11 E., about two miles  
north of the town of Denair, and over  
a dry creek near the northwest corner  
of section 5, T. 3 S., R. 10 E., about  
one and one-half miles north and one  
and one-quarter miles east of the town  
of Claus.

BRIDGES AND CULVERTS—Rein-  
forced concrete. Cost not stated. Han-  
ford, Kings Co., Cal. Engineer, County  
Surveyor, Hanford. Owners, Kings  
County. Bids will soon be called for  
by the County Supervisors for the con-  
struction of bridges and culverts on  
the unit of the highway running from  
the east terminus of Seventh street  
south eight miles. Specifications for  
this portion of the highway are near-  
ing completion.

JAIL LIGHTING FIXTURES—Cost  
not stated, Bakersfield, Kern Co., Cal.  
Architect, Orville L. Clark, Brower  
Bldg., Bakersfield. Owners, Kern  
County. Bids will be opened on Octo-  
ber 9th for furnishing and installing  
lighting fixtures in the new County  
Jail Building. Plans and specifica-  
tions can be secured from the archi-  
tect.

LIBRARY—1 story and base, brick  
or concrete, \$10,000. Dinuba, Tulare  
Co., Cal. Architects, Bowen & Davis,  
McKenzie Bldg., Fresno. Owners, Town  
of Dinuba. Will contain reading room,  
librarian's office and stack rooms. In-  
terior finish pine. Central heating  
system. Maple floor. Metal hook stacks.  
Exterior faced with pressed brick or  
cement plaster. Plans being revised.

LIBRARY—1 story and base, brick  
or concrete, \$10,000. Exeter, Tulare  
Co., Cal. Architect, A. Merrill Bowser,  
Fresno. Owners, Town of Exeter. Will  
contain one reading room, assembly  
hall, office and stack room. Interior  
finish pine with maple floor. Central  
heating system and vacuum cleaning.  
Metal hook stacks. Exterior faced with  
cement plaster or pressed brick. Plans  
being prepared.

SEWER CONSTRUCTION—Cost not  
stated. Bakersfield, Kern Co., Cal.  
Engineer, City Engineer, Bakersfield.  
Owners, City of Bakersfield. Bids will  
be opened on October 11th by the City  
Council for the construction of three  
separate sewer jobs. The work re-  
quires 6, 8 and 10 inch stone pipe.  
Plans can be secured from the City  
Clerk.

BRIDGES—Reinforced concrete. Cost  
not stated. Visalia, Tulare Co., Cal.  
Engineer, County Surveyor, Visalia.  
Owners, Tulare County. Tulare County  
officials are planning to bridge Cross  
Creek before the state highway con-  
struction crew reaches that point.  
While four or five bridges are required  
only two of them will be of concrete,  
the rest being corrugated pipes. These  
will be of 24-inch diameter and will  
be ample to carry off the flood waters.

BRIDGE—Reinforced concrete. Cost  
not stated. Madera, Madera Co., Cal.  
Engineers, Leonard & Day, Rialto  
Bldg., S. F. Owners, City of Madera.  
Bids will be opened on October 13th  
for the construction of a 270-foot  
bridge over the Fresno River at D  
street. Plans can be secured from the  
City Engineer at Madera on deposit of  
\$5.

RESIDENCES—2, 1 story, frame.  
Cost as follows. Fresno, Fresno Co.,  
Cal. The following Day Labor jobs  
are reported as about to be started in  
Fresno: G. E. Powell, 3159 Iowa street,  
1 story, frame dwelling, \$1,600 and F.  
C. Wilson, 2321 Hills street, 1 story  
frame dwelling, \$1,700.

Will cover an area of 19 by 80 feet and contain wards for 30 patients, two operating rooms and baths. Interior finish pine with hardwood and tile floors and white enamel. Steam heat, hospital plumbing and hot water system. Vacuum cleaning. Exterior faced with cement plaster. Clay tile roof. Plans complete and figures being taken.

RESIDENCE — 2 story and base, frame. Cost not stated. Hollywood, Los Angeles Co., Cal. Architect, Arthur S. Hennehan, 831 San Fernando street, L. A. Owner, Robert Fuller. Location, Camino Palmero and Franklin avenue. Will contain 14 rooms, three baths and sleeping porch. Separate garage in rear. Interior finish, pine, white enamel and hardwood. Hardwood floors, furnace heat, hot water circulating system and vacuum cleaning. Bath rooms finished in tile. Tile and brick mantels. Exterior covered with cement plaster. Plans being prepared.

SCHOOLS—3, 1 and 2 story, brick, \$135,000. El Centro, Imperial Co., Cal. Architect, S. B. Zimmer, El Centro. Owners, Town of El Centro. Bonds are to be voted at once for three new buildings and for extensive alterations and additions to the old schools. Further mention will be made of the work when plans are prepared.

STORES AND OFFICES—2 story and base, brick. Cost not stated, Calceico, Imperial Co., Cal. Architect, Ralph Swearingen, Calceico. Owners, Imperial Valley Hardware Co. Will cover an area of 112 by 152 feet. First floor will be arranged for a large store and upper floor will contain 30 modern offices. Interior finish pine and hardwood. Modern plumbing. Patent store fronts. Exterior faced with pressed brick. Plans being prepared.

#### Contracts Awarded.

BRIDGE PAVING—\$1,150. Ventura, Ventura Co., Cal. Engineer, City Engineer, Ventura. Owners, City of Ventura. Contractor, Conrad Scherrer, L. A. Contract price, \$1,150.

### PORTLAND AND OREGON.

THEATRE—2 story and base, brick, \$25,000. Springfield, Ore. Architect, D. Yensill, Eugene. Owner, J. A. Sevey. Will cover an area of 40 by 11 feet. Interior finish pine and ornamental plaster. Steam heat and special electric work. Exterior faced with pressed brick. Plans being prepared and figures to be called for shortly.

LODGE HALL—2 story and base, brick, \$15,000. Heppner, Ore. Architect, C. C. Robbins, Ainsworth Bldg., Portland. Owners, Heppner Mason Temple Association. Will cover an area of 40 by 100 feet. First floor arranged for stores. Upper floor will contain lodge rooms and offices. Interior finish pine and hardwood with hardwood floors. Central heating system. Patent store fronts. Exterior faced with pressed brick. Plans complete and figures being taken.

#### Contracts Awarded.

GRAIN ELEVATOR — Reinforced concrete, \$22,668. Astoria, Ore. Engineer, Port of Astoria Commission, Astoria. Owners, City of Astoria. Contractor, H. E. Doering, Portland. Contract price, \$22,668.

### SEATTLE AND WASHINGTON

HOME ECONOMICS—2 story and base, reinforced concrete, \$150,000. Seattle, Wash. Architects, Charles Bell and Carl Gould, Denny Bldg., Seattle. Owner, University of Washington. Although plans and specifications are not complete the date for opening bids on the proposed two-story fireproof home economics building for the University of Washington, has been set for October 29th.

### EXHIBIT OF AMERICAN MANUFACTURES IN SALVADOR.

[Charge d'Affaires Henry F. Tenar, American Legation, San Salvador, July 29.]

This office has received a letter from the publisher of the Diario del Salvador, which is one of the most important newspapers in Central America and issued by a company incorporated in the State of New York. The letter outlines briefly a plan for the establishment in the capital city of San Salvador of an "American bazaar," the primary purpose of which would be to constitute a permanent exhibition of samples of American manufacturer goods, for which the writer believes that there should be a good demand in the country.

With regard to the project in general, the writer says:

"My company can, through its paper, render valuable service to the interests of the manufacturers who decide to furnish me with samples of the products, and who give me, at the same time, instructions with regard to conditions and terms of sale, and a other information which would be required by merchants, manufacturers and farmers desiring to obtain goods which are needed in our market, now even more than ever before on account of the almost complete interruption of business relations with Europe. I am now giving you the plan only

outline, but you will easily appreciate the many advantages which it offers to the manufacturing interests of the United States."

As a means of carrying out his plan the writer desires to get in touch with manufacturing houses in this country which may be interested. He was himself at the time of writing (the end of July) preparing to leave for a trip to New York, Philadelphia, and Washington, his time to be devoted to this phase of the matter.

## Many Floats For Builders' Week.

**October 21st Will Be Parade Day and All Leading Firms are Preparing to Enter Beautiful Floats.**

The work of the Parade Committee for American Builders' Week, October 18-23 has crystallized rapidly during the last ten days. Already the progress shown promises that the occasion will be the most spectacular from an educational point of view that has ever been formed and will make even the builders themselves marvel.

Thursday will be Parade Day and will be the peak point of the week's festivities. It will be American Builders' Day at the Exposition. All those who are interested in construction or in building materials and furnishings are invited to participate. Already fully three score floats have been designed and are under construction.

The parade has been divided into 26 Divisions, each division being led by a Marshall and his aids. Many divisions are arranging for their own bands.

It is the purpose of Chairman Brandon and his parade committee to show the progress of a modern, up-to-date city like San Francisco. The evolution of the Builders' art will be exemplified, beginning with primitive methods and finishing with the most modern methods and features. It will all be interesting, instructive and impressive.

**What Some of the Floats Will Be.**  
A mammoth log symbolizing the giant tree industry of California and its lumber branches.

The Hoo Hoo Brotherhood will probably indulge in an enormous Black Cat high as the trolley wires, directed and guided by the Grand Snark of the Universe.

The largest brick that ever came to any city will be a contribution from the Brick Manufacturers.

O. C. Sorsli, the eminent artist and sculptor and dealer in garden furniture, will bring forth from his famous studios rare works of art to decorate a float or floats for this parade.

The Baer Furniture Company will enter two elegant floats.

Henry Cowell & Co. will exhibit the largest sack of cement ever drawn by a four horse team.

Woods-Huddart & Co. have their corps of engineers working on two or more floats showing the massive contour of structural iron beams and columns.

W. P. Fuller & Co. will enter two floats showing how their best paints are made.

Mr. Lynch has designed a novel float

showing the old and the new methods in lath construction.

Marshall & Stearns will exemplify the "Wall Bed" feature of modern house and apartment construction.

The Montague forces will show us something new and interesting in a float of "Mantels and Tiles."

"The Architect and Engineer" has promised "Something Very Special."

Mr. Elbert E. Mitchell, representing Insurance, has promised a float that will cover every feature of the Builders' industry.

W. H. Malott will have a float that will show how the modern house is covered by the best paper roofing process.

George Chambers is working out a float for Gladding McBean & Co. that will be a picture in Pressed Brick and Terra Cotta.

Guido Blenio Fireproofing Company will have a float showing how building materials and furnishings are made immune to the ravages of fire.

The Guilfoyle Metal Works' float will be an exposition of their industry.

Mr. Anderson of the Pacific States Electric Company is arranging for a mammoth display by the Electrical People of this city.

Among many others who have also signified their intention of entering floats are:

The Pacific Gas & Electric Co.

The Pioneer Paper Co.

The Plumbers' Association.

Mr. Chas. E. Spencer of the California Steel Co., Marshal of the "House-smiths" Division.

James Cantley & Co.

Mr. John L. E. Firman, Secretary Masters Plumbers Ass'n. and Marshal of the Plumbers' Division.

The Firestone & Roofing Co.

The Stockton and Enamel Brick Co.

The Forrester Cornice Works.

The J. A. Korell & Co. Sheet Metal Works.

Mr. A. H. Bergstrom.

The Paraffine Paint Co.

Dreusike of the United Sheet Metal Works.

The Pioneer Paper Co.

The Holloway Expanded Metal Lath Company.

C. F. Pratt, representing Rock, Gravel and Sand.

S. F. Lumbermens' Club.

J. P. McGilvray.

The Contracting Lathers.

Many firms that are going to enter floats are keeping secret their designs hoping to surprise the public as well as their competitors. For this reason only a few names of the many who will participate are obtainable.

Geo. L. Hutchin, the experienced Director of Parades and Pageants, is lining up the different interests as rapidly as the entrants indicate their willingness to participate. He is furnishing free designs and suggestions to all those wishing such help.

### COMMERCIAL ORGANIZATIONS OF THE UNITED STATES.

Facts about all sorts of organizations which bear a vital relation to the business activities of the country are presented in compact form in the directory of "Commercial Organizations of the United States," a new edition of

which has been issued by the Bureau of Foreign and Domestic Commerce. The previous volume was prepared in 1912, and all the data embraced in that publication were made to contribute toward the breadth and completeness of the new directory, which, nevertheless, has been compiled from actual returns received from various authentic sources within the reach of the bureau. Dependence was not placed entirely on the information given by trade organizations in response to circulars sent out from Washington, but valuable assistance was afforded by the Post Office Department, through the postmasters, who reported upon commercial organizations in their respective sections.

The result is the most complete list of organizations directly related to the commercial life of the country that has ever been issued. The first edition was widely circulated in the United States and copies were also in use in foreign countries in all parts of the world. With a complete revision, the book is expected to be still more valuable to business men and to those who wish to reach business men in the larger groups that are here represented.

In the compilation the organizations have been divided into three classes—interstate, national, and international in one; State and territorial in the second; strictly local associations in the third; the others are grouped according to the states in which they are located.

In addition to data relating to dues, income, number of members, and date of annual meeting, the field of service and special activities of the respective local organizations are shown as far as practicable by the use of symbols.

Copies of the publication may be obtained at 15 cents each from the Superintendent of Documents, Washington, D. C., or from the branch offices of the Bureau of Foreign and Domestic Commerce.

### A NEW ALUMINUM SOLDER.

Under the trade name Kaylon there is being introduced in Great Britain a new solder for aluminum, which is reported to have given excellent satisfaction. When soldering two aluminum surfaces with Kaylon, it is necessary to scrape away gently the thin oxidized skin on the outside of the metal, either with a knife or a fine rasp. The metal is then warmed in a flame, and the stick of Kaylon gently rubbed over the spot to be soldered. The metal should just be warm enough to melt the stick, but not hot enough to render it liquid. After the Kaylon is rubbed on, the surface is brushed with a stiff wire brush, making the solder combine well with the metal surface. The two pieces of metal are then held together and heat is applied until the solder forms a connecting skin. The chief advantage of Kaylon is said to be its permanency, due to its absolute indifference to influences of the atmosphere. The soldered joint will not oxidize, as nearly every other aluminum solder does. Its application in the automobile industry, because of the growing use of aluminum, renders this method of soldering of special interest to Americans. Scientific American.

## Associated Catalogues.

Here is where the Architect usually files the circulars, catalogues, announcements, etc., that come to his office. He can't take care of them. There are too many of them.

### the Remedy:

Associated Catalogues is a collection of catalogues of Building Materials, Building Equipment and Building Machinery available on the Pacific Coast, bound in one volume, thoroughly indexed for instant reference for Architects use.

Every Architect, Consulting Engineer and Large Corporation Purchasing Agent on the Pacific Coast will receive a copy Free. When

Size of pages, 11x14 inches.

the Architect is preparing his plans and specifications, he wants to know how to specify your goods. It's up to you, Mr. Dealer, to make it easy to specify your products.

Associated Catalogues presents the solution. Price per page \$30.00. Send for specimen pages.

## International Engineering Congress, 1915.

W. A. CATTELL, Mem. Am. Soc. C. E., Secretary.

### OUTLINE HISTORY OF THE ORGANIZATION AND DEVELOPMENT OF THE INTERNATIONAL CONGRESS, 1915.

The movement which resulted in the International Engineering Congress, 1915, began to take definite shape at a meeting of representatives of the American Societies of Civil and Mechanical Engineers, which was held on October 24, 1911.

There were present at this meeting Messrs. A. L. Adams, C. Derleth, Jr., G. W. Dickie, C. E. Grunsky, E. C. Jones and T. W. Ransom. Mr. Derleth acted as chairman and Mr. Ransom as secretary.

At this meeting it was determined that an Engineering Congress should be held in San Francisco in 1915, and invitations were extended to all Engineering and Technical Societies represented by local organizations in San Francisco to be represented by delegates at a meeting to be held November 2, 1911 to discuss "ways and means" for holding an Engineering Congress.

At this meeting of November 2nd, eight Engineering and Technical Societies were represented as follows:

- (1) Am. Soc. C. E. by C. Derleth, Jr., and C. E. Grunsky.
- (2) Am. Soc. Mec. Eng. by G. W. Dickie, E. C. Jones and T. W. Ransom.
- (3) Pacific Coast Gas Ass'n. by E. C. Jones.
- (4) Am. Inst. Elec. Engrs. by H. A. Lardner.
- (5) Mining and Metallurgy Soc. of Am. by F. W. Bradley and S. B. Christy.
- (6) Am. Inst. Min. Eng. by W. W. Halson and E. T. Blake.
- (7) Am. Chemical Soc. by F. T. Green and B. S. Drake.
- (8) Tech. Soc. of the Pac. Coast by M. Manson and O. von Geldern.

At this meeting a resolution was adopted that each society should send three delegates to a conference to be held on January 15, 1912, for the purpose of formulating plans for holding an International Engineering Congress in conjunction with the Panama-Pacific Exposition in San Francisco during the year 1915.

At the conference of January 15th, the various societies were represented by the following delegates:

American Society of Civil Engineers: A. D. Foote, Prof. C. D. Marx, W. D. Cattell.

American Society of Mechanical Engineers: Calvin W. Rice, Prof. W. F. Durand, E. C. Jones.

Pacific Coast Gas Association: John A. Britton, C. O. G. Miller, Frank A. Leach, Jr.

American Society for Testing Materials: Prof. C. B. Wing, Loren E. Hunt, C. F. Wieland.

Society of Naval Architects and Marine Engineers: Prof. E. F. Durand, F. W. Hibbs, Geo. W. Dickie.

Mining and Metallurgical Society of America: F. W. Bradley, C. W. Merrill, Ed. N. Benjamin.

American Institute of Mining Engineers: W. C. Ralston, Edwin Blake, Prof. S. B. Christy.

American Society of Electrical Engineers: H. A. Lardner, S. J. Lishberger, Geo. R. Murphy.

Technical Society of Pacific Coast: Otto von Geldern, Marsden Manson, Col. W. H. Heuer.

The meeting was called to order by Prof. Charles Derleth, Jr., T. W. Ransom acting as secretary. Prof. W. F. Durand was elected chairman and Mr. Otto von Geldern, secretary of the conference. Messrs Derleth, Grunsky and Ransom were elected delegates at large.

A committee was appointed, consisting of Messrs. Marks, Christy, Durand, Lardner, Dickie, Wing and Bradley, to formulate a definite plan of organization for the congress.

After several meetings of the conference, it was finally determined that the Congress should be held under the auspices of five National Engineering Societies, namely: American Society of Civil Engineers, American Institute of Mining Engineers, the American Society of Mechanical Engineers, American Institute of Electrical Engineers, The Society of Naval Architects and Marine Engineers; and that it should be managed by a committee, consisting of the presidents and secretaries of each of the five societies and four other members of each society to be appointed by their respective governing bodies.

This plan was submitted to and received the approval of each of the five

societies, and on March 6, 1913, the local members of the committee of management appointed by the five societies, met in the board room of the Mechanic's Institute for the purpose of perfecting a permanent organization.

There were present at this meeting Messrs. A. L. Adams, H. F. Bain, W. A. Cattell, W. G. Dodd, W. F. Durand, A. M. Hunt, C. D. Marks and C. R. Weymouth. The meeting was called to order by Prof. W. F. Durand, acting as chairman of the conference of January 15, 1912. Prof. Durand was elected temporary chairman, and W. A. Cattell, temporary secretary of the permanent organization. A committee was appointed consisting of Chairman W. F. Durand, ex-officio; E. H. Benjamin, W. A. Cattell, W. G. Dodd, A. M. Hunt and T. W. Ransom; the last five representing respectively the American Institute of Mining Engineers, the American Society of Civil Engineers, the Society of Naval Architects and Marine Engineers, the American Institute of Electrical Engineers and the American Society of Mechanical Engineers; to formulate a definite plan for the permanent organization of the committee, to nominate permanent officers and report at a meeting to be held on March 14, 1913.

In order to secure the support of the five national societies, it became necessary for the Engineers of the Pacific Coast to show their faith in the project of holding the Congress, by subscribing to a guarantee fund of \$10,000. This was accordingly done, and when the official representatives of the five societies assembled on March 6th, the \$10,000 had been fully subscribed and became an important factor in developing the final plans for the Congress.

At the meeting of March 11th, the plan of organization, together with the constitution and by-laws for the government of the committee which was submitted by the committee appointed at the previous meeting, was adopted. Prof. W. F. Durand was elected permanent chairman, and W. A. Cattell permanent secretary-treasurer of the committee.

Following close upon the meeting of March 14th at which the permanent or-

ganization was perfected, the actual work of preparing for the Congress was assigned to several sub-committees, and the services of Mr. E. J. Dupuy were secured as executive secretary.

The constitution of the committee of management of the Congress is as follows: Each of the five societies is represented by six members, the president and secretary of each and four other members of the committee of management, consisting of the five presidents and five secretaries in New York, constitute a committee of participation. All executive and editorial work is handled by the local members of the committee in San Francisco.

The fund guaranteeing the expenses of the Congress was underwritten as follows:

Engineers of the Pacific Coast...	\$10,000
Amer. Soc. of Civil Engineers...	9,000
Amer. Inst. of Mining Engineers	5,000
The Amer. Soc. of Mech. Eng....	5,000
Amer. Inst. of Elec. Eng.....	5,000
The Soc. of Naval Architects and	
Marine Engineers .....	2,000

The amounts underwritten by the five societies are proportionate to their respective membership.

#### SCHEDULE OF EVENTS.

##### Monday, September 20.

10:00 A. M. Opening general session in Main Hall of Auditorium Building, Civic Center; Hayes, Larkin and Market streets, San Francisco. 2:00 P. M. General session: The Panama Canal. In Main Hall of Auditorium. 8:30 P. M. Reception to visiting members at Palace Hotel.

##### Tuesday, September 21.

9:00 A. M. Mount Tamalpais trip. 10:00 A. M. and 2:00 P. M. Section sessions in various halls of the Auditorium.

##### Wednesday, September 22.

10:00 A. M. Section sessions in various halls of the Auditorium. 2:00 P. M. Visit to Exposition, grounds and palaces.

##### Thursday, September 23.

10:00 A. M. and 2:00 P. M. Section sessions in various halls of the Auditorium. 2:30 P. M. Lawn party on the grounds of the University of California.

##### Friday, September 24.

10:00 A. M. and 2:00 P. M. Section sessions in various halls of the Auditorium. 10:00 A. M. Automobile ride for ladies. 7:30 P. M. Banquet at Palace Hotel.

##### Saturday, September 25.

10:00 A. M. Closing general session in Main Hall, Auditorium. 2:00 P. M. Cruise about San Francisco Harbor.

Papers of the Congress in the order and at the time and place at which they were presented.

##### Monday, September 26.

10:00 A. M. Opening general session. Address of welcome by the Mayor of San Francisco. Addresses by Maj. General Goethals, Honorary President of the Congress, honorary vice-presidents and by distinguished delegates.

##### THE PANAMA CANAL.

2:00 P. M. Introductory paper, Maj. General G. W. Goethals. Commercial and Trade Aspects of the Panama Canal, Emory R. Johnson. The Working Force of the Panama Canal, Major

R. E. Wood. Purchase of Supplies for the Panama Canal, F. C. Boggs. Outline of Canal Zone Geology, Donald F. Macdonald. Climatology and Hydrology of the Panama Canal, F. D. Wilson, Sanal Zone, Panama.

#### SECTION SESSIONS.

The publication of the papers by volumes will be approximately as listed for presentation with exceptions as follows:

(1) All Panama Canal papers will be published together forming Vol. I.

(2) Due to the large amount of material in Mechanical Engineering, certain of the papers presented in this section will be published in Vol. VII with the papers on Electrical Engineering.

#### WATERWAYS.

##### Tuesday, September 21.

10:00 A. M. Dry Excavation (Panama Canal), Maj. General Geo. W. Goethals. Dredging in the Panama Canal, W. G. Comber. Construction of Gatun Locks, Dam and Spillway, Brig. General W. L. Sibert. Method of Construction of the Locks, Dams and Regulating Works in the Pacific Division of the Panama Canal, S. B. Williamson. Lock Gates, Chain Fenders and Lock Entrance Caissons, Henry Goldmark. 2:00 P. M. The General Design of the Locks, Dams and Regulating Works of the Panama Canal, Brig. General H. F. Hodges. Design of the Lock Walls and Valves of the Panama Canal, L. D. Cornish. The Design of the Spillways of the Panama Canal, E. C. Sherman. Emergency Dams above Locks of the Panama Canal, T. E. Monniche. Hydraulics of the Locking Operations of the Panama Canal, R. H. Whitehead.

##### Wednesday, September 22.

10:00 A. M. The Province of Waterways in the Internal Commerce and Development of a Country, Brig. General W. H. Bixby. Artificial Waterways which form Cut-offs on Marine Routes, and Waterways consisting of Natural Channels and Bodies of Water linked by Artificial Channels, constituting Inside Routes, C. S. Riche. The Waterway from the German Rhine through the Netherlands to the North Sea along the Rivers Rhine, Waal and Nieuwe Maas, C. A. Jolles, c. i. Natural Waterways in the United States, Lt. Col. W. W. Harts.

##### Thursday, September 23.

10:00 A. M. Flood Control, Brig. General H. M. Chittenden. Flood Control in China, Charles Davis Jameson. Works for the Improvement of Navigable Estuaries, Prof. Dr. Luigi Luiggi. River Improvement Works in Japan, Tadao Okino, Vice-President Civil Engineers Society, Japan.

#### IRRIGATION.

##### Thursday, September 23.

2:00 P. M. Irrigation Enterprise in the United States, C. E. Grunsky. Economic Advisability of Irrigation, P. H. Newell. Distribution Systems, Methods and Appliances in Irrigation, J. S. Dennis; H. R. Muckleston; Robert S. Stockton. Italian Irrigation, Prof. Luigi Luiggi. Irrigation in Lybia (Italian Colony), Prof. Luigi Luiggi. (Continued in next issue.)

# The Sewerage System of Los Angeles.

by  
**W. T. Knowlton, Engineer of Sewers.**  
(Continued from Oct. 6th.)

1909 and 1910 the annexation of Colegrove and East Hollywood sections and the consolidation of Hollywood with Los Angeles added 24 square miles to Los Angeles. These last additions caused a careful study to be made of a sewerage system for the city and as a result it was planned to have the Hollywood Main Sewer to act as an intercepting sewer for the Colegrove and East Hollywood sections. To provide an outlet into the outfall sewer the Hollywood sewer was begun at its intersection of Arlington avenue and Exposition Boulevard, and was thence northerly and northwesterly around the West Adams District, through Crenshaw Boulevard between Exposition street and Country Club Boulevard. This sewer was laid in a tunnel, and this portion, together with the portion between this portion and the outfall sewer, was built of concrete pipe 42 inches in diameter. Its upper portions were smaller in size and built of vitrified brick. The total length of the Hollywood Main Sewer was 11.7 miles, and it was completed in 1913. As a tributary to this trunk sewer was in much need of sewers its own systems have, since its completion, been laid to such an extent that on June 30, 1915, over 90 miles of sewer lines were in place, the population thus benefited amounting to 25,000.

## Harbor Districts.

In 1909 the consolidation of the portions of Wilmington and San Pedro with Los Angeles added about 15 square miles to Los Angeles, and made it necessary that considerable time and expense be given to the matter of designing and building sewerage systems for these new sections. San Pedro had, prior to consolidation, a system of about 15 miles of sewer pipes, but Wilmington had no sewers whatever. In San Pedro it was not so difficult to plan for extensions.

Wilmington, however, the level of the ground for almost a mile north of the water front at the foot of Canal street, was not many feet above tide level. To plan for sewers was, accordingly, not so easy a matter. After careful deliberation, however, it was decided to raise the level of that part of Wilmington, which was south of Exposition street, by dredging from the harbor portions of the Inner Harbor, thereby deepening the latter and making an average fill of 7 to 8 feet over a portion of Wilmington lying northerly of Sixth street, which comprises the main business section of Wilmington, and which extends from Exposition street westward to 12 street. The fill was made sewers were laid in Canal street, Main street and Broadway, and in the cross streets intersecting the main streets, so that the expense of placing those sewers was much less than it would otherwise

have been if the fill had been placed first.

When sewers were first laid in Wilmington their outlet was into the channel of the East Basin of the Inner Harbor.

As, however, the State law adopted in 1912 provided that all new sewerage systems discharging into any of the salt waters within the jurisdiction of the State shall be so planned and constructed that the discharge of sewage thereinto shall not cause any contamination or pollution that will endanger the lives or health of human beings, or become a menace to public health, it was planned that the system built for the East Wilmington section should be provided with means for sewage treatment to comply with the State law.

## Wilmington Sewage Plant.

The East Wilmington system was designed to permit of all sewage in Wilmington north of 1st street and east of G street being intercepted and conveyed to a treatment plant to be built at the foot of McFarland street. At the present time, the collection system for this East Wilmington section has been laid and the construction of the sewage treatment plant is approaching completion. As the topography of this section is flat and but a few feet above tide level, the lower end of its collection system is seven feet below mean low tide, and it consequently is necessary that the sewage be pumped before treatment.

In order to permit of the proper allowance for this pumping, a sump chamber eight feet in diameter was constructed, the inside bottom of which was placed at a depth of twelve feet below mean low tide. From the sump the sewage will be pumped up into an Imhoff tank. The design of the pumping plant was made so that a flow of 200 gallons of sewage per minute into the settling tank is to be as regular and even as possible, thereby permitting the tank to perform its work of separating solid from liquid matter in the same way that it would do if no pumping had been required. Two 7-inch vertical centrifugal pumps directly connected to 3 H. P. electric motors are to be used, and to help make a continuous flow, a controlling chamber has been placed in front of the inlet to the tank. A sludge bed, properly underdrained, has been built which will enable the plant to care for the sewage of the East Wilmington section. The effluent from the plant will discharge into the East Basin of the Inner Harbor, and measurements taken of the tidal flow have indicated that the velocity of the harbor waters at this outlet is sufficient to remove and dilute the clarified effluent to such an extent that the oxidation thus obtained will complete the process of treatment. It is thought that the sludge, when dried, can be either sold or used for filling low land.

## San Pedro Sewage Treatment.

At San Pedro plans are being considered for the construction of an intercepting sewer which will collect the sewage now being discharged along the water front at three different places, and convey it to a point adjoining the U. S. Government breakwater near Point Fermin, where it is planned to construct a number of Imhoff tanks sufficient to treat the entire sewage of San Pedro. It is then planned to discharge the effluent into the outfall sewer to be laid near and adjoining the breakwater, the outlet end of this sewer to terminate at a point in the Outer Harbor. Measurements taken of the flow of the water in the vicinity have indicated that the clarified sewage would then be taken oceanward, and the depth of the outlet would be so great that the diffusion thus obtained will be sufficient to oxidize the effluent. It is planned to dispose of the sludge in a manner similar to that above mentioned for the East Wilmington plant. It may be further mentioned that chemical and bacteriological tests of the harbor waters near the outlet of both existing and proposed sewer outfalls have been made in order to have a record of the percentage of saturation of dissolved oxygen at these points.

## Present System—Length and Extent.

As a result of the construction at different times of the main sewer and outfall sewers, as have been noted in the foregoing, the City of Los Angeles on June 30, 1915, had a total length of 787.80 miles of public sewers. Of this total length it is estimated that 95 per cent is vitrified pipe, and that the 8-inch size comprises about 78 per cent of the total length of vitrified pipe. In giving these estimates it should be remembered that in addition to the city proper, which may be considered as all of the area north of Manchester avenue, excepting the recent Palms and Fernando annexations, the harbor sections of Wilmington and San Pedro, are included. These sections add about 10 miles and 22 miles respectively to their share of the total mileage above mentioned.

It is further estimated that these sewers benefit a population of about 110,000 out of a total population of about 510,000. The sewered area, however, is estimated at but 13.1 square miles out of a total of 38.1 square miles. This is explained when it is remembered that the Palms, San Fernando, and East-town annexations have but recently added a total area of 180.5 square miles, none of which is sewered. It is considered that with few exceptions, every street in the middle part of the city proper is now provided with sewers, also much of the city between Union avenue and Temple street, and between Arlington avenue and the east boundary line of the city. It is estimated that in the sewered area of the city the average population per acre

is 16, and the amount of sewage is 67 gallons per capita.

#### North Outfall Sewer.

It is anticipated that, due to the rapid growth of the city, Los Angeles will soon be obliged to build a new outfall sewer. This will be required to serve as an outlet for the Palms section and other areas situated north and south of this section which may be annexed within a few years. These sections cannot be sewered by gravity into the present outfall sewer, and consequently plans are being prepared for a new outfall sewer, which from its location has been called the North Outfall Sewer. It is intended that the size, elevation and capacity of the North Outfall Sewer shall be sufficient to allow the discharge of a certain amount of sewage from the present outfall sewer, thereby enabling the latter to be of sufficient capacity for many years to come. In this connection it may be mentioned that a gauging station was installed over four years ago on the line of the present outfall sewer which automatically registers the flow of sewage, and thereby enables the city to have an estimate of how soon the increase of flow will require a diversion of some of the sewage from the outfall sewer now in use.

#### Hyperion.

The disposal of the sewage at Hyperion from the outfall sewer is a matter that has caused more or less comment at different times during the past three years. The discharge of crude sewage into the ocean at this place has been clearly recognized as not a desirable condition. The average daily discharge in 1910 was about 15 million gallons, and at the present time this discharge has doubled in amount. Preliminary studies were made in 1912 for the treatment of this sewage, and estimates of cost for the installation of a plant which would eliminate the discharge of crude sewage into the ocean, were prepared in the spring of 1913, in order that if feasible, construction work might later be started. Owing to the lack of funds, however, construction of a sewage treatment plant has not been made possible thus far, although at the present time it seems as though a bond issue for this work may be submitted to the people for their vote before another year has gone by.

#### Maintenance.

The sewerage system of Los Angeles having always been planned to care for sanitary sewage only, storm water being prohibited by ordinance, the main expense in the maintenance of the system is for the water used in flushing. There are today in use about 2,800 flush tanks and about 630 flushing manholes, the latter being filled about twice a month by the Maintenance Department, consisting of eight men. The average cost of the water used for flushing one mile of sewer per day is 11 cents. It is estimated that there are about two gallons of water used per capita per day, the total amount of water for flushing sewers being between 2 and 3 per cent of the total flow.

Occasionally stoppages occur in the sewers, but the amount of damage caused thereby has been slight. The entire system is regularly inspected.

As a rule the sewers are built on the

center line of the streets, the line being offset where railroad tracks or other structures interfere. In the residential district the depth varies from 7 to 10 feet, but in the business sections the sewers are from 10 to 25 feet in depth. Single strength vitrified clay pipe is used for sizes between 6 inches and 16 inches in diameter, and double strength vitrified pipe for sizes between 18 inches and 24 inches. One ring brick arches are used for diameters between 27 inches and 36 inches, and two-ring brick arches between 39 inches and 72 inches. The grades are sufficient to give a minimum velocity of 2 feet per second, the sewer one-half full.

The manholes, which are usually four feet inside diameter, are spaced between 250 and 350 feet apart. At the present time there are about 10,000 constructed. "Y" pipes are laid on an average of about 50 feet apart on each side of the sewer. If the sewer depth is over 15 feet, chimney pipes are constructed which bring the available depths for the system up to a point about 8 feet below the surface. House connections are usually laid for each lot, from the street sewer to the curb line, thereby avoiding the necessity of tearing up the paving when the latter improvement follows the sewer work. At the present time it is estimated that there are about 55,000 connections in the city proper, and 1,500 at the harbor.

Allowing for depreciation in the older sewers, it is estimated that the value of the sewerage system on June 30, 1915, was about \$6,100,000.

The accompanying map shows the present area and shape of the City of Los Angeles and outlined thereon in white lines are indicated the location of the outfall sewer and its main tributaries, also the main outfall sewers of the harbor district. Office records are kept of the location of all sewer work constructed, and special attention is given to a careful recording of all Y's placed in the sewers. Copies of records of completed sewers are given to the Building and Health Departments, and the latter enforce the work of making connections with the system as soon as public sewers are laid in front of buildings, which previous thereto were not so connected.

Most of the sewer work is laid in accordance with the provisions of the Vrooman Act, and it is estimated that the average cost of sewers per 50-foot lot is between 75c and \$1.00 per front foot, the house connections costing about 30c per lineal foot.

#### MAGNESITE MINE TO HAVE RAILROAD OUTLET.

The improved demand for manganese, magnesite, magnesite and quicksilver caused by the war has brought about the formation of the Patterson and Western Railroad Company, to give a rail outlet to the big deposits in Stanislaus and Santa Clara counties. H. G. Ginaca, president of the new road, returned to San Francisco yesterday from Patterson, Stanislaus county, and told of plans just set in motion.

The Western Magnesite Development Company's deposit around Red Mountain, reputed to be the largest in the world, is being called upon to supply

the deficiency caused by the cutting of the Austrian supply, on which United States has depended to a great extent. Between June 30, 1913, the corresponding date in 1914, 10 tons were imported from Austria.

With this supply interrupted, attention was turned to the home product and ore has been hauled to the road by automobile trucks all summer. Winter weather, however, will interfere with this movement or, it is the plan to rush the railroad to completion to meet the situation.

The ore is being burned at the present time, but it is probable that a replacement will be built at Patterson. The railroad is finished, as fuel oil has to be hauled into the mine by truck. Patterson is on pipe which would cheapen the cost of mining.

The quicksilver mines belonging to the Hayward estate in the same district have just been reopened, with prospect of using the new railroad shipments.

The survey for the new road is being carried on by C. S. Compton, engineer of the Patterson and Western. The road will be standard gauge and will be 22 miles long.

The officers of the railroad are G. Ginaca, president; W. T. Jones, president; R. J. Pratt, secretary-treasurer. All are San Francisco men. Capitalization is for \$150,000.

According to a story given by the Sacramento Pitney Association confirmed by the Ford agency in city, the Pacific Gas and Electric company, which owns the Main street lines in that city, has negotiated purchase of several cars, and will begin soon the operation of the buses in opposition to about nine independent drivers now in field.

Assurances on the part of Riverside county highway commissioners to have been given the people of the crella valley to the effect that the road to connect Palm Springs and Indio will be rushed to completion, a survey is to be completed and specifications for the road are for the new highway just as so provisions are made for protecting work from the waters of White wash.

When this news was received in Coachella valley during the past a meeting was held and by a vote of 22 to 2 the Indio levee district of trustees decided to begin work.

The new road, which will form a direct connection between Palm Springs and Indio, is said to be virtually of the Ocean-to-Ocean Highway, one of the most important steps in good roads movement of the Coachella valley.

Here is a suggestion that comes from Minnesota to prevent accidents curves. Dividing the road into parts is the simple method. The fact of the split road, states John Len, deputy state engineer, is to prevent possible accidents due to the density of drivers to hug the inside curve regardless of the direction in which they are going.

## "GOOD ROADS"

Simon Benson, Oregon's good roads advocate, was recently honored by President Moore and the Board of Directors of the Panama-Pacific Exposition with a special day as Oregon's most distinguished and worthy citizen.

Benson was selected for this notable honor chiefly for his untiring energy in the opening of the magnificent Columbia River highway.

This automobile highway, reaching from the ocean up through the Columbia River gorge into Eastern Oregon, a distance of 215 miles, is conceded to be one of the notable highway engineering feats of the decade.

From Portland to Hood River Valley the scenery is probably unequaled on any highway in America. In this stretch of sixty-eight miles, twenty-four water falls are passed, none less than 100 feet in height, and with Multnomah Falls, 925 feet high, here climbs hills and mountains, bores its way by tunnels through the solid rock, passes through virgin forests and around the edge of gigantic cliffs, hundreds of feet above the Columbia River. It is twenty-four feet wide throughout its length, with no grade over 5 per cent and no curve with a radius of less than one hundred feet. At Mitchell's Point, six miles west of Hood River, is encountered a 400-foot tunnel, costing over \$50,000 to construct. There are only two other tunnels in the world of this nature, and both are in Switzerland.

In seeking out the route for this highway the engineers sought at all times to reach the beauty spots, or those points where the most beautiful things along the line might be seen to the best advantage. From Chanticleer Tavern, 1,000 feet above the river, it was desired to reach Latourelle Falls, three miles distant and at an elevation of 150 feet. For almost half a mile the road is cut out of solid rock and is like the cornice on a tall building.

The road fits the top of this rock like the brim of a hat and traverses 225 degrees of a circle on a radius of 110 feet, 900 feet straight up in the air. The total length of the railing and sidewalk is 560 feet.

At many places along the route the highway hangs on the steep sides of the mountain, where it is literally notched out of the solid rock, but to a width of twenty-four feet. At all danger points there have been erected substantial railings similar to those along the shores of Lake Lucerne in Switzerland. These walls are of rock, laid in cement, the top being finished with a coping of ten inches deep and twenty-four inches wide.

The concrete bridges along the highway are one of its chief attractions, the most beautiful being the one at Sheppards Dell. This bridge is 150 feet long, with an arch of 100 feet, at a height of 135 feet above the stream.

The most attractive of all, however,

is Multnomah falls, with the combination of the highway bridge at the bottom and the Benson sightseeing bridge just over the junction of the upper and lower falls. On either side of Multnomah Falls are two long concrete viaducts, one 880 feet and the other 400 feet. Both of these are of original types of construction and built to harmonize with the landscape.

Just beyond is a long stretch of dry masonry wall, 26 feet at the greatest height, and over a thousand feet long. At Omonta Gorge the road passes over an 80-foot concrete bridge and immediately plunges into a well lighted tunnel, 125 feet long.

The road is to be hard surfaced throughout with a bitulithic pavement, Multnomah County having bonded for a million dollars to pave its portion of the highway.

At present Benson is behind the project to bond the State of Oregon for ten million dollars to complete the Pacific highway through Oregon, and to build a parallel highway through Central Oregon from the California line to the Columbia River highway at Hood River.

That the far-off Philippines are forging ahead in the matter of public improvements, is indicated by the fact that the total appropriation for the Bureau of Public Works for this year is \$3,577,000, and this does not include improvements in several of the departments paid for out of provisional funds.

Of this fund \$750,000 has been set aside for general road and bridge work throughout the islands, and \$177,500 for special projects, among which may be mentioned the maintenance of the Calamba-Bigaa road, \$40,000; the maintenance of the San Fernando-South road, \$25,000, and the Victoria-Manapla road, \$25,000.

It is thus evident that the Philippine government is recognizing the need for trunk line highways, which must receive special attention at the hands of the central government.

This is in line with the present policy pursued by most of the states in the building of state roads.

A map set showing the transcontinental route from Kansas City to Los Angeles has been completed by the drafting department of the Automobile Club of Southern California, which is considered by motorists to be one of the most remarkable guides for travel ever made.

Not only are sections of the National oil Trails road completely worked out and shown, but a tributary is included which brings motorists into Southern California from Denver and the Big Springs territory. In this part of the tour there are ten strip maps, showing each turn of the road.

At the present time the Automobile club, which has charge of the work, is completing the sign-posting of this

entire route, and the final posting will be set in the near future, according to a report received from Douglas Mitchell, in charge of the big trip.

In the transcontinental set of maps there are 57 sections, traversing states. These states are California, Arizona, New Mexico, Colorado, Kansas to its eastern boundary, this way Southern California is directly linked to the great Middle West. Motorists are pouring into the state over this route in a steady stream, according to an Auto club report, and traffic will materially increase next month.

A side tour is shown in Arizona which takes the motorists from Flagstaff up to the Grand Canyon. This has also been marked with signs by the club. This section is shown in two complete strip maps. In the state of Arizona nine sections of map have been drawn.

In California the strip guide for motorists from Needles westward.

The United States, through state aid, is approaching an era of road building which, within the next ten years, it is predicted, will give this country the best system of highways in the world. Progress has been slow because of opposition in many states by the farmers to loans and fear on the part of the voters that the system would fall into the hands of politicians. Most of the states, Pennsylvania being the notable exception, have built improved highways by issues. Where this system has been employed the greatest progress has been made. Pennsylvania is better off than some of the other states in public development.

The problem of road transportation is one of the chief questions before this country, says J. E. Pennington, chief of the division of road economics of the Department of Agriculture. It costs the farmer 23 cents a ton mile to haul his product to the railroad or to the consumer, where the rates are unimproved. More than 350,000 tons are hauled over these roads each year and the bill for hauling is \$1,000,000. The cost per ton mile on hauling on hard surfaced roads does not exceed 15 cents.

The automobilist is paying for the building of the good roads. Forty-two states have established highway departments for educational or administrative work, and of thirty have made appropriations for road construction or maintenance. In all, \$208,000,000 has been appropriated from state funds between January 1, 1915, for construction and educational road work, and a total of about 31,000 miles of improved roads is the result. These roads were for the most part as a joint state and local undertaking, so that a large outlay not included in the state budget was involved.

# PUBLIC WORKS IN JAPAN.

by

Bureau of Public Works Ministry of Home Affairs, Tokyo.

## Public Works Organization.

The system of public works which existed in Japan in older times had fallen into confusion in the Tokugawa Shogunate prior to the Restoration of Meiji owing to the action of the feudal lords carrying out such works not for the public convenience but for the safety of their own provinces, in the event of attack by their neighbors. Consequently, roads for example while constructed, were narrow and tortuous, especially in the mountains which marked natural divisions of territory, while such river works as were carried out were solely for local convenience and without any thought for other districts.

After the Restoration, however, two Dutch engineers and advisers, Mr. Fandouin and Mr. Sondon, were engaged and a special staff was formed, not only to organize and supervise works, but to train engineers. This was chiefly carried out during 1872-1879, and considerable progress was made in road construction and the improvement works of rivers and harbors, all such works being brought directly under Government control. As time progressed the official machinery for dealing with duties of this nature was improved, and in 1871 a proper general survey of necessary works by special Inspectors was ordered. Following this, an engineering section was added to the Ministry of Home Affairs, its functions relating chiefly to roads and rivers. Owing to the increase in work, it was decided in 1877 to transform the Section into a Bureau, and in 1886 the whole country was divided into six districts. In 1905, however, these offices were abolished and the inspectors' duties retransformed to the Bureau in order to secure central control, while branch offices were established chiefly for the investigation and execution of the works.

## Rivers.

Japan is a long narrow country which extends from northeast to southwest, and is traversed from end to end by a long chain of mountain ranges with numerous branches. No vast tracts of land are, for this reason, left to feed rivers of great magnitude. The gradients are very steep in mountainous parts and the streams there can be freely used for electric generation. But on low lands they slowly flow in broad and deep current, draining large areas of surrounding lands and in the main are capable of being used for irrigation, while many of them are navigable for some distance. Most of the mountainous parts through which rivers run, however, belong to volcanic chains and consequently the fragile earth frequently falls into the rivers, and as the rainfall in Japan is heavy it causes often of inundation. Of all the rivers of the country 365 are comparatively large, and 65 of them have drainage basins of over sixty square miles.

## The Law of Waters.

In older times, there was no systematic legislation regarding rivers, the management of them generally being put in the charge of local governments, and the maintenance and repairs of them were executed with their own money by one or more of such municipalities or water corporations as had previously been designated by such governments in accordance with the sphere of the interested region. Any municipalities may at their own discretion grant subsidies to lower class bodies for the expenses involved in such works of maintenance or repairs. But for all this, the Central Government decided on a general scheme of improvement of the most important rivers, which was put into practice as opportunity needed. With the progress of time, however, the demand of a systematic regulation was pressingly felt and in 1896 the present law relating to rivers was promulgated in which all necessary provisions, such as the execution of river works, defrayment of such expenses, superintendence of police affairs, etc., were first regulated, and thus a new epoch was opened in the history of our river administration. The application of the law is limited exclusively to those rivers which are deemed by the Minister of Home Affairs to be of great public interest. The law prescribes that rivers are all under the control of the interested local governments which shall, as a rule, bear all expenses incurred for their maintenance, repairs and improvement, provided that the river does affect the interest of more than one prefecture. A river, affects two or more prefectures, shall be administered or maintained by the Minister himself, instead of local governors, and the expenses defrayed out of the national treasury, on condition that the Minister may, in certain cases, order such prefectures as have interest in the river to subscribe a portion of the expenditure. As to improvement works, they are performed directly by the Minister, their expenses being defrayed out of the national treasury with a proportional subscription from prefectures, if the work is a very difficult one or affects two or more prefectures, or the expenses are too great to be paid by a prefecture, or the work is one to be executed as one part of a general scheme which the government has previously decided upon. To minor rivers some articles of the law are to be applied so that they may be well attended to, supervised and controlled.

## General State of Floods.

In spite of all the strenuous efforts of the government, both local as well as central for the improvement, maintenance and repairs at great expenses the difficulty of our river engineering is always to be found in the magnitude of the frequent floods. For, under the influence of the natural features of our country, a rainfall which is character-

istically great, causes overflow every year from summer to autumn, causing considerable damage to surrounding districts. The flood in 1896, which is said to be the most violent in the last era, caused a vast amount of loss, estimated at nearly \$70,000,000, and the damage extended as widely as six prefectures, 16 cities and 20,964 towns and villages, the total flooded area being about 1,050,000 acres. Next to this is the inundation of 1910, which caused damage estimated at nearly \$20,000,000. The total amounts of damage, repair expenses and state subsidies respectively for the last ten years (1897-1912) are as follows:

Total amount of damage..	\$167,718,052
Total expenses for repairs..	58,557,301
Total grant out of national

## Improvement Works by the State.

The improvement works by the state were executed for the first time on the river Yodo and then commenced on the following rivers: The Tone, the Shinano, the Fuji, the Kiso, the Kitakami, the Shō, the Abukuma, the Agano, the Mogami, the Yoshino, the Chikugo, the Ōi, the Tenryū, etc. At first, efforts were mostly directed to the observation of the water level and volume, or other fundamental investigations and designs, and no actual work on the whole line of a river was put into practice, although on those parts where the channel was much damaged the work was carried out in a small scale. Later, in 1886, the general scheme of improvement of rivers was decided upon, and in the following year the sum to be disbursed each year was settled, while on the other hand the government made its plans in accordance with the general scheme mentioned above, solely with its own money. After the enforcement of the law of rivers in 1896, the government resolved to order prefectures concerned to subscribe some portion of the expenditure, and the Kuzuryū, the Onaga, the Tagahashi and the Yatsuze were added to the list of rivers to be executed by the government.

## Radical Plan of River Improvement.

But the fact that a great deal of property falls every year a victim to inundations, and, no less, the money spent in repairs, made the government fully convinced of the necessity of establishing a radical scheme for river improvement. In order to frame the fundamental scheme, the temporary committee for the investigation of river improvement, consisting of high officials in the Ministries of Home Affairs, Finance, Agriculture and Commerce, members of Parliament and experienced specialists in hydraulic engineering and dendrology, was organized. After profound deliberation

(1) 65 most important rivers were selected, on which the government starts improvement work.

(To be continued.)

## Technical Societies.

### SAN FRANCISCO ASSOCIATION OF MEMBERS OF THE AMERICAN SOCIETY OF CIVIL ENGINEERS.

Organized April 28, 1905.

This association which this summer rounded out its tenth year of existence has grown steadily since its inception, and now numbers some 200 members.

For the benefit of our readers we give here some extracts from the by-laws and the last annual report.

The object of this association is the advancement of engineering knowledge and practice, the maintenance of a high professional standing among its members, and the furtherance of the general welfare of the American Society of Civil Engineers.

Among the means employed for this purpose are meetings for the presentation and discussion of professional papers, particularly those issued by the American Society of Civil Engineers, and the encouragement of engineers who are not members to attend and take part in the professional and social features of such meetings.

The membership of this Association is restricted to persons who are members of the American Society of Civil Engineers in any grade. All such may become members of this Association without payment of entrance fee, but should the membership in the American Society of Civil Engineers of any person cease from any cause, he shall at the same time cease to be a member of this Association.

The annual dues payable by all members are \$5.00, payable annually in advance on the first day of January, and any member whose dues are more than one year in arrears shall cease to be a member of this Association.

The officers of this Association are a president, two vice-presidents, a secretary and a treasurer, who, with the two latest living past presidents, constitute a board of directors, in which the government of the Association is vested.

The officers are elected at the annual meetings of the Association.

The annual meeting of the Association is held on the third Friday of December in each year.

Regular meetings are held bi-monthly at such time and place as may be appointed by the board of directors. The established custom is to meet on the third Fridays of February, April, June, August, October and December. At these meetings the business of the Association is transacted and the discussion of, professional papers published by the American Society of Civil Engineers, or specially arranged for the occasion is in order. Such discussions may be furnished to the Secretary of the American Society of Civil Engineers for publication, subject to

the approval of the publication committee of that Society.

Weekly luncheons in College Room, Hoffbrau Cafe, Wednesdays at 12:30. Engineers welcome; informal; no program.

Secretary—E. T. Thurston, Jr.
Treasurer—P. E. Harroun.
Board of Directors—M. C. Couchot, H. L. Haehl, A. M. Hunt, P. E. Harroun, E. T. Thurston, Jr., C. H. Snyder, C. B. Wing.

### SAN FRANCISCO CHAPTER AMERICAN INSTITUTE OF ARCHITECTS.

233 Post Street.

President.....	W. B. Faville
Sec.-Treas.....	Sylvain Schnaittacher

### LOS ANGELES AND SOUTHERN CALIFORNIA.

### AMER SOC. OF CIVIL ENGINEERS. So. Calif. Association of Members.

President.....	Chas. T. Leeds
First Vice-President.....	Geo. S. Binckley
Second Vice-President.....	H. Hawgood
Treasurer.....	Chas. H. Lee
Meetings bi-monthly. Address all communications to W. K. Barnard, Secretary, 701 Central Bldg., Los Angeles.	
AMERICAN INSTITUTE ELEC. ENGINEERS—Los Angeles Section.	
Chairman.....	E. R. Northmore
Secretary.....	C. G. Pyle
Asst. Secretary.....	Edward Woodbury

EXECUTIVE COMMITTEE—J. A. Lighthouse, J. E. Barker, Geo. A. Damon, A. W. Nye.

Regular meetings third Tuesday in each month. Address all communications to C. G. Pyle, Secretary, Standard Underground Cable Co., 914 Hibernian Bldg., Los Angeles.

### ENGINEERS AND ARCHITECTS ASSOCIATION OF SOUTHERN CALIFORNIA.

President.....	Samuel Storrow
Vice-President .....	A. H. Koebig
Second Vice-President.....	W. A. E. Noble
Secretary-Treasurer.....	H. Z. Osborne, Jr.
DIRECTORS—Arthur S. Bent, J. J. Backus, A. C. Martin, Kenneth Shibley.	
Regular monthly meetings as arranged by program committee. Address all communications to H. Z. Osborne,	

Jr., Secretary, care City Engineer's Office, Los Angeles.

### AMERICAN INSTITUTE OF ARCHITECTS—SOUTHERN CALIFORNIA CHAPTER.

President.....	Albert C. Martin
Vice-President.....	S. Tilden Norton
Secretary.....	Fernand Parmentier
Treasurer.....	August Wackerbarth
DIRECTORS—J. C. Allison, J. J. Blick, J. J. Backus.	

Regular meetings second Tuesday evening each month. Address all communications to A. R. Walker, Acting Secretary, 1403 Hibernian Bldg.

## PERSONAL.

The Norman B. Livermore Company, Merchants' National Bank Building, San Francisco, has taken the agency for the full line of logging equipment made by the Lidgerwood Mfg. Company. T. L. Williams, lately with the Seattle office of the Lidgerwood Company, and C. A. Bechtold, engineer of the same company, are now with the Livermore Company. It has also taken the agency for Knox tractors, Made at Springfield, Mass.

Following his appointment as a member of the new United States naval advisory board, Andrew Murray Hunt, a San Francisco civil engineer, has gone to New York to begin active work on the new systems that are being developed for the defense of America against hostile powers.

Andrew Murray Hunt, who is to represent the West on the new board, is a graduate of the United States Naval Academy. His work as a consulting engineer has covered a wide field of engineering activities, including hydro-electric developments, irrigation, steam power plants, gas plants, oil refineries, cement manufacturing plants, and heavy acid plants. The American Society of Civil Engineers recommended that he be given place on the board. Hunt will remain in the East at least one year.

J. E. Ludy of Blythe, Cal., who is Chief Engineer of the California Farm and Irrigation Company, has been consulting with Pierre Zucco Engineering Company of this city during the past few weeks. Mr. Zucco is the consulting engineer of the Company. Several meetings have been held among the officers of the company, directors, and also the financiers. The principal engineering problems have been worked out. The financial end of the Company was also attended to and is in every way intact. The Company is actively at work solving the problem of irrigating the Palo Verde Mesa Lands. From the financial end of view work will soon be under way on the project when the 27,000 acres of land will be signed up by the entrymen.

### APARTMENT HOUSES.

**SAN FRANCISCO**—Apartment house, 3 story and base, frame. Cost not stated. Architect, none. Owner, J. H. Kruse, 23rd and Shotwell streets, S. F. Location, southwest corner 23rd and Howard streets. Will contain 52 suites of two and three rooms. Interior finish pine and elm panels. Some hardwood floors. Steam heat, oil burning furnace and hot water system. Wall beds. Imitation tile in bath rooms. Exterior covered with shiplap and cement plaster. Plans being prepared. Work to be done by Day Labor.

**SAN FRANCISCO**—Apartment house, 3 story and base, frame, \$15,000. Architect, Charles C. Frye, 29 Montgomery street, S. F. Owner's name withheld. Location, Dolores street. Will contain 12 suites of two and three rooms. Interior finish pine with some elm panels. Hardwood floors, wall beds and steam heat. Bath rooms finished in tile. Exterior covered with cement plaster. Plans being prepared.

**SAN FRANCISCO**—Apartment house, 4 story and base, brick and steel, \$40,000. Architect, E. H. Denke, 1317 Hyde street, S. F. Owners, Dora and Max Kolander. Location, south Bush west of Jones, covering an area of 55 by 100 feet. Will contain 18 suites of four and five rooms. Interior finish mahogany, white enamel and pine. Hardwood floors, steam heat, hot water system, oil burning plant and vacuum cleaning. Wall beds and private baths. Bath rooms finished in tile. Exterior faced with pressed brick. Plans complete and figures being taken.

**SAN FRANCISCO**—Apartment house, 7 story and base, brick and steel, \$100,000. Architects, Rousseau & Rousseau, 110 Sutter street, S. F. Owners, Gerard Investment Co. Location, southeast corner of Geary and Leavenworth streets. Will contain over 200 rooms arranged in suites of two and three rooms, office, lobby and amusement rooms. Interior finish pine, hardwood and white enamel. Hardwood floors. Steam heat, oil burning furnace, hot water system and vacuum cleaning. Wall beds. Marble and tile wainscot. Bath rooms finished in tile. Exterior faced with pressed brick trimmed with terra cotta. Plans being prepared.

**OAKLAND, CAL.**—Apartment house, 3 story and base, frame. Cost not stated. Architects, Rousseau & Rousseau, 110 Sutter street, S. F. Owner's name withheld. Location, corner of Miles and Colledge avenue. Will contain two and three room suites with wall beds and private baths. Interior finish pine and hardwood. Hardwood floors and tile baths. Steam heat and a hot water system. Exterior covered with cement plaster on metal lath. Plans being prepared. Ready for figures about November 1st.

**OAKLAND, CAL.**—Apartment house, 3 story and base, frame, \$20,000. Ar-

chitect, none. Owner, John A. Blischoff, 6045 Harwood street, Oakland. Location, corner of 30th and Grove streets. Will contain three and four rooms suites with wall beds and private bath rooms. Interior finish pine with some elm panels and hardwood floors. Steam heat and a hot water system. Bath rooms finished in tile. Exterior covered with cement plaster on metal lath. Plans complete and work to be done by Day Labor.

**OAKLAND, CAL.**—Apartment houses, 1, 3 story and base, frame. Cost not stated. Architects, Rousseau & Rousseau, 110 Sutter street, S. F. Owners, Clyde Improvement Co. Location, northwest corner of 3rd avenue and East 15th street. Each will contain two and three room suites. Interiors finished in pine and hardwood with some white enamel. Hardwood floors. Steam heat, hot water system, oil burning furnace and vacuum cleaning. Wall beds and private baths. Tile wainscot and floors in bath rooms. Exteriors covered with cement plaster. Plans ready for figures about November 1st. This will complete a group of nine similar buildings erected on this property by the Clyde Improvement Co.

### Contracts Awarded

**LOS ANGELES, CAL.** — Apartment house, 7 story and base, reinforced concrete, \$57,000. Architect, John Parkinson, Security Bldg., L. A. Owner, Dr. James H. Edmonds, Contractors, Atlas Planing Mill Co., 830 McGarry street, L. A. Contract price, \$57,000.

### BONDS

**SAN LUIS OBISPO, SAN LUIS OBISPO CO., CAL.**—The proposed bond issue for \$100,000 for the erection of new schools failed to carry by a small majority. Another election will be called.

**SACRAMENTO, CAL.**—Recommendation has been made by the City Board of Education that the Sacramento School District vote \$2,650,000 for additional schools and sites. The recommendation calls for the erection of thirteen schools. E. J. Carragher is chairman of the Board of Education.

**BAKERSFIELD, KERN CO., CAL.**—The Mount Whitney road petitions have been presented to the County Supervisors and it is probable that an election will be called in the immediate future to vote bonds for the construction of the proposed highway, which will be 160 miles in length from Bakersfield to Tulare County line. The Automobile Club of Southern California is interested in the proposed work.

**KELSEYVILLE, LAKE CO., CAL.**—John V. Davis of Lake County is advocating the movement to have the Supervisors call a bond election to secure funds for the improvement of the roads leading into Lake County. Petitions for the proposed issue are now in circulation.

**SANTA CRUZ, SANTA CRUZ CO., CAL.**—The bonds of the Santa Cruz School District have been sold. The bonds were for \$10,000.

**CORCORAN, KINGS CO., CAL.**—The Board of Trustees have called an election to vote bonds of \$30,000 to secure a water works system.

**MIDFORD, ORE.**—The Oregon-Utah Sugar Company, capitalized at \$100,000, with a bond issue of \$500,000, has been incorporated at Salt Lake, the object being to construct a sugar beet factory in the Rogue River Valley in time for the 1916 crop. George E. Sanders, head of the Rogue River Public Service Corporation is named as president and Alexander Nibley of Portland as secretary.

**SANTA CRUZ, SANTA CRUZ CO., CAL.**—The City Council has passed an ordinance which calls for a special election to vote on November 6th the purchase of the F. A. Hihn Company water system.

**AUBURN, PLACER CO., CAL.**—November 16th is the date set for the voting of bonds to install a septic tank, extend the sewer system, the purchase of three fire trucks and the installation of a fire alarm system.

**SANTA CLARA, SANTA CLARA CO., CAL.**—At the last meeting of the Town Trustees a petition was presented asking that a bond election be called to vote bonds of \$85,000 for the paving of the main streets in Santa Clara. The matter has been laid over for one week.

**TURLOCK, STANISLAUS CO., CAL.**—W. F. Herman of Denair is discussing with Vernon Campbell, general manager of the California Growers Association, and secretary of the Board of Trade Webber, the proposition of erecting a new cannery in Turlock. The proposed building will cost \$20,000.

**SAN LUIS OBISPO, SAN LUIS OBISPO CO., CAL.**—The bonds of \$10,000 of the Paso Robles School District have been sold. The Supervisors have also sold the bonds of \$20,000 for the Santa Margarita School District. Plans for the buildings to be erected from the proceeds of the sales will be ordered prepared immediately.

**FRESNO, FRESNO CO., CAL.**—The City Engineer has been instructed to prepare plans for a new storm and sanitary sewer system, the work of which will cost about \$150,000. A bond issue will be called to raise funds to cover the cost of the work.

**VENTURA, VENTURA CO., CAL.**—The Board of Supervisors has sold \$500,000 of the \$1,000,000 bond issue for the construction of a county highway system. Eleven bids were received for the bonds and a premium of \$16,053 was obtained. Construction work on the highway system will be started as soon as the money is available.

**ESCONDIDO, SAN DIEGO CO., CAL.**—The Board of Trustees has passed a resolution calling a special election for the purpose of voting bonds in the sum of \$50,000 for acquiring a gas plant and electric light and power generating plant. The present private plant will probably be purchased and extensions and additions made, allowing the water to rush out to the bay.

**LA CANADA, LOS ANGELES CO., CAL.**—The Board of School Trustees has called a special bond election for October 26, for the purpose of voting \$25,000 in bonds for the erection of a new school building. Plans have been submitted by a number of architects, but no selection will be made until the bonds are voted.

**BAKERSFIELD, KERN CO., CAL.**—The \$50,000 bond issue of the Taft School District and the \$15,000 bond issue of the Maricopa School District have been declared illegal and new elections will have to be held to correct the technicalities.

**VENTURA, VENTURA CO., CAL.**—The Chamber of Commerce and Merchants' Association are promoting a movement to secure the erection of a bath house in this city. It is proposed to have the city vote bonds and construct the building on municipal property.

**LOWELL, CAL.**—The \$25,000 bond issue of the Lowell Joint Union High School District, which was recently sold to the State Board of Control, has been found invalid by the Attorney General.

## BRIDGES AND DAMS

**SAN FRANCISCO**—Pier construction, \$283,230. Engineer, Assistant State Engineer, Ferry Bldg. S. D. Owners, State of California. Bids were received by the State Board of Harbor Commissioners for the construction of Pier No. 29 Clinton Construction Co. S. F. presented the low bid at \$283,230. No award was made. A complete list of the bids appears under the heading of San Francisco in this issue.

**HANFORD, KINGS CO., CAL.**—Culverts, reinforced concrete. Cost not stated. Engineer, County Surveyor, Hanford. Owners, Kings County. Bids will be received by the Board of Supervisors up to 2 p. m. of October 16, 1915, for constructing bridges and culverts on highway No. 3 in accordance with plans and specifications prepared by the highway commission. The work will involve 89.4 cubic yards of Class A concrete, 90.1 cubic yards of Class B concrete, 354 lineal feet corrugated iron pipe and 5,763 pounds of reinforcing steel.

**RICHMOND, CONTRA COSTA CO., CAL.**—Viaduct, steel and concrete. Cost not stated. Engineer, City Engineer H. D. Chapman, Richmond. Owners, City of Richmond. City Engineer H. D. Chapman has been instructed to prepare plans and specifications for an opening through the Oakland branch of the Santa Fe at 16th street, which is to be spanned with a steel viaduct, of sufficient width to allow the passing of vehicles and pedestrians in either direction.

**MARTINEZ, CONTRA COSTA CO., CAL.**—Flood gate. Cost not stated. Engineer, City Engineer Elam C. Brown, Martinez. Owners, City of Martinez. A movement for the improvement of the conditions prevailing in Alhambra Creek north of Main street has been taken up by the development board committee. The desired end, it is believed, can be brought about by the building of a flood gate, the impounding of the flood tide waters, and at low tide opening the gates and al-

**REDDING, SHASTA CO., CAL.**—Bridges and culverts, reinforced concrete. Cost not stated. Engineer, County Surveyor, Redding. Owners, Shasta County. After adopting the plans and specifications for bridges and culverts on highway No. 3 of the county improved system, the Board of Supervisors instructed County Clerk Pickervill to advertise for bids for the construction of the culverts and bridges. The bids will be opened on October 16th at 2 p. m.

**MARYSVILLE, YUBA CO., CAL.**—Bridge construction and extension, reinforced concrete, \$1,863. Engineer, County Surveyor, Marysville. Owners, Yuba County. L. J. Bryan, Marysville, submitted the lowest bid for construction of the Timbuctoo bridge and will probably be awarded the contract.

**RED BLUFF, TEHAMA CO., CAL.**—Creek fill. Cost not stated. Engineer, County Surveyor, Red Bluff. Owners, Tehama County. All bids received by the County Supervisors for the fill on the Salt Creek bridge were rejected, as it was thought the work could be done cheaper by Day Labor, and Supervisor Schafer was authorized to have the work done in that manner.

**CHICO, BUTTE CO., CAL.**—Bridge construction, timber and concrete. Cost not stated. Engineer, County Surveyor, Oroville. Owners, Butte County. The County Supervisors have voted to erect a new bridge over Forbes Creek on the Honcut-Bangor road in Supervisor Whipple's district. The structure is to cost in the neighborhood of \$100, and was ordered built under the emergency act. It was also decided to rebuild bridge Nos. 5 and 7 on the Oroville road. Further information relative to this work may be had from the County Engineer at Oroville.

**SACRAMENTO, CAL.**—Bridge, reinforced concrete and steel, \$4,000. Engineer, County Surveyor, Sacramento. Owners, Sacramento County. The County Supervisors have appropriated \$2,000 for the construction of the bridge across the P. G. & E. Co.'s canal on the road leading out of Folsom to Orangevale. The P. G. & E. Co. will pay the other \$2,000. Bids on the work will soon be called for.

**REDWOOD CITY, SAN MATEO CO., CAL.**—Culvert, reinforced concrete. Cost not stated. Engineer, County Surveyor, Redwood City. Owners, San Mateo County. The plans and specifications prepared by the County Surveyor for the construction of a concrete culvert at the foot of Millbrae Hill were adopted and the Clerk of the Board was directed to advertise for bids on the work.

**SANTA CRUZ, SANTA CRUZ CO., CAL.**—Bridge, steel and concrete. Cost not stated. Engineers, County Surveyors, Hollister and Santa Cruz. Owners, San Benito and Santa Cruz Counties. Plans and specifications for the Chittenden bridge to be constructed by Santa Cruz and San Benito Counties have been adopted by the Supervisors and bids will be received up to October 15th. Further information may be had from the County Surveyor at Santa Cruz.

**SAN JOSE, SANTA CLARA CO., CAL.**—Bridge, reinforced concrete. Cost not stated. Engineer, County Surveyor,

San Jose, Owners, Santa Clara County. Plans and specifications for a reinforced concrete bridge on New avenue in Santa Clara County have been adopted by the Supervisors, and bids will be received up to 11 a. m. October 25th.

**MYERS CREEK, IMPERIAL CO., CAL.**—Bridge, reinforced concrete. Cost not stated. Engineer, State Highway Commission, Forum Bldg., Sacramento. Owners, State of California. Bids will be received on November 1st by the State Highway Commission for the construction of this bridge. It will be about 500 feet long with a main span of 170 feet. Plans can be secured from the office of the State Highway Commission. An official proposal appears in another column of this issue.

**VENTURA, VENTURA CO., CAL.**—Bridges, 3, reinforced concrete. Cost not stated. Engineer, County Surveyor, Ventura. Owners, Ventura County. Bids will be received by the Board of Supervisors up to 11 a. m. of October 8, 1915, for the construction of three reinforced concrete bridges. They are designated as the Fairview bridge, the ridge across Calleguas Creek and the ridge on Los Angeles avenue. Simi. B. McClosky is the County Clerk.

**SANTA BARBARA, SANTA BARBARA CO., CAL.**—Bridges, steel and concrete, \$13,500 and \$11,000 each. Engineer, E. T. Flaherty, L. A. Owners, Santa Barbara County. The Supervisors have ordered bids advertised for in the construction of State Highway bridges over Eagle Canyon Creek and Los Pueblos Creek. Plans show the Eagle Canyon bridge to be 50 feet long, concrete girder, single span with 17t approaches and cement retaining walls to cost about \$13,500. The plans and specifications for the Dos Pueblos bridge show a 100-foot steel bridge, with a concrete deck and two 20-foot concrete approaches to cost \$11,000.

**VENTURA, VENTURA CO., CAL.**—Bridge, steel. Cost not stated. Engineer, County Surveyor Pettit. Ventura. Owners, Ventura County. County Surveyor Pettit has completed plans for new bridge to be constructed on the Jai road. It will be of steel construction and will consist of one 150-foot span, 19 feet above the creek bed.

#### Contracts Awarded

**OROVILLE, BUTTE CO., CAL.**—Bridges, 2, reinforced concrete, \$2,560. Engineer, County Surveyor, Oroville. Owners, Butte County. Contractors, J. C. Mery Co., Chico. Contract price, \$2,560.

**RED BLUFF, TEHAMA CO., CAL.**—Bridges, reinforced concrete. Cost not stated. Engineer, County Surveyor, Red Bluff. Owners, Tehama County. Contractors, Ross Construction Co., Forum Bldg., Sacramento. Contract price not stated.

**HANFORD, KINGS CO., CAL.**—Bridge, reinforced concrete, \$2,012. Engineer, County Surveyor, Hanford. Owners, Kings County. Contractor, Henry E. Walker, L. A. Contract price, \$2,012 and \$5.50 per cubic yard for paving approaches.

**SAN JOSE, SANTA CLARA CO., CAL.**—Bridge, reinforced concrete, \$1,738. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. Contractor, William Martin, San Jose. Contract price, \$1,738.

### CHURCHES

**TURLOCK, STANISLAUS CO., CAL.**—Church, 1 story and base, frame, \$10,000. Architect, Ralph P. Morrell, Odd Fellows Bldg., Stockton. Owners, Church of Christ, Rev. Brooke, pastor. Will contain main auditorium, Sunday school rooms and pastor's study. Interior finish pine and ornamental plaster. Gas steam radiators. Exterior covered with cement plaster on metal lath. Clay tile roof. Plans being prepared.

**SANTA CLARA, SANTA CLARA CO., CAL.**—Convent, 2 story and base, reinforced concrete, \$100,000. Architect, John J. Foley, 16 Kearny street, S. F. Owners, Carmelite Sisters. Revised figures for this work are now in the hands of the architect and a general contract will be awarded this week.

### COURT HOUSES.

**SAN FRANCISCO**—City Hall shades. Cost not stated. Architects, Bakewell & Brown, 251 Kearny street, S. F. Owners, City and County of San Francisco. Bids will be received by the Board of Public Works, Temporary City Hall until October 20th for furnishing and installing shades in the new City Hall.

**WOODLAND, YOLO CO., CAL.**—Court house, 3 story and base. Class A construction, \$200,000. Architect, W. H. Weeks, 75 Post street, S. F. Owners, County of Yolo. W. H. Weeks has been officially appointed as the architect to design the new county court house. Other than the fact that the building will be of fireproof construction no details are yet available. Construction will not be undertaken until next year. Further mention will be made of the work.

### FACTORIES AND WAREHOUSES.

**CROCKETT, CONTRA COSTA CO., CAL.**—Warehouse, 2 story and base, reinforced concrete. Cost not stated. Architect's name not given. Owners, California-Hawaii Sugar Refinery. Work has been started on the new concrete warehouse at Crockett for the California-Hawaii Sugar Refinery Co. The new structure will be 720 feet in length and will provide storage space for several thousand tons of sugar.

**SAN PEDRO, LOS ANGELES CO., CAL.**—Warehouse, 6 story and base, reinforced concrete, \$200,000. Engineer, Harbor Commission, San Pedro. Owners, Town of San Pedro. Bids will be received by the Board of Harbor Commissioners up to 10:30 a. m. of October 27th, for furnishing all labor and equipment for the erection of a warehouse on Municipal Dock No. 1. The foundation is now under construction. The city will furnish all cement, sand, rock, steel, artificial stone, etc. The building will be 152 ft by 180 feet. The work to be done under this contract will require the placing of 27,000 cubic yards of concrete, placing 1,750 tons of reinforcing steel, setting 75 tons of structural steel, including 175,000 square feet of floor and about 2,000,000 feet of form lumber.

### FLATS

**SAN FRANCISCO**—Flats, 2 story and base, frame, \$7,000. Architect, C. O. Clausen, Hearst Bldg., S. F. Owner's name withheld. Location, Baker between Union and Filbert. Will contain two modern six-room flats. Interior finished in pine and southern gum. Hardwood floors. Open fire places, tile mantels and tile wainscot in both bath rooms. Automatic water heaters. Exterior covered with cement plaster. Plans being prepared.

**SAN FRANCISCO**—Flats, 2 story and base, frame, \$2,600. Architect, none. Owner, Frank Indelicato, 348 Union street, S. F. Location, north Brazil west of London. Will contain two small flats. Interior finish pine with some hardwood floors. Open fire places and tile mantels. Exterior covered with rustic and shiplap. Plans complete and work to be done by Day Labor.

**SAN FRANCISCO**—Flats, 3, 2 story and base, frame, \$2,500 each. Architect, none. Owner, W. G. McDiarmid, 791 Fair Oaks, S. F. Locations, north 26th east of Dolores and northeast Dolores and 26th streets. Each will contain two flats of five and six rooms. Interiors finished with pine and redwood. Some hardwood floors.  79. 12 cutters, gauge glass—Bid 3, \$1.20 ea; 15, \$1; 22, \$1.08; 38, 98c; 50, 91c, accepted.

## HOSPITALS

SAN FRANCISCO—Hospital, 1 and 2 story, frame. Cost not stated. Architects, City Department of Architecture, Temporary City Hall. Owners, City and County of San Francisco. The Board of Public Works has requested the Board of Supervisors to adopt an ordinance authorizing the construction of several frame buildings at the Isolation Hospital Tract. Further mention will be made of this work.

SAN FRANCISCO—Hospital, 1 and 2 story and base. Class C construction. \$20,000. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Working drawings for the Central Emergency Hospital to be erected at the corner of Polk and Grove streets are progressing rapidly. Further mention will be made of the work when bids are called.

SAN FRANCISCO—Hospital completion, 4 story, Class A construction. Architect, Lewis P. Hobart, Crocker Building, S. F. Owners, Regents of the University of California. Bids will be opened on October 23th for electric work, plumbing, heating, elevators, power plant and refrigerating plant at the University of California Hospital. Plans and specifications can be secured from the Berkeley office of the Regents. An official proposal appears in another column of this issue.

SAN FRANCISCO—Hospital ward, 1 story, frame, \$7,000. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Location, southwest Army and De Haro streets. Will contain two wards of sixteen beds each, kitchens, dining rooms and offices. Interior finish pine. Exterior cement plaster. Plans nearly complete and figures to be called for shortly.

SAN FRANCISCO—Relief home buildings, 1 and 2 story, frame and concrete. Cost not stated. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Several new buildings are to be erected at the Relief Home Tract. Preliminary plans have been prepared and have received official approval. Further mention will be made of this work.

FRENCH CAMP, SAN JOAQUIN CO., CAL. Hay and cow barn, frame construction, \$2,000. Architect, Ralph P.

Morrell, Odd Fellows Bldg., Stockton. Owners, San Joaquin County. Bids are now being taken for the construction of a hay and cow barn on the County Farm. Plans can be secured from the architect.

**STOCKTON, SAN JOAQUIN CO., CAL.**—Hay, storage and feed barn, frame construction. Cost not stated. Architect, State Architect George B. McDougall, Sacramento. Owners, State of California. Bids will be opened on November 8th at 2 P. M. for the construction of a hay, storage and feed barn at the Stockton State Hospital. Plans can be secured from the State Department of Engineering. An official proposal appears in another column of this issue.

**OAKLAND, CAL.**—Hog house, 1 story reinforced concrete, \$3,375. Architect's name not given. Owners, Alameda County. Frank Robinson submitted the low figure for the construction of a hog house at the Alameda County Infirmary and will probably be awarded the contract. A complete list of the bids received will be found under the heading of Oakland and Alameda County in this issue.

### IRRIGATION PROJECTS

**TURLOCK, STANISLAUS CO., CAL.**—Irrigation project, \$200,000. Engineer, R. V. Meikle, Turlock. Owners, Turlock Irrigation District. Engineer R. V. Meikle of the Turlock Irrigation District has started work on the proposed irrigation improvements recently authorized by a bond issue for \$200,000. It is thought the work will be completed about January 1st.

### LIBRARIES.

**SAN FRANCISCO**—Library, 2 story and base. Class A construction. Cost not stated. Architect, John Reid, Jr., First National Bank Bldg., S. F. Owners, City and County of San Francisco. Bids were opened at last Monday's meeting of the Library Trustees for the construction of the Xoe Valley Branch Library. Segregated figures were taken. A complete list of the bids received will be found under the heading of San Francisco in this issue. No award of contract was made.

**OAKLAND, CAL.**—Library, 2 story and base, brick and concrete, \$35,000. Architect, W. H. Weeks, 75 Post street, S. F. Owners, City of Oakland. Bids were received at the last meeting of the Oakland Library Trustees for the construction of the branch library at the corner of 54th and Boulevard avenue. A complete list of the segregated figures will be found under the heading of Oakland and Alameda County in this issue. No award of contract was made.

### Contracts Awarded.

**SAN FRANCISCO**—Library, 4 story and base. Class A construction, \$1,200,000. Architect, George William Kelham, Sharon Bldg., S. F. Owners, City and County of San Francisco. Contractors, Lindgren & Co., Monadnock Bldg., S. F. general construction only, \$414,000.

### RAILROAD CONSTRUCTION AND EQUIPMENT.

**SAN RAFAEL, MARIN CO., CAL.**—Railroad construction, \$275,000. Engineer's name not given. Owners, Northwestern Pacific. The proposition of having the Corte Madera tunnel double tracked is now being considered by the Central Marin Chamber of Commerce. The cost is estimated at \$275,000. Engineers say the work could be completed in three months and would not interfere with the running of the system. Further information will be given on this work when further progress is made.

**PORTERVILLE, TULARE CO., CAL.**—Railroad extension. Cost not stated. Engineer, Engineering Department Southern Pacific Co., Flood Bldg., S. F. Owners, Southern Pacific Co. Surveys are being completed by the Southern Pacific Company for a branch line of railroad to run from Adobe station on the line of the Porterville Northeastern to the base of Rocky Hill, where are located the granite quarries now in process of development, and then continuing to the base of Magnesite Hill, where the Porterville Magnesite company is doing extensive work.

**PATTERSON, STANISLAUS CO., CAL.**—Railroad construction. Cost not stated. Engineer's name not given. Owners, Patterson & Western Railroad Co., Patterson. The Patterson & Western Railroad Company has filed articles of incorporation. Among the incorporators are Oscar Engblom, E. R. Leedy, Olseen and T. J. Moe. The capital stock will be \$150,000, of which \$25,000 has been subscribed by Honolulu investors and the balance will be subscribed by the directors. The Hawaiian investors are connected with the Mineral Products Company, owners of the magnesite mines west of this city, to which point it is intended to build a line for the purpose of bringing the ore from the mines to the main line of the Southern Pacific.

### Contracts Awarded.

**MENDOCINO AND HUMBOLDT COUNTIES, CAL.**—Railroad stations, frame, \$10,000. Architect, Engineering Dept. Northwestern Pacific, Phelan Bldg., S. F. Owners, Northwestern Pacific Co. Contractors, Mercer-Fraser Co., Eureka. Contract price, \$10,000.

### RESIDENCES.

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$3,300. Architect, none. Owner, Hugh Galway, 420 Pierce street, S. F. Location, east 15th avenue north of Judah. Will contain seven rooms, bath and sleeping porch. Interior finish pine with some elm panels and hardwood floors. Open fire place and tile or brick mantel. Imitation tile in bath room. Automatic water heater. Exterior covered with cement plaster on metal lath. Plans complete and work to be done by Day Labor.

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$2,500. Architect, none. Owner, A. V. Anderson, 1601 10th avenue, S. F. Location, west 9th avenue south of Kirkham. Will contain six rooms and bath. Interior finish pine throughout. Some hard-

wood floors. Open fire place and tile mantel. Automatic water heater. Exterior covered with rustic and cement plaster. Plans complete and work to be done by Day Labor.

**SAN FRANCISCO**—Residences, 2, 2 story and base, frame, \$5,000 each. Architects, Conservative Building and Investment Co. Location, south Alton avenue east 9th avenue. Each will contain seven rooms, bath and basement garage. Interiors finished in pine, hardwood and white enamel. Hardwood floors, furnace heat and open fire places. Mantels tile and brick. Automatic water heaters. Exteriors covered with cement plaster. Plans complete and work to be done by Day Labor.

**SAN FRANCISCO**—Residences, 2, 2 story and base, frame, \$3,000 each. Architect, none. Owners, Nelson Bros., 515 Dolores street, S. F. Location, east 19th avenue, north of Balboa. Will contain six rooms, bath and sleeping porches. Interior finish pine with some elm panels. Hardwood floors, open fire places and tile or brick mantels. Bath rooms finished in imitation tile. Automatic water heaters. Exteriors covered with cement plaster. Plans complete and work to be done by Day Labor.

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$2,800. Architect, C. O. Clausen, Hearst Bldg., S. F. Owner, R. H. Osborn, 709 5th avenue. Location, east Naples south of Munich. Will contain six rooms, bath and sleeping porch. Interior finish pine and elm panels. Hardwood floor and open fire place. Mantel tile. Automatic water heater. Exterior covered with rustic and cement plaster. Plans complete and work to be done by Day Labor.

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$3,000. Architect, A. W. Richardson, 937 Church street, S. F. Owner, J. J. Barry, 59 Prospect avenue. Location, east Cole-ridge south Lizzie. Will contain six rooms and bath. Interior finish pine. Hardwood floors and open fire place. Mantel tile or brick. Automatic water heater. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

**SAN FRANCISCO**—Residence, 3 story and base, frame, \$5,000. Architect, none. Owners, S. A. Born Building Co., 660 Market street, S. F. Location, Ashbury Terrace. Will contain eight rooms, three baths and sleeping porch. Interior finish pine and hardwood with some white enamel. Hardwood floors, furnace heat and open fire places. Mantels tile or brick. Bath rooms finished in tile. Automatic water heater. Exterior covered with cement plaster and brick veneer. Plans complete and work to be done by Day Labor.

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$2,500. Architect, none. Owners, Oscar Heyman & Bro., 742 Market street, S. F. Location, west 6th avenue south of Geary. Will contain five rooms and bath. Interior finish pine and elm panels. Hardwood floors and open fire place. Mantel tile or brick. Exterior covered with rustic and cement plaster. Plans complete and work to be done by Day Labor.

**SAN FRANCISCO**—Residences, 4, 2

story and base, frame, \$2,500 each. Architect, none. Owner, J. Anderson, 123 16th avenue, S. F. Location, east 17th avenue south of Geary. Each will contain five rooms and bath. Interiors finished in pine with some elm panels and hardwood floors. Open fire places and tile or brick mantels. Automatic water heaters. Exteriors covered with rustic and cement plaster on metal lath. Plans complete and work to be done by Day Labor.

SAN FRANCISCO—Residence alterations, frame, \$3,000. Architect, Julia Morgan, Merchants' Exchange Bldg., S. F. Owner, David Atkins, 1949, 1055 Green street, S. F. Work will consist of plumbing, interior trim, hardwood and white enamel, hardwood floors, painting and open fire places. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

PETALUMA, SONOMA CO., CAL.—School lockers, metal, \$300. Architect's name not given. Owners, City of Petaluma. Contractors, Ralston Iron Works, S. F. Contract price, \$300.

FLOREN SCHOOL DISTRICT, SACRAMENTO CO., CAL.—School, 1 story, frame, \$7,960. Architect, George C. Sellen, 1005 K street, Sacramento. Owners, Florin School District. Contractor, E. E. Etherton, Monadnock Bldg., S. F. Contract price, \$7,960.

**SEWERS, STREET WORK & WATER SYSTEMS.**

SAN FRANCISCO—Beach esplanade. Cost not stated. Engineer, City Engineer, Temporary City Hall, S. F. Owners, City and County of San Francisco. Bids will close on October 20th for the construction of the first section of the Beach Boulevard. Plans can be secured from the Engineer's office. An official proposal appears in another column of this issue.

PALO ALTO, SANTA CLARA CO., CAL.—Street paving. Cost not stated. Engineer, City Engineer, Palo Alto. Owners, City of Palo Alto. The Palo Alto Board of Public Works took the initial step toward an extensive campaign of street paving to be done during the year 1916 at its last regular meeting. It was recommended by the City Council that proceedings be started at once for paving the following streets: Homer avenue for its entire length, Webster avenue for its entire length, Byron avenue from Lytton avenue to the creek, Scott street from Channing avenue to Madison avenue, Gilman street from Hamilton avenue to Forest, Kipling street from avenue to Channing, Everett street from Middlefield road to creek, Emerson street from Channing avenue to Embarcadero road, Middlefield road from Melville avenue to Embarcadero road, Lincoln avenue from Alma street to Middlefield road, Addison avenue from Alma street to Middlefield road.

SACRAMENTO, CAL.—Sewer construction, \$60,000. Engineer, City Engineer, Sacramento. Owners, City of Sacramento. Bids received for the construction of the new bond sewer through the southern part of the city indicate that the Contra Costa Construction Co., S. F., and the Ross Construction Co., of Sacramento are the two low bidders. Further mention will be made of the work when contracts are awarded.

SACRAMENTO, CAL.—Sewer construction. Cost not stated. Engineer, City Engineer, Sacramento. Owners, City of Sacramento. The City Commission has adopted a resolution calling for the laying of a sewer along Freeport road, between Burnside and El Dorado avenue.

REDDING, SHASTA CO., CAL.—Street lighting system. Cost not stated. Engineer's name not given. Owners, City of Redding. The proposition of installing a new lighting system in this city is under discussion by the Board of Trustees. The matter will be taken up with the Railroad Commission next month. Business men on Yuba street, between Market and the railroad tracks are now completing arrangements to finance the construction

and maintenance of the proposed system. Further information on this work will be given when final arrangements have been started.

CHICO, BUTTE CO., CAL.—Road construction. Cost not stated. Engineer, County Surveyor, Oroville. Owners, Butte County. In response to a petition to the County Supervisors a new road will be built in district No. 14, from Honcut road to the Palermo road and thence to the Lone Tree road. Plans for the work have already been ordered prepared.

SACRAMENTO, CAL.—Street paving. Cost not stated. Engineer, City Engineer, Sacramento. Owners, City of Sacramento. Resolutions providing for the improvements of alleys in the lower section of the city have been passed by the City Commission. The alleys to be improved are in the blocks bounded by Front and Second, W to X; and W and X, 4th to 6th; N and O, 10th to 11th, and Oak avenue, 5th to 7th.

STOCKTON, SAN JOAQUIN CO., CAL.—Sewer construction, \$23,042.35. Engineer, City Engineer, Stockton. Owners, City of Stockton. E. Bishop, Stockton, submitted the lowest bid at \$16,419.25 for the construction of sewers in South street, McKinley avenue and Edison street. The City Engineer's estimate was \$23,042.35. No award has been made.

FRESNO, FRESNO CO., CAL.—Storm water sewer, \$150,000. Engineer, City Engineer B. E. Cronkite, Fresno. Owners, City of Fresno. The City Engineer has been instructed to prepare plans for a complete storm water sewer system. This work will require between three and four months. Further mention will be made when bids are called.

BAKERSFIELD, KERN CO., CAL.—Road construction. Cost not stated. Engineer, County Surveyor, Bakersfield. Owners, Kern County. Plans and specifications having been approved, the County Supervisors have advertised for bids to be received October 19th for the construction of the Caliente-Kernville road. Further information may be had from the County Engineer at Bakersfield.

FRESNO, FRESNO CO., CAL.—Street paving, \$45,000. Engineer, City Engineer B. E. Cronkite, Fresno. Owners, City of Fresno. The paving of Santa Fe avenue, a distance of nine blocks is now being considered by the City Council. The Santa Fe Railroad Company owns all of the property along this thoroughfare, and it is understood that they are willing to have the paving laid.

KINGSBURG, FRESNO CO., CAL.—Street paving and improvement. Cost not stated. Engineer, City Engineer, Kingsburg. Owners, City of Kingsburg. Kingsburg is planning to improve the streets of the city. At the last meeting of the city trustees, the matter was discussed with the city engineer and city attorney, and approval given to the plans and specifications for Simpson street. The plans for the other street improvements have not yet been completed. Bids will soon be called for.

SAN ANSELMO, MARIN CO., CAL.—Street improvements. Cost not stated. Engineer, Town Engineer, San Anselmo. Owners, Town of San Anselmo. A resolution was adopted at the last

meeting of the Trustees providing for street work on Willow avenue, and the clerk has been instructed to advertise for bids on the work. Further information may be had from the Clerk of the Trustees at San Anselmo.

NAPA, NAPA CO., CAL.—Sewer construction. Cost not stated. Engineer, City Engineer, Napa. Owners, City of Napa. Plans and specifications have been completed and approved and the City Council has passed a resolution of intention providing for the laying of an ironstone sewer pipe 8 inches in diameter with 8 Y branches in Nursery street, 245 feet north of Vallejo street, running to a manhole at the intersection of Nursery and Vallejo streets. The resolution also provides for one flushing hole to be constructed of ironstone pipe 8 inches in diameter with iron cap and cover at the north end of the sewer at Nursery street, also that an 8 inch ironstone pipe with eleven oranches be laid in Vallejo street, and a cement concrete catch-basin. Bids on this work will soon be called for.

VALLEJO, SOLANO CO., CAL.—Street improvement, \$8,275.40. Engineer, City Engineer Kilkenny, Vallejo. Owners, City of Vallejo. Plans have been prepared for the improvement of the alleys in blocks 265, 266, 267, 268 and 269 between Sonoma and Monterey and Georgia and York.

RIVERSIDE, RIVERSIDE CO., CAL.—Road construction. Cost not stated. Engineer, County Surveyor, Riverside. Owners, Riverside County. The County Highway Commission has ordered bids received for the construction of the Moreno-Beaumont and Palm Springs highways. The route from Moreno to Beaumont is 10 miles through the Moreno hills. The route from Palm Springs to Indio is 25 miles and terminates at Gard's store in Indio. Further information may be had from the County Engineer at Riverside.

SANTA BARBARA, SANTA BARBARA CO., CAL.—Street paving. Cost not stated. Engineer, City Engineer, Santa Barbara. Owners, City of Santa Barbara. A resolution of intention providing for the paving of Valerio street from Garden to Canal has been adopted by the City Council. Bids will soon be called for on the work.

RIVERSIDE, RIVERSIDE CO., CAL.—Sewer construction, \$15,000. Engineer, City Engineer, Riverside. Owners, City of Riverside. Preliminary steps have been taken by the City Council towards the construction of the Arlington sewer. The Riverside Council agrees to pay \$5,000 towards the cost of the proposed outfall sewer. The Supervisors have agreed to pay \$3,000 in order that the county hospital and detention home may be included in the sewer district.

There will be several stores besides the theatre on the first floor. Interior finish will be of pine and ornamental plaster. Patent store fronts are specified. Exterior will be faced with pressed brick. Plans are being prepared and the work will be done by Day Labor.

### ARGENTINA TO BUILD GRAIN ELEVATORS.

The President and Minister of Agriculture of Argentina, after considering proposals from syndicates in foreign countries for the establishment of grain elevators in the agricultural zone of the country, have decided to formulate a law providing for the construction of such elevators, and to call for bids, both in Argentina and in foreign countries. United States Consul General W. Henry Robertson, at Buenos Aires, transmits a copy of La Prensa, dated August 9, in which the attitude of the Argentine officials is set forth. The projected installation of an extensive system of elevators in Argentina, with terminal stations at Buenos Aires, Rosario, and Bahia Blanca, was the subject of an article published in Commerce Reports for August 24, 1915.

### COST OF LIVING.

**LOS ANGELES**—The item of rent, which plays an important part in the cost of living, has suffered a heavy decline in Los Angeles during the past year and all classes of dwellings can be secured to day at figures from 10 to 30 per cent lower than the same property brought in 1914. There is an over-supply of bungalows, flats and apartments in the city, and even with the great influx of tourists this year owners have been compelled to lower their rents in order to obtain tenants. —Fresno Daily Real Estate Report.

### SOUTH AMERICAN ORDERS.

An American business firm informs the Bureau of Foreign and Domestic Commerce that it has recently received two orders from a Latin-American country, obtained through the information furnished by an American consul in that country, which was published in "Commerce Reports." The firm adds that it will doubtless obtain other orders in the field thus opened.

### UNSIGNED LETTERS DETRIMENTAL TO TRADE.

[Consul General L. J. Keena, Valparaiso, Chile, July 22.]

Unsigned business letters from American firms which have been received here are criticized by the Chilean recipients, and their criticisms have been confirmed by the increasing proportion of letters coming to this consulate general without signatures.

The comments that have been heard apply to three classes—letters asking for information, letters of acknowledgment, and those making business offers. It is unlikely that a letter of the third class, unsigned, would inspire much confidence here, as the conclusion would naturally be drawn that it had received purely perfunctory attention on the part of the writer, or had been written by some one who had no authority to sign it.

An unsigned offer of sale creates an impression similar to that which was produced several years ago, when numerous letters were sent out by business houses in the United States conspicuously stamped; "Dictated, but not reread."

Similar complaint regarding the sending of trade letters from the United States without signatures was received from the consulate at Hankow, China, in a communication published in Commerce Reports for June 11, 1915. It was then stated that the practice was invariably construed by foreign merchants as a sign that the American houses involved lacked any real interest in the possible sale of their goods abroad.

### PHILIPPINES.

[Manila Daily Bulletin, July 27.]

#### Plans for the New Sugar Centrals.

The Government Central Sugar Board announces that it has definitely decided that, with the \$1,000,000 available, at least one central will be erected and put into operation in time to handle the 1916-17 crop, and that if satisfactory banking arrangements can be made the erection of two mills will be proceeded with. The secretary of the board announced that representatives of sugar-machinery manufacturers were invited to accompany the board to visit the Maao, Isabela, Silay, and Capiz projects in order to secure information to enable them to file bids for supplying machinery and other materials for the central.

### FRESNO BUILDING ACTIVE.

**FRESNO, Fresno Co., Cal.**—During the month of September the City Building Inspector issued building permits to the valuation of \$12,777.

# OFFICIAL PROPOSALS.

## NOTICE TO BIDDERS.

**PETALUMA.** Sonoma Co., Cal.—BIDS will be received by the Board of Education of Petaluma, until **October 15th, 8:00 P. M.**, for furnishing and installing 350 yards (more or less) of First Quality Battleship or Cork Linoleum. Will's make or equal, and 634 opera chairs (more or less).

Further information may be had from A. B. Way, Secretary of the Board of Education, Petaluma City School District. (This is not an official proposal.)

## PROPOSAL FOR BIDS.

SEALED BIDS will be received at the office of Lewis P. Hobart, Crucker Building, San Francisco, Cal., at or before **2:00 P. M., October 23, 1915**, for the elevators, electric wiring, plumbing, heating and ventilating, power plant and refrigerating plant for the building for the University Hospital at Fourth and Parnassus Aves., San Francisco, Cal., as per plans and specifications on file and obtainable after 9:00 A. M., October 12, 1915, at the Cashier's window in the Comptroller's Office of the University of California, Berkeley, Cal.

A deposit of \$50.00 will be required for each set of plans and specifications taken out, which deposit will be returned upon return of said plans and specifications, accompanied by a regular bid for the work. No bids will be received unless accompanied by a certified check or bond in favor of the undersigned, equal to 10% of the bid, to secure execution of the contract by the successful bidder.

The right is reserved to reject any or all bids.  
THE REGENTS OF THE UNIVERSITY OF CALIFORNIA

may be obtained from this office or the office of the assistant purchasing agent, Fort Mason, San Francisco, Cal.; also from the U. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal. F. C. BOGGS, major, corps of engineers, U. S. army, general purchasing officer.

## PROPOSALS.

**OFFICE OF THE BOARD OF PUBLIC WORKS of the City and County of San Francisco.**

Sealed proposals will be received at this office between the hours of **2 o'clock p. m. and 3 o'clock p. m., on Wednesday, the 20th day of October, 1915**, for doing the following work:

Electric clock system and mail chutes for the City Hall.

Said work must be done in accordance with the specifications on file in the office of Public Works, and the work, to which reference is hereby made, and must be commenced within five (5) calendar days from the receipt of written notice from the Board of Public Works and completed within one hundred (100) calendar days thereafter.

The amount of bond for faithful performance of contract has been fixed as follows:

Proposition No. 1.....\$1,750.00  
Proposition No. 2.....1,500.00  
Proposition No. 3.....750.00

All proposals offered must be accompanied by a check certified by a responsible bank, payable to the order of the Clerk of the Supervisors, for an amount not less than ten per cent of the aggregate of the proposal.

Printed proposal forms will be furnished gratuitously upon application at the office of the Architect, and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids.  
By order of the Board of Public Works.  
F. J. CHURCHILL,  
Secretary.

## STATE OF CALIFORNIA. DEPARTMENT OF ENGINEERING. CALIFORNIA HIGHWAY COMMISSION

### NOTICE TO CONTRACTORS.

SEALED PROPOSALS will be received at the office of the California Highway Commission, 515 Foran Building, Sacramento, Cal., until **2 o'clock P. M., on November 1, 1915**, at which time they will be publicly opened and construction in accordance with the specifications therefor, to which special reference is made, portions of State Highway as follows:

Imperial County across Myers Creek, (VII-10p-12-A) a reinforced concrete bridge about 350 feet long with one three hinged arch span of 170 feet.

Plans may be seen, and forms of proposals, bonds, contract and specifications may be obtained, at the said office, and they may be seen at the office of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the division in which the work is situated. The Division Engineers' Offices are located at Willits, Dunsmuir, Sacramento, San Francisco, San Luis Obispo, Fresno, and Los Angeles.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The Department of Engineering reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

CHARLES D. BLANEY,  
NEWELL D. DARLINGTON,  
CHARLES F. STEIN,  
California Highway Commission.  
AUSTIN B. FLETCHER,  
Highway Engineer.  
CHARLES C. CARLETON,  
Acting Secretary.

NOTICE TO CONTRACTORS.

SEALED BIDS will be received by W. F. McClure, State Engineer, Forum Building, Sacramento, California, up to and including 12 o'clock, noon, Monday, November 8, 1915, said bids then and there to be publicly opened and read for furnishing all plant, materials and labor, and doing the work required for the complete construction and erection of a building to be known as "Hay, Storage and Feed Barn," Stockton State Hospital Farm, near Stockton, California, in accordance with the plans and specifications therefor, copies of which may be obtained on application to the State Department of Engineering, Sacramento, California.

Such bids will be received for the Entire Work, and must be submitted on forms prepared and furnished by the State Department of Engineering. Cash, a bidder's bond, or a certified check in the sum of ten per centum (10%) of the amount of the bid must accompany each bid.

A deposit of Fifteen (\$15.00) Dollars will be required on plans and specifications, the deposit to be returned immediately on the return of the plans and specifications to the State Department of Engineering, at Sacramento, California, in good condition.

The State Department of Engineering reserves the right to reject any and all bids and to waive any informality in any bid received.

All bids must be addressed to W. F. McClure, State Engineer, Sacramento, California, and plainly marked on the envelope: "Proposal for Hay, Storage and Feed Barn, Stockton State Hospital Farm, near Stockton, California."  
(Signed) W. F. McCLEURE,  
State Engineer.

PROPOSALS.

OFFICE OF THE BOARD OF PUBLIC WORKS of the City and County of San Francisco.

## OAKLAND AND ALAMEDA COUNTY

**APARTMENT HOUSE**—3 story and base, frame. Cost not stated. Oakland, Cal. Architects, Rousseau & Rousseau, 110 Sutter street, S. F. Owner's name withheld. Location corner of Miles and College avenue. Will contain two and three room suites with wall beds and private baths. Interior finish pine and hardwood. Hardwood floors and tile baths. Steam heat and a hot water system. Exterior covered with cement plaster on metal lath. Plans being prepared. Ready for figures about November 1st.

**APARTMENT HOUSES**—4, 3 story and base, frame. Cost not stated. Oakland, Cal. Architects, Rousseau & Rousseau, 110 Sutter street, S. F. Owners, Clyde Improvement Co. Location, northwest corner of 3rd avenue and East 15th street. Each will contain two and three room suites. Interiors finished in pine and hardwood with some white enamel. Hardwood floors. Steam heat, hot water system, oil burning furnace and vacuum cleaning. Wall beds and private baths. Tile wainscot and floors in bath rooms. Extérieurs covered with cement plaster. Plans ready for figures about November 1st. This will complete a group of nine similar buildings erected on this property by the Clyde Improvement Co.

**RESIDENCE**—1 story and base, frame, \$2,000. Oakland, Cal. Architect, none. Owner, C. E. Wordlow, 812 Park street, Oakland. Location, northwest corner of 23rd avenue and East 25th street. Will contain five rooms and bath. Interior finish pine. Hardwood floors and open fire place. Mantel tile or brick. Automatic water heater. Exterior covered with cement plaster on metal lath. Plans complete and work to be done by Day Labor.

**RESIDENCE**—1 story and base, frame, \$2,000. Oakland, Cal. Architect, none. Owner, J. F. Chambers, Plaza Bldg., Oakland. Location, east view north of Mather. Will contain five rooms and bath. Interior finish pine. Some hardwood floors. Open fire place and tile or brick mantel. Imitation tile in bath. Automatic water heater. Exterior covered with rustic and ce-

ment plaster. Plans complete and work to be done by Day Labor.

**RESIDENCE**—1 story and base, frame, \$2,500. Oakland, Cal. Architect, none. Owner, Walter H. Packard, Syndicate Bldg., Oakland. Location, west 108th avenue north of Bancroft. Will contain six rooms and bath. Interior finish pine and white enamel. Hardwood floors and open fire place. Mantel tile or brick. Automatic water heater. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

**RESIDENCE**—2 story and base, frame, \$3,500. Oakland, Cal. Architect, none. Owner, R. E. Stubble, 1209 East 19th street, Oakland. Location, west Thomas north Napa. Will contain seven rooms, bath and sleeping porch. Interior finish pine and hardwood with some white enamel. Hardwood floors and open fire place. Mantel tile or brick. Bath room finished in tile. Automatic water heater. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

**RESIDENCE**—2 story and base, frame. Cost not stated. Berkeley, Alameda Co., Cal. Architect, H. B. Monges, Hohart Bldg., S. F. Owner, Walton Van Winkle. Will contain seven rooms, bath and sleeping porch. Interior finish pine and hardwood with some white enamel. Hardwood floors and furnace heat. Open fire places and tile or brick mantels. Bath room finished in tile. Exterior covered with cement plaster. Plans complete and figures being taken.

**RESIDENCE**—2 story and base, frame, \$5,000. Piedmont, Alameda Co., Cal. Architect, Olin S. Grove, 2911 Telegraph avenue, Berkeley, Owner, M. Rose. Location, Piedmont Manor. Will contain seven rooms, two baths and sleeping porch. Interior finish pine, hardwood and white enamel. Hardwood floors. Furnace heat, open fire places and tile or brick mantels. Bath rooms finished in tile. Automatic water heater. Exterior covered with cement plaster. Plans being prepared.

**RESIDENCE**—2 story and base, frame. Cost not stated. Berkeley, Alameda Co., Cal. Architect, E. W. Cannon, Central Bank Bldg., Oakland. Owner, W. J. Moylan. Location, Northbrae. Will contain six rooms and bath. Interior finish pine and white enamel. Hardwood floors. Open fire place and tile or brick mantel. Imitation tile in bath room. Automatic water heater. Exterior covered with cement plaster on metal lath. Plans complete and revised figures being taken.

**APARTMENT HOUSE**—3 story and base, frame, \$20,000. Oakland, Cal. Architect, none. Owner, John A. Bischoff, 6045 Harwood street, Oakland. Location, corner of 30th and Grove streets. Will contain three and four room suites with wall beds and private bath rooms. Interior finish pine with some elm panels and hardwood floors. Steam heat and a hot water system. Bath rooms finished in tile. Exterior covered with cement plaster on metal lath. Plans complete and work to be done by Day Labor.

**HOG HOUSE**—1 story, reinforced concrete, \$3,375. Oakland, Cal. Architect's name not given. Owners, Alameda County. Frank Robinson sub-

mitted the low figure for the construction of a hog house at the Alameda County Infirmary and will probably be awarded the contract. A complete list of the bids received will be found under the heading of Oakland and Alameda County in this issue.

**LIBRARY**—2 story and base, brick and concrete, \$35,000. Oakland, Cal. Architect, W. H. Weeks, 75 Post street, S. F. Owners, City of Oakland. Bids were received at the last meeting of the Oakland Library Trustees for the construction of the branch library at

the corner of 54th and Boulevard avenue. A complete list of the segregated figures will be found under the heading of Oakland and Alameda County in this issue. No award of contract was made.

#### Contracts Awarded

**RESIDENCES**—3, 1 story and base, frame, \$2,000. Piedmont, Alameda Co., Cal. Architect, Alvin J. Stern, 306 14th street, Oakland. Owner, C. R. Coit. Contractor, Roger Coit, 306 14th street, Oakland. Contract price, \$2,000 each.

## Oakland Library Bids Opened By Board.

**Bids Received for General Construction  
Exclusive of Electric Work and  
Heating. No Award.**

Bids were opened Tuesday evening, October 5th, by the Oakland Library Trustees for the construction of the two-story Class "C" library building

to be erected at the corner of 54th and Boulevard from plans prepared by Architect W. H. Weeks. Figures were presented for the general construction with two alternates, first an addition to be made for marble bases and second for washable paint instead of tinting. All bids were taken under advisement and a contract will not be awarded until October 13th, at which time bids will also be received for the heating and electric work.

Following is a complete list of the bids:

#### Oakland Library.

Bidder	Gen.	Alt. 1	Alt. 2
Robert Frost	\$29,945	\$560	\$324
Fletcher & Winklund	33,780	520	400
E. T. Leiter	33,967	550	650
W. G. Thornally	28,775	540	60
Harvey A. Klyce	31,313	530	150
Lange & Bergstrom	31,921	560	400
Williams Bros. & Henderson	28,200	575	500
Schnebley, Hostrawser & Pedgrift	30,735	600	269
Collman & Collman	28,840	640	125
C. Christenson	28,800	600	245
Carnahan & Mulford	30,279	600	620
R. W. Littlefield	30,579	575	245
R. T. Owsley	33,700	585	250
R. Glaze	31,948	656	245
McLeran & Peterson	28,840	525	250
Foster-Vogt Co.	29,057	700	450

## SAN JOSE AND THE SANTA CLARA VALLEY

**RESIDENCE**—1 story and base, frame, \$2,500. Pacific Grove, Monterey Co., Cal. Architect, W. J. Wythe, Central Bank Bldg., Oakland. Owner, Mr. Watterson. Will contain six rooms, bath and sleeping porch. Interior finish pine and redwood with some white enamel. Hardwood floors. Open fire place and tile or brick mantel. Bath room finished in tile. Automatic water heater. Exterior covered with rustic and cement plaster. Plans complete and figures being taken.

**CULVERT**—Reinforced concrete. Cost not stated. Redwood City, San Mateo Co., Cal. Engineer, County Surveyor, Redwood City. Owners, San Mateo County. The plans and specifications prepared by the County Surveyor for the construction of a concrete culvert at the foot of Millbrae Hill were adopted, and the Clerk of the Board was directed to advertise for bids on the work.

**BRIDGE**—Steel and concrete. Cost not stated. Santa Cruz, Santa Cruz Co., Cal. Engineers, County Surveyors, Hollister and Santa Cruz. Owners, San Benito and Santa Cruz Counties. Plans and specifications for the Chittenden bridge to be constructed by

Santa Cruz and San Benito Counties have been adopted by the Supervisors and bids will be received up to October 15th. Further information may be had from the County Surveyor at Santa Cruz.

**BRIDGE**—Reinforced concrete. Cost not stated. San Jose, Santa Clara Co., Cal. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. Plans and specifications for a reinforced concrete bridge on New avenue in Santa Clara County have been adopted by the Supervisors and bids will be received up to 11 a. m. October 25th.

**CONVENT**—2 story and base, reinforced concrete, \$100,000. Santa Clara, Santa Clara Co., Cal. Architect, John J. Foley, 16 Kearny street, S. F. Owners, Carmelite Sisters. Revised figures for this work are now in the hands of the architect and a general contract will be awarded this week.

**STREET PAVING**—Cost not stated. Palo Alto, Santa Clara Co., Cal. Engineer, City Engineer, Palo Alto. Owners, City of Palo Alto. The Palo Alto Board of Public Works took the initial step toward an extensive campaign of street paving to be done during the year 1916 at its last regular meeting. It was recommended by the City Council that proceedings be started at once

for paving the following streets: Homer avenue for its entire length. Webster avenue for its entire length. Byron avenue, from Lytton avenue to the creek; Scott street, from Channing avenue to Madison avenue; Gilman street, from Hamilton avenue to Forest. Kipling street, from avenue to Channing; Everett street, from Middlefield road to creek; Emerson street, from Channing avenue to Embarcadero road. Middlefield road, from McKille avenue to Embarcadero road; Lincoln avenue from Alma street to Middlefield road. Addison avenue, from Alma street to Middlefield road.

**STORE AND OFFICE ALTERATION**—\$20,000. San Jose, Santa Clara Co., Cal. Architect, F. D. Wolfe, First National Bank Bldg., San Jose. Owners, San Jose Building and Loan Association. Location, north Santa Clara east of Market. Work will consist of interior and exterior alterations and will include new interior trim, hardwood and ornamental plaster, lighting fixtures, electric work, plumbing and painting. Exterior of the building will be faced with cement plaster or pressed brick. Plans are being completed.

#### Contracts Awarded

**BRIDGE**—Reinforced concrete, \$1,798. San Jose, Santa Clara Co., Cal. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. Contractor, William Martin, San Jose. Contract price, \$1,798.

**ROAD CONSTRUCTION AND RIVER PROTECTION**—Cost not stated. Salinas, Monterey Co., Cal. Engineer, County Surveyor, Salinas. Owners, Monterey County. Contractors, Granite Rock Co., Salinas, Salinas-Watsonville road. Contract price not stated. Lou G. Hare, Salinas, river protection work. Contract price, \$19,500.

## MARIN, CONTRA COSTA AND SONOMA COUNTIES

**VIADUCT**—Steel and concrete. Cost not stated. Richmond, Contra Costa Co., Cal. Engineer, City Engineer H. D. Chapman, Richmond. Owners, City of Richmond. City Engineer H. D. Chapman has been instructed to prepare plans and specifications for an opening through the Oakland branch of the Santa Fe at 16th street, which is to be spanned with a steel viaduct, and of sufficient width to allow the passing of vehicles and pedestrians in either direction.

**FLOOD GATE**—Cost not stated. Martinez, Contra Costa Co., Cal. Engineer, City Engineer Elam C. Brown, Martinez. A movement for the improvement of the conditions prevailing in Alhambra Creek north of Main street has been taken up by the development board committee. The desired end, it is believed, can be brought about by the building of a flood gate, the impounding of the flood tide waters and at low tide opening the gate and allowing the water to rush out to the bay.

**WAREHOUSE**—2 story and base, reinforced concrete. Cost not stated. Crockett, Contra Costa Co., Cal. Architect's name not given. Owners, California-Hawaii Sugar Refinery. Work has been started on the new concrete warehouse for the California-Hawaii

Sugar Refinery Co. The new structure will be 720 feet in length and will provide storage space for several thousand tons of sugar.

**RAILROAD CONSTRUCTION**—\$275,000. San Rafael, Marin Co., Cal. Engineer's name not given. Owners, Northwestern Pacific. The proposition of having the Corte Madera tunnel double tracked is now being considered by the Central Marin Chamber of Commerce. The cost is estimated at \$275,000. Engineers say the work could be completed in three months and would not interfere with the running of the system. Further information will be given on this work when further progress is made.

**STREET IMPROVEMENTS**—Cost not stated. San Anselmo, Marin Co., Cal. Engineer, Town Engineer, San Anselmo. Owners, Town of San Anselmo. A resolution was adopted at the last meeting of the Trustees providing for street work on Willow avenue, and the Clerk has been instructed to advertise for bids on the work. Further information may be had from the Clerk of the Trustees at San Anselmo.

**SEWER CONSTRUCTION**—Cost not stated. Napa, Napa Co., Cal. Engineer, City Engineer, Napa. Owners, City of Napa. Plans and specifications have been completed and approved and the City Council has passed a resolution of intention providing for the laying of an ironstone sewer pipe 8 inches in diameter with 8 Y branches in Nursery street, 245 feet north of Vallejo street, running to a manhole at the intersection of Nursery and Vallejo streets. The resolution also provides for one flushing hole to be constructed of ironstone pipe 8 inches in diameter with iron cap and cover, at the north end of the sewer at Nursery street, also that an 8 inch ironstone pipe with eleven branches be laid in Vallejo street and a cement concrete catch basin. Bids on this work will soon be called for.

**STREET IMPROVEMENT**—\$8,275.40. Vallejo, Solano Co., Cal. Engineer, City Engineer, Kilkenny, Vallejo. Owners, City of Vallejo. Plans have been prepared for the improvement of the alleys in blocks 265, 266, 267, 268 and 269, between Sonoma and Monterey and Georgia and York.

#### Contracts Awarded

**SCHOOL, WORKERS**—Metal, \$300. Petaluma, Sonoma Co., Cal. Architect's name not given. Owners, City of Petaluma. Contractors, Galston Iron Works, S. F. Contract price, \$300.

#### FRESNO, MODESTO, STANISLAUS AND CENTRAL CALIFORNIA

**RESIDENCE**—2 story and base, frame, \$3,500. Fresno, Fresno Co., Cal. Architect, none. Owner, C. Samuelson, 267 Jensen street, Fresno. Location, Fortcamp Addition. Will contain seven rooms, bath and sleeping porch. Separate garage. Interior finish pine and white enamel. Hardwood floors. Open fire place and tile mantel. Bath room finished in tile. Automatic water heater. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

**CULVERTS**—Reinforced concrete. Hanford, Kings Co., Cal. Engineer,

County Surveyor, Hanford. Owners, Kings County. Bids will be received by the Board of Supervisors up to 2 p. m. of October 16th, 1915, for constructing bridges and culverts on Highway No. 3, in accordance with plans and specifications prepared by the highway commission. The work will involve 89.1 cubic yards of Class A concrete, 90.1 cubic yards of Class B concrete, 354 lineal feet corrugated iron, and 5,763 pounds of reinforcing steel.

**CHURCH**—1 story and base, frame, \$10,000. Turlock, Stanislaus Co., Cal. Architect, Ralph E. Morrell, Odd Fellows Bldg., Stockton. Owners, Church of Christ, Rev. Brooke, pastor. Will contain main auditorium, Sunday school rooms and pastor's study. Interior finish pine and ornamental plaster. Gas steam radiators. Exterior covered with cement plaster on metal lath. Clay tile roof. Plans being prepared.

**IRRIGATION PROJECT**—\$200,000. Turlock, Stanislaus Co., Cal. Engineer, R. V. Meikle, Turlock. Owners, Turlock Irrigation District. Engineer R. V. Meikle of the Turlock Irrigation District has started work on the proposed irrigation improvements recently authorized by a bond issue for \$200,000. It is thought the work will be completed about January 1st.

**RAILROAD EXTENSION**—Cost not stated. Porterville, Tulare Co., Cal. Engineer, Engineering Department Southern Pacific Co., Flood Bldg., S. F. Owners, Southern Pacific Co. Surveys are being completed by the Southern Pacific Company for a branch line of railroad to run from Adobe station on the line of the Porterville Northeastern to the base of Rocky Hill, where are located the granite quarries now in process of development, and then continuing to the base of Magnesite Hill, where the Porterville Magnesite Company is doing extensive work.

**RAILROAD CONSTRUCTION**—Cost not stated. Patterson, Stanislaus Co., Cal. Engineer's name not given. Owners, Patterson & Western Railroad Co., Patterson. The Patterson & Western Railroad Company has filed articles of incorporation. Among the incorporators are Oscar Engblom, E. R. Leedy, Olsson and T. J. Moe. The capital stock will be \$150,000, of which \$25,000 has been subscribed by Honolulu investors and the balance will be subscribed by the directors. The Hawaiian investors are connected with the Mineral Products Company, owners of the magnesite mines west of this city, to which point it is intended to build a line for the purpose of bringing the ore from the mines to the main line of the Southern Pacific.

**STORM WATER SEWER**—\$150,000. Fresno, Fresno Co., Cal. Engineer, City Engineer B. E. Cronkite, Fresno. Owners, City of Fresno. The City Engineer has been instructed to prepare plans for a complete storm water sewer system. This work will require between three and four months. Further mention will be made when bids are called.

**ROAD CONSTRUCTION**—Cost not stated. Bakersfield, Kern Co., Cal. Engineer, County Surveyor, Bakersfield. Owners, Kern County. Plans and specifications having been approved, the County Supervisors have advertised for

bids to be received October 19th for the construction of the Caliente-Kernville road. Further information may be had from the County Engineer at Bakersfield.

**STREET PAVING**—\$15,000. Fresno, Fresno Co., Cal. Engineer, City Engineer, B. E. Cronkite, Fresno. Owners, City of Fresno. The paving of Santa Fe avenue, a distance of nine blocks is now being considered by the City Council. The Santa Fe Railroad Company owns all of the property along this thoroughfare, and it is understood that they are willing to have the paving laid.

**STREET PAVING AND IMPROVEMENT**—Cost not stated. Kingsburg, Fresno Co., Cal. Engineer, City Engineer, Kingsburg. Owners, City of Kingsburg. Kingsburg is planning to improve the streets of the city. At the last meeting of the City Trustees, the matter was discussed with the City Engineer and City Attorney and approval given to the plans and specifications for Simpson street. The plans for the other street improvements have not yet been completed. Bids will soon be called for.

#### Contracts Awarded.

**RESIDENCE**—2 story and base, frame, \$3,987. Bakersfield, Kern Co., Cal. Architect, none. Owner, Paul Fetchner, Contractor, Charles Scott, Bakersfield. Contract price, \$3,987.

**RESIDENCE**—2 story and base, frame, \$7,000. Fresno, Fresno Co., Cal. Architect, Eugene Mathewson, Forsythe Bldg., Fresno. Owner, D. S. Ewing, Fresno. Contractor, Frank Reborn, Fresno. Contract price, \$7,000.

**SEWER EXTENSION SYSTEM**—\$40,500. Visalia, Tulare Co., Cal. Engineer, City Engineer, Visalia. Owners, City of Visalia. Contractor, Michael Murphy, S. F. Contract price, \$40,500.

**HIGHWAY CONSTRUCTION**—Cost as follows. Bakersfield, Kern Co., Cal. Engineer, County Surveyor, Bakersfield. Owners, Kern County. Contractors, Worswick Paving Co., Union National Bank, Fresno, Weed Patch loop. Contract price, \$31,460.40. M. T. Kean, Bakersfield, bridges and culverts on McKittick road. Contract price, \$12,350.78; and the Shattuck & Nimmo Warehouse Co., Bakersfield, paving McKittick-Bakersfield road. Contract price, \$28,802.95.

**SEWER CONSTRUCTION**—\$20,300. Santa Barbara, Santa Barbara Co., Cal. Engineer, City Engineer, Santa Barbara. Owners, City of Santa Barbara. Contractor, Samuel Kurley, L. A. Contract price, \$20,300.

**BRIDGE**—Reinforced concrete, \$2,642. Hanford, Kings Co., Cal. Engineer, County Surveyor, Hanford. Owners, Kings County. Contractor, Henry E. Walker, L. A. Contract price, \$2,642 and \$8.50 per cubic yard for paving approaches.

#### SACRAMENTO, STOCKTON AND NORTHERN CALIFORNIA

**RESIDENCE**—1 story and base, frame, \$2,000. Sacramento, Cal. Architect, none. Owner, Tony Carey, 1612 Dana Way, Sacramento. Will contain five rooms and bath. Interior finish pine. Open fire place and tile mantel.

Exterior rustic and cement plaster. State Architect George B. McDougall, Sacramento. Owners, State of California. Bids will be opened on November 8th at 2 P. M. for the construction of a hay, storage and feed barn at the Stockton State Hospital. Plans can be secured from the State Department of Engineering. An official proposal appears in another column of this issue.

**COURT HOUSE**—3 story and base, Class A construction, \$200,000. Woodland, Yolo Co., Cal. Architect, W. H. Weeks, 75 Post street, S. F. Owners, County of Yolo. W. H. Weeks has been officially appointed as the architect to design the new county court house. Other than the fact that the building will be of fireproof construction no details are yet available. Construction will not be undertaken until next year. Further mention will be made of the work.

**BRIDGES AND CULVERTS**—Reinforced concrete. Cost not stated. Redding, Shasta Co., Cal. Engineer, County Surveyor, Redding. Owners, Shasta County. After adopting the plans and specifications for bridges and culverts on highway No. 3 of the county improved system, the Board of Supervisors instructed County Clerk Pickert to advertise for bids for the construction of the culverts and bridges. The bids will be opened on October 15th at 2 p. m.

**BRIDGE CONSTRUCTION AND EXTENSION**—Reinforced concrete, \$1,869. Marysville, Yuba Co., Cal. Engineer, County Surveyor, Marysville. Owners, Yuba County. L. J. Bryan, Marysville, submitted the lowest bid for the construction of the Timbuctoo bridge and will probably be awarded the contract.

**CREEK FILL**—Cost not stated. Red Bluff, Tehama Co., Cal. Engineer, County Surveyor, Red Bluff. Owners, Tehama County. All bids received by the County Supervisors for the fill on the Salt Creek bridge were rejected, as it was thought the work could be done cheaper by Day Labor, and Supervisor Schafer was authorized to have the work done in that manner.

**BRIDGE CONSTRUCTION**—Timber and concrete. Cost not stated. Chico, Butte Co., Cal. Engineer, County Surveyor, Oroville. Owners, Butte County. The County Supervisors have voted to erect a new bridge over Forbes Creek on the Honcut-Dangor road in Supervisor Whipple's district. The structure is to cost in the neighborhood of \$400 and was ordered built under the emergency act. It was also decided to re-build bridges Nos. 5 and 7 on the Oroville road. Further information relative to this work may be had from the County Engineer at Oroville.

**BRIDGE**—Reinforced concrete and steel, \$4,000. Sacramento, Cal. Engineer, County Surveyor, Sacramento. Owners, Sacramento, County. The County Supervisors have appropriated \$2,000 for the construction of the bridge across the P. G. & E. Co.'s canal on the road leading out of Folsom to Orangeville. The P. G. & E. Co. will pay the other \$2,000. Bids on this work will soon be called for.

**HAY AND COW BARN**—Frame construction, \$2,000. French Camp, San Joaquin Co., Cal. Architect, Ralph P. Morrell, Odd Fellows Bldg., Stockton. Owners, San Joaquin County. Bids are now being taken for the construction of a hay and cow barn on the County Farm. Plans can be secured from the architect.

**HAY, STORAGE AND FEED BARN**—Frame construction. Cost not stated. Stockton, San Joaquin Co., Cal. Archi-

tect, State Architect George B. McDougall, Sacramento. Owners, State of California. Bids will be opened on November 8th at 2 P. M. for the construction of a hay, storage and feed barn at the Stockton State Hospital. Plans can be secured from the State Department of Engineering. An official proposal appears in another column of this issue.

**SEWER CONSTRUCTION**—\$60,000. Sacramento, Cal. Engineer, City Engineer, Sacramento. Owners, City of Sacramento. Bids received for the construction of the new bond sewer through the southern part of the city indicate that the Contra Costa Construction Co., S. F., and the Ross Construction Co., Sacramento, are the two low bidders. Further mention will be made of the work when contracts are awarded.

**SEWER CONSTRUCTION**—Cost not stated. Sacramento, Cal. Engineer, City Engineer, Sacramento. Owners, City of Sacramento. The City Commission has adopted a resolution calling for the laying of a sewer along Freeport road, between Burnside and El Dorado avenue.

**STREET LIGHTING SYSTEM**—Cost not stated. Redding, Shasta Co., Cal. Engineer's name not given. Owners, City of Redding. The proposition of installing a new lighting system in this city is under discussion by the Board of Trustees. The matter will be taken up by the Railroad Commission next month. Business men on Yuba street, between Market and the railroad tracks are now completing arrangements to finance the construction and maintenance of the proposed system. Further information on this work will be given when final arrangements have been started.

**ROAD CONSTRUCTION**—Cost not stated. Chico, Butte Co., Cal. Engineer, County Surveyor, Oroville. Owners, Butte County. In response to a petition presented to the County Supervisors a new road will be built in district No. 14, from Honcut road to the Palermo road, and thence to the Lone Tree road. Plans for the work have already been ordered prepared.

**STREET PAVEMENT**—Cost not stated. Sacramento, Cal. Engineer, City Engineer, Sacramento. Owners, City of Sacramento. Resolutions providing for the improvement of alleys in the lower section of the city have been passed by the City Commission. The alleys to be improved are in the blocks bounded by Front and Second, W to X; and W and X, 11th to 6th; N and O, 10th to 11th and Oak avenue, 5th to 7th.

**SEWER CONSTRUCTION**—\$22,942.35. Stockton, San Joaquin Co., Cal. Engineer, City Engineer, Stockton. Owners, City of Stockton. E. Bishop, Stockton, submitted the lowest bid at \$16,119.25 for the construction of sewers in South street, McKinley avenue and Edison street. The City Engineer's estimate was \$23,012.35. No award has been made.

#### Contracts Awarded.

**BRIDGES**—2, reinforced concrete, \$2,560. Oroville, Butte Co., Cal. Engineer, County Surveyor, Oroville. Owners, Butte County. Contractors, J. L. Mery Co., Chico. Contract price, \$2,560.

**SCHOOL**—1 story, frame, \$7,960. Florin School District, Sacramento Co., Cal. Architect, George C. Nelson, 1005 K street, Sacramento. Owners, Florin School District. Contractor, E. E. Edrington, Monadnock Bldg., S. F. Contract price, \$7,960.

**BRIDGES**—Reinforced concrete. Cost not stated. Red Bluff, Tehama Co., Cal. Engineer, County Surveyor, Red Bluff. Owners, Tehama County. Contractors, Ross Construction Co., Forum Bldg., Sacramento. Contract price not stated.

**RAILROAD STATIONS**—Frame, \$10,000. Mendocino and Humboldt Counties, Cal. Architect, Engineering Department, Northwestern Pacific. Phenix Bldg., S. F. Owners, Northwestern Pacific Co. Contractors, Mercer-Fraser Co., Eureka. Contract price, \$10,000.

#### LOS ANGELES AND SOUTHERN CALIFORNIA.

**RESIDENCE**—2 story and base, brick veneer. Cost not stated. Los Angeles, Cal. Architects, Plummer & Feil, Story Bldg., L. A. Owner, Henry Boos. Location, Lafayette Square. Will contain twelve rooms, three baths and sleeping porch. Interior finish pine and hardwood with white enamel in bed rooms. Hardwood floors, furnace heat and open fire places. Mantels tile and brick. Bath rooms finished in tile. Automatic water heater. Exterior faced with pressed brick veneer. Plans being prepared.

**BRIDGE**—Reinforced concrete. Cost not stated. Myers Creek, Imperial Co., Cal. Engineer, State Highway Commission, Forum Bldg., Sacramento. Owners, State of California. Bids will be received on November 1st by the State Highway Commission for the construction of this bridge. It will be about 300 feet long with a main span of 170 feet. Plans can be secured from the office of the State Highway Commission. An official proposal appears in another column of this issue.

**BRIDGES**—3, reinforced concrete. Cost not stated. Ventura, Ventura Co., Cal. Engineer, County Surveyor, Ventura. Owners, Ventura County. Bids will be received by the Board of Supervisors up to 11 a. m. October 18, 1915, for the construction of three reinforced concrete bridges. They are designated as the Fairview bridge, the bridge across Calleguas Creek and the bridge on Los Angeles avenue. Simi. J. B. McCloskey is the County Clerk.

**BRIDGES**—Steel and concrete, \$13,500 and \$11,000 each. Santa Barbara, Santa Barbara Co., Cal. Engineer, E. T. Flaherty, L. A. Owners, Santa Barbara County. The Supervisors have ordered bids advertised for on the construction of state highway bridges over Eagle Canyon Creek, and Dos Pueblos Creek. Plans show the Eagle Canyon bridge to be 60 feet long, concrete girder, single span with dirt approaches and cement retaining walls to cost about \$17,500. The plans and specifications for the Dos Pueblos bridge show a 100-foot steel bridge with a concrete deck and two 20-foot concrete approaches to cost \$11,000.

**BRIDGE**—Steel. Cost not stated. Ventura, Ventura Co., Cal. Engineer, County Surveyor Pettit, Ventura. Own-

ers, Ventura County. County Surveyor Petit has completed plans for a new bridge to be constructed on the Ojai road. It will be of steel construction, and will consist of one 150-foot span, 19 feet above the creek bed.

**WAREHOUSE**—6 story and base, reinforced concrete, \$300,000. San Pedro, Los Angeles Co., Cal. Engineer, Harbor Commission, San Pedro. Owners, Town of San Pedro. Bids will be received by the Board of Harbor Commissioners up to 10.30 a. m. of October 27th, for all labor and equipment for the erection of a warehouse on Municipal Dock No. 1. The foundation is now under construction. The city will furnish all cement, sand, rock, steel, artificial stone, etc. The building will be 162x180 feet. The work to be done under this contract will require the placing of 27,000 cubic yards of concrete, placing 1,290 tons of reinforcing steel, setting 75 tons of structural steel, finishing 475,000 square feet of floor and about 2,000,000 feet of form lumber.

**SCHOOL**—1 story and base, brick or hollow tile, \$25,000. Los Angeles, Cal. Architects, Train & Williams, Exchange Bldg., L. A. Owners, City of Los Angeles. Location, west Los Angeles south of Pico. Will contain six rooms and an auditorium. Interior finish pine with maple floors. Central heating system and program clocks. Modern school plumbing and electric work. Exterior faced with cement plaster. Plans being prepared.

**ROAD CONSTRUCTION**—Cost not stated. Riverside, Riverside Co., Cal. Engineer, County Surveyor, Riverside. Owners, Riverside County. The County Highway Commission has ordered bids received for the construction of the Moreno-Beaumont and Palm Springs highways. The route from Moreno to Beaumont is 10 miles through the Moreno hills. The route from Palm Springs to Indio is 25 miles and terminates at Gard's store in Indio. Further information may be had from the County Engineer at Riverside.

**STREET PAVING**—Cost not stated. Santa Barbara, Santa Barbara Co., Cal. Engineer, City Engineer, Santa Barbara. Owners, City of Santa Barbara. A resolution of intention, providing for the paving of Velerio street from Garden to Canal has been adopted by the City Council. Bids will soon be called for on the work.

**SEWER CONSTRUCTION**—\$15,000. Riverside, Riverside Co., Cal. Engineer, City Engineer, Riverside. Owners, City of Riverside. Preliminary steps have been taken by the City Council towards the construction of the Arlington sewer. The Riverside Council agrees to pay \$5,000 towards the cost of the proposed outfall sewer. The Supervisors have agreed to pay \$4,000 in order that the county hospital and detention home may be included in the sewer district.

**ROAD CONSTRUCTION**—Cost not stated. Riverside, Riverside Co., Cal. Engineer, County Surveyor, Riverside. Owners, Riverside County. Bids will be opened on October 19th at 3 p. m. for constructing 561 miles of roads, more or less, and for furnishing 10,000 tons, more or less, of crushed rock, and for furnishing 5,000 barrels, more or less, of asphaltic oil for the Indio

## Unit Plant Hot Blast Furnace

### Delivers the Heat

#### A Complete Answer to the Heating Question.

**Instantaneous**—Furnishes an instantaneous and continuous supply of **Saundary**—fresh warm air free from gas fumes, odors, smoke or dust.

**Hygienic**—Maintains an even temperature necessary to health and comfort.

**Scientific**—Built like a real hot air furnace reduced in size.

**Convenient**—Operated from inside of room, saving many steps to cellar.

**Simple**—Any child 10 years of age can operate, turn the key and apply match.

**Economical**—Wall furnace burns 10 cubic feet and floor furnace 20 cubic feet of gas per hour.

**Efficient**—Each furnace will heat from 2 to 5 rooms or from 3,000 to 5,000 cubic feet of space.

**Fireproof**—Has four thicknesses of metal and three air spaces of one inch each between fire and wood; fire is 20 inches from floor.

**Up to Date**—Uses exclusively the Johnson Hot Blast Burner, recognized as the most efficient ever constructed.

**Durable**—Is made from best grade of metal to be obtained.

**Finish**—Register electro plated Flemish Brass. The finish that lasts.

**Installation**—Can be installed by any gas appliance dealer, plumber, tinsmith or hardware merchant at nominal cost.

**Retail Prices**—Wall Furnace, any style \$22.50  
Floor Furnace, any style \$30.00  
Installations and fittings extra.

**WALL FURNACE STYLE C**  
Size of Wall Furnace front is 17x19 inches, with a recessed portion of 11x11 inches between studing. Recessed portion has a 2-inch vent opening at top and a fresh air intake 2x12 inches at bottom operated with damper in front. Both vent and fresh air intake pipes go between studing.

## THE DIESEL ENGINE.

Its Economy and Efficiency for Contractors.

By H. S. Jones, M. E.

The Diesel Engine is an invention of the late Dr. Rudolph Diesel of Munich, Germany, and the engine has been attracting wide spread interest, particularly on the Pacific Coast, owing to the fact that the engine has proven its ability to operate successfully on the California oil.

The basis of operation of this engine differs radically from the carburetted type of internal combustion engine. The compression is carried to a very much higher point and the fuel is admitted after the compression has been completed. In a four-stroke-cycle, vertical engine, which is the one most often met with in practice, the down stroke of the piston draws air from the atmosphere into the cylinder. With the up stroke this air is compressed to approximately 500 lbs. per square inch with an accompanying temperature of about 1,000 deg. Fahr. At or near the top point of the stroke the fuel oil is admitted, being sprayed into the cylinder by an external source of compressed air obtained from a direct connected compressor. This oil is allowed to enter the cylinder during a definite portion of the downward travel, and it burns and expands without explosion during the entire stroke, thus eliminating any shock on crank and bearings. On the next up stroke the burnt gases are exhausted and the cylinder is again ready to take its charge of pure air. This type of engine requires four strokes of the piston for one working stroke, and is called the four-stroke-cycle engine, or popularly known as the four-cycle engine. This type of engine is the one most used in commercial operation and has been the one that has stood the test of time. It is to be expected, however, that two-stroke-cycle engines, those with a fuel injection every down stroke, will come into more general use in the future in the larger sizes.

Almost any kind of liquid fuel can be used in Diesel Engines and in fact experimentally practically all kinds have been tried, but it is not economical to use fuel that will form a deposit in the cylinder or on the valves as it is expensive to shut down the engine for cleaning, particularly if the type of service the engine has to perform is of a continuous character. The

oil companies in the West sell what they call fuel oil. This oil is crude oil with the lighter kerosene and gasoline removed, and at certain times of the year asphalt is also removed for road use. The removal of the asphalt, however, with some companies depends upon the season of the year or more properly on the demand for asphalt. This fuel oil which is sold under various ranges between 20 deg. and 24 deg. gravity, Beaume, and has a so-called asphalt content of approximately 25%. This oil has been used successfully in Arizona for the last five years and has given entire satisfaction.

State of California, one consisting of two Busch-Sulzer Bros. Diesel Engines at Needles, which supply power for an ice plant.

These engines of 500 and 120 H. P. are operated upon fuel known as "Calol Fuel Oil" supplied by the Standard Oil Co. at approximately 70c per barrel of 42 gallons in Bakersfield. Another installation on the coast is the municipal plant at Palo Alto, Cal. This installation consists of an engine manufactured in Hanover, Germany. It is of the horizontal, four-stroke, four-cycle type with four cylinders direct connected to an electric generator. This engine has given excellent

The 450 H. P. engine at the United Verde Copper Co.'s plant at Jerome has operated on this oil this oil 21 hours per day, 6 days in the week; on Sunday a shut down of approximately 2 hours is made for observation and possible changing of valves. This engine drives a Roots blower and must be depended upon to ventilate certain portions of the mine so that it can be imagined that no type of engine would be considered about which there was the slightest question of reliability.

There are at the present time several Diesel plants in operation in the

satisfaction and is generating electricity for the municipality at a minimum figure. This engine is using the same fuel oil that was previously burnt under the boilers in the same plant.

The National Ice Co. of San Francisco have two engines of 200 H. P. each installed in their ice plant, and the power cost of ice has been reduced to one third the cost using steam power.

There is one point which is vital to the installation of a Diesel Engine in comparison with the purchase of electricity from a public service corpora-

tion, and that is the matter of load factor, or the portion of the total time that the plant will be in operation. It will be noticed by the installations cited that the ice industry apparently offers an excellent opportunity for Diesel engines owing to the continuous character of its load, while industrial plants which operate but eight hours per day usually have a load factor below 25%. Owing to the first cost of the Diesel Engine, the fixed charges are relatively high in comparison with the operating charges and with the fixed charges for other types of apparatus. These fixed charges continue day and night, Sundays and holidays, and must be divided by the number of hours, or kilowatts, or horsepower of useful work performed by the apparatus. From this it will be readily seen that should the useful output of the engine be small, the fixed charges per unit will be large, and this fixed charge expense can only be decreased by increasing the number of hours of operation. In this regard the Diesel Engine will appeal strongly to contractors who are contemplating undertaking large contracts at isolated points, such as tunnel work where air compressors must be operated continuously, or where it is impossible to obtain electric power at any thing approaching a reasonable figure. Due to the life of the Diesel, which experience shows is far in excess of ten years, the engine can be sold after the expiration of the contract at a figure very near its first cost, in fact there are few, in any, second hand Diesel Engines for sale in the United States, and those who have Diesel Engines in operation may be quoted as saying that they would not sell the engine at any figure if they could not buy another to take its place, and as far as they can see the engine is as valuable to them after five or six years operation as the day it was first purchased.

To the contractor the matter of the transportation of the engine may at first sight appear to be a problem in an isolated location, but the engine is so constructed that the weight of each separate piece is not great. Even an engine as large as 500 H. P. can be transported on wagons over such character of roads as may be found in the West, and it would also be likely that an undertaking that could make use of a 500 H. P. engine would necessitate building a good road to transport other material for the work. Where power is necessary for rock drills, hoists, derricks and all apparatus in connection with a large contract, the Diesel Engine would be a most economical installation. The average cost of the Diesel Engine would be from one-quarter to one-third greater than that of a steam plant, but the saving in fuel would be very great, and it can be stated roughly that the consumption would be from one-sixth to one-ninth that of the steam plant usually erected by contractors, and also eliminates all expense and trouble due to boiler operation and repair.

The labor of operating an engine is a minimum and the character of the operation is practically the same as that employed in a steam plant, the

master mechanic employed on the job would have supervision over the operation in connection with his other duties. A 500 H. P. engine would use approximately 30 gallons of fuel per hour or about three-fourths of a barrel, using a barrel containing 42 gallons. In this way the cost of fuel would be three-fourths of the price of one barrel of oil, which at San Francisco, Bay points is approximately 80c per barrel. At isolated plants, such as are under consideration, the price of a barrel of oil ranges from \$1.25 to \$1.35. To this must be added approximately 5c per hour for lubricating oil.

The engine will also require cooling water of 30 to 50 gallons per minute. If the expense of cooling water is considerable, it is generally customary to install a cooling tower. In any event the quantity of water used will be far less than that used in a steam plant so that this matter can be dropped from consideration when comparing these two types of prime movers.

\$1.04 divided by 336 equals 31c per K. W. H.

**Total Cost of Power.**

	Per K. W. H.
Fixed charges .....	.21
Operating charges .....	.31

Total ..... .52  
In the table above an estimate is made of the cost of installation and operation of a 500 H. P. engine direct connected to A. C. generator, and assuming that the work will last three years the cost per kilowatt hour is figured. This table assumes that plant has a salvage value of 50%. The table shows the cost per kilowatt hour to be 52c, which is far below purchased price of electricity by any other type of prime mover.

There is another matter which often comes before the consideration of contractors on large undertakings, and that is the purchase of electricity from a public utility company, and is often accompanied by the necessity of build-

Cost of 500 H. P. Diesel plant including engine, generator, switchboard, exciter, all erected in suitable building.....\$36,000  
Considering salvage value to be 50% and plant to be operated 3 years, 1-6th of this investment must be written off each year, or fixed charges... 6,000  
Each year there will be generated 336 H. W. x 360 days x 24 hours equals 2,900,000 K. W. H., or 6,000 divided by 2,900,000 equals 207c per K. W. H. fixed charges.

Total .....\$1.01  
336 K. W. H. generated per hour or

ing a pole line of considerable length. This pole line has no salvage value and if it is not charged direct, it is reflected in the rate obtainable per kilowatt hour as ordinarily it would be of little value when the construction work is completed.

**CUT No 3**

We are showing herewith a section of a modern Diesel Engine showing the air compressor and one working cylinder. This is the engine being put out by Busch-Sulzer Bros. Diesel Engine Co. of St. Louis, a company having fifteen years' experience in Diesel building in this country. The engine combines the American experience with that of Sulzer Bros., the premier builders of Diesels abroad. It will be noted that no cross heads are used, a trunk type of piston having been found most serviceable. All the valves are in the head, being set in cages, and permit of ready removal, the fuel valve being at the center. The cylinder walls, head

## Design of the New Long Beach Outfall.

By Frank Gillen,\* Consulting Engineer.

In 1913 about one-fifth of the total area of Long Beach was provided with sewer. The outfall for this territory was built some fifteen years ago by a bond issue and the connecting laterals were built under the District Assessment Act. In May, 1913, we were called in to design an outfall and main trunk line sewer that would serve the entire city. Owing to the location of the old outfall and the topography of the city, all the territory that could be drained into this outfall was sewered, and in order to sewer the new territory a new outfall was planned and located, so that practically the entire city could be sewered into the new outfall by gravity. In considering the size of the new outfall, not only the present city limits were included but also the territory lying outside of the present city limits, and which in all probability would become a portion of the city within the next few years.

The present population at Long Beach is approximately 35,000. The new outfall is designed of sufficient capacity for from 125,000 to 150,000.

The city voted by a large majority \$310,000 in bonds for the construction of the work. The work consists of 12 miles of outfall and main trunk line, ranging in size from ten inches at the extreme upper end to 48 inches at the lower end.

Bids were solicited on both vitrified pipe and machine made cement pipe for all sizes up to 24 inches. On sizes from 24 inches to 48 inches bids were

solicited on reinforced concrete pipe, brick pipe, and segmental tile block, and exhaust valve and pipes are water coated. An integral air compressed supplies the air for starting as well as furnishing the pressure for atomizing and spraying the fuel. In order to insure the operation of the three-stage air compressor, which must attain a pressure of approximately 1,000 lbs. per square inch, inter and after cooling of the air must be resorted to for such high temperatures are almost prohibitive to the proper lubrication of the cylinders.

The two outer cylinders in a four-cylinder engine are usually used for starting, and as soon as the engine is turning over the first compression is obtained in the two outer cylinders and the first burning of fuel accomplished. The engine can be started from cold in less than half a minute.

The reliability of the Diesel Engine has been proven by years of successful operation in this country and abroad, and in the West practically all of the installations are in isolated points where expert labor is hard to obtain. The fact that nearly half of the Diesel Engines sold in this country have been sold on reorder speaks volumes for their success in every possible way.

Bent Brothers of Los Angeles were the low bidders on the work. Their bid consisted of the use of machine made cement pipe for the small and reinforced concrete pipe for the larger sizes.

After a thorough investigation of the Riensch-Wull screen, its use and the results accomplished in Germany and elsewhere in Europe, it was decided that this method of clarification of the sewage was, everything considered, the most satisfactory system for Long Beach. No attempt at purification was made, because the sewage, after passing the fine screen, is discharged into the ocean 1100 feet from shore, and in 15 feet of water. The screen openings are 1-32 of an inch, so that only the finest particles will appear in the effluent. These will readily oxidize and will not be noticeable in ocean discharge. In order to obtain a gravity flow for nearly the entire city, it is necessary to have the elevation of the inlet to the screening plant at approximately half tide. Under this condition it is necessary to pump the sewage for about one-third of the time while the tide level is above the elevation of the inlet. The gravity discharge is obtained for about two-thirds of the time during the low tide interval. The sludge collected on the screens is consumed in an oil burning incinerator connected to a stack 65 feet high. The outlet for the screening plant under the ocean is 26 inch cast iron pipe laid along the ocean bottom and anchored with three concrete piles at each joint. These piles are driven to a 20 foot penetration.

A portion of the sewer has a cut of 30 feet and this section was tunnelled with shafts placed every 100 feet. A little difficulty was encountered in this tunnel work which was all in sand, due to the fact that caves occurred here and there, which left pockets above the roof lagging. It was impossible to pull the lagging after the pipe was laid, so these pockets were filled from the surface by boring six-inch auger holes ten feet apart, and pumping sand together with enough water to make the sand flow through these holes.

In other places the 48-inch pipe crosses a flat which formerly was a slough. This flat was raised by filling in with dredgings from the harbor, and consists of the finest silt. The water plain is only a few feet from the surface, and the saturated silt proved to be a very unstable and quaking foundation on which to lay the sewer pipe. Timber supports and concrete cradle were used throughout this section in order to give the pipe a substantial footing.

Great credit is due the contractor for his skillful handling of several difficult sections of this sewer.

\*Gillen & Gillen, Consulting Engineers, 1112 Hollingsworth Bldg., Los Angeles, Cal.

## U. S. Civil Service Examination.

Associate Gas Engineer (Male), \$2,000.

November 3, 1915.

The United States Civil Service Commission announces an open competitive examination for associate gas engineer, for men only, on November 3, 1915. From the register of eligibles resulting from this examination certification will be made to fill a vacancy in this position in the Bureau of Standards, Department of Commerce, Washington, D. C., at a salary of \$2,000 a year, and vacancies as they may occur in positions requiring similar qualifications, unless it is found to be in the interest of the service to fill any vacancy by reinstatement, transfer, or promotion.

This examination is open to all men who are citizens of the United States and who meet the requirements.

Persons who desire this examination should at once apply for Form 1212, stating the title of the examination for which the form is desired, to the United States Civil Service Commission, Washington, D. C. Applications should be properly executed, excluding the medical certificate, and filed with the Commission at Washington in time to arrange for the examination at the place selected by the applicant. The exact title of the examination as given at the head of this announcement should be stated in the application form.

Surveyor (Male).

December 8-9, 1915.

The United States Civil Service Commission announces an open competitive examination for surveyor, for men only, on December 8 and 9, 1915. From the register of eligibles resulting from this examination certification will be made to fill vacancies in positions of United States surveyor and transitman in the General Land Office, and vacancies as they may occur in positions in any branch of the service requiring similar qualifications, unless it is found to be in the interest of the service to fill any vacancy by reinstatement, transfer, or promotion.

This examination is open to all men who are citizens of the United States and who meet the requirements.

Persons who desire this examination should at once apply for Form 1212, stating the title of the examination for which the form is desired, to the United States Civil Service Commission, Washington, D. C. Applications should be properly executed, excluding the medical and county officers' certificates, and filed with the Commission at Washington in time to arrange for the examination at the place selected by the applicant. The exact title of the examination as given at the head of this announcement should be stated in the application form.

# News From the California State Commission.

## STATE CORPORATION DEPARTMENT.

Commissioner of Corporations H. L. Carnahan has granted a permit to Martinez Land Company, a \$200,000 corporation, to issue \$48,000 par value of its shares to B. Schapiro, R. R. Veale and others in payment for the Babbitt, Henderson and Potter ranches, aggregating 170 acres, situated near Martinez, subject to \$39,000 indebtedness. The company may also sell \$76,000 par value of its shares to net par for the purpose of subdividing the property for sale for residential purposes.

Consolidated Electric Company, San Francisco, is permitted to issue its stock to the Great Western Power Company and issue \$2,593,000 face value of 5 per cent forty-year bonds, in accordance with the order of the Railroad Commission.

Another \$5,000,000 of European money is coming into California to develop the oil industry. The Shell Company of California has just been issued a permit by Commissioner of Corporations H. L. Carnahan authorizing it to sell \$5,000,000 par value of its preferred shares for cash, to net the company not less than 90. None of this stock is to be sold in California but is to be taken up entirely, it is understood, by Holland capitalists. The proceeds will be used in the general development work undertaken by the Shell interests in this State.

Amelia Custom Milling Company, Bakersfield, is permitted to sell 15,000 shares at 25 cents per share, for the purpose of erecting a five-stamp mill in the Amelia District of Kern County for the use of various mines.

## Applications Filed.

Red Cap Mining and Development Company of Scotia, Cal., operating ten quartz claims and three placer claims in northeastern Humboldt County, makes application for permission to sell 100,000 shares at 10 cents to net the company the full amount of the selling price. The \$10,000 raised, it is estimated, will pay off indebtedness and complete development work preparatory to installing a mill.

Maximoi Company of Vernon, Cal., makes application to issue \$18,000 par value of its shares in exchange for the reining plant and other assets of the firm of Murray, McHugh & Murray.

## RAILROAD COMMISSION.

That jurisdiction over motor bus lines and auto stage lines has never been conferred upon the State Railroad Commission is the decision reached by that body after hearing the cases of the Western Association of Short Line Railroads vs. the Wichita Transportation Company, and that of the United Railroads of San Francisco

vs. the Peninsula Rapid Transit Company.

In a review of the public utilities act the commission dismissed both complaints on the grounds of no jurisdiction. The contention of the railroads that every common carrier is a public utility and consequently subject to control by the commission was disproved by the commission. It is distinctly provided that the Railroad Commission shall have and exercise only "such power and jurisdiction" to supervise and regulate public utilities "as shall be conferred upon them by the Legislature."

That the Legislature did not confer this jurisdiction is the opinion of the commission.

## Supreme Court.

A decision has been rendered by the State Supreme Court which involves a realignment of claims of various large creditors of the California Development Company. The latter company, now in the hands of a receiver, built the canal which takes water from the Colorado River into the Imperial Valley.

A break in the bank of the river, occurring in 1904, started litigation which became very complicated, and finally was taken to the Supreme Court on appeal of the Southern Pacific Company. The water poured through the break in the bank and flooded the Salton sink, making the Salton sea. This water damaged the new Liverpool Salt Company's plant. The latter sued and got judgment for \$458,000. Then the Southern Pacific Company advanced money to the Development Company and helped repair the break. For its services it got a judgment for \$1,500,903. Subsequently the Development Company failed to pay interest on its bonds, a foreclosure suit was filed, and the Title Insurance and Trust Company secured a judgment for \$634,000. Litigation followed to determine the rights asserted by the various parties. From the judgment given by Superior Judge Walter Bordwell of Los Angeles, in 1912, an appeal was taken by the Southern Pacific.

The effect of the Supreme Court decision is to affirm the priority of claim of the insurance company, and of certain bond holders, and also of holders of receiver's certificates in the sum of \$315,000. The salt company is given a priority of lien on the Development Company's property in California; the Southern Pacific is given a priority of lien on stock of the old Mexican Company, which built that part of the canal running through Mexico; and the case is sent back for retrial on the issue of the relative value of the old Mexican stock and the California property.

## Appellate Court.

A decision that will mean a saving to the city and county of San Fran-

cisco of between \$14,000 and \$15,000 was handed down by the Appellate Court of the Third District.

The decision was in the matter of a taxation of San Francisco's Hetch-Hetchy holdings in Tuolumne County, the Appellate Court ruling that Tuolumne had no right to levy upon the property of San Francisco.

This ruling, written by Presiding Justice Chipman, upholds the judgment of the Superior Court of San Joaquin, before which City Attorney Long of San Francisco urged the claims of the metropolis some time ago. Prior to the opening of litigation, Long petitioned the Tuolumne Supervisors to leave the San Francisco holdings from its assessment roll, but without result. Court proceedings were begun in Tuolumne and transferred to San Joaquin.

## Railroad Commission.

Since March, 1912, the State Railroad Commission has authorized the issuance of stocks, bonds, notes and certificates for the public utilities of California amounting to \$165,000,000, according to a report it has made to the Governor.

Of this total \$175,000,000 has been allowed for the payment of maturing debts. The sum of \$248,000,000 has been authorized for new construction, additional development of existing utilities and new ventures. The balance has been approved for miscellaneous purposes. To date approximately \$200,000,000 of the total amount authorized already has been expended or is in process of expenditure.

## 16 Railroad Enterprises.

The report sets forth that under the regulation of the Railroad Commission there have been launched or carried forward almost from their inception 16 new railroad enterprises, the only independent ferry line on San Francisco bay, 13 new gas and electric companies, a \$5,000,000 oil pipe line and a score of new water companies.

Under the commission there have been built or are now being constructed in this State 700 miles of new railway lines, and power companies have initiated or completed projects embracing 100,000 additional horsepower for California.

## Distribution of Funds.

The authority for new improvements and new enterprises in the three and one-half year period has been distributed as follows:

Steam railroads (including \$25,000,000 for expenditures outside of Calif.-

Gas and electric companies	\$102,800,000
Electric railroads	22,500,000
Gas and electric companies	80,000,000
Water companies	18,500,000
Tel. & Tel. companies	2,500,000
Warehouses	1,600,000
Pipe lines	10,000,000

## ITEMS OF INTEREST.

### MINERAL PRODUCTION OF CALIFORNIA FOR 1914.—MINING LAWS.

The completed, detailed report of the mineral yield of California for the year 1914, compiled under the direction of Fletcher Hamilton, State Mineralogist, is now ready for distribution in the form of Bulletin 70 of the State Mining Bureau.

California stands pre-eminent among the States of the Union in the diversity of her mineral wealth and is exceeded in the total value of the annual output by only four—the large coal and iron producing States of the East.

California's yield for the year 1914, though a slight decrease from that of 1913 due to the general business depression which pervaded the entire country for the greater part of 1914, maintained the creditable sum of \$92,436,554 worth of crude materials. It should be borne in mind that this value, with the exception of gold, silver and quicksilver, is, as far as obtainable, that of crude materials at the mine, or quarry, or well, as the case may be—and not sale price values at the marketing centers, which would include the elements of transportation and refining costs and the middlemen's profits.

The gold yield of 999,113 fine ounces, valued at \$20,653,496 was, with the exception of 1883, the greatest of any year in California since 1864. California leads all States in this item, as well as petroleum which is the largest single item here, the 1914 figures for which were 102,881,907 barrels, value \$17,487,109. The structural materials, including cement, crushed rock, building stones, etc., hold a prominent place and are growing in importance each year. Their total for 1914 was \$14,469,981.

An appendix contains the principal California and Federal mining laws.

Copies of Bulletin 70 may be obtained free of charge by addressing the State Mining Bureau, Ferry Building, San Francisco, California.

### SANITARY INSPECTOR VISITS TAHOE RESORTS.

As a part of its campaign for improving the sanitation of summer resorts in California, the State Board of Health has recently sent its Sanitary Inspector, Edward T. Ross, to the Lake Tahoe region, where he made inspections of sixteen resorts around the lake as well as six resorts on the Placerville road in El Dorado County.

Insanitary conditions were found in eighteen out of the twenty-two places visited, the most common fault relating to stream pollution. In some places privies were placed directly over running streams, hog pens were found on the banks, and sewage from some resorts was flowing into Lake Tahoe or its tributaries. Such pollu-

tion not only creates a nuisance, but is also a distinct menace to the health of persons who drink from these beautiful mountain lakes or streams. Besides, such pollution of streams and lakes is a direct violation of State law.

Sanitary conditions at Tahoe Tavern, Pomin's Resort, Al Tahoe Inn and at Homewood Resort met with the approval of the inspector. Instructions for improving conditions at eighteen resorts which did not come up to the required standard were given to the owners, who were glad to receive the expert information furnished by Mr. Ross. They willingly agreed to make the changes required and will have ample opportunity to do so before the 1916 season opens, at which time Mr. Ross will make a re-inspection. In no case will sewerage into Lake Tahoe or its tributaries be permitted. Accordingly, in most instances, resorts were instructed to provide sanitary toilets and to dispose of sewage in septic tanks or leaching cesspools, situated at least 200 feet from lakes or streams.

It was found also, that a number of places were dumping garbage and rubbish in the brush near the camps. This procedure frequently resulted in a breeding place for flies and also became an eyesore. Rubbish and garbage will be required to be buried or burned.

Through the systematic inspections of Mr. Ross, the State Board of Health is bringing about the correction of insanitary conditions at summer resorts and thereby markedly lessening the conditions responsible for "vacation typhoid." By looking after the summer resorts, the Board will lessen the typhoid fever death rate in our cities as well as in our rural districts.

### UNITED STATES NAVAL ADVISORY BOARD.

The members of the board best known to the general public are Thomas A. Edison, Hudson Maxim and Peter Cooper Hewitt, whose fame is world-wide. Eleven scientific societies took part in forming the new board, each offering two names, as follows:

The American Chemical Society: Dr. W. R. Whitney of Schenectady, inventor of photographic films and electric lamps; Dr. L. H. Baekeland, Yonkers, N. Y., a Belgian inventor, principally of photographic apparatus.

The American Institute of Electrical Engineers: Frank Julian Sprague, Milford, Conn.; B. G. Lamme, Springfield, Ohio.

American Mathematical Society: Dr. Robert Simpson Woodward, Washington, D. C., civil engineer, astronomer and geographer; Dr. Arthur Gordon Webster, Worcester, Mass., leading authority in America on sound.

American Society of Civil Engineers:

Andrew Murray Hunt; Alfred Craven, New York City, a graduate of the United States Naval Academy, who has distinguished himself in irrigation work in California and elsewhere.

American Aeronautical Society: Matthew Bacon Sellers, Baltimore, Md., a pioneer in aeronautics; Hudson Maxim, who has won world-wide fame in his work with explosives.

The Inventors' Guild: Dr. Peter Hewitt, New York City, inventor of electrical apparatus; Thomas Robins, Stamford Conn., inventor of numerous mechanical devices.

American Society of Automobile Engineers: Howard E. Coffin, Detroit, Mich., whose inventions have revolutionized the industry; Andrew L. Riker, who placed the American automobile on a meritorious world-wide basis.

American Institute of Mining Engineers: William Lawrence Saunders, Plainfield, N. J., inventor and author of scientific treatises; Benjamin Bowditch Thayer, president of the Anaconda Mining Company and expert on copper and high explosives.

American Electro-Chemical Society: Dr. Joseph William Richards and Lawrence Addison.

American Society of Mechanical Engineers: Spencer Millet, South Orange, N. J., whose cable-ways speeded the completion of the Gatun locks on the Panama Canal; William Le Roy Emmet, New York City.

American Society of Aeronautic Engineers: Henry A. W. Wood, New York, foremost in America in naval aeronautics; Elmor Ambrose Sperry, one of the world's foremost inventors of electric apparatus and inventor of the gyroscopic compass.

### WAR DEMAND FOR HORSE SHOES.

Late Government statistics indicate the scale of the war demand for horse shoes. Our exports in June, 1915, were 750 per cent greater than in June, 1914, or 6,621,671 pounds against 86,383 pounds. For the fiscal year ended June 30, 1915, the exports were 29,157,243 pounds against 2,723,806 pounds and 2,594,448 pounds and 2,594,448 pounds in the fiscal years 1914 and 1913 respectively.

# PUBLIC WORKS IN JAPAN.

by

Bureau of Public Works Ministry of Home Affairs, Tokyo.

(2) These 65 rivers were divided into two classes, on one of which work is to be commenced prior to the other. Those which were at that time actually under the care of the state and other most important rivers, numbering twenty in all, were selected as the first group. All the others, numbering 40, are included in the second group. The work on the first group shall be finished in 18 years—from 1912 to 1930—during which period the government was also to make ample investigation regarding the other group of rivers and make preparation so as to be able to commence the work on them as soon as that on the former group shall have been completed.

This radical plan was put in operation at once and a great deal of good has since been effected.

The total expense on these works on the first group of rivers is estimated at \$2,500,000, about two-thirds of which is to be paid from the national treasury, and the remainder by prefectures concerned. The state revenue appropriated to meet the expenditure is put aside as a special fund, so that the works in view may not be postponed by any obstruction which may occur in the condition of the general finances of the state.

Improvement schemes of those rivers which are under actual work are explained as follows:

## The River Tone.

This river is one of the greatest rivers in the Pacific Coast, having a drainage basin of over 3,573 square miles and irrigation area of over 294,84 acres. Considering the data obtained from minute investigation of the state of the river, the following scheme was decided upon. Some 130 miles of the main channel from its mouth upward to the district Shibane and the whole line of the river Yedo, a distributory, which is 40 miles in length, were taken as the area for the improvement. Discharge at the highest water was assumed to 200,000 cubic feet, 80,000 cubic feet of which should be apportioned to the Yedo. Main works of the scheme are: to enlarge the sectional area of the river channel so that it may afford sufficient space for the passage of this vast volume of water (construction of embankments of great magnitude on both sides of the river, diversion of the water-way where the natural course is too devious and revetment on the bank) to shut up the Gogendo, a distributory, at its junction with the main channel, by which the whole body of water is made to flow into the latter; to remove the watercourse of the Gyaku, a distributory, and to make a new channel connecting the new watercourse and the natural course of the Gyaku, by which sufficient width is given to convey 60,000 cubic feet of water which is to be carried to the Yedo and then by the Yedo to the sea; to extend the breadth

of the whole line of the Yedo; which conveys the combined water of the Sakasa and the Gogendo; to make a short cut from Gyotoku, in the lower part of the river, to the sea for detaching flood water, together with the construction of a lock and a weir at the junction; to divert the river Kinn, an affluent, making it join at a lower point, thus to facilitate the discharge of the Kinn into the Tone; to dam the watercourse of the Shogen, a distributory; to make a lock at the junction of the Yokotone with its main in order to dam the flood of the main toward lake Kasumi through the Yokotone and last of all to improve the state of the northern watercourse of the river which branches off in the neighborhood of the district Karuno. The work is now in course of execution and expected to be completed in the year 1920.

## The Watarase, a Tributary of the Tone.

The idea of the work is to improve the channel for 23 miles above the mouth, and the channels of its three tributaries, namely, the Akiyama, the Omoi, and the Uzuma. The main works are: The improvement of the state of the channel, by which the flood can be hurried forward into the Tone, before the water in the latter rises much; the surrounding the great area of damp ground near the Watarase, called Akama swamp, of 5,057 acres, with an embankment of great size, so that it may serve as a complete reservoir; the excavation of the hill lying between the river and the swamp for a weir, and the making cut-offs for the Omoi and the Uzuma, by which the water, otherwise allowed to overflow, as the Tone increases, may be confined to the reservoir and the channel running downwards from the upper reservoir, the latter being also enlarged to a proper extent. For this scheme, the highest water was supposed to be 90,000 cubic feet for the Watarase, 60,000 cubic feet for Omoi; and the maximum volume of 6,000,000,000 cubic feet is to be reserved in this swamp. This work was commenced in 1910 with the expectation of completing it in 1920.

## The Kuzuryu.

This is one of the greatest rivers in the north coast. The area to be improved covers the main channel for 30 miles above the mouth, the Hino, a branch for 13 miles, the Asuha for 15 miles and smaller branches such as the Asozu, the Kuratani. The work is chiefly the dredging of channels, the extension of embankments and the construction of weirs in those parts where the discharge capacity is deficient, so that they may be able to discharge the highest water, namely, 150,000 cubic feet for main channel, 60,000 cubic feet for the Hino, and 25,000 cubic feet for the Asuha. The work was begun in the year 1900, and so far as it concerns the Kuzuryu and the Asuha, has already finished, the balance being in course of construction.

It will be completed by the year 1916.

## The Onaga.

One of the main rivers in Kyushu Island. Operations to be carried out are chiefly the enlargement of the embankments and the dredging of channels of the main river and its tributaries — the Izumikochi, the Hikosan, the Chugenji and the Inunaki. The length of the main river to be improved is 23 miles from the mouth to Kasamatsu. Besides the Izumikochi will be dammed at its mouth, and the water led to a newly cut channel which joins the main river at a lower point, by which the slope may be increased. A new waterway will be constructed at each of the two towns, Iizuka and Kotake where the main river and the Izumikochi respectively pursue a devious course. By these means, the supposed highest water, viz., the Onaga 150,000 cubic feet, Izumikochi 40,000 cubic feet, the Hikosan 30,000 cubic feet, the Chugenji and the Inunaki each 30,000 cubic feet, has sufficient discharge provided for its passage. The reason why the high water of the main river is small in quantity compared with its tributaries is explained by the fact that the increase of the water of the main generally comes later than that of the smaller so that it is not necessary to convey all the floods at the same time, the work was commenced in 1906 and completed in 1914.

## The Shinano.

The greatest river in the opposite side of the Pacific coast with a drainage basin of over 1,548 square miles and irrigation area of some 196,656 acres. Early in the year 1877 an improvement work was set about on the main course from the city of Nagaoaka downwards to its mouth at Niigata, and was substantially completed by the year 1902 by the co-operated efforts of the state and the prefecture of Niigata, the low water work by the latter and the high water work by the former. Next to this, the repair works at the mouth began in 1886 with similar way and were completed in 1903. At length, a thorough scheme was planned for diversion of floods and the improvement of the mouth. For the former purpose, a heavy cut is to be made through a narrow neck of land between Okozu and the seashore of Tera-domari, measuring 7 miles in length and more than 800 feet to 1,600 feet in width, by which the total water of the river can be carried direct to the sea instead on long detour. (Some photos showing these works are exhibited in this Grand Exposition. At its junction with the main channel a lock and weir are to be made, through which the volume of water necessary for navigation and irrigation below the mouth of the cut-off is admitted into the natural channel. As to the mouth improvement, the Jetty on the west side

(Continued in next issue.)

# Technical Societies.

## SAN FRANCISCO ASSOCIATION OF MEMBERS OF THE AMERICAN SOCIETY OF CIVIL ENGINEERS.

### Officers for 1915.

President—A. M. Hunt.  
Vice-Presidents—H. L. Haehl, M. C. Couchot.

Secretary—E. T. Thurston, Jr.  
Treasurer—P. E. Harroun.  
Board of Directors—M. C. Couchot, H. L. Haehl, A. M. Hunt, P. E. Harroun, E. T. Thurston, Jr., C. H. Snyder, C. B. Wing.

Weekly luncheons in College Room, Hoffbrau Cafe, Wednesdays at 12:30. Engineers welcome; informal; no program.

Regular meetings are held bi-monthly at such time and place as may be appointed by the board of directors. The established custom is to meet on the third Fridays of February, April, June, August, October and December.

Address E. T. Thurston, Secretary, 813 Mechanics' Institute Bldg., Post street, San Francisco.

## SAN FRANCISCO CHAPTER AMERICAN INSTITUTE OF ARCHITECTS.

233 Post Street.

President—W. B. Faville.  
Vice-President—Edgar A. Matthews.  
Sec.-Treas.—Sylvain Schnaittacher.  
Trustees—James W. Reid and Henry Schulze.  
Monthly meeting the third Thursday.

## STATE BOARD OF ARCHITECTS.

### Northern District.

John Bakewell, President.  
Sylvain Schnaittacher, Sec.-Treas.  
Joseph C. Newson, Edgar Matthews.  
One vacancy.

## LOS ANGELES AND SOUTHERN CALIFORNIA.

## PERSONAL.

Announcement was made at Stanford University on October 15th that Dr. Ray Lyman Wilbur will become president of the institution January 1, succeeding Dr. John Caspar Branner. The appointment was made at a meeting of the board of directors Thursday, the 14th.

President Branner presented his resignation to the board October 12th. He will be retired under the provisions of the Carnegie pension fund and will continue all research work in geology at Stanford University. On accepting the appointment in 1913 on the retirement of Dr. David Starr Jordan, Dr. Branner stipulated that he be permitted to relinquish the post at the end of two years.

Dr. Wilbur, dean of the Stanford Medical School, formerly Cooper Medical College of San Francisco, is the youngest of the three presidents of Stanford University. He was born in Boonesville, Ia., April 13, 1875. He received his A. B. degree at Stanford in 1896 and his master's degree the following year. In 1899 he was given the degree of doctor of medicine at Cooper Medical College.

From 1903 to 1904 Dr. Wilbur studied in Germany and England. In 1911 he was made dean of the medical school. In 1911 and 1912 he served as president of the American Academy of Medicine.

President Branner, on his retirement at the end of the year, will resume his former duties as head of the geology department.

## Merits Of Unit Plant Warm Air Furnace.

By P. Edson Snell,  
(of Central Hardware Co., Inc.)

**Prominent Manufacturer Says This Appliance Is the One the Heating World Has Been Waiting for as Successful Gas Competitor Against Coal, Wood or Oil Heating Appliances.**

If service is to come first as the chief watchword of gas companies and appliances manufacturers and dealers of the United States and later of the entire world, those of us who are connected with this part of the game must first make it our business to discover what the great public desires and then do our utmost to render service accordingly. Not only in the gas business but in every other line of commercial endeavor, real profit can only come as the result of giving real service first. Only a few years ago but a few hundreds of people knew anything about the many advantages of gas fuel for cooking or hot water heating. Now there are hundreds of thousands doing all or most of their cooking and water heating with gas and enjoying its many practical conveniences. Our forefathers would think it an extremely long way from the iron kettle and log fire to the modern gas range or automatic water heater.

If cooking and water heating with gas fuel has been made as practical and as economical as well as more convenient than with coal, oil or wood, why has warm air heating with gas fuel not come into more general use? Simply because the gas appliance manufacturers have given much less attention to the production of permanent gas fuel heating devices than to either cooking or water heating devices; and further because most of the gas heating devices which have been produced for the purpose of heating air were designed purely for temporary heating or portable auxiliary heating. Very little attention has been given permanent gas fuel warm air heating devices either for general or auxiliary heating and most of the actual efforts in this direction have been expended along lines which in the general heating game are classed as the most expensive, while by no means most efficient, namely, heat by direct radiation.

The gas appliance world almost as a whole has seemed to overlook the great and important fact that by far the greater portion of general heating, particularly of private homes, has been accomplished by heating devices known as hot air furnaces, or those using the circulating principle. The world's greatest heating engineers as well as medical specialists and scientific experts have all agreed that the most efficient heating device and the one which creates the most sanitary and livable conditions in the one which brings in a continuous supply of fresh air from outside of the building heated and passing this air rapidly over a heating chamber into room, thus supplies the heat desired. In extremely cold weather such devices are sometimes arranged so as to draw some of the cool air off floor and back through the heating chamber up into the room again. The principle, however, remains the same: circulated warm air.

To return to the question of why general heating with gas fuel has not come into general use; one of the chief reasons can be summed up in the statement that an exceedingly large percentage of gas fuel, warm air heating devices which have been produced have not proven as practical or as efficient nor as economical or sanitary as those using coal, oil or wood as fuel. Permanent warm air gas heating devices have been chiefly constructed as central heating plants, none of which can be operated without a very large percentage of heat loss. This has been estimated by heating experts and manufacturers of central heating plants at not less than 50 per cent heat loss. Heat absorbed by the air passing to registers or steam or water passing to radiators; heat lost by radiation from furnace or boiler casing; heat lost by passing up chimney or vent in

form of gas of high temperature; heat lost by unburnt gases passing out of vent by reason of lack of oxygen when most needed—these all contribute to the 50 per cent or more heat loss connected with central heating plants, no matter what fuel is used or whether of the steam, hot water, or hot air types. With gas fuel central heating plants this heat loss has been enough to cause an excess of operating expense which compared with other fuels used in similar types of central plants has been large enough to make gas fuel prohibitive for general heating.

Some attention has been given to unit systems of permanent character but these have mostly been constructed along the very expensive line of heat radiation and have proven much less efficient than the general radiator types which they followed. These devices have had the added serious fault of depletion of oxygen contents of room heated, using such oxygen for combustion purposes and many of them actually pouring back into room heated all of the products of combustion. The author claims that any permanent gas fuel warm air device should be constructed so as to secure its air for combustion from outside of rooms to be heated and positively vent all of its products of combustion to the out-door air, via chimney or properly constructed vent pipe. The time is unquestionably coming when the general public will absolutely demand this quality in the construction of gas warm air heating devices and this demand will come before the inquiry as to its practicability, efficiency, economy, cleanliness, or convenience. To be practical and economical a permanent heating device using gas for fuel must come very close to the general efficiency and economy of devices

using other fuel. The many other advantages of gas fuel such as cleanliness, convenience, quickness, easier regulation, etc., should and will help sell such heating devices and make them the universal method for heating the air we breathe, but these advantages are only secondary to the first insistent demand of the public whom we serve for as practical and as economical efficiency as the fuel which they are now using. The other advantages will remain for the clinching argument which results in sales. We then have an answer to the vital question asked, mainly why have gas fuel warm air heating devices not come into more general use or kept pace with gas fuel cooking and water heating devices?

The next question which naturally arises is can a gas fuel device be constructed which will successfully compete with coal, oil or wood for general permanent heating of air?

With all sincerity yet with due modesty the author answers the above question with a very emphatic yet, and in explanation states that in his judgment the only practical device produced up to the present is the unit plant warm air furnace constructed without heat conducting pipes but so that all but a very small percentage of the heat units are utilized to rapidly warm a large volume of fresh air, all of which passes directly into the room heated. These unit plant furnaces should be constructed so as to be operated and regulated from within the room instead of the basement and located directly under floor between joists or in the wall between studding. Such devices must deliver a continuous supply of fresh air and be absolutely free from all injurious products of combustion and so constructed as to eliminate the great loss of heat connected with the operation of all central or basement plants. To be successful, a permanent gas fuel air heating device must be one which compares favorably in operating expense with other fuel and which at a minimum of gas consumption most quickly heats the largest volume of air by coming into contact with surfaces against which hot gases come in direct contact. The heating chamber should be constructed so as to create a quick upward circulation of the fresh air. Maintenance and regulation of such devices is an important matter to all gas companies and appliance dealers. The author desires to call attention to the fact that the luminous flame properly utilized in furnace construction requires practically no care after installation and entirely avoids the many repeated come back, trouble shooting, calls connected with devices using the Bunsen burner principle, which delivers no greater heat. The steel chamber so combined with a properly constructed luminous flame burner as to avoid direct contact of flame with metal and also avoiding smoking of such flame offers very interesting and effective possibilities.

It can be readily understood that the unit plant warm air furnace using gas for fuel can be at once considered as affording practically double the efficiency of the central plant type.

## Associated Catalogues.

Here is where the Architect usually files the circulars, catalogues, announcements, etc., that come to his office. He can't take care of them. There are too many of them.

### the Remedy:

Associated Catalogues is a collection of catalogues of Building Materials, Building Equipment and Building Machinery available on the Pacific Coast, bound in one volume, thoroughly indexed for instant reference for Architects use.

Every Architect, Consulting Engineer and Large Corporation Purchasing Agent on the Pacific Coast will receive a copy Free. When

Size of pages, 11x14 inches.

the Architect is preparing his plans and specifications, he wants to know how to specify your goods. It's up to you, Mr. Dealer, to make it easy to specify your products.

Associated Catalogues presents the solution. Price per page \$30.00. Send for specimen pages.

## APARTMENT HOUSES.

**SAN FRANCISCO**—Apartment house, 3 story and base, frame, \$24,000. Architect, John H. Powers, 460 Montgomery street, S. F. Owner, John Biller, 460 Montgomery street. Location, southeast corner of Polk and Vallejo streets. Will contain two stores and a total of 14 suites of two and three rooms. Interiors finished in pine with some elm panels and hardwood floors. Steam heat, hot water system and oil burning system. Wall beds and private bath rooms. Bath rooms finished in tile. Patent store fronts. Exterior covered with cement plaster on metal lath. Plans complete and work to be done by Day Labor.

**SAN FRANCISCO**—Apartment house, 3 story and base, frame, \$15,000. Architect, Charles C. Frye, 20 Montgomery street, S. F. Owner's name withheld. Location, 15th and Dolores streets. Will contain twelve suites of two and three rooms. Interiors finished in pine throughout. Some hardwood floors. Wall beds and private baths. Tile floors and wainscot in bath rooms. Exterior covered with cement plaster on metal lath. Plans being prepared and bids to be called for at once.

**OAKLAND, CAL.**—Apartment house, 2 story and base, frame, \$15,000. Architect, J. Henry Boehrer, Delger Bldg., Oakland. Owner, Nevada L. Rudolph. Location, southwest corner of Staten avenue and Belmont. Will contain ten suites of two and three rooms. Interior finish pine with some elm panels and hardwood floors. Wall beds and private bath rooms. Bath rooms finished in tile. Steam heat and hot water system. Exterior covered with cement plaster. Plans complete and in the hands of the owner who is letting all contracts.

**SAN FRANCISCO**—Apartment houses 1, 3 and 1, 4 story and base, reinforced concrete, \$16,000 and \$22,000. Architects, O''Brien Bros., 210 Montgomery street, S. F. Owner's name withheld. Location, China Town District. The smaller building will contain 36 rooms and the larger 16 rooms, both arranged for three room suites with bath and wall beds. Interior finish pine. Steam heat and a hot water system. Exteriors faced with cement plaster. Plans being prepared.

**SAN FRANCISCO**—Apartment house, 3 story and base, frame, \$10,000. Architects, Heiman & Schwartz, Nevada Bank Bldg., S. F. Owner, A. Birrer, 1180 Sutter street, S. F. Location, north California west of Larkin. Will contain six suites. Interior finish pine with some elm panels and hardwood floors. Wall beds. Tile bath rooms. Exterior covered with rustic and cement plaster. Plans complete and owner to take figures.

## BATH HOUSES.

**SAN RAFAEL, MARIN CO., CAL.**—Bath house filter. Cost not stated. Engineer, City Engineer, San Rafael. Owners, City of San Rafael. Bids will be opened on Nov. 1st at 8 p. m. for furnishing and installing a Continental Pressure Filter or equal in the Municipal Baths.

## BANKS

**LOS ANGELES, CAL.**—Bank and offices, 1 story and base. Class A construction. Cost not stated. Architect, John Parkinson, Security Bldg., L. A. Owners, Security National Bank. Location, Spring street adjoining present Security Bldg. First floor occupied by bank, upper floors arranged for offices. Steel frame, hollow tile partitions, concrete floors, metal window sash and frames. Ornamental iron and bronze. Interior finish hardwoods, ornamental plaster and metal trim. Marble and tile wainscot. Special Bank fixtures and vaults. Exterior faced with granite. Plans complete and figures being taken.

## BONDS

**LOS ANGELES, CAL.**—The sale of \$1,026,000 of power bonds has been made by the City Council to the Chase National Bank of New York. These bonds are a portion of the \$6,500,000 power bond issue voted at the election a year ago.

**OREGON CITY, ORE.**—A flax mill, costing between \$300,000 and \$500,000 will be built within a radius of forty miles of Oregon City by the Willamette Valley Flax Company, according to statements of City Recorder Loder. A certificate of incorporation has been issued by Corporation Commissioner Schullerman to the company.

Those interested are William Hassel-din, superintendent of the Oregon City Wooden Mills; Roy B. Cox, one of the owners of the Oregon City Ice and Cold Storage Company; E. S. Larsen, merchant, and W. C. Elliott, Portland contractor.

**CALIXICO, IMPERIAL CO., CAL.**—This city at the present time is taking proceedings for the purpose of voting bonds for water main and sewer extensions.

**SAN BERNARDINO, SAN BERNARDINO CO., CAL.**—The City Council, at a special meeting decided to postpone the proposed special election to vote bonds in the sum of \$210,000 for the erection of a new city hall and municipal auditorium which was scheduled for October 18th. The election will probably not be held until next spring. Elmore R. Jeffery and Frank H. Schaefer, 605 Wesley Roberts Bldg., L. A., are the architects.

**SANTA BARBARA, SANTA BARBARA CO., CAL.** The Board of Supervi-

sors has sold the first \$50,000 block of the \$350,000 bridge bond issue to Byrne, McDonnell & Co., at a premium of \$907.

**VASCO, KERN CO., CAL.**—The Board of Trustees of the Wasco Union High School District will shortly call a special election to vote bonds for the erection of a new high school building.

**POMONA, LOS ANGELES CO., CAL.**—Elections will be held in this city during the month of November to vote bonds of \$30,000 for the construction of storm drains and culverts; \$10,000 for the improvements to be made in Ganesha Park and \$5,000 for the erection of a chamber of commerce building.

**FORTUNA, HUMBOLDT CO., CAL.**—The last election held to vote bonds of \$24,000 for the erection of a high school carried, but after placing the bonds for sale they were declared invalid. The trustees are making preparations for another election.

**PORTERVILLE, TULARE CO., CAL.**—The Doyle ranch, 14 miles of this city, has been purchased by a number of Porterville business men and orange growers, who have the intention to erect a modern club house building on the site. The club membership will be limited to 100.

**OAK PARK, SACRAMENTO CO., CAL.**—The Oak Park Business Men's Association is working for the following improvements: A comfort station for Magnolia and Sacramento avenues; high pressure system for city main by connection with the system at the Western Pacific plant at the shops; alley sewage drains; surface drainage into the bond sewers, and repair of damaged streets.

**MODESTO, STANISLAUS CO., CAL.**—Although the required number of signatures have not been secured, the petitions now being circulated, calling a bond issue for good roads, is meeting with success.

**EUREKA, HUMBOLDT CO., CAL.**—The County Supervisors have sold \$125,000 county highway bonds to The Anglo & London-Paris National Bank.

**AUBURN, PLACER CO., CAL.**—November 16th is the date set for the voting of bonds of \$22,000 for extending city sewers, constructing a septic tank, purchasing three fire trucks and installing a fire alarm system.

**GRASS VALLEY, NEVADA CO., CAL.**—E. S. De Golyer, head of the California and West Point Mining Company, has been in this city, accompanied by George Kingsbury, mining engineer of Los Angeles, with the intention of rebuilding the California surface plant, recently destroyed by fire.

**HANFORD, KINGS CO., CAL.**—The construction of a new city jail building is now under construction by the City Trustees. It is thought a bond issue to vote \$2,000 for the extension of fire mains will be called shortly. While no definite action was taken by the Trustees, it is probable that bonds of \$50,000 for the jail and main extensions will be voted.

**TAFT, KERN CO., CAL.**—The Trustees have definitely decided to revoke bonds of \$50,000 for the erection of a new high school, the last issue having been declared invalid. Notices have been posted calling the election for November 6th.

**BAKERSFIELD, KERN CO., CAL.**—Owing to the crowded conditions of the school buildings the Board of Education will recommend that a bond issue for making additions to the present schools and for the erection of new buildings.

## BRIDGES AND DAMS

**WILLOWS, GLENN CO., CAL.**—Bridges, reinforced concrete. Cost not stated. Engineer, County Surveyor, Willows. Owners, Glenn County. Four new bridges have been ordered constructed by the County Supervisors. One will be over Salt Creek near Newville, and will be 80 feet long. Two will be over a slough in Van Sickle subdivision at Hamilton City, 30 and 60 feet long. One will be over Farrar Creek, three-fourths of a mile east of Butte City, and will be 80 feet in length. All will be of concrete, and bids for their construction will be opened November 1st. Further information may be had from the County Engineer at Willows.

**SACRAMENTO CAL.**—Bridge, reinforced concrete, \$2,300. Engineer, City Engineer Frank C. Miller, Sacramento. Owners, City of Sacramento. Bids are now being taken by the City Park Board for the construction of a bridge in Del Paso Park, to cost approximately \$2,300. Two sets of plans will be offered to bidders, one by City Engineer Frank C. Miller and the other by Jenkins & Wells. Further information may be had from the City Engineer at Sacramento.

**UKIAH, MENDOCINO CO., CAL.**—Bridge, reinforced concrete. Cost not stated. Engineer, City Engineer, Ukiah. Owners, City of Ukiah. At the last meeting of the City Trustees only one bid was received by the board for the construction of a wooden bridge across Orr Creek at Oak street. Walter B. Dickie offered to do the for \$1,150, this amount including grading and filling with driven piles, or for \$1,075 with piles on mud sills. Action on awarding a contract was laid over until October 11th. Trustee Charlton recommended that bids be called for the construction of a concrete bridge at the same location in accordance with the plans prepared by the City Engineer. It is said that the cost of a concrete bridge will run about \$3,000. Plans and specifications may be had from the City Engineer at Ukiah.

**GALT, SACRAMENTO CO., CAL.**—Levee construction, \$30,000. Engineer's name not given. Owners, Allen Estate. The Allen Estate for the past few weeks have been working on a new levee on their place known as the old Hicks ranch. Approximately two miles of levee work has been completed of the three miles to be done. The levee is from five to seven feet high.

**BAKERSFIELD, KERN CO., CAL.**—Bridges and culverts, reinforced concrete. Cost not stated. Engineer, County Surveyor, Bakersfield. Owners, Kern County. Bids will be opened on November 8th at 10 a. m. for grading, construction of bridges and culverts on Division 10, Section 7, Bakersfield-Mojave road.

**VISALIA, TULARE CO., CAL.**—Bridge, concrete, \$1,750. Engineer,

County Surveyor, Visalia. Owners, Tulare County. Bids of Thompson Bros. and Noble & Noble were taken under advisement for the construction of the Mill creek bridge. The former bid \$1,735 and the latter \$1,941.

**SANTA BARBARA, SANTA BARBARA CO., CAL.**—Bridges, 4 reinforced concrete. Cost not stated. Engineer, W. M. Thomas, Hibernian Bldg., L. A. Owners, Santa Barbara County. Engineer W. M. Thomas has been commissioned to prepare plans and specifications for four bridges to be erected on the state highway under the recent bond issue. The bridges will be located as follows: One overhead bridge crossing near Bell canyon; a reinforced concrete span over El Capitan creek; and two reinforced concrete bridges over Gaviota creek between Gaviota gorge and the ocean.

**VENTURA, VENTURA CO., CAL.**—Bridge, reinforced concrete. Cost not stated. Engineer, County Surveyor, Ventura. Owners, Ventura County. The Board of Supervisors has authorized the County Clerk to advertise for bids for the construction of a bridge across the Ellsworth Barranca in Road District No. 5, in accordance with plans and specifications prepared by the County Surveyor.

**FRESNO, FRESNO CO., CAL.**—Retaining walls, reinforced concrete. Cost not stated. Engineer, County Surveyor, Fresno. Owners, Fresno County. Bids will be received by the Board of Supervisors up to 2 p. m. of November 1, 1915, for the construction of four concrete retaining walls for the bridge across Kings River near Sanger, in accordance with plans and specifications on file in the office of the Board.

## Contracts Awarded.

**UKIAH, MENDOCINO CO., CAL.**—Bridges, reinforced concrete, \$1,045.76. Engineer, County Surveyor, Ukiah. Owners, Mendocino County. Contractor, T. J. Hyman, Ukiah. Contract price, \$1,045.76.

**SAN LUIS OBISPO, SAN LUIS OBISPO CO., CAL.**—Jetty work. Cost as follows. Engineer, County Surveyor, San Luis Obispo. Owners, San Luis Obispo County. Contractors, Grace & Bernier, Spreckels Bldg., S. F. Contract price 26-foot piles, \$10.80; 28-foot piles, \$11.50; 30-foot piles, \$12.40; barbed wire per 100 lbs. \$5.50.

**MODESTO, STANISLAUS CO., CAL.**—Bridges, reinforced concrete, \$4,533. Engineer, County Surveyor, Modesto. Owners, Modesto County. Contractors, F. F. Reames and R. N. Simpson, Modesto. Contract price, \$4,533.

**EUREKA, HUMBOLDT CO., CAL.**—Bridges. Cost as follows. Engineer, County Surveyor, Eureka. Owners, Humboldt County. Contractor, Mercer Fraser Co., Eureka, trestle bridge, \$2,200. D. C. Farnell, Eureka, culvert \$372.

## CHURCHES

**HOME OF PEACE, SAN MATEO CO., CAL.**—Mausoleum, 1 story, granite and concrete, \$10,000. Architects, Cunningham & Politeo, First National Bank Bldg., S. F. Owners, I. Cohn Estate. Will contain several receptacles. Interior finish Caen stone and plaster. Ornamental iron and bronze, art glass and modern plumbing. Exterior face with granite. Plans being prepared.

## FACTORIES AND WAREHOUSES.

**KELLOG, IDAHO**—Copper smelter, 1,000,000. Engineers, Bradley, Bluff & Labadie, Hobart Bldg., S. F. Owners,unker Hill and Sullivan Mining Co. Engineers, Bradley, Bluff & Labadie have been commissioned by the management of the Bunker Hill and Sullivan Mining Co. to prepare plans for a smelter plant to be erected on their property in Kellogg, Idaho. Mr. Easton, manager of the mining company, states that it is possible that the plant may be located in either Seattle or Portland as the freight rates on ore from Kellogg are very high. Further mention will be made of the work.

**EUGENE, ORE.**—Warehouse, 2 story and base, reinforced concrete, \$25,000. Architect, J. R. Ford, Eugene. Owners, Allen & Lewis, Eugene. Will cover an area of 80 by 122 feet. Construction will be either reinforced concrete or hollow tile. Tin roof. Furnace heat and electric elevator will be installed. Interior finish rough and pine. Exterior cement plaster. Plans complete and figures being taken.

**SAN FRANCISCO**—Warehouse, 1 story and base, brick and reinforced concrete. Architect, John A. Ettler, 404 Mission street, S. F. Owners, Bohlen Co. Location, north Clementina east of 4th, covering an area of 75 by 80 feet. No interior finish, cement floor, plumbing and electric work. Exterior faced with cement plaster. Plans complete and work to be done by Day Labor.

### Contracts Awarded.

**CALAWA, FRESNO CO., CAL.**—Warehouse addition, 1 story, brick, \$10,500. Architect, John H. Powers, 460 Montgomery street, S. F. Owners, Fresno Bonded Warehouse Co. Contractor, John Miller, 460 Montgomery street, S. F. Contract price, \$10,500.

## FIRE REPORT

**VENICE, LOS ANGELES CO., CAL.**—The Pacific and Standish apartment houses of this city, were destroyed by fire at a loss of \$20,000.

**THERMAL, CAL.**—S. D. Nichols, whose general store was destroyed by fire recently, will rebuild at once. The new structure will cost in the neighborhood of \$30,000.

**PALO ALTO, SANTA CLARA CO., CAL.**—The planning mill of J. F. Parkinson, near the Stanford University grounds, was destroyed by fire last week, causing a loss of \$25,000. There was no insurance carried on the building.

**REDDING, SHASTA CO., CAL.**—A livery barn owned by Thomas Laffon of Redding, has been destroyed by fire. The loss is placed at \$9,000.

**SAN FRANCISCO**—The plant of T. H. Meek at 1157 Mission street was completely destroyed by fire last week. The building was of frame and corrugated iron construction.

**SANTA ROSA, SONOMA CO., CAL.**—The lumber mills at Fort Ross have been destroyed by fire. A considerable amount of lumber and machinery was lost.

**ALAMEDA, CAL.** The Alaska Packers' Association warehouse in Alameda has been destroyed by fire, entailing a loss of \$18,000.

**CLOVERDALE, SONOMA CO., CAL.**—Fire threatening the entire town of Cloverdale caused damage to business and dwelling buildings. The loss is estimated at \$50,000.

**NORD, BUTTE CO., CAL.**—The warehouse of James H. Jones Company of Nord was completely destroyed by fire last week at a loss of \$15,000.

**PROBERTA, TEHAMA CO., CAL.**—Causing a loss of \$10,000 fire destroyed the Proberta Hotel building. The building will be rebuilt immediately, according to those interested in the property.

**BIEBER, LASSEN CO., CAL.**—The general store of N. Bieber & Co. was destroyed by fire last week. The loss is placed at \$25,000, and is partly covered by insurance.

## FLATS

**SAN FRANCISCO**—Flats, 3, 2 story and base, frame, \$3,500 each. Architect, O. H. Thayer, 20 Montgomery street, S. F. Owner, W. A. Goericke, San Rafael Location, south Pacific west of Taylor. Each building will contain two flats of five and six rooms. Interior finish will be of pine and hardwood with some hardwood floors. Open fire places and tile or brick mantels. Imitation tile in bath rooms. Automatic water heaters. Exteriors covered with cement plaster and shiplap. Plans complete and bids to be taken by the owner and architect.

**SAN FRANCISCO**—Flats, 2 story and base, frame, \$3,000. Architect, none. Owner, John F. Haner, 2580 20th street, S. F. Location, west San Carlos north of 19th street. Will contain two flats of five and six rooms. Interior finish pine with some elm panels and hardwood floors. Open fire places and tile mantels. Automatic water heaters. Bath rooms finished in imitation tile. Exterior covered with cement plaster and shiplap. Plans complete and work to be done by Day Labor.

## GARAGES

### Contracts Awarded.

**PORTLAND, ORE.**—Garage, 2 story and base, brick, \$30,000. Architects, Jacobberger & Smith, Board of Trade Bldg., Portland. Owner, Gay Lombard, tor, James P. Taylor, Macleay Bldg., lessee, Oregon Motor Car Co. Contract price, \$30,000.

## GOVERNMENT WORK & SUPPLIES

### Pearl Harbor, Wharf.

The Hawaiian Dredging Co., of Honolulu, H. T., has the contract at \$155,500 for constructing reinforced concrete wharf at the naval station, Pearl Harbor, H. T.

### Chico, Cal., Furniture.

The following bids were received by the supervising architect, Treasury Department, Washington, D. C., for installing furniture in the U. S. public building at Chico, Cal.:

Jacob Breitzel & Son, York, Pa., \$1,575.

Furnas Office and Bank Furniture Co., Indianapolis, Ind., \$1,655.10.

Louck & Hill, Richmond, Ind., \$1,689.11.

The Federal Equipment Co., Carlisle, Pa., \$1,711.75.

John E. Sjostrom Co., Philadelphia, Pa., \$1,700.

Richmond School Furniture Co., Muncie, Ind., \$1,552.75.

McGuire Cabinet Co., Los Angeles, Cal., \$1,257.10.

### Operating Mechanism.

The Reclamation Service is asking for proposals for furnishing the operating mechanism for two cylinder gates of 12-foot diameter for Sherrburne reservoir, Milk River project, Mont., and a duplicate set for Keechelus reservoir, Yakima irrigation project, Wash. The bids will be opened at the office of the U. S. Reclamation Service, Washington, D. C., on October 20.

### Chain Shafts.

The Reclamation Service is asking for proposals for furnishing chain shafts and chains for the rolling crest of the Grand River diversion dam, Grand Valley irrigation project, Colo. The contract involves one safety chain, one chain shaft, one operating chain, and one guard chain, all for the 60-foot roller, and six safety chains, six chain shafts, six operating chains, and six guard chains for the 70-foot rollers. The bids will be opened at the office of the U. S. Reclamation Service, Washington, D. C., November 8.

### Puget Sound, Stable.

Under bids opened September 29 at the bureau of yards and docks, Navy Department, for constructing a stable at the navy yard, Puget Sound, the contract has been awarded to E. Ward, of 513 31st avenue, Seattle, Wash., at \$1,595.

RAINIER NATIONAL PARK, WASH.—Hotel, 1 and 2 story and base, reinforced concrete, \$75,000. Architects, Heath & Gove, National Realty Bldg., Tacoma. Owners, Savage-Scofield Co., et al. Contractors, Cornell Bros., Savage Bldg., Tacoma. Contract price, \$75,000.

### LIBRARIES.

#### Contracts Awarded

PENDELTON, ORE.—Library, 1 story and base, hollow tile construction, \$31,200. Architects, Johnson & Mayer, Portland, associated with Architect Raymond W. Hatcher, Pendleton. Owners, City of Pendleton. Contractors, Olson & Johnson, Missoula, Mont. Contract price, \$31,200.

### IRRIGATION PROJECTS

COLUSA, COLUSA CO., CAL.—Earth work. Cost not stated. Engineer's name not given. Owners, Brown-Arnold Co., Colusa. The earth work for the canal and laterals on the Brown-Arnold rice project, one mile south-west of the town of Colusa, is now ready for bids. Intending bidders may call at Chas. de St. Maurice's office and examine the plans and specifications.

DALLS RESERVOIR SITE, STANISLAUS CO., CAL.—Race and curtain wall protection, reinforced concrete. Cost not stated. Engineer, Chief engineer, Modesto Irrigation District. Owners, Modesto Irrigation District. Bids will be opened on November 2nd for constructing reinforced concrete protecting race and curtain wall on the up-stream face of dam No. 1.

STOCKTON, SAN JOAQUIN CO., CAL.—Irrigation project, \$285,000. Engineer not selected. Owners, Tracy-Bethany Irrigation District. The people of the Tracy-Bethany district by a vote of 79 to 11 favored the formation of the west side irrigation district, comprising approximately 11,500 acres, and, at the same time, elected their officers. The directors and officers elected are: S. A. Shearer, district one; Fred von Sostem, district two; Louis Parker, district three; Henry Frierichs, district four; Peter D. Schmidt, district five; Mrs. Dollie McGee, treasurer; George Parker, assessor; Cornelius Looney, tax collector. Rough estimates for pumping water on the lands of the district are placed at about \$285,000. One of the first important matters to be attended to will be the naming of an engineer to prepare plans and estimates for the district preparatory to submitting a bond issue to the voters of the district.

MADERA, MADERA CO., CAL.—Irrigation project. Cost not stated. Engineer's name not given. Owners, Madera Canal and Irrigation Co., Madera. The Madera Canal and Irrigation Co. has under consideration a project to build an irrigation dam across the San Joaquin River at Polasky or a short distance above Friant, near the mouth of Hildreth creek. The dam would

store part of the flood waters of the river and would supply water to irrigate. It is estimated, 120,000 acres of and chiefly in Madera County. The dam would be 230 feet high from bed rock and would back the water for 11 miles, covering about 1,000 acres. The level of the canal would be 100 feet above the sea, making it possible to irrigate much of the high plain land of Madera County. It is said that this site was chosen by Government engineers some time ago as the most feasible for a dam across the San Joaquin. The water would be diverted into Cottonwood creek, and the land near Hornen, Berenda and Madera would be served.

#### Contracts Awarded.

MODESTO, STANISLAUS CO., CAL.—Canal lining, concrete, \$62,962.25. Engineer, Chief Engineer P. C. Herrmann, Modesto. Owners, Modesto Irrigation District. Contractor, James Willison, Half Moon Bay. Contract price, \$62,62.25.

### RAILROAD CONSTRUCTION AND EQUIPMENT.

PORTLAND, ORE.—Railroad construction, \$6,000,000. Engineer's name not given. Owners represented by Robert E. Strahorn, Portland. According to announcement made by Robert E. Strahorn, a railroad, the cost of which will be about \$15,000 per mile, will be constructed into Eastern, Central and Southern Oregon, to extend for a distance of 400 miles. He proposes to construct a line from Bend to Clamath Falls; one branching from this line about Silver Lake and extending easterly into the rich Warner valley, and one branching from the north and south line about Millican to connect with the line the Oregon Short line and O.-W. R. & N. are building westward through Crane Creek gap.

PORTLAND, ORE.—Elimination of grade crossing, \$750,000. Engineer, City Engineer, Portland. Owners, City of Portland. Final preliminaries leading up to the commencement of actual proceedings for the elimination of the O.-W. R. & N. grade crossings from the head of Sullivan's Gulch to the city limits will be completed this week when the city formally will take over the road west of 82nd street from the county. This will be followed by the filing of the plans and specifications for the project.

#### Contracts Awarded

GRAY'S FLAT, PLUMAS CO., CAL.—Number tramway, \$35,536. Engineer's name not given. Owners, Spanish Peak Number Co. Contractors, United States Steel Products Co., New Jersey. Contract price, \$35,536.

### RESIDENCES.

SAN FRANCISCO.—Residence, 2 story and base, frame, \$3,000. Architect, none. Owner, C. A. Hall, 1318 14th avenue, S. F. Location, west side 14th avenue south of Balboa. CUCAMONGA, SAN BERNARDINO CO., CAL.—School, 1 story and base, frame, \$15,238. Architects, Tuttle & Angel, Delta Bldg., L. A. Owners, Cucamonga School District. Contractor, A. L. Gribling, 3320 North Griffin avenue, L. A. Contract price, \$15,238. Cass-Snurr-Damerel Co., L. A., heating and ventilating, \$2,545.

### SEWERS, STREET WORK & WATER SYSTEMS.

SAN FRANCISCO—Roads, walks and gutters. Cost not stated. Engineer, Constructing Quartermaster's Office,

Fort Mason, S. F. Owners, United States Government. Bids will be opened on October 26th for the construction of roads, walks and gutters at the Letterman General Hospital in the Presidio of San Francisco. Plans can be secured from the Constructing Quartermaster's Office at Fort Mason. An official proposal appears in another column of this issue.

**ORANGE, ORANGE CO., CAL.**—Sewers. Cost not stated. Engineer, City Engineer, Orange. Owners, City of Orange. Plans and specifications for the construction of sewers on East Almond avenue, East Washington avenue, North Cypress street and West Palm avenue, have been approved by the City Council and bids will be called or immediately. Further information may be had from the City Engineer at Orange.

**SAN LUIS OBISPO, SAN LUIS OBISPO CO., CAL.**—Road construction. Cost not stated. Engineer, County Surveyor, San Luis Obispo. Owners, San Luis Obispo County. Plans and specifications for the excavation and construction along the line of certain portions of the right-of-way of the extension of the Morro Creek road, work covers excavation and filling, etc., between Station O and Station 262-00 were approved by the County Supervisors at their last meeting and bids have been ordered received until November 2d at 10 a. m. Further information may be had from the County Surveyor at San Luis Obispo.

**SANTA BARBARA, SANTA BARBARA CO., CAL.**—Road fence, \$3,120. Engineer, County Surveyor, Santa Barbara. Owners, Santa Barbara County. The lowest bid received for the construction of 9½ miles of fence along the State Highway was presented by the Boardman Construction Co., Santa Barbara at \$3,126. A contract will probably be awarded.

**BAKERSFIELD, KERN CO., CAL.**—Highway construction. Cost as follows. Engineer, County Surveyor, Bakersfield. Owners, Kern County. Mesmer & Rice, Marsh-Strong Bldg., L. A., presented the lowest figure at \$3,990 for asphaltic top for a three-mile section on the Bellevue road, and at \$1,300 for paving Brundage Lane. Contracts have not been awarded.

**BAKERSFIELD, KERN CO., CAL.**—Sewer construction. Cost as follows. Engineer, City Engineer, Bakersfield. Owners, City of Bakersfield. At the last meeting of the City Council Lloyd Stroud put in the lowest bid on work to be done in constructing sewer districts 27, 28 and 29 in East Bakersfield, but action in letting the contract was deferred for one week to investigate the reason for a higher bid per foot being placed for district 29 than for the other districts. Stroud's bids were \$730.49, \$455.02 and \$2,512.20 on the three contracts.

**SOUTH SAN FRANCISCO, SAN MATEO CO., CAL.**—Street improvement. Cost not stated. Engineer, City Engineer, South San Francisco. Owners, South San Francisco. Resolutions ordering work on Cypress avenue and Lux avenue, and on Magnolia and Orange avenues have been adopted by the Trustees and bids will shortly be called. The work consists of regrading and paving those streets and con-

structing sidewalks, curbs and gutters.

**MORGAN HILL, SANTA CLARA CO., CAL.**—Road construction. Cost not stated. Engineer, Henry B. Fisher, S. F. Owners, Town of Morgan Hill. At the last meeting the Town Trustees appointed Henry B. Fisher of San Francisco as engineer in charge of the improvement of Monterey street, between the improved parts of the State Highway to the north and south. Bids on this work will be called for shortly.

**SAN JOSE, SANTA CLARA CO., CAL.**—Street improvement. Cost not stated. Engineer, City Engineer, San Jose. Owners, City of San Jose. At the last meeting of the San Jose City Council the following action was taken on street improvements. Resolutions of intention ordering paving done at the crossing of Seventeenth street and Julian and several other unfinished portions of 17th street were read and adopted. A resolution accepting the bid of the San Jose Lumber Co. for redwood to be used on the bridge over the Coyote Creek in East San Jose was given a second reading and adopted. Only one bid, that of the Raich Improvement Co., was received for the work of putting in a concrete wing above the San Fernando street bridge over the Los Gatos creek was received. It was rejected as being too high. The estimate of the City Engineer on the work was \$550. M. Mortoya was awarded the work of putting in sidewalks and gutters around the Allen school property on South 10th street. His bid was 8c a square foot for the sidewalks and 46c a lineal foot for curbing and gutters. Motion was made and carried that property owners should be given 30 days in which to put in sidewalks, curbs and gutters on Prevost between Home and Jerome streets, Home between Delmas and Bird streets, Illinois between San Salvador and William.

**SAN JOSE, SANTA CLARA CO., CAL.**—Curtain wall, reinforced concrete. Cost not stated. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. Plans and specifications having been approved by the County Supervisors, bids have been ordered received for the following work. For the construction of a reinforced concrete curtain wall on Campbell Creek in the County of Santa Clara, and for the improvement of New avenue. Bids on the above work close November 1st, 11 a. m. Further information may be had from the County Surveyor at San Jose.

**SAN JOSE, SANTA CLARA CO., CAL.**—Light tower, steel construction. Cost not stated. Engineer, City Engineer, San Jose. Owners, City of San Jose. Bids are now being taken by the City Council for the reconstruction of the tower at the corner of Santa Clara and Market streets. The bids close October 25th. Further information together with plans and specifications may be had from the City Engineer at San Jose.

**SONORA, TUOLUMNE CO., CAL.**—Sewer construction. Cost not stated. Engineer, Town Engineer, Sonora. Owners, Town of Sonora. Trustee Doyle reported at the last meeting of the Trustees that he had gone over the town with the engineer and obtained complete data and approximate cost of

completing the sewer system. The Engineer was instructed to prepare plans for the work. Further information will be given on this work when bids are called.

**SAN RAFAEL, MARIN CO., CAL.**—Road improvement, \$9,000. Engineer, City Engineer, San Rafael. Owners, City of San Rafael. The City Trustees have announced that the San Joaquin toll road from Mary street to the city limits near the flood gate will be raised to three feet above high tide, graded and macadamized.

**SAUSALITO, MARIN CO., CAL.**—Street improvements. Cost not stated. Engineer, Town Engineer, Sausalito. Owners, Town of Sausalito. Bids will be opened on October 25th for grading of West street from Main to Valley and on Valley street from Fourth to West street. The construction of retaining wall at the intersection of West and Valley streets. The construction of timber highway bridge on West street from the southerly line of Main street to a point 100 feet southerly from said southerly line of Main street produced. The laying and construction of 40 feet of 30-inch vitrified, salt glazed, ironstone pipe in and across West street between Valley and Main streets.

**BERKELEY, ALAMEDA CO., CAL.**—Sewer construction. Cost not stated. Engineer, City Engineer, Berkeley. Owners, City of Berkeley. Bids will be received on October 26th for the improvement of Gilman street by grading to official grade, constructing concrete curbs and gutters, and that the main portions of the street be paved with oiled macadam. Also that 30-inch cast iron culverts be constructed.

**GILROY, SANTA CLARA CO., CAL.**—Fire alarm system. Cost not stated. Engineer, none. Owners, Town of Gilroy. Plans and specifications for the installation of a fire alarm system for this city have been accepted by the City Council and the Clerk has been instructed to advertise for bids on the proposed work.

**BAKERSFIELD, KERN CO., CAL.**—Road improvement. Cost not stated. Engineer, County Engineer, Bakersfield. Owners, Kern County. Bids will be received on November 1st for three miles of paving on Bellevue road near Bakersfield. Bids formerly received for this work have been rejected. Bids will also be received at the same time for concrete paving on Brundage Lane, H street to Union avenue. Former bids for this work were also rejected.

**NAPA, NAPA CO., CAL.**—Electroliner system, \$18,000. Engineer, City Engineer, Napa. Owners, City of Napa. At a recent meeting the Advisory Board of the City of Napa, the City Council, City Engineer and the City Attorney discussed the feasibility and advisability of establishing an electroliner lighting system in Napa. Although no definite action was taken it is thought the work will soon go under way.

**VALLEJO, SOLANO CO., CAL.**—Street improvement. Cost not stated. Engineer, City Engineer, Vallejo. Owners, City of Vallejo. Plans prepared by City Engineer Kilkenny for the improvement of the intersection of Capitol and Branciforte streets have been adopted by the City Council and

bids for the work will soon be called for.

will be received at the office of the U. S. Reclamation Service, Washington, D. C., until **2 o'clock p. m. November 8, 1915**, for furnishing chain shafts and chains for the rolling crest of Grand River diversion dam, Grand Valley project, Colorado, consisting of one safety chain, one chain shaft, one operating chain, and one guard chain, all for the 60-foot roller, and of six safety chains, six chain shafts, six operating chains and six guard chains for the six 70-foot rollers. For particulars address the U. S. Reclamation Service, Washington, D. C. A. P. DAVIS, chief engineer.

## PROPOSALS FOR CANAL SUPPLIES.

**PANAMA CIRCULAR 976**—Proposals for Pneumatic Hoists, Hydraulic Jacks, Magnetic Chucks, Spring Steel, Pig Iron, Pig Lead, Malleable Iron, Castings, Bronze Bars, Nails, Twist Drills, Reamers, Pipe Wrenches and Parts, Gongs, Water Closets, Building Brick, Fire Brick, Fire Clay, Foundry Clay, Silica Grit, Silica Sand, Thumb Tacks, Mucilage, Wrapping Paper, Blueprint Paper, Putty, Sal Soda, Coal Tar, Sal Ammoniac, Carbon Bisulphide, Fish Oil, Alcohol, Varnish, Linseed Oil, Japan Primer, Shellac, White Zinc, Red Lead, White Lead, Lamplack and Paints.—Sealed proposals will be received at the office of the general purchasing officer, the Panama Canal, Washington, D. C., until **10:30 a. m. October 20, 1915**, at which time they will be opened in public, for furnishing the above mentioned articles. Blanks and general information relating to this circular (No. 976) may be obtained from this office or the office of the assistant purchasing agent, Fort Mason, San Francisco, Cal.; also from the U. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal. F. C. BOGGS, major, corps of engineers, U. S. army, general purchasing officer.

## STATE OF CALIFORNIA. DEPARTMENT OF ENGINEERING. NOTICE TO CONTRACTORS.

**SEALED BIDS** will be received by W. F. McClure, State Engineer, Forum Building, Sacramento, California, up to and including **1 o'clock, noon, Monday, November 8, 1915**, said bids then and there to be publicly opened and read for furnishing all plant, materials and labor, and doing the work required for the complete construction and erection of a building to be known as "Hay, Storage and Feed Barn," Stockton State Hospital Farm, near Stockton, California, in accordance with the plans and specifications therefor, copies of which may be obtained on application to the State Department of Engineering, Sacramento, California.

Such bids will be received for the Entire Work and must be submitted on forms prepared and furnished by the State Department of Engineering.

Each a bidder's bond, or a certified check in the sum of ten per centum (10%) of the amount of the bid must accompany each bid.

A deposit of Fifteen (\$15.00) Dollars will be required on the plans and specifications, the deposit to be returned immediately on the return of the plans and specifications to the State Department of Engineering, at Sacramento, California, in good condition.

The State Department of Engineering reserves the right to reject any and all bids and to waive any informality in any bid received.

All bids must be addressed to W. F. McClure, State Engineer, Sacramento, California, and plainly marked on the envelope, "Proposal for Hay, Storage and Feed Barn," Stockton State Hospi-

tal Farm, near Stockton, California."  
(SIGNED) W. F. McCURE,  
State Engineer. (\*)  
**NOTICE TO CONTRACTORS.**

SEALED BIDS will be received by W. F. McCure, State Engineer, Forum Building, Sacramento, California, up to and including 12 o'clock noon, Wednesday, November 10, 1915, said bids then and there to be publicly opened and read for furnishing all plant, materials and labor, and doing the work required for the complete "Painting and Staining" of the Buildings at the California Institution for Deaf and Blind, Berkeley, California, in accordance with the specifications therefor, copies of which may be obtained on application to the State Department of Engineering, Sacramento, California.

Such bids will be received for the Entire Work and must be submitted on forms prepared and furnished by the State Department of Engineering.

Cash, a bidder's bond, or a certified check in the sum of ten per centum (10%) of the amount of the bid must accompany each bid.

A deposit of Five (\$5.00) Dollars will be required on the specifications, the deposit to be returned immediately on the return of the specifications to the State Department of Engineering, Sacramento, California, in good condition.

The State Department of Engineering reserves the right to reject any and all bids and to waive any informality in any bid received.

All bids must be addressed to W. F. McCure, State Engineer, Sacramento, California, and plainly marked on the envelope: "Proposal for 'Painting and Staining' of the Buildings at the California Institution for the Deaf and Blind, Berkeley, California."

(SIGNED) W. F. McCURE,  
State Engineer. (\*)

#### CALIFORNIA HIGHWAY COMMISSION

##### NOTICE TO CONTRACTORS.

SEALED PROPOSALS will be received at the office of the California Highway Commission, 515 Forum Building, Sacramento, Cal., until 2 o'clock P. M., on November 1, 1915, at which time they will be publicly opened and read for construction in accordance with the specifications therefor, to which special reference is made, portions of State Highway as follows:

Imperial County across Myers Creek, (VII-Imp.-12-A) a reinforced concrete bridge about 500 feet long with one three hinged arch span of 170 feet.

Plans may be seen, and forms of proposals, bonds, contract, and specifications may be obtained, at the said office, and they may be seen at the office of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the division in which the work is situated. The Division Engineers' Offices are located at Willits, Dunsmuir, Sacramento, San Francisco, San Luis Obispo, Fresno, and Los Angeles.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The Department of Engineering reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

CHARLES D. BLANEY,  
NEWELL D. DARLINGTON,  
CHARLES F. STERN,  
California Highway Commission.  
ALSTIN E. FLETCHER,  
Highway Engineer.  
CHARLES C. CARLITON,  
Acting Secretary.

Classified According to Location.

## SAN FRANCISCO.

**RESIDENCE**—2 story and base, frame, \$3,000. San Francisco. Architect, none. Owner, C. A. Hall, 1318 14th avenue, S. F. Location, west side 14th avenue south of Balboa. Will contain six rooms, bath and sleeping porch. Interior finish pine with some white enamel. Hardwood floors. Open fire place, furnace heat and automatic water heater. Mantel tile or brick. Imitation tile in bath room. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

**RESIDENCE ALTERATION**—3 story same and brick, \$20,000. San Francisco. Architects, Greene & Greene, Pasadena. Owner, Mortimer Fleishacker, 131 Fremont street, S. F. Location, 2418 Pacific avenue. Work will consist of entire new interior trim, hardwood and white enamel, new heating system and hot water supply, plumbing, painting, plastering and electric work. Some minor exterior alterations will also be made. Plans complete and in the hands of the owner who is now letting contracts.

**ROADS, WALKS AND GUTTERS**—not stated. San Francisco. Engineer, Constructing Quartermaster's Office, Fort Mason. S. F. Owners, United States Government. Bids will be opened on October 26th for the construction of roads, walks and gutters at the terminus of General Hospital in the presidio of San Francisco. Plans can be secured from the Constructing Quartermaster's Office at Fort Mason. Official proposal appears in another column of this issue.

**APARTMENT HOUSE**—3 story and base, frame, \$24,000. San Francisco. Architect, John H. Powers, 160 Montgomery street, S. F. Owner, John Miller, 460 Montgomery street. Location, southeast corner of Polk and Geary streets. Will contain two and a total of fourteen suites of two and three rooms. Interiors finished with some elm panels and hardwood floors. Steam heat, hot water system and oil burning system. All beds and private bath rooms. Bath rooms finished in tile. Patent fire fronts. Exterior covered with cement plaster on metal lath. Plans complete and work to be done by Day Labor.

**APARTMENT HOUSE**—2 story and base, frame, \$15,000. San Francisco. Architect, Charles C. Frye, 20 Montgomery street, S. F. Owner's name withheld. Location, 15th and Dolores streets. Will contain twelve suites of two and three rooms. Interiors finished in pine throughout. Some hardwood floors. Wall beds and private baths. Tile floors and wainscot in bath rooms. Exterior covered with cement plaster on metal lath. Plans prepared and bids to be called for at once.

**COPPER SMELTER**—\$1,000,000. Kellogg, Idaho. Engineers, Bradley, Bluff & Labrathe, Hohart Bldg., S. F. Owners, Bunker Hill and Sullivan Mining Co. Engineers Bradley, Bluff & Labrathe have been commissioned by the management of the Bunker Hill and Sullivan Mining Co. to prepare plans for a smelter plant in Kellogg, Idaho. Mr. Easton, manager of the mining company states that it is possible that the plant may be located in either Seattle or Portland as the freight rates on ore are very high. Further mention will be made of the work.

**FLATS**—3, 2 story and base, frame, \$3,500 each. San Francisco. Architect, C. R. Thayer, 20 Montgomery street, S. F. Owner, W. A. Goerick, San Rafael. Location, south Pacific west of Taylor. Each building will contain two flats of five and six rooms. Interior finish will be of pine and hardwood with some hardwood floors. Open fire places and tile or brick mantels. Imitation tile in bath rooms. Automatic water heaters. Exteriors covered with cement plaster and shiplap. Plans complete and bids to be taken by the owner and architect.

**FLATS**—2 story and base, frame, \$3,000. San Francisco. Architect, none. Owner, John F. Haner, 3580 20th street, S. F. Location, west San Carlos north of 19th street. Will contain two flats of five and six rooms. Interior finish pine with some elm panels and hardwood floors. Open fire places and tile mantels. Automatic water heaters. Bath rooms finished in imitation tile. Exterior covered with cement plaster and shiplap. Plans complete and work to be done by Day Labor.

**CLUB HOUSE**—3 story and base, frame, \$30,000. San Francisco. Architect, H. C. Bauman, Hearst Bldg., S. F. Owners, Dorian Olympia Club. Location, northwest corner 32nd avenue and California street. Will contain club rooms, kitchen, dining room, special accommodations for golf players and living apartments. Interior finish pine and hardwoods with some hardwood floors. Central heating system and open fire places. Mantels tile and brick. Bath rooms finished in tile. Exterior covered with cement plaster. Plans complete and figures being taken.

**HOTEL COMPLETION**—6 story and base. Class A construction, \$50,000. San Francisco. Architect, Earl E. Scott, Humboldt Bank Bldg., S. F. Owners, J. K. Prior Estate. Location, southwest corner Eddy and Mason streets, covering an area of 127½ feet square. Work will consist of altering first floor to contain 13 stores besides the hotel entrance. Upper floors will contain 158 rooms and baths. There will be interior finish of pine, plastering, electric work, steam heat, oil burning furnace, plumbing, painting, glass and glazing and patent store fronts. Exterior will be faced with cement

and red pressed brick. Plans are being prepared.

**RESIDENCE**—3 story and base, frame, \$26,000. San Francisco. Architect, John H. Powers, 160 Montgomery street, S. F. Owner, Romolo A. Sharbott. ## Local Man Low On Mare Island Work.

Frank P. Walsh Will Probably be Awarded Contract For Big Oil Storage Station at Navy Yard.

(By Special Wire.)

WASHINGTON, D. C., Oct. 16th, 1915.—Frank P. Walsh, 244 Kearny street, San Francisco, presented the low bid at \$258,225 for furnishing and installing pipes, pumps, boilers, heaters, buildings and insulations for a complete oil storage station at the Navy Yard at Mare Island, California. No award was made.

Besides the work at Mare Island bids were received for similar oil storage stations at the Navy Yards at Puget Sound, Wash., San Diego, Cal., and at Norfolk, Va. The low bid covering the entire work was submitted by John W. Danforth Co., Buffalo, N. Y., at \$957,300. Segregated figures were also submitted by the same firm for work at each station except Mare Island. For the Puget Sound work the Danforth Co. bid \$312,300 with an alternate of \$286,500; San Diego, \$156,600 and Norfolk, \$194,700. A complete list of the bids will be published later.
